First, among the things we have done for small communities in this bill is to extend the waiver provisions that eliminate onerous paperwork that many of the small communities of 25,000 population or less have had to face in trying to get a single dollar out of this program.

The Members know as well as I do that small towns do not have staffs with 16 Philadelphia lawyers, they do not have the means to invest the time and the dollars to develop multiyear plans and sophisticated proposals in order to get funding for a single community need, for a project that means a great deal for that community.

Under the previous program, until we adopted the waiver provision, all of that paperwork was a burden to small communities. In Oregon, the League of Oregon Cities actually went so far as to tell the smaller communities to not even try to get into these programs, because the paperwork necessary to get what they expect to get out of the program is just not worth it. Now the bill provides the waiver I described.

We did another thing for small communities. I compliment my colleague, the gentleman from New York, for this amendment. That is, we enable small communities who have more than just a 1-year, one-shot program, to come in with a multiyear request, so that a larger program for a small community that needs funding on more than a 1-year basis can get a commitment on a 3-year basis. This means the community does not have to jump into the national competitive pool each year and fight with every other community in order to get the first, second, and third phase of the program funded. This is another major way small communities will get more money.

I also hope the Members would look at title VI. Title VI provides a revitalization of the Farmers Home Administration, a program which is focused on the needs of small towns and rural areas across the country. This amendment was adopted by the committee in order to give balance to the bill.

The National Rural Housing Coalition, in a statement immediately after the committee passed this bill with the FmHA amendment in it, issued a statement which said,

> At long last, we have a landmark instance in which Congress is passing a housing bill wherein both rural needs and small town needs and urban needs are all simultaneously met.

I say to my colleagues that it is a balanced bill, as written, without the proposed amendment.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. AuCOIN) has expired.

(By unanimous consent, Mr. AuCOIN was allowed to proceed for 2 additional minutes.)

Mr. AuCOIN. Finally, Mr. Chairman, I think the House ought to think twice before adopting the Grassley set-aside amendment which arbitrarily says that 25 percent of the grant requests from a particular category of communities are somehow going to be superior to other grant requests from other communities.

There is not a Member in this House who can tell me that some worthy project is not going to be discriminated against because of that arbitrary formula.

We have a Secretary of this agency who has said to the committee, who has said to the individual Members of the House, who has said to anyone who has taken the time to ask her, that she intends to use these funds for both large communities and small communities. I think, on the basis of her commitment and on the basis of what she has done so far, she deserves to be given a chance.

We have a committee which will look into these things. The chairman has said the committee is going to watch this program, and if it is abused in one direction or another, this committee use its oversight responsibility for corrective action.

I remind my colleagues that we have other Federal programs addressing the needs of rural America. Let us take the Economic Development Administration. Seventy-seven to seventy-eight percent of those funds go to rural areas.

We cannot look at this bill in isolation and ignore these facts and others.

What is more, as the chairman of the subcommittee has so well stated, the block grant program merged a set of categorical grant programs that were 94 percent urban, and today in the block grant approach this has been reduced to an 80-percent factor.

I say to my colleagues that, for all these reasons, coupled with the paramount point that the gentleman from New York made—that this is the centerpiece of the administration's proposal—this amendment should be defeated.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. AuCOIN) has expired.

(On request of Mr. WATKINS and by unanimous consent, Mr. AuCOIN was allowed to proceed for 1 additional minute.)

Mr. AuCOIN. Mr. Chairman, to continue, that is why I say, coupled with that one final point, these are the reasons why this is the centerpiece of the administration's community development initiative and strategy for this Nation for the next several years, and I think we owe it to the administration to give it a chance.

Lord knows, we have had enough failures in the past. The path to our objectives has been littered with failures in the past, and I think we deserve to give the administration this chance.

Mr. GRASSLEY. Mr. Chairman, will the gentleman yield?

Mr. AuCOIN. I yield to the gentleman from Iowa.

Mr. GRASSLEY. Mr. Chairman, I thank the gentleman for all the work he did in cutting down on the paperwork for the small communities, and every small community in America thanks him as well. Those provisions apply to the community development block program and not to the UDAG program, and these small communities are going to have to go through that same paperwork in this program, just as the large communities are.

Second, I remind the gentleman that the GAO report that I have mentioned so many times requires an equity of 34 percent.

Mr. AuCOIN. Mr. Chairman, I wish to reclaim my time.

I would say to the gentleman that he is looking at one single dimension of this bill, but I believe if he would add up all the provisions of this bill taken together, he would find that it is a balanced bill and that small town needs are met.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. AuCoin) has again expired.

(On request of Mr. Watkins and by unanimous consent, Mr. AuCoin was allowed to proceed for 1 additional minute.)

Mr. WATKINS. Mr. Chairman, will the gentleman yield?

Mr. AuCOIN. I yield to the gentleman from Oklahoma.

Mr. WATKINS. Mr. Chairman, let me ask the gentleman from Oregon (Mr. AuCoin) one additional question here.

Is the gentleman aware that the League of Cities has endorsed this amendment?

Mr. AuCOIN. Yes; I understand the League of Cities has endorsed this amendment, but I can give the gentleman a list as long as my arm of organizations that agree with the bill in the form in which it was brought forward by the committee.

Moreover, I believe the league is mistaken for the reasons I mentioned.

Mr. ROBERTS. Mr. Chairman, will the gentleman yield?

Mr. AuCOIN. I yield to the gentleman from Texas.

Mr. ROBERTS. Mr. Chairman, I thank the gentleman for yielding.

I am the ranking member of the Subcommittee on Economic Development of the Committee on Public Works and Transportation, and I regret to say that the gentleman's figures do not in any way gibe with ours with reference to the distribution of funds for economic development.

Mr. AuCOIN. Mr. Chairman, I appreciate the comments on the gentleman, for whom I have very high respect and personal admiration.

I can only say that these figures were supplied to me by the Congressional Research Service.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. AuCoin) has again expired.

Mr. KELLY. Mr. Chairman, I ask unanimous consent that the gentleman from Oregon (Mr. AuCoin) be allowed to proceed for 1 additional minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

Mr. FRENZEL. Mr. Chairman, reserving the right to object, I will not object if there is not going to be a limitation of debate, but it has been a little difficult for other members of the committee to participate.

I will withdraw my reservation of objection in the hope that we will be able to proceed and complete this portion of the debate so that others will be able eventually to take part.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. KELLY. Mr. Chairman, will the gentleman yield?

Mr. AuCOIN. I yield to the gentleman from Florida.

Mr. KELLY. Mr. Chairman, I thank the gentleman for yielding.

Mr. AuCOIN. It is always a pleasure to yield to the gentleman from Florida.

Mr. KELLY. I thank the gentleman for his kindness.

Mr. Chairman, the gentleman from Oregon (Mr. AuCoin) has referred to the arbitrary nature of the formula that is suggested in the amendment. I would like the gentleman to comment on the fact that the formula in the bill itself provides that Jacksonville, Fla., will get $12 million and that Cleveland, Ohio, will get $40 million; yet Cleveland, Ohio, has only 10,000 more population than Jacksonville, Fla.

Mr. AuCOIN. Mr. Chairman, we have only 1 minute. I wish the gentleman would make his point or ask me the question.

Mr. KELLY. Mr. Chairman, the point is this: I wonder if the gentleman would comment about the arbitrary nature of the formula that has arrived at unequal result in the provision for these two cities in different regions of the Nation.

Mr. AuCOIN. Mr. Chairman, I have already made my comments on the equities that were set up in an arbitrary fashion.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. AuCOIN. I yield to the gentleman from Ohio.

Mr. ASHLEY. Mr. Chairman, we are not talking about general revenue sharing funds; we are talking about a community development plan.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. AuCOIN) has expired.

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise in support of the amendment with some trepidation, because I hestitate to be on the other side of the issue from the chairman of the subcommittee, the distinguished gentleman from Ohio (Mr. Ashley), whose work in this field is almost legendary. I had the opportunity to observe his most effective work when I was a member of the committee. The gentleman is almost always right.

Yet I would submit in this case that the gentleman might in fact be wrong, and that the amendment should be supported.

Mr. Chairman, I am also a little nervous about applying restrictions on bills, and that may be another good reason to be nervous about supporting the amendment.

Nevertheless, Mr. Chairman, we are only talking about 25 percent of a $400 million pie, a very tiny amount in this bill. We are talking about giving approximately two-thirds of the people of the United States a little, tiny one-quarter of the pie.

Mr. Chairman, one of the speakers referred to it as the centerpiece of the program. If $400 million is the centerpiece of the program, it is not going to be much of a program.

We have also been told that the Secretary will take care of the small towns and that the Department will be amenable to their requests. If that is so, certainly there can be no objection to simply setting aside one-quarter of that $400 million for towns in which two-thirds of the people of this country live.

Mr. Chairman, this is not a rural versus city issue. I do not represent any rural area. They do not grow anything more exciting than geraniums in my district. Nevertheless, most of my district lives in towns of under 50,000 people, and those towns should have a reasonable chance to get into this pool. The 25 percent reservation will give them a small chance to do so.

Mr. Chairman, the amendment is only designed to give the Department and give the Secretary a chance to live up to its, and to her, promise that they will take care of these slightly smaller towns and it will give the towns some assurance that they won't have to compete with the giant cities for every last cent. It will give some attention to the two-thirds of Americans, who pay the same kind of taxes, but who are getting a good deal less out of this pie.

Mr. Chairman, those things are not too much to ask. I hope that the amendment will be supported.

Mr. BROWN of Michigan. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I must admit and confess that I am somewhat ambivalent with respect to this amendment, and am so for three basic reasons. First, I have always been a Member who has generally tried to avoid the parochialness if I may call it such, of earmarking funds for this, that, or the other thing. Therefore, normally, I am opposed to earmarking; and, of course, my good and respected colleague, the gentleman from Ohio (Mr. Ashley), has been of similar mind and has taken a similar judgmental view of these things in the past.

Of course, as has been indicated, he has wandered from this basic course and has supported earmarking a portion of the 701 planning fund.

The second thing, Mr. Chairman, is that I offered an amendment in committee consistent with the old Urban Re-

newal Act and with the EDA program, which would restrict funds going to any one State to 12.5 percent. Many opposed my amendment and it was defeated in committee due in great part to the administration's opposition.

Finally, I am concerned about what I view as the direction the administration intends to follow in the administration of the urban development action grant program. I am bothered by its opposition to the 12.5 percent amendment I offered since such opposition would indicate it intends to make very substantial grants to limited communities and limited areas. I am also bothered by the remarks of officials of the administration in explanation and support of the UDAG program. I get the impression that in administering the program there will be a definite tilt toward making a big splash in a big city, if I may characterize it as such, and that there will be minimal funds available to smaller communities.

Even though there has been some testimony to the effect that funds will be made available to all sizes of cities, all things considered, I believe the tilt and the bias is more than evident. Therefore when it gets right down to it, I will have to come down on the side of being a little inconsistent along with my chairman and will have to support a little earmarking.

Mr. STANTON. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Michigan. I will be glad to yield to the gentleman from Ohio.

Mr. STANTON. Mr. Chairman, I appreciate the gentleman from Michigan yielding to me. I apologize for not having entered into this debate sooner but, regretably, I have been delayed. But, in listening to the gentleman from Michigan I believe the gentleman makes a confusing case.

Mr. BROWN of Michigan. That is the message that the gentleman in the well has been trying to convey.

Mr. STANTON. The gentleman from Michigan has done a very good job and I compliment him.

Mr. BROWN of Michigan. I thank the gentleman.

Mr. STANTON. Mr. Chairman, I just want to say one thing about this amendment, because, once again, I did not enter into the debate earlier, in desiring always to cooperate with my colleague, the gentleman from Ohio, in wanting to do the right thing, and in thinking about it, as I did in the subcommittee, I came to the conclusion that I would be for it and I did vote for it in the subcommittee. I support the amendment on the floor of the House today. I do so, Mr. Chairman, because it certainly seems to me with the way we are moving, and the direction we are going, and in recognition of the great job that this committee has done over the years in moving this from a strictly big city bill to an all American bill, that we have come a long ways in recognition of the problems of urban America.

I do not have any particularly great rural areas in my district; they are all small towns, but, on the other hand, I do believe there is a strong case for the 25 percent of the $400 million. I believe it just boils down to the fact that I honestly and truly believe that in reality that probably the 30 or the 35 percent would go to the small towns, so I just cannot see the objection really to putting it into law.

Mr. BROWN of Michigan. Mr. Chairman, going back to the original statement of the gentleman from Ohio (Mr. STANTON) I want the gentleman to know that I concluded my remarks by saying that I did, in this case, intend to support the amendment.

Mr. STANTON. In most cases you cannot go wrong.

Mr. BAUCUS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I will not take the full 5 minutes because this has been fairly well explored and discussed during the past hour or so. However, I do wish to point out, briefly, as the chairman of the committee, the gentleman from Ohio (Mr. ASHLEY) states: This program is a program to allocate money equally between the smaller communities and the major communities. I agree that that is not only proper, but that is the way it should be. The point I wish to make is that the assumption of equal allocation, contains another assumption, and that is the assumption of omniscience on the part of the Secretary and omniscience in the allocation process. But, in the practical world that is not the case because the smaller communities do not have the grantsmen and they do not have the expertise to vie with the larger communities. Therefore they will not end up getting their fair share of the funds.

Second, with regard to the remarks made by the gentleman from Oregon (Mr. AUCOIN) who is one of the more outstanding members of the committee concerning the so-called balance in the bill. His argument assumes that the action grant program is solely an urban provision. The gentleman is saying that this is balance. But as I understand the action grant program it does not help the smaller communities. It is based only on need. So we are only talking about that one program. What we are saying is that the smaller communities do not have a fair share.

I believe that Secretary Harris will do all she can. She is an honorable woman. I think she will do her very best. But, in the practical and realistic world, our rural communities do not have enough resources available. That is the reason for the set-aside.

Mr. BLANCHARD. Mr. Chairman, if the gentleman will yield, the urban action grant program does indicate that its primary function, as I understand, of the title urban action grant is for viable urban communities.

It talks about severely distressed cities, and this is the centerpiece of the administration's policy to help rescue urban America. It is.

Mr. BAUCUS. If that is the case, then that is all the more reason for the set-aside. It is my understanding that this is supposed to be for cities—both smaller cities and larger cities.

Mr. AUCOIN. Mr. Chairman, will the gentleman yield?

Mr. BAUCUS. I yield to the gentleman from Oregon.

Mr. AUCOIN. I thank the gentleman for yielding.

I hope the gentleman is not forgetting that there are urban problems in communities of 50,000 population.

Mr. BAUCUS. That is true.

Mr. AUCOIN. For that reason the Secretary has said she is intent upon providing the urban development action grant in those instances as well. The fatal flaw in set-asides is, as is so well pointed out by the subcommittee chairman, once we have a set-aside, where do we stop? We inevitably will have some other arbitrary set-aside, some other percentage of a program preempted on a basis other than merit, and finally the program will be completely handcuffed.

Mr. BAUCUS. My personal judgment, in response to the gentleman, is to stop right here. That is sufficient.

Mr. AUCOIN. But, if the gentleman will yield further, there is always someone else in line.

Mr. BAUCUS. Mr. Chairman, I yield back the remainder of my time.

Mr. MOORHEAD of Pennsylvania. Mr. Chairman, I move to strike the last word.

Mr. Chairman, yesterday we heard a lot of criticism about the dual formula system and, of course, the committee worked very hard on that dual formula system. But there may be some cities or small communities with needs that the formula does not meet. This program gives the Secretary the opportunity to rectify any imbalance which the formulas, however carefuly crafted, might leave, and it does particularly, as the committee directs, focus attention on those hold-harmless communities which are going to lose their grant assistance and suffer the results thereof. I think we should give the Secretary maximum flexibility to see that the dual formula plus the action grant program will do a proper job for all of our cities—large cities, middle-sized cities, and smaller communities.

Mr. Chairman, I yield back the remainder of my time.

Mr. ALEXANDER. Mr. Chairman, I rise in support of the Grassley-Watkins amendment. When Congress deliberated on the Housing and Community Development Act of 1974, the Banking Committee, at my urging, wrote into the bill a provision guaranteeing a share of the money under the community development block grant program for nonmetropolitan areas. While the 70–30 split I sought was not adopted, the committee, and subsequently, the House and Senate mandated an 80–20 split in this funding between metropolitan and nonmetropolitan cities.

In the bill before us today, nonmetropolitan cities stand to lose in the proportion of total funds due to creation of a $400 million set-aside for urban develop-

ment action grants, to be administered at the discretion of the Secretary.

The Grassley amendment simply mandates that a guaranteed share—25 percent—of this money as well will go to nonmetropolitan cities. It is consistent with the general principles established under the original act, since it extends the same treatment, as applied under the regular CDBG program, to divide the available funds between large and small communities.

If the $400 million pot for urban development action grants were spread among all communities as part of the basic formula allocation presently in effect, $100 million—25 percent—would go to smaller communities. I think it important to note that such a share will accrue to the benefit of not only small communities in rural areas, but to hold-harmless communities soon to lose all funds, and small communities in metropolitan areas which have received less than anticipated funding over recent years because of a heavy drain caused by urban counties.

It is clear that large communities have unmet needs, but so do small communities. In fact, a recent GAO study indicates that if community development block grants were allocated according to need, small communities in rural areas would receive 34 percent, rather than the meager 20 percent presently in effect.

I urge my colleagues to support this preservation of the smaller communities' share of community development funding to prevent the circumvention of the division of funds mandated under current law.

It is a matter of equity.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. GRASSLEY).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. GRASSLEY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 279, noes 129, not voting 24, as follows:

[Roll No. 221]

NOT VOTING—24

Bevill	Hansen	Rhodes
Burgener	Heftel	Roe
Cederberg	Hillis	Shipley
Clawson, Del	Madigan	Stratton
Conable	Murphy, N.Y.	Teague
Dent	Myers, Gary	Van Deerlin
Florio	Price	Weaver
Forsythe	Quillen	Wilson, Tex.

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Florio against.

Mr. Shipley for, with Mr. Heftel against.

Mr. Bevill for, with Mr. Price against.

Mr. Quillen for, with Mr. Murphy of New York against.

Mr. Burgener for, with Mr. Stratton against.

Mr. Cederberg for, with Mr. Weaver against.

Ms. OAKAR and Mr. ECKHARDT and Mr. PEPPER changed their vote from "aye" to "no."

Messrs. BUCHANAN, KILDEE, FOWLER, PATTEN, RUSSO, YATRON, and ALLEN changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MRS. SPELLMAN

Mrs. SPELLMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. SPELLMAN: On page 8, strike line 2 and insert the following: "by inserting at the end of paragraph 3(B) 'and in a manner to insure full opportunity for participation by, and benefits to, the handicapped; and' ".

On page 8, line 3, strike "(3)(B)".

Mrs. SPELLMAN. Mr. Chairman, today I am offering an amendment to require that no grant made under section 106 of this bill may be considered and approved by the Secretary unless the application affords a full opportunity to obtain housing assistance for the handicapped.

People with severe disabilities, especially those who have had a disability for many years, have substantial difficulty in compensating for their disabilities, because they lack any experience of normal growth and development. For these persons, discrimination is a part of their daily experience. To integrate these people successfully into our community life, we must insure their basic rights to a suitable, and independently chosen place to live. We can no longer isolate handicapped persons from our communities or force them into institutions which further discriminate against their normal development.

I must add that I had raised my concern in the committee deliberations on this legislation. Secretary Embry was also concerned about the shortcomings in our present policy with regard to handi-

capped persons, and his office was helpful in reaching this amendment language.

My concern arose from problems which the handicapped have encountered in my own district which I have learned are evident in many parts of our country. For instance, I am advised that under the previous administration in Mantua, Ohio, the Hattie Larlham Foundation's attempts to obtain section 202 moneys to expand a facility for severely and profoundly retarded children under 6 years of age were refused with the comment by local HUD personnel that the housing funds in the program would only be used for urban renewal. Perhaps even more disturbing was the information that in a survey conducted by the Task Force on Housing of the Consortium Concerned with the Developmentally Disabled, a majority of the 130 communities surveyed were not involved in the planning process for housing and community development needs. Or, as I read in a letter from Stephen Slaikeu, the executive director of the League of Human Dignity in Lincoln, Nebr.:

> We have been more fortunate than many groups in obtaining community development money, but we still feel that the persons in actual control of the programs have no real desire or interest to meet the problems of the physically handicapped in the area of housing. Instead, it is our distinct impression that they put up with us as a nuisance. I think that your amendment will definitely aid us in our pursuit of developing housing for the handicapped. . . .

My amendment is an honest effort, supported by the new administration, in the right direction. I am heartened by Secretary Harris' attitude and by that of Assistant Secretary Robert Embry. I would like to express my gratitude for their interest in the handicapped and for their excellent cooperation and assistance with this amendment. I urge my colleagues to support me in this effort to help the thousands and thousands of people in our country who have been so consistently excluded in the past.

Mr. ASHLEY. Mr. Chairman, will the gentlewoman yield?

Mrs. SPELLMAN. I yield to the gentleman from Ohio (Mr. ASHLEY).

Mr. ASHLEY. I think the gentlewoman for yielding.

Mr. Chairman, I am pleased to accept the amendment. The gentlewoman from Maryland (Mrs. SPELLMAN) has done an excellent job in pursuing this amendment and in working out satisfactorily some troublesome matters that presented themselves.

The amendment does meet with the approval of HUD, and on that basis I am delighted to accept it.

Mrs. SPELLMAN. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Maryland (Mrs. SPELLMAN).

The amendment was agreed to.

Mr. FISH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I was and still am among those who view with some concern the fate of the smaller hold-harmless communities under 50,000 population which were funded under the 1974 act, but which now find themselves phased out. I was among those who wished to extend hold-harmless at its previous level for an additional year to provide further studies prior to cutting these smaller communities adrift to compete for discretionary funding.

If the Members will recall, under the 1974 act, to become hold-harmless these communities had to have demonstrated a concern for community improvement, code enforcement, housing, and various programs related to community revitalization.

Within New York's 25th Congressional District, which I have the honor to represent, there are four small, but old cities and one township, all being funded under hold-harmless and all in need of continued assistance. Of these, one, the city of Poughkeepsie, as it is in a standard metropolitan statistical data area, will be eligible as a formula city. The others, the cities of Beacon, Peekskill, and Kingston—the first capital of New York State—as well as the town of Yorktown, will not. But all are suffering on a smaller scale the problems faced by our larger industrial cities.

Over the years, in addition to upgrading areas of physical decay and eradicating urban blight, a considerable amount of community development funding in these small cities has gone toward helping to finance programs which are human-resource related. These programs, once started, require an ongoing effort if any value from money already spent is to be realized.

Mr. Chairman, I would like to address a series of three questions to the gentleman from New York (Mr. LUNDINE), a member of the committee, who addressed these concerns in the legislation before us during the deliberations before his committee.

My first question is this:

Is my understanding correct that under H.R. 6655 these needs will be recognized and responded to? Is it correct that these smaller hold-harmless cities will be in a preferential position in applications for discretionary funding?

Mr. LUNDINE. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from New York.

Mr. LUNDINE. Yes, the gentleman from New York is correct.

Past performance is one of the criteria to be taken into consideration in the decision with regard to the multiyear funding for small communities under this act, as amended.

Mr. FISH. Mr. Chairman, I thank the gentleman.

Let me also ask this question:

Is my understanding correct that these small hold-harmless communities can apply for the 3-year comprehensive grant programs for discretionary funding while at the same time receiving their two-thirds or one-third hold-harmless funding during fiscal year 1978 and 1979?

Mr. LUNDINE. Yes, I believe that is correct. There is no question that a small community can have a hold-harmless amount and can still apply for a discretionary grant.

Whether or not they can then ask for multiyear funding is not specifically addressed by the legislation. It would be my understanding of the intent of the committee that they could, but that the amount of the hold-harmless would be considered among other factors by HUD in determining the level of their funding.

Mr. FISH. Mr. Chairman, I appreciate the gentleman's reassurance.

Further, since I mentioned the social programs under community development, I would like to clarify a question that has arisen in some HUD area offices about their eligibility.

It is my understanding that the social programs are eligible if they predominantly serve low- and moderate-income persons and also an area in which community development physical activities are taking place and that it is absolutely not necessary that any more complicated relationship between the physical and social activities needs to be established. Is this correct?

Mr. LUNDINE. That is my understanding, yes.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Chairman, I want to commend the gentleman from New York (Mr. FISH) and the gentleman from New York (Mr. LUNDINE) for clarifying the hold-harmless provisions in this new legislation, something that our Upstate New York communities are particularly concerned about.

I, too, want to commend the gentleman from Iowa (Mr. GRASSLEY) for considering the smaller communities in this legislation, something that we have neglected for far too long.

Mr. Chairman, I rise to express my support for H.R. 6655, legislation which would extend and strengthen our Nation's community development program.

My congressional district in New York State has been struck with the urban blight which has plagued the industrial northeast in recent decades. However, the communities in my district have viewed the community development program as a beam of hope and have been enthusiastic and innovative in taking advantage of this beneficial program.

The historic city of Newburgh, N.Y., nestled on the Hudson, has used community development funding to successfully carry out an ambitious redevelopment program, upgrading the housing and the streets, neighborhood by neighborhood.

Port Jervis, N.Y., once a major transportation hub, has successfully used community development funding to fight the blight brought about by the decline of the railroad industry.

Middletown, N.Y., losing businesses and residents to rapidly expanding suburbs, has made great strides in revitalizing the downtown area as a magnet for commerce with the use of community development programs.

Both the county of Rockland, classified as an urban county, and some of the municipalities within that county, particularly the villages of Spring Valley and Nyack, are noted in the area for the imaginative uses to which they used community development funding.

Mr. Chairman, the Congress should not allow a program as far reaching and as successful as community development to die.

When I testified before the subcommittee on this legislation, I expressed my opposition to the exclusion of the "hold harmless" funding. However, the changes in the formula to be used for distribution will more than satisfy the gap that will be caused when "hold harmless" is phased out.

Loss of population will not be held against a community, but will be considered a prime motivation for the allocation of funds. Urban blight will also be taken into consideration.

Yesterday, during the floor debate, it was mentioned that the so-called new formula "targets" older communities for community development funding. This is how it should be. My distinguished colleague from New York (Mr. BINGHAM) articulately pointed out that the bulk of urban problems with which this Nation is faced is not spread evenly nationwide, but is concentrated in our older communities.

I am confident that Congress will act favorably on this worthy legislation and will thus take these vital steps toward eliminating the cancer of urban decay.

Accordingly, I urge all of my colleagues to support this legislation.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to direct some of my remarks to the distinguished gentleman from Ohio (Mr. ASHLEY).

Not too many moments ago, I heard the very able distinguished gentleman from Oregon refer to this proposal as a carefully crafted proposal. I agree totally with that description.

Particularly do I agree with reference to section 112 of this bill, dealing with comprehensive planning grants. That section amends section 701 of the Housing Act of 1954, which is the basic legislation establishing comprehensive planning grants. This proposal will mandate that not less than 20 percent of the funds appropriated for fiscal year 1978 and for succeeding years be used for planning grants to large cities and urban counties.

Mr. Chairman, the gentleman from Ohio (Mr. ASHLEY) and I have been over this matter before. I decided I would not offer an amendment. I can count heads here, and I decided perhaps we could live to fight this battle on another day in another forum.

In any event, on page 13 of the report this language appears:

> The committee adopted this approach because of HUD's continued attempts to eliminate 701 funding for large cities and urban counties on the theory that comprehensive planning, while desirable to encourage, could be funded out of community development block grants. While narrow, functional planning can be funded out of block grants, comprehensive planning cannot.

Mr. Chairman, that really does not state the case as it is. The legislation which established the Housing and Community Development Act of 1974 clearly permits the use of community development funds for comprehensive planning grants.

Mr. Chairman, let me give a little history of comprehensive planning. When this was put into the law back in 1954, comprehensive planning grants were reserved—and listen to this—were reserved for communities of less than 50,000 in population. Oh, there were subsequent amendments to the law which permitted the use of the 701 program for communities above 50,000 in population, and the Department has been making grants on that basis.

Mr. Chairman, since 1954, the Department of Housing and Urban Development has expended some $775 million in comprehensive planning grants. That is not the only area, of course, where grants are made for planning. There is functional and project planning in many other agencies of the Government. There are some 23 spigots, and in the other 23 spigots, the total funding—and listen to this—for the other 23 spigots combining comprehensive, functional and project planning comes to $780 million-plus per year.

Therefore, Mr. Chairman, I do not think that the Federal Government or the Department has been lax in the amount of money that has been made available to all communities. My problem with the 701 planning grants is that those communities that participate in community development, where they get community development block grants, ought to use some of those funds for comprehensive planning. That is all I ask, and that has been the position of the subcommittee which I chair for some years.

So, Mr. Chairman, I pass this on to my distinguished and my loyal friend, the gentleman from Ohio (Mr. ASHLEY). I just wanted to compliment the gentleman on the excellent craftsmanship that is exhibited in this section. I totally agree with the gentleman from Oregon, that it is well crafted.

The CHAIRMAN. Are there further amendments to title I? If not, the Clerk will read title II.

The Clerk read as follows:

TITLE II—HOUSING AUTHORIZATIONS

AMENDMENTS TO THE UNITED STATES HOUSING ACT OF 1937

SEC. 201. (a) The first sentence of section 5(c) of the United States Housing Act of 1937 is amended—

(1) by striking out "and" following "July 1, 1975," the first time it appears; and

(2) by inserting after "on October 1, 1976," the following: "and by $1,232,120,000 on October 1, 1977,".

(b) Section 5(c) of such Act is amended by inserting the following new sentence after the third sentence: "Of the additional authority to enter into contracts for annual contributions provided on October 1, 1977, and approved in appropriation Acts, the Secretary shall make available not less than $197,139,200 for low-income housing projects permanently financed by loans from a State housing finance or State development agency as defined in section 802(b)(2)(A) of the Housing and Community Development Act of 1974.".

(c) Section 8(c)(1) of such Act is amended by adding the following new sentence at the end thereof: "Notwithstanding any other provision of this section, the Secretary may not, after the date of enactment of the Housing and Community Development Act of 1977, enter into any contract under this section for any dwelling unit with respect to which the total of the debt service and any insurance premium charged under title II of the National Housing Act exceeds $100 per month per room contained in such unit; except that, in the case of any such dwelling unit located in Alaska or Hawaii, this sentence shall not apply.".

(d) Section 8(c)(4) of such Act is amended by striking out the following: "(i) if the unoccupied unit is in a project insured under the National Housing Act, except pursuant to section 244 of such Act, or (ii)".

(e)(1) Section 8(d) of such Act is amended by adding the following new paragraph at the end thereof:

"(3) Notwithstanding that the public housing agency is administering the housing assistance payment contract, all the management and maintenance responsibilities of any existing housing unit assisted under such contract may be assumed by such public housing agency, if approved by the Secretary.".

(2) Section 8(e)(2) of such Act is amended by adding the following new sentence at the end thereof: "In approving any public housing agency to assume all the management and maintenance responsibilities of any dwelling unit under the preceding sentence, the Secretary may do so without regard to whether such agency administers the housing assistance payment contract for that unit.".

(f) Section 9(c) of such Act is amended—

(1) by striking out "and" following "on or after July 1, 1976,"; and

(2) by inserting before the period at the end thereof a comma and the following: "and not to exceed $665,000,000 on and after October 1, 1977".

INCREASE IN MAXIMUM MORTGAGE AMOUNTS UNDER FEDERAL HOUSING ADMINISTRATION MORTGAGE INSURANCE PROGRAMS

SEC. 202. (a) Section 203(b)(2) of the National Housing Act is amended by striking out "$45,000", "$48,750", and "$56,000" wherever they appear and inserting in lieu thereof, "$60,000", "$65,000", and "$75,000", respectively.

(b) Section 220(d)(3)(A) of such Act is amended by striking out "$45,000", "$48,750", and "$56,000" wherever they appear and inserting in lieu thereof "$60,000", "$65,000", and "$75,000", respectively.

(c) Section 221(d)(2)(A) of such Act is amended by—

(1) striking out "$25,000", "$29,000", and "$33,000" each place they appear and inserting in lieu thereof "$31,000", "$36,000", and "$42,000", respectively.

(2) striking out "$28,000", "$38,880", "$47,520", "$36,000", "$46,080", and "$54,720", and inserting in lieu thereof "$35,000", "$48,600", "$59,400", "$45,000", "$57,600", and "$68,400", respectively.

(d) Section 222(b)(2) of such Act is amended by striking out "$45,000" and inserting in lieu thereof "$60,000".

(e) Clause (A) of the third sentence of section 234(c) of such Act is amended by striking out "$45,000" and inserting in lieu thereof "$60,000".

(f) Section 235 of such Act is amended—

(1) by striking out, in the last proviso in subsection (b)(2), "$25,000", "$29,000",

"$29,000", and "$33,000" and inserting in lieu thereof "$31,000", "$36,000", "$36,000", and "$42,000", respectively;

(2) by striking out, in subsection (i)(3)(B) "$25,000", "$29,000", "$29,000", and "$33,000" and inserting in lieu thereof "$31,000", "$36,000", "$36,000", and "$42,000", respectively;

(3) by striking out "and" at the end of subparagraph (B) of subsection (i)(3); and

(4) by redesignating subparagraph (C) of subsection (i)(3) as subparagraph (D) and inserting after subparagraph (B) the following new subparagraph:

"(C) involve, in the case of a dwelling unit other than a condominium or cooperative unit, a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Secretary shall approve) in an amount not to exceed $31,000, or up to $36,000 in any geographical area where the Secretary authorizes an increase on the basis of a finding that cost levels so require, except that with respect to any family with five or more persons the foregoing limits shall be $36,000 and $42,000, respectively; and".

(g) Section 203(i) of such Act is amended by striking out "$16,200" and inserting in lieu thereof "75 per centum of the limit on the principal obligation applicable to a one-family residence under subsection (b) of this section".

DECREASE IN DOWNPAYMENT REQUIREMENTS

SEC. 203. (a) Section 203(b)(2) of the National Housing Act is amended—

(1) by striking out, in clause (i) of the first sentence, all the parenthetical language which begins "(but, in any case";

(2) by striking out clauses (ii) and (iii) in the first and second sentences and inserting in lieu thereof in each sentence "and (ii) 95 per centum of such value in excess of $25,000."; and

(3) by inserting immediately after the second sentence the following: "Notwithstanding any other provision of this section, in any case where the dwelling is not approved for mortgage insurance prior to the beginning of construction, such mortgage shall not exceed 90 per centum of the entire appraised value of the property as of the date the mortgage is accepted for insurance, unless the dwelling was completed more than one year prior to the application for mortgage insurance, or the dwelling was approved for guaranty, insurance, or direct loan under chapter 37 of title 38, United States Code, prior to the beginning of construction.".

(b) Section 220(d)(3)(A)(i) is amended by—

(1) striking out the comma at the end of clause (1) and all of clauses (2) and (3) in the matter preceding the first proviso and inserting in lieu thereof "and (2) 95 per centum of such value in excess of $25,000"; and

(2) striking out in the second proviso the comma at the end of clause (1) and all of clauses (2) and (3) and inserting in lieu thereof "and (2) 95 per centum of such value in excess of $25,000".

(c) Section 222(b)(3) of such Act is amended by striking out clauses (ii) and (iii) and inserting in lieu thereof "and (ii) 95 per centum of such value in excess of $25,000;".

(d) The third sentence of section 234(c) of such Act is amended by striking out clauses (A)(ii) and (A)(iii) and inserting in lieu thereof "and (ii) 95 per centum of such value in excess of $25,000,".

AUTHORITY TO INCREASE MORTGAGE INSURANCE PREMIUM FOR SECTION 203(n)

SEC. 204. Section 203(c) of the National Housing Act is amended by inserting the following before the colon preceding the first proviso: *"Provided,* That premium charges fixed for insurance under subsection (n) need not be the same for such charges for other mortgages insured under this section but the charges for insurance under such subsection may not exceed 1 percent per annum:".

ASSISTANCE PAYMENTS UNDER SECTION 236

SEC. 205. (a) Section 236(f)(3) of the National Housing Act is amended to read as follows:

"(3) For each project the mortgage of which is either insured under this section or is assisted under a State or local program providing assistance through loans, loan insurance, or tax abatement, there shall be established an initial operating expense level, which shall be the sum of the cost of utilities, local property taxes, and operating and maintenance expenses payable by the project owner for the twelve months following the date on which the property has first achieved an occupancy rate of 50 per centum, as determined by the Secretary. Within ninety days subsequent to the establishment of an initial operating expense level, but not prior to October 1, 1977, the Secretary is authorized to make, and shall contract to make to the extent approved in appropriation Acts, additional assistance payments to the project owner in an amount up to the amount by which the sum of the cost of utilities, local property taxes, and operating and maintenance expenses exceeds the initial operating expense level, but not to exceed the amount required to maintain the basic rentals of any units at levels not in excess of 30 per centum, or such lower per centum not less than 25 per centum, as shall reflect the reduction permitted in clause (ii) of the last sentence of paragraph (1), of the income of tenants occupying such units. Any contract to make additional assistance payments shall be amended periodically to provide for appropriate adjustments in the amount of the assistance payments. Additional assistance payments shall be made pursuant to this paragraph only if the Secretary finds that the increase in the cost of utilities, local property taxes, or operating and maintenance expenses is reasonable and is in the community.".

(b) The last sentence of section 236(g) is amended by striking out "1974" and inserting in lieu thereof "1977".

EXPERIMENTAL FINANCING

SEC. 206. Section 245 of the National Housing Act is amended—

(1) by striking out "on an experimental basis" in the first sentence;

(2) by striking out the second sentence and inserting in lieu thereof the following: "Notwithstanding any other provision of this title, the principal obligation (including all interest to be deferred and added to principal) of a mortgage insured pursuant to this section may not exceed 97 per centum of the appraised value of the property covered by the mortgage as of the date the mortgage is accepted for insurance, or if the mortgagor is a veteran and the mortgage is to be insured in accordance with the provisions of section 203 of this title, such higher percentage of appraised value as is provided for purposes of determining the maximum mortgage amount eligible for insurance under section 203(b)(2) in the case of veterans."; and

(3) by inserting at the end thereof the following new sentence: "Any mortgage or loan insured pursuant to this section which contains or sets forth any graduated mortgage provisions (including but not limited to provisions for adding deferred interest to principal) which are authorized under this section and applicable regulations, or which have been insured on the basis of their being so authorized, shall not be subject to any State constitution, statute, court decree, common law, or rule or public policy limiting the amount of interest which may be charged, taken, received, or reserved, or the manner of calculating such interest (including but not limited to prohibitions against the charging of interest on interest), if such statute, court decree, common law, or rule would not apply to the mortgage or loan in the absence of such graduated payment mortgage provisions.".

INCREASE IN MAXIMUM MORTGAGE AMOUNT AND TERM OF MATURITY UNDER TITLE I OF THE NATIONAL HOUSING ACT

SEC. 207. The first sentence of section 2(b) of the National Housing Act is amended—

(1) by striking out "$10,000" the first time it appears in clause (1) and inserting in lieu thereof "$15,000"; and

(2) by striking out "twelve years" in clause (2) and inserting in lieu thereof "fifteen years".

URBAN HOMESTEADING DEMONSTRATION

SEC. 208. Section 810(g) of the Housing and Community Development Act of 1974 is amended by striking out "and not to exceed $5,000,000 for the fiscal year 1978" and inserting in lieu thereof "and not to exceed $15,000,000 for the fiscal year 1978".

FLOOD INSURANCE STUDIES

SEC. 209. Section 1376(c) of the National Flood Insurance Act of 1968 is amended by inserting the following before the period at the end thereof: "and not to exceed $108,000,000 for the fiscal year 1978".

RESEARCH AUTHORIZATION

SEC. 210. The second sentence of section 501 of the Housing and Urban Development Act of 1970 is amended by inserting the following before the period at the end thereof: "and not to exceed $65,000,000 for the fiscal year 1978".

INCREASE IN LIMITS ON AMOUNT OF A CONVENTIONAL MORTGAGE WHICH MAY BE PURCHASED BY FNMA OR FHLMC

SEC. 211. (a) The last sentence of section 302(b)(2) of the National Housing Act is amended by inserting "by more than 25 per centum" after "exceed".

(b) The last sentence of section 305(a)(2) of the Federal Home Loan Mortgage Corporation Act is amended by inserting "by more than 25 per centum" after "exceed".

LEASED HOUSING

SEC. 212. Section 208 of the Housing and Community Development Act of 1974 is amended by inserting ", including the right to renewal of such lease to the maximum term permitted by law," after "United States Housing Act of 1937".

SECTION 202 HOUSING FOR THE ELDERLY

SEC. 213. (a) Section 202(d)(3) of the Housing Act of 1959 is amended by inserting the following before the period at the end thereof: ", which cost shall be determined without regard to mortgage limits imposed with respect to housing projects insured under section 231 of the National Housing Act".

(b) Section 202 of such Act is amended by adding at the end thereof the following new subsection:

"(g) In carrying out the provisions of this section and section 8 of the United States Housing Act of 1937, the Secretary shall issue and implement regulations, as soon as practicable after the date of enactment of Housing and Community Development Act of 1977, which shall provide that the processing of any application for a loan for a project under this section and the processing of any application for assistance under such section 8 with respect to housing units in the same such project shall be coordinated in an economical and efficient manner.".

SECTION 203 INSURANCE IN CERTAIN COMMUNITIES

SEC. 214. Section 203 of the National Housing Act is amended by adding at the end

thereof a new subsection (o) reading as follows:

"(o) (1) Notwithstanding any other provision of this section or any other section of this title, the Secretary is authorized to insure, and to commit to insure, under subsection (b) of this section as modified by this subsection a mortgage which meets both the requirements of this subsection, and such criteria as the Secretary by regulation may prescribe to further the purpose of this subsection, in any community where the Secretary determines that—

"(A) temporary adverse economic conditions exist throughout the community as a direct and primary result of outstanding claims to ownership of land in the community by an American Indian tribe, land, or Nation;

"(B) such ownership claims are reasonably likely to be settled, by court action or otherwise, by the end of calendar year 1977;

"(C) as a direct result of the community's temporarily impaired economic condition, owner occupants of homes in the community have been involuntarily unemployed or underemployed and have thus incurred substantial reductions in income which significantly impair their ability to continue timely payment of their mortgages; and

"(D) as a result, widespread mortgage foreclosures and distress sales of homes are likely in the community.

"(2) A mortgage shall be eligible for insurance under subsection (b) of this section as modified by this subsection without regard to limitations in this title relating to a mortgagor's reasonable ability to pay, economic soundness, marketability of title, or any other statutory restriction which the Secretary determines is contrary to the purpose of this subsection but only if the mortgagor is an owner occupant of a home in a community specified in paragraph (1) who, as a direct result of the community's temporarily impaired economic condition, has been involuntarily unemployed or underemployed and has thus incurred a substantial reduction in income which significantly impairs the owner's ability to continue timely payment of the mortgage. The Secretary is authorized to encourage or provide directly to or on behalf of mortgagors whose mortgages are insured under subsection (b) as modified by this subsection forebearance, assignment of mortgages to the Secretary, or such other relief as the Secretary deems appropriate and consistent with the purpose of this subsection. The Secretary, in connection with any mortgage insured under subsection (b) as modified by this subsection, shall have all statutory powers, authority, and responsibilities which the Secretary has with respect to other mortgages insured under subsection (b), except that the Secretary may modify such powers, authority, or responsibilities where the Secretary deems such action to be necessary because of the special nature of the mortgage involved. Nowithstanding section 202 of this title, the insurance of a mortgage under subsection (b) of this section as modified by this subsection shall be the obligation of the Special Risk Insurance Fund created pursuant to section 238 of this title.".

Mr. ASHLEY (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

AMENDMENT OFFERED BY MR. STANTON

Mr. STANTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STANTON: Page 37, line 16, section 202(f) is amended—

(a) by striking out "and" at the end of paragraph (3);

(b) by striking the "." at the end of paragraph 4 and inserting in lieu thereof: "; and"; and

(c) by adding the following new paragraph at the end thereof:

"(5) by adding the following new subsection:

"'(n) No mortgage shall be insured on a unit in a subdivision, after the date of enactment of this subsection, which, when added to any other mortgages insured in that subdivision after such date, represents more than 40 per centum of the total number of units in the subdivision.'"

Mr. STANTON. Mr. Chairman, what this amendment attempts to do is to really put into law what the general practice of HUD is at the present time.

Many of us who have lived with 235 from the time of its inception recall many of the mistakes that we originally made. The first and probably biggest mistake we made was in the initial distribution, and we all recall that the way we did it we allowed the local housing administration to take a contract with the builders not in the places where these units were needed but basically in those areas way out in the suburbs, areas where there was water, and there was sewer and where they could start building immediately.

After we started to analyze and consider the program we came to the conclusion that the best units of all were those units that were built where there was an intertwining of privately built and subsidized homes and found out that in those areas in which 100 percent of 235 were built it tended to ghetto-ize those areas and that we had less and less control over those builders than in the areas where there was a mix between private homes and subsidized homes than in all subsidized areas. That where people put down hard cash to buy that same type home that was being subsidized next door, it had an effect upon the builder, to the extent that he was more careful in his building.

So when this program was reactivated by mandate of the Congress, the Secretary at that time was Carla Hills, and she listened to all of us on the committee and said that this was the best thing to do. So we asked to have this put in to the extent that not more than 40 percent in any one subdivision could be applied to this particular program.

I think that it has worked extremely well. It has overcome a lot of the handicaps that were in the original program. Where there is this mix between the private and the subsidized homes, it has helped the builders because the people pay a larger downpayment on their home and because of that they probably had some leverage on that builder, more so than on the subsidized homes.

I would hope the committee would accept the amendment.

Mr. ASHLEY. Mr. Chairman, this matter has been reviewed. The limitation that the gentleman's amendment would fasten into the law is in fact in being by regulation of the amendment that conforms to the philosophy of the Department, and I am pleased to accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. STANTON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. COHEN

Mr. COHEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COHEN: Page 46, line 13, immediately after the word "otherwise" delete: ", by the end of calendar year 1977".

Mr. COHEN. Mr. Chairman, section 214 of this bill will have the effect of permitting the HUD Secretary to provide mortgage payment relief to certain persons adversely affected by Indian claims to land. Such claims currently exist in Maine and Massachusetts.

The committee's intent with respect to section 214 is clear. It is stated on page 22 of the committee report:

To permit the insurance of mortgages in communities, where temporarily adverse economic conditions exist due to claims to land by American Indian tribes, bands, or nations, and where these claims are expected to be settled during calendar year 1977.

While I applaud the committee for recognizing the need, and Federal responsibility to take interim action with respect to mortgage problems caused by Indian claims, I must point out to you that the assistance envisioned in section 214 will not be forthcoming as long as the HUD Secretary must first determine that ownership claims are reasonably likely to be settled, by court action or otherwise, by the end of calendar year 1977. That is what section 214 says: That the Secretary must first determine that settlement is likely by the end of this year.

Those of us who are familiar with the complex nature of the Indian claims in our districts know full well right now that settlement of these claims will not occur within the next 8 months. The President—who has appointed a special representative to determine reasonable approaches to the intricate problems involved—is also aware that an acceptable solution will take more than 8 months to formulate.

Therefore, Mr. Chairman, in light of the fact that section 214 will be meaningless unless the reference in this bill to "the end of calendar year 1977" is deleted, I am offering an amendment to eliminate this phrase. I would urge all who support the committee's intent with respect to section 214 to support my amendment. Without it, the insurance program contained in section 214 will never go into effect and those people who suffer from the economic consequences of the Indian claims will never benefit from the relief intended for them by the committee.

Mr. ASHLEY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, admittedly this section is special-purpose legislation. It is carefully structured—mainly by means of the provision which the gentleman wishes to strike—to make available emergency relief in one specific situation and one only. To accept the gentleman's amendment would be to apply this temporary one-shot mortgage insurance program nationally on a permanent basis without really knowing what we are letting ourselves in for as to the extent of the contingent liabilities the Government would incur. What I am saying is that by expanding the mortgage-insurance approach to other communities without more careful consideration and hearings, the Congress would be exposing the Federal Government to unknown and potentially huge liabilities. I can assure the gentleman from Maine that the Office of Management and Budget is aware of this fact and shares this view. For these reasons, Mr. Chairman, I most strongly wish to oppose the gentleman's amendment.

Mr. STANTON. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to my colleague, the gentleman from Ohio.

Mr. STANTON. I appreciate the gentleman's yielding.

I join the gentleman—I will say to my friend, the gentleman from Maine, reluctantly—to oppose this amendment. But to members of the committee this was, as the gentleman from Ohio said, special legislation. It did come up in conference. It covers one specific incident, and what the gentleman from Maine would do would be to strike the year 1977 and open it up nationally.

As the gentleman from Ohio so well explained, if we are ever going to get into this deal, without strong opposition at the present time from the Department and the committee, let us take our time and look at it another time down the road, but certainly not in this bill.

Mr. COHEN. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Maine.

Mr. COHEN. Mr. Chairman, the gentleman mentioned that this is designed specifically for one special situation. I would like to know why is not that one special situation clearly defined in this legislation and what is that special situation?

Mr. ASHLEY. The report spells this out. We were looking at the difficult situation of the town of Mashpee on Cape Cod in Massachusetts. There was an effort on the part of the other body to come to grips with that problem in a way that did not reflect a sound legislative view of the approach in the view of the House conferees and in the view of the Department of Housing and Urban Development. After consultation with the department it was felt that the approach contained in the legislation before us might be appropriate for this situation with the time limitations contained in the amendment.

But I have got to say to the gentleman that HUD expressed considerable apprehension about embarking upon a broad course, making the new legislation permanent and broader in scope without fully scrutinizing the implications that might have in terms of potential liability to the Government.

Mr. COHEN. In other words, we have a suit pending against the town of Mashpee and a suit pending against the State of Maine involving some 12.5 million acres which will cause severe economic hardship and yet we have defined by this legislation relief for the town of Mashpee but not for the State of Maine.

Mr. ASHLEY. It was felt that this approach could be taken with the time limitation fastened on it and addressed to the problem of that community. The same cannot be said with respect to the situation the gentleman is concerned about in his State.

Mr. BAUMAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to ask the chairman of the committee what cost will result if this section is enacted even with the calendar year 1977 limit. If we are dealing with only one town, is there not some dollar quantity the gentleman can tell us?

Mr. ASHLEY. If the gentleman will yield, we are advised, I will tell the gentleman, it could be as much as $3 million of insurance which could be involved.

Mr. BAUMAN. It could be $3 million.

Mr. ASHLEY. Yes.

Mr. BAUMAN. I would say the amendment of the gentleman from Maine would open us up to unlimited liability, but even the limited liability proposed by this section seems to me to establish a precedent. I wonder whether or not the committee wants to endorse such a principle by accepting this entire section. I do not know what the status of these claims are that the Indian tribes may make, but in reading the press reports Indian claims may be made in many States including the States of Washington, North Carolina, New York, Maine, and Massachusetts. If that is the case I would assume if this precedent is accepted and written into law for one community, it will have to be done for all, and at that point we will have the Secretary of HUD guaranteeing billions of dollars of mortgages.

It seems to me the whole section ought to be stricken rather than limiting it to one instance. It is a very bad precedent to set in any legislation.

Mr. ASHLEY. Mr. Chairman, if the gentleman will yield, I would have hoped for a more thoughtful approach. Frankly we were faced in conference with a difficult situation. To resolve that situation I negotiated, I suppose it could be said, with the Department, suggesting and causing the Department to suggest language that more directly and more effectively might answer the situation which we are obliged to look at in conference. We are having a difficult time in getting off dead center because of a particular provision the other side insisted upon.

Mr. BAUMAN. So what the gentleman is saying in essence is that although he does not particularly agree with this approach it was an arrangement made to get the supplemental bill through.

Mr. ASHLEY. Let me say this is a better approach than the one being made by the other side at that time. I think the gentleman from Michigan, who was, of course, a conferee, will bear me out that we were faced with a difficult situation which we sought to resolve in the most effective way that was available to us. Would the gentleman from Michigan agree with that?

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, I do concur with the gentleman from Ohio (Mr. ASHLEY). The provision that was in the Senate bill in the supplemental HUD Authorization Act was just intolerable, shall we say. We had some difficulty getting it stricken from that conference report. We accomplished that striking of the provision in the conference report by agreeing to look it it in this legislation. HUD then looked at the proposal, came up with this very strictly and tightly constrained language so as to apply purely to the situation that was raised in the previous bill.

Mr. BAUMAN. Mr. Chairman, the gentleman would have to admit that the principle is much broader than that and if we do it for one, we have to do it for all. Then we are in the position of facing possible billions of dollars in losses from mortgages that the Federal Government is guaranteeing.

Mr. BROWN of Michigan. Mr. Chairman, if the gentleman will yield further, I agree with the gentleman. I have great problems with it; but to take care of this situation in accordance with the agreement we reached with the conferees before, we have kept our faith and the provision is before us.

We, of course, support the provision and feel it should be adopted; but, obviously, we cannot support the amendment of the gentleman from Maine.

AMENDMENT OFFERED BY MR. BAUMAN AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. COHEN

Mr. BAUMAN. Mr. Chairman, in view of that, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. BAUMAN as a substitute for the amendment offered by Mr. COHEN: Page 45, line 20, strike out line 20 and all thereafter through page 48, line 3.

Mr. BAUMAN. Mr. Chairman, this is only an attempt to extricate the chairman of the committee and the committee members from a bad deal. Quite obviously, they have described their dissatisfaction with the principle involved here. While the section is tightly drawn because it has a 1977 date involved, it establishes the principle that HUD will have to guarantee many mortgages to an unknown limit, perhaps billions of dollars all across this country, simply because of claims being filed by Indian tribes.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Ohio.

Mr. ASHLEY. Mr. Chairman, it is not mandatory, of course. It simply authorizes the Secretary. There is no triggering mechanism.

Mr. BAUMAN. I concede to the gentleman it is discretionary for the Secretary, but I am quite sure the pressures from

those communities affected will be great for mortgage guarantees.

I think we ought to address the problem of Indian claims in another bill rather than a housing bill. We should put this aside and not encumber a housing bill with such a broad Federal liability.

Mr. COHEN. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Maine.

Mr. COHEN. Mr. Chairman, I would like to address the gentleman from Michigan, who said he was basically in support of this provision of the Secretary to have discretion to pick up the mortgage paper. Is the gentleman in support of the principle, does the gentleman support Maine as well?

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, as I indicated to the gentleman from Maryland when I responded to the gentleman's question, I said that I support the provision as incorporated in the bill, because we had agreed to incorporate such a provision in this legislation as a condition to the Senate, in effect, receding from its position in conference on the prior bill.

Mr. COHEN. Mr. Chairman, if the gentleman will yield further, perhaps the gentleman can respond, since the chairman of the committee has indicated the Secretary has discretion, why not give the same discretion to Maine or any other State?

Mr. BAUMAN. Mr. Chairman, I would respond that if the principle is applied, it ought to be applied to all areas of the country; but it is a highly questionable principle and opens up unlimited liability that no one can predict. It ought to be settled as part of an Indian claims bill and not a housing bill.

Mr. Chairman, I urge support of my amendment.

The CHAIRMAN. The Chair will put the question in the following order. The amendment offered by the gentleman from Maryland (Mr. BAUMAN) is not, technically speaking, a substitute amendment but is a motion to strike the entire section. Consequently, the Chair will put the question first on the perfecting amendment offered by the gentleman from Maine (Mr. COHEN).

The question is on the amendment offered by the gentleman from Maine (Mr. COHEN).

The amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maryland (Mr. BAUMAN).

The question was taken; and on a division (demanded by Mr. BAUMAN) there were—ayes 12; noes 37.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. EVANS OF INDIANA

Mr. EVANS of Indiana. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. EVANS of Indiana: On page 43, line 12, insert "(a)" after "Sec. 207.".

On page 43, line 18, insert the following new subsection:

"(b) Section 2(b)(1) of such Act is amended by striking out '12,500 ($20,000' and inserting in lieu thereof '$15,000 (23,000'."

Mr. EVANS of Indiana (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the amendment be dispensed with and that it be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. EVANS of Indiana. Mr. Chairman, concisely put, my amendment is designed to increase the FHA mortage insurance program for mobile homes—which, in effect, will make this housing option more accessible to many American families.

Let me say that this housing bill does address the increased costs of purchasing single-family dwellings by increasing FHA loan ceiling for structured housing. The need for this is certainly clear, and I would like to commend the chairman of the Housing Subcommittee for his expertise and dedication to provide decent housing to all Americans.

The need for increasing the loan ceiling for mobile homes is also very clear. For example, a single-wide manufactured home in today's marketplace retails for around $16,000. The present FHA loan ceiling of $12,500 makes it financially impossible for many moderate-income families to put down a $3,500 downpayment—thus accessible housing for many Americans now becomes too expensive. My amendment updates the loan ceilings ceiling to $15,000 will make this housing market more attainable.

In a time when we are trying to meet our growing housing needs, it is ironic that the purchase of affordable housing is thwarted by antiquated regulations. My amendment undates the loan ceilings to make them more reflective of today's marketplace. Manufactured homes offer a solid and affordable housing option to millions of Americans, and the adoption of this amendment will provide our citizens with the financial ability to own their own home. I urge your support of this amendment.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Indiana. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, we have had an opportunity to examine the gentleman's amendment. We concur with the purpose of it, and we would be happy to accept it at this time.

However, I understand that the gentleman from Florida (Mr. FREY) has an amendment to the amendment, and so before taking action and indicating our acceptance of the pending amendment, I would suggest that the gentleman from Florida have an opportunity to offer his amendment.

Mr. EVANS of Indiana. Yes, that is my understanding, that Mr. FREY does have an amendment to offer. I believe it is a good amendment.

Mr. AUCOIN. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Indiana. I yield to the gentleman from Oregon.

Mr. AUCOIN. Mr. Chairman, I would like to associate myself with the remarks of the gentleman from Indiana.

Mr. Chairman, in these days when housing is increasingly expensive and beyond the reach of average Americans, the mobile home industry has come forward with a viable alternative.

That alternative is a safe, decent, sanitary home that sells for an amount average Americans can afford. The mobile home has meant the difference for a lot of Americans between living in a substandard dwelling and living in a home they owned and gave them a feeling of dignity.

But like all other housing units, the mobile home has risen in cost. Structural improvements that improved quality, plus normal inflationary pressures, have driven up prices to the point of where increases are necesary in the FHA mortgage insurance ceiling.

In some regions of the country, single-wide mobile homes are selling for $16,000. Under the current $12,500 single-unit ceiling, families—in order to buy such a mobile home—would have to have a large down payment. Not only would this be a hardship on low-income families, but it also would affect moderate-income young families.

The amendment offered by Congressman EVANS of Indiana to raise the ceiling for both single- and double-wide mobile homes is timely and necessary if this important alternative housing opportunity is to remain viable as a means of helping cure our Nation's chronic housing shortage.

Mr. FREY. Mr. Chairman, I thank the gentleman from Indiana for yielding, and I want to commend him for his foresight and determination on this matter of including manufactured homes in title II of this act. I strongly agree with the gentleman from Indiana that the current dollar ceilings on FHA mortgage insurance are much too low, and I shall strongly support his amendment.

I want to point out that the matter of terms on these FHA guaranteed loans needs to be dealt with as well. I plan to offer an amendment to do just that here in a few moments. Before doing so, however, I have a question regarding the current authorizations on loan terms versus actual practice by those who administer these programs.

Perhaps the gentleman from Ohio who chairs the Subcommittee on Housing and Community Development, which has done so much work in this area, could clear up for me this question of implementation of this and previous acts.

For example, this act, just as previous housing acts, seeks to bring about more opportunities for more Americans to obtain a home of their own. In the matter of mobile homes Congress authorized, in 1974, for the Secretary of the Department of Housing and Urban Development to insure single-wide mobile home loans for a term of 15 years. Yet, it is now the practice of HUD to insure these loans for only 12 years.

Would not the gentleman from Ohio agree with me that this practice of HUD fails to live up to the spirit and intent of the Congress, especially as we now know that the majority of Americans

simply cannot afford the average site-built home today?

It is my strong opinion that the Secretary of Housing and Urban Development should take a fresh look at this practice and move these loan terms to the 15 years authorized by the Congress.

In addition, I want to now bring up a simple perfecting amendment to Mr. EVAN'S amendment to deal with this this matter of terms.

Now, this amendment is aimed at increasing the terms for double-wide mobile homes from 15 years without land and 20 years with land to a flat 23-year term.

This area of the manufactured housing industry is one that hold tremendous potential to provide quality, permanent housing, and I believe the terms for double-wide units should be in line with loan guarantee amounts to be created by Mr. EVAN'S amendment.

Mr. Chairman, my home State of Florida is third in the Nation in mobile home households and eighth in the Nation in production. Clearly, this type of housing is being looked to by more and more Americans as the last affordable housing buy. In Florida last year alone retail sales exceeded $231 million—again clearly showing the growing trend toward the manufactured home.

I strongly believe that those who look to this rising new market in housing should not be denied that opportunity by out-dated and unrealistic loan guarantee policies.

Again, I would hope that the Department of Housing and Urban Development would bring its policies on single-wide units into line with the intent of the Congress, and I urge swift passage of this perfecting amendment on terms for double-wides to the amendment by the gentleman from Indiana, and final passage of the combined amendments.

AMENDMENT OFFERED BY MR. FREY TO THE AMENDMENT OFFERED BY MR. EVANS OF INDIANA

Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. FREY to the amendment offered by Mr. EVANS of Indiana: In the last line of the amendment offered by Mr. EVANS, strike out the period and insert in lieu thereof "; and".

After the last line of the amendment offered by Mr. EVANS, add the following:

(4) by inserting the following before the semicolon at the end of the proviso in clause (2): "(twenty-three years and thirty-two days in the case of a mobile home composed of two or more modules)".

(b) Subparagraph (B) of the second paragraph of section 2(b) of such Act and subparagraph (B) of the third paragraph of such section 2(b) are each amended by striking out "twenty years" and inserting in lieu thereof in each case "twenty-three".

In addition, after adding the preceding material, redesignate section 207 of the bill as "SEC. 207. (a)".

Mr. BROWN of Michigan (during the reading). Mr. Chairman, I ask unanimous consent that the amendment to the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. FREY. I yield to the gentleman from Michigan (Mr. BROWN).

Mr. BROWN of Michigan. I thank the gentleman for yielding.

Mr. Chairman, as I indicated to the gentleman from Indiana (Mr. EVANS), I have had an opportunity to look not only at the amendment offered by the gentleman from Indiana (Mr. EVANS), but also at the amendment offered by the gentleman from Florida (Mr. FREY), and the amendments are acceptable to this side.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. FREY. I yield to the gentleman from Ohio (Mr. ASHLEY), the distinguished chairman of the subcommittee.

Mr. ASHLEY. I thank the gentleman for yielding.

Mr. Chairman, I will say to my good friend, the gentleman from Florida (Mr. FREY), that I am delighted to join with the gentleman from Michigan (Mr. BROWN) in accepting this amendment.

Mr. FREY. Mr. Chairman, there is one question which I would like to direct to the chairman of the subcommittee.

It was my understanding, when we passed the original provision for the single-unit mobile homes, that we passed the 15-year provision, in terms of the mortgage, and that HUD itself has restricted this to 12 years, I think in contravention of what the Congress intended.

Is it the feeling of the gentleman from Ohio (Mr. ASHLEY) that the single units will have 15 years financing?

Mr. ASHLEY. The answer would be yes.

Mr. FREY. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. FREY) to the amendment offered by the gentleman from Indiana (Mr. EVANS).

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana (Mr. EVANS), as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. ROUSSELOT

Mr. ROUSSELOT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROUSSELOT: Page 34, line 1—

Section 201(a) is amended by adding "not more than $196,200,000 of which may be used for the assistance of units other than under Section 8 of this Act," after "on October 1, 1977,".

Mr. ROUSSELOT. Mr. Chairman, this does nothing more than set the level of public housing units to 50,000, which is what this administration requested in March, of this year

This amendment would, in effect, limit the number of public housing units which could be assisted under the annual contributions contract authority in this bill, to the number recommended by the administration. As I noted in my supplemental views on this bill, there are members of the Appropriations Committee who feel this figure should be much higher. Unfortunately, I have been informed that on May 4, 1977, the HUD Appropriations Subcommittee took action to require an increase in the number of public housing units from 50,000—recommended by the administration—to 75,000. This is a 50 percent increase over the level of such housing the administration has requested and will add considerably to the retraining and staffing requirements of HUD.

This may well be the only time the administration and I are on the same side of a subsidized housing question. While I feel even the 50,000 new public housing units are too many, in light of the program's history, it is certainly better than 75,000 units. We must be realistic. I know I cannot cut off public housing completely, but when I see, in this very bill, that we are authorizing $665 million in operating subsidies alone for such housing, I believe we can join together and limit this program to a more acceptable level.

I would now hope that my distinguished subcommittee chairman would do the same.

I realize that our Subcommittee on Appropriations got carried away and is suggesting a higher number of units.

But I would like to remind my colleagues that we are not only supporting new units but we are also supporting their subsidization for as long as 40 years. So the commitment is not just for the new units but it is also for subsidizing down the line with substantial amounts of money; up to $33 billion.

So, Mr. Chairman, I hope this is one little area where we can tidy this bill up a little bit.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, I quite concur with the gentleman's remarks on his amendment. I hope the amendment is adopted. It reflects the position taken by the administration, and I think it should be sustained.

Mr. ROUSSELOT. Mr. Chairman, I think that was made very clear by the administration's budget justification submitted in March.

I assume that my colleague, the gentleman from Ohio (Mr. ASHLEY), wishes to support this amendment?

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Ohio.

Mr. ASHLEY. Mr. Chairman, may I ask the gentleman a question?

Mr. ROUSSELOT. Certainly.

Mr. ASHLEY. It is a fact, I take it, that $196,200,000 is the amount of contract authority that was necessary to support 50,000 units of conventional public housing; is that correct?

Mr. ROUSSELOT. That is correct.

Mr. ASHLEY. The gentleman is suggesting to the Committee that it was the testimony of the Secretary that there would be some 50,000 units of conven-

tional public housing included in the 400,000-unit level for the next fiscal year; is that correct?

Mr. ROUSSELOT. That is correct.

Mr. ASHLEY. Mr. Chairman, much though I would like to, I find it very difficult under those circumstances to contest the gentleman's amendment any further.

Mr. ROUSSELOT. Mr. Chairman, I accept the gentleman's support.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. ROUSSELOT).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ASHLEY

Mr. ASHLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ASHLEY: Page 40, strike out line 13 and all that follows through line 22 on page 41 and redesignate the subsequent sections accordingly.

Mr. ASHLEY. Mr. Chairman, my amendment strikes the provision of the bill offered in committee by the gentleman from New York (Mr. HANLEY) that would provide a greatly expanded operating subsidy for projects assisted by section 236 rental payment assistance. Under existing law, operating subsidy payments can now be made by the Secretary where she determines they are necessary. Existing law also provides that such a subsidy be payable only to the extent that increases in utilities and property taxes exceed the initial operating cost of a project as determined once a property is fully occupied. The subsidy is also limited to the amount which cannot be assumed by the tenants paying 30 percent of their adjusted income in rent.

The Hanley operating subsidy amendment would make the implementation of the section 236 operating subsidy mandatory and would also require this subsidy to be calculated and initiated early in a project's life. Further, it would require that increases in management costs, as well as property taxes, insurance expenses, and utility costs, be included in determining the amount of the subsidy and would extend the availability of the subsidy to projects assisted, but not insured, under section 236 of the National Housing Act—State-aided projects such as New York State's Mitchell-Lama program.

The net effect of this provision contained in the bill would make an already expensive and cost-ineffective program even more so. The cost estimate for this operating subsidy provision for a single year, beginning in fiscal year 1978, would be almost $76 million exclusive of administrative costs. This, Mr. Chairman, is just a projection of 1-year cost of this proposal with every expectation that this proposal would require greatly increased funding requirements. It has been estimated by the Department at my request that the administrative costs for running this proposal would be at least $14 million.

This subsidy vehicle would be an administrative and budgetary nightmare.

Mr. Chairman, in so much as this subsidy proposal would extend to 236 projects not insured by FHA and in so much as such projects would be for the most part State-financed, State-conceived, and State-approved housing projects, this provision would permit States to escape the liability for the costs of their own inadequate underwriting, financing, and loan management. Since 1970, the Federal Government has provided mortgage payment assistance to State-assisted rental housing projects. Now we are asked to cover not only the uncontrollable operating expenses, such as maintenance, of these State projects, but to subsidize the costs of real property taxes and utilities as well. Given the States' power to regulate the costs of these latter items, I fail to understand how we can condone this subsidy proposal.

Mr. Chairman, for these numerous reasons, I would urge the House approve my amendment to strike the Hanley operating subsidy proposal for the 236 assisted rental projects.

Mr. HANLEY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, it is with much regret that I take to the well in opposition to the position of my chairman. It is with much regret, too, that I observe the amendment that the gentleman has offered in deference to the will of the majority of the committee. The amendment was debated and accepted in the committee. We have a great bill here, one that most of us applaud.

Mr. Chairman, the adoption of my amendment in the committee made it a somewhat better bill.

Mr. Chairman, let me ask the Members to consider a few things, such as the GAO report, which says that the 236 program is the best program that we have going to meet the housing problem of our poor and almost poor. That is the GAO attitude.

This provision, Mr. Chairman, is already in the law. HUD has the authority resultant from the amendments to the act in 1974. HUD has been brought into court nine times for its failure to execute the sense of the 1974 law. Mr. Chairman, nine times HUD lost its case.

Do we talk about costs? What I am trying to do here is to put some stability into the economics of our housing program. Yes, it is going to cost maybe about $70 million the first year.

Mr. Chairman, does anyone know how much we were in the bag for as of September 1976, with the 236 program? We had at that time better than 50,000 units in default, accounting for almost $900 million, in part because HUD has failed to exercise its authority in this matter.

It is not the fault of those managing the projects. The problem happens to relate to the matter of inflation and energy.

Mr. Chairman, back in the late 1960's and early 1970's, when States responded to the need for housing for the low-income citizens, they had no idea that the operating costs would increase as they have. Therefore, they have had to inch up the rents, forcing the low-income person out of that project and ultimately developing a degree of occupancy insufficient to sustain the project.

Then what happens, Mr. Chairman? It comes back to the taxpayers of the United States as a defaulted HUD property.

Or would we rather make this investment, $70 million a year and perhaps about $50 million a year from that point on to preserve the units of housing already constructed? Is it not a little ridiculous to let projects deteriorate, let them become unfit for occupancy and at the same time go out and construct brand new units of housing?

What is the basic intent of our housing program? My interpretation of it is to provide housing for a certain category of American citizen. What difference does it make whether it was State sponsored or sponsored by the Federal Government? The fact is that it is serving an intended purpose.

I am trying hard, to correct a costly deficiency and those who supported me in committee were doing the same.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. HANLEY was allowed to proceed for 2 additional minutes.)

Mr. HANLEY. Incidentally, Mr. Chairman, the provision is supported by most entities such as the National Association of Home Builders and a number of others. I have a litany of them. I wonder if they would have supported the bill to the degree that they do if we void this provision?

Incidentally, this is another interesting factor, HUD this year asked for an increase in its risk insurance up to $1.8 billion. Obviously the antenna is up and it anticipates that we are going to continue to have this kind of default.

I do not think that this is what the intent of Congress is.

It is going to cost a little more money to keep these projects solvent and still allow the tenants the opportunity to inhabit them, then what we are doing here is paying not the full tax, not the full utility cost, not the full operating cost, we are only paying the difference between the budget set back in the late 1960's and early 1970's to the actual cost of operating the projects today.

I hope very much that the will of that committee, as expressed when it approved this amendment in full committee, will prevail here in the full House today, with due respect to my dear friend, the gentleman from Ohio (Mr. ASHLEY) and the chairman of the committee, I hope that the committee will vote down the Ashley amendment.

Mr. STANTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would say to my good friend the gentleman from Ohio (Mr. ASHLEY) that when it comes down to seeing the light in the committee, very honestly and truthfully I just cannot see the light now with the gentleman on this amendment.

Mr. Chairman and members of the committee, this is an extremely important amendment that would strike from the bill a section which we refer to in the minority report, and I believe it really stresses it and states more elo-

quently than I could ever possibly do. In the report it discusses the amendment, unless the amendment here were to be adopted, which would eliminate the Hanley amendment, it says that it broadens the existing definition of operating expenses to include maintenance and would make eligible projects assisted under a State or local program.

In effect the Federal Government is being told that it must go beyond the 236 interest rate subsidies on State and local projects and also pay for the cost of the utilities, property taxes, and operating and maintenance expenses which exceed the initial operating level. Surely I think the members of the committee will take a look and see that the State and local governments whose projects are subsidized should be required to make contributions toward the financial livelihood of these particular projects. I think if we do not recognize this basic premise, Mr. Chairman, truly there is no real partnership between the State and local and Federal governments, but, like I say, what it would become would be nothing but a Federal sole proprietorship with respect to all of the liability.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. STANTON. I yield to the gentleman from Ohio.

Mr. ASHLEY. Let me say I appreciate the gentleman's yielding. I appreciate his comments. The issue, it seems to me, that we are confronted with here is, Where does the Federal responsibility start and stop, and where does the responsibility of the State start and where does it stop?

What we are facing here is a situation in which the Federal Government has said with respect to FHA-insured projects, with respect to State-sponsored or locally sponsored projects, we will on the basis of Federal responsibility come in with the 236 subsidy support. What the amendment that was adopted in the committee offered by the gentleman from New York, now in the bill, says is that the Federal Government's responsibility goes further than just making the subsidy payment; it includes a subsidy for taxes, for utilities, and for maintenance. Furthermore, it mandates the Federal to make these payments with respect to State and local-sponsored housing projects.

This is an unfair tilting of the responsibility, I have got to say to my friend, the gentleman from New York (Mr. HANLEY)—and I appreciate the opportunity given to me by the gentleman from Ohio to say it—that the Federal Government is assuming its rightful share and perhaps then some with respect to the cost it is picking up in the 236 program, direct and indirect. For the gentleman to suggest that the Federal Government be mandated with respect to State-sponsored housing to assume these additional costs just strikes me as being too much, and I would urge the adoption of the amendment.

Mr. HANLEY. Mr. Chairman, will the gentleman yield?

Mr. STANTON. I would be happy to yield to the gentleman from New York.

Mr. HANLEY. I thank the gentleman for yielding.

The word "responsibility" has been offered rather frequently in this debate. Then is it responsible that we as a Congress of the United States sit idly by and let that default factor increase on a year-to-year basis? Mind you, already better than 4,000 units have had to be sold at a loss of about $49 million approximately. That would go a long ways toward sustaining the cost of my amendment.

When I mentioned a little bit earlier about $900 million in the way of default of 236 programs, then we sit idly by and just let them all continue to go.

Mr. STANTON. I appreciate the gentleman's contribution, but let me say to him I would not care whether it is $900 or a million dollars or a billion dollars, or $500 million or what it is. The gentleman from Ohio eloquently said it when he said what is at stake here is the basic principle. That is the true objection.

What the gentleman's amendment does is mandate that the Federal Government should pay the State and local government's maintenance.

Mr. BADILLO. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

I think it is important that the members of the committe know that we had very extensive debate on this matter in the committee and that this matter was fully discussed and was voted upon and approved by a very substantial margin. It was understood there that this would involve additional funds because of the reality that we have got to insure that the projects which are already in existence do not collapse at the same time that we are trying to build additional projects. It makes no sense for us to provide for additional construction if we are going to stand by and find that project after project throughout the States ends up in financial difficulty, and that is the reason why my colleague from New York introduced the amendment.

Mr. HANLEY. Mr. Chairman, will the gentleman yield?

Mr. BADILLO. I yield to my colleague, the gentleman from New York (Mr. HANLEY).

Mr. HANLEY. Mr. Chairman, again I think with due respect to my chairman and my dear friend, the gentleman from Ohio (Mr. STANTON), I would hope the Congress would not be derelict in its responsibility to the taxpayers of this country in adopting the gentleman's amendment and thus condone the continuing deterioration of projects around this country. Again I think it is utter nonsense if we spend a dollar in the way of new construction while on the other hand we let existing projects, where the capital investment is already made, bite the dust. That does not make sense at all. And I would almost guarantee that in the next request HUD will ask for sufficient funds to do exactly what we are suggesting here today. The only problem is that in the interim we have got about a 2-year spread from the standpoint of time and the dollar loss and housing unit loss in the interim will go well over the billion dollar mark if we do not let the intent of the committee prevail by voting down the Ashley amendment.

Mr. TSONGAS. Will the gentleman yield?

Mr. BADILLO. I yield to the gentleman from Massachusetts.

Mr. TSONGAS. I commend the gentleman from New York on his initiative. We are going to have to face this issue. The question is whether we face it now or later. The difficulties are going to take place not only in New York but also in Massachusetts and other industrial States who will have these problems. I hope the amendment will be defeated, but the question is going to come back.

Mr. BADILLO. But the fact is that we faced that issue when we voted in the committee. I thought we had solved it when the amendment offered by my friend, the gentleman from New York, was approved. That is why I am surprised to find the amendment has come up at this time, because we thought the issue had been settled in the committee.

That is the problem around here. We recognize the problems are going to have to be faced but we are saying: "Face them mañana. Face them some other time." But we are saying: "Let us face them now." Certainly we faced the problem in the committee and thought we had solved it. Let us leave the committee action alone.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. ASHLEY).

The question was taken; and on a division (demanded by Mr. BROWN of Michigan) there were—ayes 14, noes 21.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. RUSSO

Mr. RUSSO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RUSSO: On page 44, immediately after line 20 insert the following new subsection:

"(c) Section 309(h) of the National Housing Act is amended by inserting at the end thereof:

" 'Pursuant to the authority provided in this subsection, the Secretary shall conduct a review of the financial operations of the corporation and undertake a study of the extent to which the activities of the corporation meet the purposes of this title. Such review and study shall be completed and transmitted to the Congress on or before July 1, 1978.' "

Mr. RUSSO. Mr. Chairman, I rise to offer another amendment to the bill under consideration, H.R. 6655. My second measure would instruct the Secretary of the Department of Housing and Urban Development to review the Federal National Mortgage Association—Fannie Mae.

Fannie Mae was created in 1968 as a quasi-governmental corporation designed to free-up the secondary mortgage market. In this respect, Fannie Mae has fulfilled its function. It purchases roughly 70 percent of the FHA paper sold by primary lenders.

However, implicit in its charter was an obligation to keep mortgagees from fore-

closing on mortgages too quickly or allow them to maintain high foreclosure rates. Fannie Mae has failed dramatically in this area.

Rarely has Fannie Mae disciplined any primary lender, even when inspection of Fannie Mae's records would indicate that some disciplinary action was imperative. Fannie Mae should assert its authority and encourage mortgage companies to forbear payment if a homeowner is having problems. Allowing the mortgagee to foreclose immediately costs the Government a fortune, because it has insured 100 percent of the unpaid balance of the mortgage. Many times the Government will pay more than 90 percent of the principal, because the mortgage company has foreclosed upon the first or second missed monthly payment and yet Fannie Mae will not reprimand the mortgagee. The question is "Why?"

My amendment directs the Secretary to conduct a review of the financial operations and a study of the extent to which these activities meet Fannie Mae's obligations under its charter. In this manner Congress will learn the reasons, if any, why Fannie Mae has failed to assist the Government in reducing the number of quick foreclosures and perhaps then we will take some legislative action to correct the faults.

I want to thank the chairman for his cooperation and for the subcommittee's assistance in the technical preparation of my amendments. I am positive that these additions will improve the operation of our Nation's housing programs.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. RUSSO. I yield to the gentleman from Ohio.

Mr. ASHLEY. Mr. Chairman, is the gentleman offering these amendments en bloc?

Mr. RUSSO. I have a second amendment that I will offer immediately after the House considers this one.

Mr. ASHLEY. Mr. Chairman, I have discussed this amendment with the gentleman in the well at some considerable length and with the Secretary. The amendment has been worked out well. I am glad that it meets the purposes of the gentleman in the well and I am pleased to accept it.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. RUSSO. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, as the gentleman knows, the gentleman has discussed this amendment and another one with me. Since the amendment is quite different from the original one the gentleman proposed, that I could not accept, I can accept this one at this time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. RUSSO).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. RUSSO

Mr. RUSSO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RUSSO: On page 48, immediately after line 3, insert the following new section:

"HOMEOWNERSHIP COUNSELING

"SEC. 215. Section 106(a)(2) of the Housing and Urban Development Act of 1968 is amended by inserting the following immediately before the period at the end of the first sentence thereof: 'and may provide such services for other owners of single family dwelling units insured under title II of the National Housing Act.' ".

Mr. RUSSO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. RUSSO. Mr. Chairman, I rise to offer an amendment to the Housing and Community Development Act of 1977. My proposal would authorize the Department of Housing and Urban Development to provide counseling services to prospective purchasers of Federal Housing Administration (FHA) insured homes.

Counseling is perhaps the single most important, but unfortunately the most neglected, tool the Government could employ to help potential buyers and homeowners, while at the same time reducing its financial losses. Effective counseling would assist buyers and owners in three ways—screening of applicants; advising homeowners of their rights and responsibilities; and assisting homeowners in trouble financially. The most basic of these is prepurchase screening and this is the focus of my amendment.

Most of the purchasers who apply for FHA mortgage insurance are buying a home for the first time and know very little about the myriad costs associated with owning a house. Unless an impartial counselor informs these individuals of the "extra" costs, they might come as a surprise to the new homeowner living on a very tight budget. After learning of these additional expenses, many prospective purchasers decide not to undertake the venture because it would be impossible for them to finance the entire cost of owning a house.

In its report, counseling low-income homeowners, the Government Operations Subcommittee on Manpower and Housing set forth two excellent examples of the effectiveness of screening purchasers. Once counseling agency reported that after initial meetings, only 150 out of 450 applicants were certified as eligible for FHA mortgage insurance. The rest either refused certification, or decided as a result of counseling not to buy a home. At the time the subcommittee's hearings were held in 1975, only 2 of the 150 were in default.

In the Dallas region, 605 homeowners were given prepurchase counseling under a HUD program for prospective section 235 homeowners. As you know, this program has a higher rate of default than most of the other programs because it assists very low income families. However, only 20 of these purchasers had gone into foreclosure at the time the hearings were held. Even if a much larger program were only half as successful as these two examples, the Government would have helped many people who might have faced financial disaster because they had purchased a home when they could not afford it.

Counseling would save the Government billions of dollars and stem the deterioration of many of our cities' finer neighborhoods because of abandoned structures. From 1968 to 1975, the Federal Government paid $1.7 billion out of its insurance fund to cover its losses. The overall average loss per home that the FHA had to purchase because of foreclosure was $8,900 per house and this price goes up when many of the structures were razed because of vandalism. But this is merely the monetary loss associated with the abandonment of a home; the real loss appears when an entire neighborhood becomes dotted with wrecked hulks and gutted frames.

At a time when many people are searching for homes within city limits, the number of houses is declining because of abandonment and the subsequent razing of them. As a nation we cannot afford to destroy so many homes when families are unable to find a decent structure in which to live. The entire thrust of the Community and Housing Development Act is to revitalize our country's metropolitan areas and I believe that counseling will promote the purposes of the statute.

The Department of Housing and Urban Development (HUD) admits that counseling is very cost-effective. In a letter from former HUD Secretary Carla Hills to the former chairman of the Manpower and Housing Subcommittee, the Secretary stated that HUD studies found counseling a very effective tool in combatting foreclosures. But HUD's record in encouraging counseling has been very dismal, even to the point where Congress has inserted counseling funds into HUD's appropriation despite protests from the former administration. This attitude must be changed.

But what function should the Government play in the counseling program—should it conduct all the counseling itself, at an enormous cost to the Federal Government, or should it merely advise community-based counseling agencies? In my opinion, and the recommendation of the Subcommittee on Manpower and Housing, the Government should train, supervise, and cooperate with local counseling agencies primarily sposored by the community, but not totally fund these groups. Proper training is essential for effective counselors and HUD should conduct classes to instruct trainees about the Federal housing programs. It should also allow its field offices to assign its counseling person to full-time duty and not burden him with other assignments, thus reducing his liaison activities with the local group.

However, communities must first show initiative before any Federal assistance, either financial or personnel-wise, is offered. Communities and neighborhoods must financially support counseling agencies and not depend on the Federal Government for everything. Many fine groups have formed and are already operating with minimal Federal assistance.

These should serve as the blueprint for many other counseling agencies yet to spring up.

Under present law, HUD is only authorized to provide counseling services for prospective section 235 purchasers. While this program needs this special treatment because the percentage of foreclosures is higher than under the section 203 program, the latter program comprises the bulk of FHA involvement and foreclosures in this program outnumber those in other programs in absolute numbers. Thus, counseling is necessary for all FHA insured programs.

When representatives from the mortgage banking industry visited my office yesterday, they voiced their continued support for prepurchase counseling. According to facts supplied to me by the Mortgage Bankers Association of America, for every dollar spent on counseling, $5 was saved in foreclosure and other costs. This speaks very well for counseling's cost-effectiveness.

Mr. Chairman, I have discussed this amendment with the chairman of the subcommittee, Mr. ASHLEY, and the ranking minority member, Mr. BROWN, I would like to say at this particular point that I have prepared other amendments to this bill, H.R. 6655, which cover other areas which I view as major problems in this country's housing program. I have asked the subcommittee chairman if he would solicit comments from the Administration on these other amendments, because I think it is time that we investigate these problems and realize that Congress should address them as quickly as possible.

The subcommittee chairman has indicated that he will send them to the Administration for comments.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. RUSSO. I yield to the gentleman from Ohio.

Mr. ASHLEY. Mr. Chairman, I can assure the gentleman the Department will be responsive to the gentleman's inquiries and requests for the specific information that the gentleman indicates the gentleman wants.

Let me also say that the gentleman's amendment now pending is a good amendment. What it really says is that the authority of the 1968 Housing Act, which permitted counsel for tenants of the section 235 program, can be expanded to other home ownership programs. That is a very logical and necessary kind of flexibility for the Secretary to have. So I am happy to support the amendment on that basis.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. RUSSO. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Chairman, I just want to get the gentleman's clarification. Is the gentleman saying these are the only two amendments the gentleman is offering today?

Mr. RUSSO. That is correct.

Mr. MITCHELL of Maryland. Mr. Chairman, if the gentleman will yield further, I am glad, because had the gentleman offered the one about increasing the amount of downpayment to 10 percent, there would be no need for counseling, because there would be no people seeking mortgages.

If that is the understanding, I support the amendment.

Mr. MURPHY of Illinois. Mr. Chairman, will the gentleman yield?

Mr. RUSSO. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. Mr. Chairman, I thank the gentleman for yielding. I want to compliment the gentleman on what I consider two very essential amendments, especially the one on counseling. I know the gentleman's area is different than mine. It is a very serious problem and I compliment the gentleman from Illinois and also the chairman for accepting the amendment.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. RUSSO. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, I have not seen the amendment, but I know from my review of the summary prepared by the Democratic study group, it would appear that the amendment would not only authorize, but mandate counseling, which would seem to be outrageously expensive and imprudent. I want to know if my assumption is correct or not.

Mr. RUSSO. I have changed the language from "mandate" to "provide" and give discretion to the Secretary, mainly because the funds are not authorized in the present budget resolution. They would far exceed the moneys in the budget resolution, which would make the amendment subject to a point of order on the floor; so to alleviate that problem we set it at the discretion of the Secretary. The Secretary has approximately $6 million he can utilize for the counseling program.

Mr. GLICKMAN. Mr. Chairman, if the gentleman will yield further, so it is clear, it is not a mandatory program on the Secretary's part, but a discretionary requirement.

Mr. RUSSO. That is correct.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. RUSSO).

The amendment was agreed to.

AMENDMENT OFFERED BY MRS. FENWICK

Mrs. FENWICK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. FENWICK: Page 34, line 21, after "unit," insert "and shall prohibit high-rise elevator projects for families with children unless there is no practical alternative."

Mrs. FENWICK. Mr. Chairman, I will not take the full 5 minutes. I think we all know the tragedy of high-rise, low-income housing for families with children. This amendment will only insert again, following the excellent amendment which Mr. BADILLO entered in the committee, a provision that we emphasize that high-rise, low-income housing for families with children shall be prohibited unless the Secretary finds that there is no other feasible alternative.

Too often, what we are getting are political decisions, made by local HUD officials, and the Secretary is delegating his authority to do this. We know, in case after case, as when they pulled down the Pruitt Igoe project in St. Louis, which cost $36 million, families with children cannot live in high-rise housing.

Mr. Chairman, I urge adoption of this amendment.

Mr. BROWN of Michigan. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have discussed this amendment with the gentlewoman from New Jersey, and have pointed out to her that elsewhere in the present law there is a similar provision, but I was very happy to have her offer the amendment as to emphasize the point she was trying to make. I understand that she then will seek unanimous consent to withdraw the amendment.

Mrs. FENWICK. If necessary, yes, rather than subject the House to a protracted struggle; but I would very much like to see it in the bill. We cannot overemphasize the fact that this is happening. Just the other day I heard on the radio of 16-story, low-income housing for families with children. It is not possible to continue this. We know these buildings do not work, that they hurt the people in them. If there is no other feasible alternative, we have to accept it, but we really must stand up for these people.

Even though it is in another section of the law, it has been disregarded, and I would be grateful if it could be adopted. I will not subject the House to a long struggle, but I would ask that it be accepted by both sides of the aisle.

Mr. BROWN of Michigan. Well, Mr. Chairman, the language of the amendment almost exactly duplicates language in the law that applies to all such projects, and so it would encompass the projects the gentlewoman is speaking about. However, if she wishes to have it duplicated in this particular portion of the act, I would have no objection.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from New Jersey (Mrs. FENWICK).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. STARK

Mr. STARK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STARK: Page 35, after line 18, add the following new subsection and redesignate the subsequent subsection accordingly:

(f) Section 8 of such Act is amended by adding the following new subsection at the end thereof:

"(1) The Secretary shall issue and implement regulations designed to ensure that an adequate number of the newly constructed or susbtantially rehabilitated dwelling units which are assisted under this section shall be designed and constructed so that physically handicapped persons will have ready access to, and use of, such units."

Mr. STARK (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. STARK. Mr. Chairman, my amendment quite simply is inserted to insure greater access to the handicapped to housing in the section 8 program which will be built. It is a prospective amendment, and it requests or directs the Secretary to see that an adequate number of housing units are designed and constructed to accommodate the handicapped and be barrier-free.

It does not mandate any occupancy quotas, but it merely helps to insure that, for a very modest expense, estimated by HUD to be perhaps slightly under 1 percent of the total cost of these buildings, we insure such things as keeping parking close to the unit, keeping sills low, and doors to accommodate wheelchairs are designed to the new units from the beginning, and that we allow those citizens in our country who are handicapped a free choice in these units. The needs of the handicapped are not mutually exclusive from the rest of us.

I think we have seen recently that we have signed into law some rules to insure the handicapped of this country are not discriminated against, and I think this is one more step in mandating that it is the will of this House that we will say to our citizens who are handicapped that they will have a chance to participate in this program.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. STARK. I yield to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Chairman, can my colleague, the gentleman from California (Mr. STARK), tell me why he thinks it is necessary to put this into the law?

Mr. STARK. The HUD regulations have talked about 10 percent. And in many areas, this has been inadequate. It is not mentioned anywhere in the law. And I thought it was necessary to indicate in the law that we intend to make an effort in the new units, at a very low cost, to make sure of the design criteria.

As the gentleman knows, every Federal building must be 100-percent barrier free. It would seem to me that an adequate number, would be anywhere from 12 percent to 20 percent of handicapped in this country. I thought it was worthwhile to enact into law.

Mr. ROUSSELOT. Mr. Chairman, I appreciate my colleague's attempt to do this, and I, too, think it is very worth while.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. STARK. I yield to the gentleman from Michigan (Mr. BROWN).

Mr. BROWN of Michigan. I thank the gentleman for yielding.

Mr. Chairman, as the gentleman has redrafted the language, I support the amendment.

Mr. STARK. Mr. Chairman, I appreciate the gentleman's support.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. STARK. I yield to the gentleman from Ohio (Mr. ASHLEY), the distinguished chairman of the subcommittee.

Mr. ASHLEY. I thank the gentleman for yielding.

Mr. Chairman, the amendment is very sensibly directed to newly constructed and rehabilitated dwelling units, as distinguished from existing units.

Mr. STARK. That is absolutely correct.

Mr. ASHLEY. I think it is a well designed amendment. I commend the gentleman, and I am pleased to accept it.

Mr. STARK. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. STARK).

The amendment was agreed to.

AMENDMENT OFFERED BY MS. HOLTZMAN

Ms. HOLTZMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Ms. HOLTZMAN: Page 48, after line 3, add the following new section:

SEC. 215. Section 1211(b) of the National Housing Act is amended by striking out "and" at the end of paragraph 9, by striking out the period at the end of paragraph 10 and inserting in lieu thereof "; and", and by adding at the end thereof the following new paragraph:

"(11) on or after January 31, 1978, no risk within the plan shall be insured at a rate higher than the advisory rates set by the State licensed rating organization for essential property insurance in the voluntary market: *Provided, however,* That the Secretary of Housing and Urban Development may allow a rate up to 30 per centum higher upon a showing of extraordinary need.".

Ms. HOLTZMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Ms. HOLTZMAN. Mr. Chairman, very briefly, this is a noncontroversial amendment. It is designed to carry out the clear intention of Congress under the National Housing Act with reference to the availability of property insurance at reasonable rates.

I have discussed this amendment with the distinguished gentleman from Ohio (Mr. ASHLEY), the chairman of the subcommittee.

Mr. ASHLEY. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. I yield to the gentleman from Ohio (Mr. ASHLEY).

Mr. ASHLEY. I thank the gentlewoman for yielding.

Mr. Chairman, I have had the opportunity to examine the amendment offered by the gentlelady from New York which would amend title 12 of the National Housing Act, the urban riot reinsurance program, to provide that premiums under the State FAIR plans would be no higher than the State approved advisory rates for property insurance. The Secretary of HUD could allow a waiver under the amendment of no more than 30 percent higher than the suggested advisory rate upon a showing of extraordinary circumstances.

As the gentlelady has explained, the State of New York's FAIR plan premium rates are based on a self-rating basis. This means that the premium rates for property insured under the State FAIR plans are based solely upon the loss experience of properties insured by the FAIR plan rather than the statewide loss experience. The premiums of properties insured under the State FAIR plans of New York are running four times higher than the same insurance rates for other properties not insured under the FAIR plans.

In enacting the riot reinsurance program in 1968 and extending it again earlier this year, the congressional intent was clear and that was to make property insurance available to urban communities at reasonable premiums, and I believe that the gentlelady's amendment accomplishes that.

Ms. HOLTZMAN. Mr. Chairman, I thank the gentleman for his comments.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from New York (Ms. HOLTZMAN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: Page 34, after line 12, insert the following new subsection and redesignate the subsequent subsections accordingly:

(c) Section 8(b) of such Act is amended by adding the following new paragraph at the end thereof:

"(3) After the date of the enactment of the Housing and Community Development Act of 1977, neither the Secretary nor a public housing agency may agree to enter into an annual contributions contract under this section unless, at least thirty days before entering into such agreement, the Secretary or the public housing agency has transmitted the following information to the Member of the United States House of Representatives who represents the district in which the assisted housing is, or is to be, located and to the Members of the United States Senate who represent the State in which such housing is, or is to be, located:

"(A) the location of the units which are to be assisted;

"(B) the person with whom the agreement is to be entered into;

"(C) the number and type of such units;

"(D) the number of occupants for which such units are designed;

"(E) the date on which rehabilitation or construction, if any, of such units will begin; and

"(F) the age or income group or groups for which such units are designed.".

Mr. WALKER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALKER. Mr. Chairman, the pur-

pose of this amendment is primarily to give Members of Congress a little additional information about section 8 projects which are coming into their areas.

What the amendment purports to do is to give Members of Congress some specific information about the section 8 projects that are proposed to be built within their districts and to give the Senators of the State information of the same type.

The information which is to be provided is as follows: The location of the units which are to be assisted; the person with whom the agreement is to be entered into; the number and type of such units; the number of occupants for which such units are designed; the date on which rehabilitation or construction of such units will begin; and the age or income group or groups for which such units are designed. Primarily the intent of this amendment is to provide enough information that local areas will have a chance to know something about the section 8 units that are coming into the community and which may substantially change the character of the community.

The experience in my district has been that when people have this kind of information available to them, they will respond in a positive way to those units which are going to be a positive factor within the community.

When there is a negative reaction to a project within the community, this amendment will assure a little bit of additional time so that the public can make a proper determination.

Essentially what this amendment does is this: It gives the Members of Congress an opportunity to know what is proposed in the section 8 program for their areas and to permit them to react correspondingly.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Ohio.

Mr. ASHLEY. Mr. Chairman, let me ask the gentleman this question:

This notification does not imply either approval or disapproval on the part of the congressional recipient, does it?

Mr. WALKER. Not at all.

Mr. ASHLEY. I think that is very important. We do not want any implication that nothing goes forward unless there is some kind of clearance.

Mr. WALKER. No; this is not a clearance procedure at all. All this provides is a notification procedure; it does not involve any type of clearances at all.

Mr. ASHLEY. Mr. Chairman, I can understand the gentleman's being interested in what is going on in his congressional district. Certainly I am likewise interested in what is going on in mine.

I cannot see but what this would facilitate the lines of comunication and allow them to be kept open. On that basis I am happy to accept the amendment.

Mr. WALKER. Mr. Chairman, I thank the gentleman.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, I have had an opportunity to examine the amendment, and we have no objection to it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. WALKER).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. RICHMOND

Mr. RICHMOND. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RICHMOND: Page 35, after line 24, add the following:

(a) The United States Housing Act of 1937 is amended by adding at the end thereof the following new section:

"ANNUAL CONTRIBUTIONS FOR CRIME PREVENTION IN LOW-INCOME HOUSING PROJECTS

"SEC. 13. (a) In addition to the contributions authorized to be made for purposes specified in section 5 and 9 of this Act, the Secretary may make annual contributions to public housing agencies for the provision of services which are designed to provide for the safety, security, and well-being of the residents of low-income housing projects, including the installation of properly equipped safety systems, the services of security staff and special housing police, the establishment and maintenance (with the help and association of the residents) of special security committees to eliminate crime and insure that the proper priorities are followed in resolving security and crime problems, and such other security arrangements entered into in order to prevent crimes and maximize the physical safety of the tenants as may be appropriate.

"(b) There are authorized to be appropriated, for the purpose of providing annual contributions contracts pursuant to this section, not to exceed $10,000,000 on or after October 1, 1977."

Mr. RICHMOND (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. RICHMOND. Mr. Chairman, the amendment offered by Mr. SOLARZ and me would authorize and fund activities in public housing which will deter crime. This new section of the bill would commit $10 million to crime prevention programs. Such activities would include security personnel and housing police as well as tenants' advisory groups.

The high rate of crime is one of the most serious problems facing our Nation today. It is the major concern of the 3½ million residents of the Nation's public housing facilities and threatens the very existence of this severely needed housing which is already burdened by tenants with low incomes and difficult living conditions.

Reported incidents include all categories of serious crimes. Rape, assault, larceny and burglary threaten the tenant both inside and outside of his apartment. Entrance lobbies, elevators, stairwells, and hallways and roofs are all danger areas. During 1976, out of a total of over 12,500 indexed crimes in public housing projects in New York City. There were over 4,200 robberies in just the lobbies of these facilities. But while the level of crime has increased, the corresponding level of services has been harder to maintain. I know, for example, that in my own city of New York, at least 127 housing police have been laid off due to the city's financial problems. The fact of the matter is that a majority of the housing police force in New York City, including those operating in Federal projects, are supported by the city at a cost of $52,000,000. This is an unrealistic cost for any community to bear.

One of the results of the high crime rate is a population so trapped behind doors that it fails to join together for its own mutual protection. This inability to work together, or lack of sense of community, aggravates the deterioration of our housing projects, and leads to disasters like the Pruitt-Igoe situation. On the other hand, tenants organizations which have been formed to deter intruders, have had additional benefits. Beautification projects sponsored by tenant groups make the public housing community a better place to live.

Our amendment would permit local housing authorities to take advantage of some of the newer security equipment that has been developed over the last few years. Controlled entranceways, and electronic monitors for elevators and hallways, should be utilized. The steady presence of additional guards will also deter intruders.

In addition, the amendment calls for the development of tenants' organizations which would be provided with technical and educational training to create their own safety programs. Such programs could include volunteer nightly patrol groups and adult escort services. Testimony before the Select Committee on Aging in 1976 noted that these educational programs and adult escort services have a great impact on crime on the streets.

I recognize that our Banking Committee has had a difficult time trying to balance the needs of the Nation's urban and rural communities. But I believe this investment is necessary to maximize the use of already constructed public housing facilities and I hope my colleagues will support us.

The CHAIRMAN. The time of the gentleman from New York (Mr. RICHMOND) has expired.

(On request of Mr. BROWN of Michigan and by unanimous consent, Mr. RICHMOND was allowed to proceed for 1 additional minute.)

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. RICHMOND. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, I notice in the authorizing paragraph of the amendment there is authorized to be appropriated not to exceed $10 million on or after October 1, 1977.

Does the gentleman contemplate that this would be a kind of open-end authorization for any time or is it $10 million a year? Does he contemplate it to be $10 million a year or what?

Mr. RICHMOND. I think I would contemplate that there would be an annual authorization of $10 million to provide security devices on already existing public housing facilities which otherwise are deteriorating terribly.

Mr. BROWN of Michigan. Mr. Chairman, I thank the gentleman.

Mr. SOLARZ. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, this amendment is designed to deal with what is really a frightful situation.

There are about 1.1 million public housing units around the country, which means that there are somewhere in the vicinity of 4 million Americans who are living in publicly supported, largely low-income public housing projects. These people, by and large, are lving in complete and utter fear.

In New York City, from which I come, the latest statistics indicate that over 25 percent of the crimes that are committed in what has euphemistically become known as the "Crime Capital of the World" are committed in public housing projects.

A recent study, which was commissioned by HUD itself, indicated that in public housing projects around the country over 55 percent of the residents of those projects have at one time or another, within the very buildings in which they live, been victimized by crime. The study further indicated that many of these poor and unfortunate people have been the victims of multiple crimes committed against them.

Mr. Chairman, the fact of the matter is that these people are living in high rise jungles of terror, in fear of their lives. They are not only afraid to answer the door when the bell rings at night, but they are afraid, by and large to leave their apartments to go out during the day.

Mr. Chairman, I think that to the extent that we help to build the facilities in which thev live, we have some kind of moral obligation to make it possible for these people to live in peace and tranquility.

Mr. Chairman, the distinguished chairman of the subcommittee, the manager of this legislation, as everybody here knows, is a very persuasive man.

In fact, the other day when I came over to the gentleman and showed him the amendment which I have sponsored together with my colleague, the gentleman from New York (Mr. RICHMOND) he almost managed to persuade me to forget the amendment on the grounds that it was without merit. He argued that there is already in this legislation another section providing $665 million in operating subsidies for low-income housing projects around the country which contains money for precisely these purposes. It is, to be sure, quite true that if this bill is adopted, even without the amendment, that there will be somewhere in the vicinity of $20 to $25 million, which will be made available through the operating subsidy mechanism to low-income public housing projects around the country for security purposes.

But the fact of the matter is, Mr. Chairman, that this amendment is not designed to substitute for funds that would otherwise be available, it is designed to supp ement them.

The fact of the matter is, Mr. Chairman, and my colleagues, that even with the money that is already being provided there is so much more that needs to be done. There are billions and billions of dollars in this legislation for all sorts of worthy purposes. Is it asking too much to add another paltry, measly, $10 million to this bill so that the old folks and the poor people, who are living literally in fear of their lives, can receive the advantage of some new security devices and equipment, which will help them feel somewhat more secure from the ravages of crime?

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I am delighted to yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, the gentleman from New York (Mr. SOLARZ) is saying exactly what I wrote in making reports on housing: The people in the high rise public housing live in absolute terror.

As consumer director, I became aware of a pitiful fraud—faulty burglar alarms were being sold for $600 apiece, to families in this housing because they were so desperately afraid.

I have seen people hurt—one man cut from the shoulder to the ear—burglarized and hurt in their own homes.

These people have triple locks on their doors. They do not know what to do. The fact is that crime of this kind strikes mostly at the low-income housing buildings. We have built these buildings, these high rises, we have them, and we must try to protect the people in them.

The CHAIRMAN. The time of the gentleman from New York has expired.

(By unanimous consent, Mr. SOLARZ was allowed to proceed for 1 additional minute.)

Mr. SOLARZ. Mr. Chairman, I thank the gentlewoman from New Jersey for her support.

Mr. Chairman, I just want to make two final points.

The first is that there is probably not a Member of this House who does not have low-income public housing projects somewhere either in or near his district. They are certainly in every State of the Union.

The second is that we must keep in mind the fact that objective studies carried out by HUD itself indicate that over half the people living in these facilities have been victimized by crimes within the buildings themselves.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman.

Mr. BLANCHARD. Mr. Chairman, I would ask the gentleman from New York (Mr. SOLARZ) if the gentleman has any figures on how many people who reside in these projects have committed the crimes on the 55 percent that have been victimized?

Mr. SOLARZ. I do not know that those figures are available, but I am not sure what the operative implications of this information would be for the people who live in these low-income public housing projects who are not committing crimes but who live in constant fear of their very lives.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. ASHLEY. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, I will be very brief. The gentleman from New York (Mr. SOLARZ) the sponsor of the amendment, has indicated part of the basis for my objections. I am sympathetic to the plight that the gentleman describes. The gentleman knows that. But I certainly cannot allow the implication to persist that the committee paid no attention to the need for control of criminal activity or control of violence in public housing projects and public housing units. Of course we have.

The fact of the matter is that the operating subsidies that are provided for in the bill are some $660 million dollars, and about $25 million of this amount goes directly for security, for the very purposes that the gentleman's amendment speaks to.

So it is not as if we do not do anything, that is to say, if we reject the amendment then nothing is going to be done in this area. The fact is that, of course, the committee has addressed this problem, perhaps not quite in the magnanimous way that the gentleman would have us. We are spending $25 million directly for security in public housing units. The gentleman would want $35 million. It is a question of degree. It does not stop there. We have provided some $35 million annually, it seems to me, if my recollection is correct, for modernization of public housing facilities, and that this generates some $300 million of rehabilitation renewal activity in existing public housing units. A substantial portion of this is for devices that increase the security of the tenants living in the public housing. So let it be said and let it be known that the committee has not been unaware of the problem nor unresponsive to the problem, $10 million obviously is not going to in and of itself provide the security that the gentleman says is so badly needed. Security is needed. The bill itself and the history of the public housing program suggest that Congress has been responsive to this problem and is continuing to be, and it is on that basis, Mr. Chairman, that I oppose the amendment.

Mr. STANTON. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I am happy to yield to the gentleman from Ohio.

Mr. STANTON. I thank the gentleman for yielding.

What the gentleman has said, of course, is absolutely right in comparison to the tremendous amount of money that has been set aside specifically for this purpose. But I have been informed by staff—and, of course, the gentleman knows, but I do not know whether the author of the amendment knows—that the community development funds themselves could be used for this purpose. Am I correct on that?

Mr. ASHLEY. The gentleman is absolutely right.

Ms. OAKAR. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I will make it brief. I just want to add my support for the amendment which would provide for additional funds for safety features. I applaud the effort by the chairman of the committee to include at least some funding for safety features; however, we all know that that is not enough. I just want to say very briefly that among the most vulnerable victims of crime are those who live in public housing projects; namely, the elderly and women who are heads of households. It is unthinkable that HUD is primarily interested in building the buildings and not providing all the extended services that should go with the buildings when there are densities of people living together who are so vulnerable to crime.

I think it is not only regrettable, I think it is criminal that we do not have more funding in this bill to protect our elderly and to protect other victims of crime.

Mr. GLICKMAN. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I yield to the gentleman from Kansas.

Mr. GLICKMAN. I thank the gentlewoman for yielding.

I think we have to face it. We probably could not spend $500 million in this area and really do anything good responsibly. I cannot believe that we are spending this additional money when we do not realize that the real problems affecting public housing is not the security or lack thereof, it is the basic sociological conditions surrounding the whole set of housing patterns. It just seems to be absurd to get on this pattern of starting to spend these kinds of funds when we really ought to just look at the problem squarely and realize that no amount of additional security fund is going to improve the situation. Therefore, I oppose the amendment.

Ms. OAKAR. I cannot agree that nothing can be done to protect our poor victims of crime.

Mrs. FENWICK. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank the gentlewoman for yielding.

I would just like to say that it has been proved that crime against inhabitants of low-rise housing is 9 per 1,000, whereas in high rises it is 20 per 1,000, more than double. It makes a difference what kind of housing we have. We subject people in these high rises to conditions that are intolerable.

Ms. OAKAR. In response to that, I also want to say that not only is it unfair to families who live in high rises, but we ought to be thinking about the elderly who live in high rises because it is unsafe for them also.

Mrs. FENWICK. Mr. Chairman, if the gentlewoman will yield, I think of the elderly a great deal.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. RICHMOND).

The question was taken; and on a division (demanded by Mr. RICHMOND) there were—ayes 10, noes 28.

So the amendment was rejected.

Mr. PANETTA. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to engage in a brief colloquy involving page 35, subsection (e). The reason I do this is because I am concerned over developments regarding section 23 and section 8 housing.

In the past administration HUD made the basic policy decision that they would gradually terminate section 23 housing and make a transition to section 8 housing. I am not sure I understand why that decision was made but nevertheless it was made.

As this transition is occurring there are families that are being evicted particularly in my State of California where this is a very real crisis. In California alone there are 40,000 families living in section 23 housing. The transition to section 8 housing is supposed to take place by June of next year and in the process leases are now being terminated and families are now being released and evicted without relief.

Within this bill there is some language which I think can provide some assistance in this crisis. The basic attraction for section 23 housing was the fact that management and maintenance of the facility could be done by the public housing authorities. In California our rents are so high and we have such a low vacancy rate that section 8 housing is not an attractive alternative. The result is that while the transition is supposed to take place from section 23 housing to section 8 housing, it is not happening. Section 8 is not replacing section 23. Nobody is moving to section 8 housing and the tragic result is evictions of families.

On page 35, however, there is language in subsection (e) which provides that a public housing agency can provide and assume management and maintenance responsibilities of existing housing units under section 8.

I understand the gentleman from Oregon is the individual who put this language into the bill and I would ask if the intent here is to allow maintenance and management of those housing units to be assumed by the public housing authorities and the public housing agencies. This certainly would help in stimulating the transition to section 8.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Oregon.

Mr. AuCOIN. I appreciate the gentleman yielding.

Mr. Chairman, the gentleman is quite right. The amendment he refers to gives the Secretary the ability to allow public housing agencies to manage these units. This overcomes one of the major problems with section 8. Section 8, by putting the developer and client in a direct relationship, has caused some problems because many developers quite frankly do not like to be in the direct relationship with the clients. The public housing agencies, on the other hand, are in the business of management of this kind.

So this gives the Secretary another tool under section 8, to allow the public housing agencies, as under section 23, to provide that management function. I think it will strengthen section 8. This is precisely the intent of the amendment I authored in committee.

Mr. PANETTA. I thank the gentleman. I would make one other comment. It states that this provision takes place "if approved by the Secretary"—and I would hope it is the intent of the committee and the intent of the gentleman that the approval would be handled expeditiously.

Mr. AuCOIN. If the gentleman would yield further, in testimony before the committee Secretary Harris said quite forcefully that she felt that section 8 as it stood was not the only tool for providing housing for the American people and she was interested in new features that would provide such housing, so, yes, indeed, I am certain the Secretary will make use of this.

Mr. PANETTA. Mr. Chairman, again I thank the gentleman. I had the opportunity to speak to the Secretary of HUD, Patricia Harris, today and she indicated she was reviewing this entire area in question, in order that California and other areas would not be seriously disadvantaged.

Mr. Chairman, I also would like to draw attention to page 44, section 212, which deals with leased housing. As I understand section 212 on leased housing, this would permit the renewal of leases. I assume that involves section 23 leases, so that we will have a little more time and families will not be evicted so precipitously.

The CHAIRMAN. The time of the gentleman from California has expired.

(By unanimous consent, Mr. PANETTA was allowed to proceed for an additional 2 minutes.)

Mr. AuCOIN. Mr. Chairman, if the gentleman will yield further, the gentleman is absolutely right. I was also responsible for this amendment in committee. It is designed to insure that those contracts under section 23 that are in existence today will be allowed to reach their maturity, so that even though the section 23 categorical program is being phased out, the agency by regulation shall not terminate those contracts before they reach their full maturity.

Mr. Chairman, the gentleman is precisely right and I think the agency knows precisely what the bill's intent is. I will say to him that I understand the problem; in my district some 1,400 section 23 families will lose their homes if HUD were able to terminate existing section 23 contracts—and there are not enough section 8 housing funds available to accommodate them. That is the reason I added this amendment.

Mr. PANETTA. Mr. Chairman, I thank the gentleman. I want to indicate that I intend to pursue efforts in connection with restoring section 23 housing but this language certainly provides some assistance and some hope to the desperate low income and needy families making use of section 23 housing.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, I want to applaud the gentleman for engaging members of the committee in this very important colloquy with respect to the effects it will have on many in California who will be adversely affected by the position laid out so eloquently by my distinguished colleague. I would like to associate myself with the gentleman's remarks.

Mr. PANETTA. Mr. Chairman, I thank the gentleman for his support.

The CHAIRMAN. If there are no further amendments to title II, the Clerk will read title III.

The Clerk read as follows:

TITLE III—PROGRAM EXTENSIONS

EXTENSION OF FHA MORTGAGE INSURANCE PROGRAMS

SEC. 30 . (a) Section 2(a) of the National Housing Act is amended by striking out "June 30, 1977" in the first sentence and inserting in lieu thereof "October 1, 1978".

(b) Section 217 of such Act is amended by striking out "June 30, 1977" and inserting in lieu thereof "September 30, 1978".

(c) Section 221(f) of such Act is amended by striking out "June 30, 1977" in the fifth sentence and inserting in lieu thereof "September 30, 1978".

(d) Section 235(m) of such Act is amended by striking out "September 30, 1977" and inserting in lieu thereof "September 30, 1978".

(e) Section 236(n) of such Act is amended by striking out "September 30, 1977" and inserting in lieu thereof "September 30, 1978".

(f) Section 244(d) of such Act is amended—

(1) by striking out "June 30, 1977" in the first sentence and inserting in lieu thereof "September 30, 1978"; and

(2) by striking out "October 1, 1977" in the second sentence and inserting in lieu thereof "October 1, 1978".

(g) Section 245 of such Act is amended by striking out "September 30, 1977" where it appears and inserting in lieu thereof "September 30, 1978".

(h) Section 809(f) of such Act is amended by striking out "June 30, 1977" in the second sentence and inserting in lieu thereof "September 30, 1978".

(i) Section 810(k) of such Act is amended by striking out "June 30, 1977" in the second sentence and inserting in lieu thereof "September 30, 1978".

(j) Section 1002(a) of such Act is amended by striking out "June 30, 1977" in the second sentence and inserting in lieu thereof "September 30, 1978".

(k) Section 1101(a) of such Act is amended by striking out "June 30, 1977" in the second sentence and inserting in lieu thereof "September 30, 1978".

EXTENSION OF FLEXIBLE INTEREST RATE AUTHORITY

SEC. 302. Section 3(a) of the Act entitled "An Act to amend chapter 37 of title 38 of the United States Code with respect to the veterans' home loan program, to amend the National Housing Act with respect to interest rates on insured mortgages, and for other purposes", approved May 7, 1968, as amended (12 U.S.C. 1709-1), is amended by striking out "June 30, 1977" and inserting in lieu thereof "October 1, 1978".

EXTENSION OF NATIONAL FLOOD INSURANCE PROGRAM

SEC. 303. (a) Section 1319 of the National Flood Insurance Act of 1968 is amended by striking out "June 30, 1977" and inserting in lieu there of "September 30, 1978".

(b) Section 1336(a) of such Act is amended by striking out "September 30, 1977" and inserting in lieu thereof "September 30, 1978".

EXTENSION OF EMERGENCY HOME PURCHASE ASSISTANCE ACT OF 1974

SEC. 304. Section 3(b) of the Emergency Home Purchase Assistance Act of 1974 is amended by striking out "October 1, 1977" and inserting in lieu thereof "October 1, 1978".

NEW COMMUNITIES

SEC. 305. Section 720(a) of the Housing and Urban Development Act of 1970 is amended by striking out "October 1, 1977" and inserting in lieu thereof "October 1, 1978".

TREASURY DRAW AUTHORITY

SEC. 306. Section 14(b) of the Federal Reserve Act is amended by striking out "November 1, 1978" and inserting in lieu thereof "October 1, 1977"; and by striking out "October 31, 1978" and inserting in lieu thereof "September 30, 1977".

Mr. BROWN of Michigan (during the reading). Mr. Chairman, I ask unanimous consent that title III be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

AMENDMENT OFFERED BY MR. ERTEL

Mr. ERTEL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ERTEL: Page 50, after line 2, insert the following new section:

LAND-USE REQUIREMENTS UNDER THE NATIONAL FLOOD INSURANCE ACT OF 1968

SEC. 303. Section 1361 of the National Flood Insurance Act of 1968 is amended by adding the following new subsection at the end thereof:

"(d) In carrying out the provision of this section or any other section of this Act, the Secretary may not require that State, local, or any other measures referred to in subsection (c) apply to any repair, reconstruction, or improvement to a structure unless the cost of such repair, reconstruction, or improvement exceeds 80 percent of the market value of this structure prior to such repair, reconstruction, or improvement or, in the case of a structure which has been damaged, prior to such damage."

Mr. ERTEL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection?

Mr. ERTEL. Mr. Chairman, this amendment is offered as an amendment to the Flood Insurance Administration Act. The amendment's purpose is to provide that if a piece of property, residential property or commercial property, is 50 percent or more destroyed while it is in the floodway, the present regulations would provide it cannot be rebuilt; so, therefore, if a person at the present time had a fire in his residence, vandals or anything else, and it was 51 percent destroyed, then when he went to rebuild that property he could not rebuild or do anything to that property, so he would be stuck with a piece of property 49 percent of the value, with which he could do nothing. He would have to continue to pay taxes on it, and it would amount to a hazard or nuisance within the floodway.

My amendment is to change the requirement of the Flood Insurance Administration regulation to increase that to 80 percent. If it is burned or destroyed over 80 percent, this is effectively the total destruction of the property, except for the underlying real estate; so what I propose to do is increase the provisions from 50 to 80 percent.

It also applies if a person wanted to expand his home. If he is on a flood plain, he could only expand to 50 percent. This would allow up to 80 percent expansion. It does not allow new construction on the flood plain, which is prohibited under the Flood Insurance Act.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Ohio.

Mr. ASHLEY. Does this apply exclusively to flood damage, as distinguished from fire damage?

Mr. ERTEL. No, it does not. The regulation will apply regardless as to whether it is flood damage or anything else. If a fire occurs, one cannot rebuild. If a vandal comes in and destroys one's home 51 percent, one cannot fix it up under present regulations. So long as the person is in that flood plain and flood insurance applies to it, he cannot do anything with that house. So, in effect, we have condemned 49 percent of the person's home if 51 percent has been destroyed. It applies to anything—lightning, any natural calamity.

Mr. ASHLEY. But other than flood damage?

Mr. ERTEL. Yes, basically.

Mr. ASHLEY. Mr. Chairman, I have no problem with this amendment.

Mrs. FENWICK. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

We have continually weakened our flood plan protection. It is something that we have got to begin to pay attention to. I have the regulation here. In the flood hazard areas, one is not allowed to improve a farm building by more than $100,000. I am trying to find the page where it speaks about homes, but the point we are coming to is that we cannot continue to insure buildings in the flood plain, and we cannot allow federally insured mortgages and improvements on homes in the flood plain because, forever, the people of this country are going to be in debt. The debt will rise because people choose to improve in the flood plain.

Mr. ERTEL. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. I would like to address a question to the gentlewoman. If your home is in a flood plain and a fire takes place in your home and it is 51 percent destroyed, you cannot now rebuild that home, and we do not compensate the person for the other 49 percent. Would the gentlewoman say to that person that he must move out of his home, give up that other 49 percent just because he happens to live in a flood plain?

Mrs. FENWICK. I say that anybody who has a house and has a fire and has fire insurance is going to be able to get money, but I do not think that fire insurance money should go back into a home in the flood plain. What we are doing is making it easier all the time to expose people to living not only in danger of fire, but also we ought to get them out of the flood plain.

Mr. ERTEL. If the person has a fire and 51 percent of his home is destroyed, assuming that he has adequate insurance, he would get 51 percent of the value of the home, but the other 49 percent is there. He can do nothing with it. He has to go someplace else and build. The Government is not going to compensate him for the 49 percent that is there. He has to pay taxes on it, and the structure becomes a rat-infested slum. Is that what the gentlewoman would want?

Mrs. FENWICK. Suppose it is 82-percent destroyed, it is going to be a rat-infested slum anyway. The point is that everytime we do this, we make it easier for people to build and improve and continue to live where it is dangerous for them to live, and other people are required to put up the money.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. ERTEL).

The amendment was agreed to.

The CHAIRMAN. Are there additional amendments to title III? If not, the Clerk will read title IV.

Mr. HUGHES. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to my colleague from New Jersey.

Mr. HUGHES. I understand my colleague's concern about the flood plain, but does my colleague understand that most of the communities along our seashore are in the flood plain? All our islands are within the flood plain. Are you suggesting that every time we have a catastrophe, we should not permit the people to rebuild their homes?

Mrs. FENWICK. That is the law. If the municipality has not zoned for flood danger, what is the alternative? We are going to get what we had at Passaic, where we had eight people drown because they never stopped people from building there. When a house is destroyed in the flood plain, it ought not to be rebuilt.

Mr. HUGHES. I think it would be frightening to discover how much of New Jersey lies in the flood plain. The law is clearly wrong and should be changed.

Mrs. FENWICK. We have a wetlands survey and we have a flood plain survey.

The Clerk read as follows:

TITLE IV—LENDING POWERS OF FEDERAL SAVINGS AND LOAN ASSOCIATIONS

CONSTRUCTION LOANS

SEC. 401. The twenty-first undesignated paragraph of section 5(c) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c)) is amended by striking out "3 per centum" and inserting in lieu thereof "5 per centum".

SINGLE FAMILY DWELLING LIMITATIONS

SEC. 402. The first undesignated paragraph of section 5(c) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c)) is amended by striking out "$55,000" and inserting in lieu thereof "$60,000" and by inserting "but of said 20 per centum the amount deemed to be loaned in transactions which except for excess in amount, would be eligible for such association under provisions of this sentence (other than this exception) or under the next following sentence shall be only the outstanding amount of such excess," immediately after "improved real estate without regard to the foregoing limitations,".

LENDING AUTHORITY

SEC. 403. The twenty-second undesignated paragraph of section 5(c) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c)) is amended by inserting "or farm" immediately after "residential".

PROPERTY IMPROVEMENT LOAN

SEC. 404. The second and third undesignated paragraphs of section 5(c) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c)) are amended by striking out "$10,000" and inserting in lieu thereof "$15,000".

MULTIFAMILY DWELLING LIMITATIONS

SEC. 405. The first sentence of section 5(c) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c)), is amended by deleting ", and the Board shall by regulation limit to not more than 20 per centum of the assets of the association the aggregate amount or amounts of the investments which may be made by an association under the foregoing provisions of this sentence on the security of property which comprises or includes more than four dwelling units or does not constitute homes or combinations of homes and business property".

CONFORMING AMENDMENT TO FEDERAL HOME LOAN BANK ACT

SEC. 406. Section 10(b) of the Federal Home Loan Bank Act (12 U.S.C. 1430(b)) is amended by striking out "$55,000 (except that with respect to dwellings in Alaska, Guam, and Hawaii the foregoing limitations may, by regulation of the Board be increased by not to exceed 50 per centum)" and inserting in lieu thereof the following: "the dollar limitation under the first proviso of the first sentence of section 5(c) of the Home Owners' Loan Act of 1933, as amended,"

Mr. BROWN of Michigan (during the reading). Mr. Chairman, I ask unanimous consent that title IV be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The CHAIRMAN. Are there any amendments to title IV?

There being no amendments to title IV, the Clerk will read title V.

The Clerk read as follows:

TITLE V—NATIONAL URBAN POLICY

SEC. 501. (a) Section 701 of the Urban Growth and New Community Development Act of 1970 is amended—

(1) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) This title may be cited as the 'National Urban Policy and New Community Development Act of 1970'.";

(2) by striking out "growth" the first time it appears in subsection (b);

(3) by inserting "energy and" before "our natural resources" in subsection (b);

(4) by inserting "and their residents" before "of adequate tax base," in subsection (b); and

(5) by inserting "good housing in" before "well-balanced neighborhoods" in subsection (b).

(b) Section 702 of such Act is amended—

(1) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) The Congress finds that rapid changes in patterns of urban settlement, including change in population distribution and economic bases of urban areas, have created an imbalance between the Nation's needs and resources and seriously threaten our physical and social environment, and the financial viability of our cities, and that the economic and social development of the Nation, the proper conservation of our energy and other natural resources, and the achievement of satisfactory living standards depend upon the sound, orderly, and more balanced development of all areas of the Nation.";

(2) by inserting "and redevelopment" before "which adversely affect" in subsection (b), by striking out "our" in subsection (b) and inserting in lieu thereof "energy and other", and by striking out "growth" the last time it appears in subsection (b);

(3) by inserting "energy and other" before "natural resources," in subsection (c), by striking out "growth" the first time it appears in the second sentence of subsection (c) and inserting in lieu thereof "development and redevelopment", and by striking out "growth and stabilization" in the second sentence of subsection (c) and inserting in lieu thereof "urban";

(4) by striking out "growth" the first time it appears in subsection (d);

(5) by striking out "help reverse trends of migration and physical growth which reinforce" in paragraph (3) of subsection (d) and inserting in lieu thereof "encourage patterns of development and redevelopment which minimize"; and

(6) by striking out "growth and stabilization," in paragraph (8) of subsection (d) and inserting in lieu thereof "development and redevelopment, encourage", by inserting "energy and other" before "natural resources" in such paragraph (8), and by striking out "the protection" in such paragraph (8) and inserting in lieu thereof "protect".

(c) Section 703 of such Act is amended—

(1) by striking out the section heading and the material preceding paragraph (1) of subsection (a) and inserting in lieu thereof the following:

"NATIONAL URBAN POLICY REPORT

"SEC. 703. (a) The President shall transmit to the Congress during February 1978, and during February of every even-numbered year thereafter, a Report on National Urban Policy which shall contribute to the formulation of such a policy, and in addition shall include—",

(2) by striking out "and statistics, describing characteristics of urban growth and stabilization and identifying significant trends and developments" in paragraph (1) of subsection (a) and inserting in lieu thereof ", statistics, and significant trends relating to the pattern of urban development for the preceding two years";

(3) by striking out "growth" in paragraph (2) of subsection (a), and by inserting "affecting the well-being of urban areas" before the semicolon at the end of such paragraph;

(4) by striking out "growth" in paragraph (3) of subsection (a);

(5) by striking out "growth" in subsection (b) and inserting in lieu thereof "policy"; and

(6) by striking out "Report on Urban Growth" in subsection (c) and inserting in lieu thereof "National Urban Policy Report" and by striking out "growth" in such subsection and inserting in lieu thereof "areas".

(d) The title heading for such Act is amended by striking out "URBAN GROWTH" and inserting in lieu thereof "NATIONAL URBAN POLICY".

(e) The part heading for part A of such Act is amended by striking out "GROWTH"

Mr. BROWN of Michigan (during the reading). Mr. Chairman, I ask unanimous consent that title V be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The CHAIRMAN. Are there any amendments to title V? There being no amendments to title V, the Clerk will read title VI.

The Clerk read as follows:

TITLE VI—RURAL HOUSING

AUTHORIZATIONS FOR RURAL HOUSING PROGRAMS

SEC. 601. (a) Section 513 of the Housing Act of 1949 is amended by striking out "June 30, 1977" where it appears in paragraphs (b), (c), and (d) and inserting in lieu thereof "September 30, 1978"; and by striking out "$80,000,000" where it appears in paragraphs (b) and (c) and inserting in lieu thereof "$105,000,000".

(b) Section 515 of such Act is amended by striking out "June 30, 1977" where it appears in paragraph (b)(5) and inserting in lieu thereof "September 30, 1978".

(c) Section 517 of such Act is amended by striking out "June 30, 1977" where it appears in paragraph (a)(1) and inserting in lieu thereof "September 30, 1978".

(d) Section 523(f) of such Act is amended by striking out "July 1, 1977" where it appears in paragraph (f) and inserting in lieu thereof "October 1, 1978"; and by striking out "June 30, 1977" where it appears in such paragraph (f) and inserting in lieu thereof "September 30, 1978".

CHANGES IN THE GUARANTEED HOUSING LOAN PROGRAM

SEC. 602. (a) Section 502(b)(3) of the Housing Act of 1949 is amended by inserting after "(3)": "except for guaranteed loans,".

(b) Section 517(e) of such Act is amended by inserting after the first sentence the following new sentence: "The guaranteed loan program under this title shall be operated separately from the insured loan program operated under this title and no funds designated for one program may be transferred to another program.".

(c) Section 521(a)(1) of such Act is amended by striking out the period at the end thereof and inserting in lieu thereof the following: ": *Provided further*, That loans under this title when made as guaranteed loans shall bear interest at such rate as may be agreed upon by the borrower and the lender.".

AUTHORIZING PREPAYMENT OF TAXES AND SIMILAR ITEMS BY FARMERS HOME ADMINISTRATION BORROWERS WITHOUT PUTTING FUNDS IN ESCROW

SEC. 603. Section 501(e) of the Housing Act of 1949 is amended by striking out the second sentence and inserting in lieu thereof the following: "Such payments shall be disbursed by the Secretary at the appropriate time or times for the purposes for which such payments are made, and after October 1, 1977, if the prepayments made by the borrower are not sufficient to pay the amount due, advances may be made by the Secretary to pay these costs in full, which advances shall be charged to the account of the borrower and bear interest and be payable in a timely fashion not to exceed two years, as determined by the Secretary.".

COMPENSATION FOR CONSTRUCTION DEFECTS

SEC. 604. Section 509 of the Housing Act of 1949 is amended by adding at the end thereof the following new subsections:

"(c) The Secretary is authorized, after October 1, 1977, with respect to any unit or dwelling newly constructed during the period beginning eighteen months prior to the date of enactment of the Housing and Community Development Act of 1977 and purchased with financial assistance authorized by this title which he finds to have structural or other conditions not in conformance with such standards as he has prescribed under subsection (a), to make expenditures for (1) correcting such defects, (2) paying the claims of the owner of the property arising from such defects, or (3) acquiring title to the property, if such assistance is requested by the owner of the property within eighteen months after financial assistance under this title is rendered to the owner of the property or, in the case of property with respect to which assistance was made available within eighteen months prior to the date of enactment of the Housing and Community Development Act of 1977, within eighteen months after such date of enactment. Expenditures pursuant to this subsection may be paid from the Rural Housing Insurance Fund.

"(d) The Secretary shall be regulations prescribe the terms and conditions under which expenditures and payments may be made under the provisions of this section.".

AUTHORIZING FARM LABOR HOUSING LOANS AND GRANTS IN PUERTO RICO AND THE VIRGIN ISLANDS

SEC. 605. Section 514(f)(3) of the Housing Act of 1949 is amended to read as follows:

"(3) the term 'domestic farm labor' means persons who receive a substantial portion (as determined by the Secretary) of their income as laborers on farms situated in the United States, Puerto Rico, and the Virgin Islands and either (A) are citizens of the United States, or (B) reside in the United States, Puerto Rico, or the Virgin Islands after being legally admitted for permanent residence herein.".

EXTENDING PURPOSES FOR WHICH FUNDS FROM THE RURAL HOUSING INSURANCE FUND MAY BE USED

SEC. 606. Section 517(j) of the Housing Act of 1949 is amended by striking out "and" at the end of paragraph (3); by striking out the period at the end of paragraph (4) and inserting in lieu thereof a semicolon; and by adding the following new paragraphs at the end thereof:

"(5) after October 1, 1977, and as approved in appropriations Acts, to make advances authorized by section 501(e); and

"(6) after October 1, 1977, and as approved in appropriations Acts, to make the expenditures authorized by section 509(c).".

HOUSING FOR THE ELDERLY AND HANDICAPPED

SEC. 607. (a) Title V of the Housing Act of 1949 is amended by striking out "elderly persons" and "elderly persons or elderly families" wherever they appear and inserting in lieu thereof "elderly or handicapped persons or families".

(b) Section 501(b)(3) of such Act is amended to read as follows:

"(3) For the purposes of this title, the term 'elderly or handicapped persons or families' means families which consist of two or more persons, the head of which (or his or her spouse) is at least sixty-two years of age or is handicapped. Such term also means a single person who is at least sixty-two years of age or is handicapped. A person shall be considered handicapped if such person is determined, pursuant to regulations issued by the Secretary, to have an impairment which (A) is expected to be of long-continued and indefinite duration, (B) substantially impedes his ability to live independently, and (C) is of such a nature that such ability could be improved by more suitable housing conditions, or if such person is a developmentally disabled individual as defined in section 102(a)(5) of the Developmental Disabilities Services and Facilities Construction Amendments of 1970. The Secretary shall prescribe such regulations as may be necessary to prevent abuses in determining, under the definitions contained in this paragraph, the eligibility of families and persons for admission to and occupancy of housing constructed with assistance under this title. Notwithstanding the preceding provisions of this paragraph, such term also includes two or more elderly (sixty-two years of age or over) or handicapped persons living together, one or more such persons living with another person who is determined (under regulations prescribed by the Secretary) to be essential to the care or well-being of such persons, and the surviving member or members of any family described in the first sentence of this paragraph who were living, in a unit assisted under this title, with the deceased member of the family at the time of his or her death.".

CONGREGATE HOUSING FOR ELDERLY AND HANDICAPPED FAMILIES

SEC. 608. (a) Section 515(c) of the Housing Act of 1949 is amended by adding at the end thereof the following new sentence: "However, specifically designed equipment required by elderly or handicapped families shall not be considered elaborate or extravagant.".

(b) Section 515(d)(1) of such Act is amended by adding at the end thereof the following: "; and such term also means congregate housing facilities for elderly or handicapped families who require some supervision and central services but are otherwise able to care for themselves; such housing for the handicapped may be utilized in conjunction with educational and training facilities;".

(c) Section 515(d)(3) of such Act is amended to read as follows:

"(3) the term 'congregate housing' means housing in which (A) some of the units may not have kitchen facilities, (B) there is a central dining facility to provide wholesome and economic meals for elderly and handicapped families.".

PROVIDING FOR A DIVISION OF INSURED RURAL HOUSING LOANS

SEC. 609. Section 517 of the Housing Act of 1949 is amended by adding at the end thereof the following new subsection:

"(n) At least 60 per centum of the amount of loans made pursuant to sections 502 and 515 shall benefit persons of low income.".

RURAL HOUSING RESEARCH

SEC. 610. Section 506(d) of the Housing Act of 1949 is amended to read as follows:

"(d) In order to carry out this section, the Secretary shall establish a research capacity within the Farmers Home Administration which shall have authority to undertake, or to contract with any public or private body to undertake, research authorized by this section.".

RURAL RENTAL ASSISTANCE

SEC. 611. Section 521(a)(2)(A) of the Housing Act of 1949 is amended by striking out "may" wherever it appears, except in

clause (i), and inserting in lieu thereof "shall".

Mr. BROWN of Michigan (during the reading). Mr. Chairman, I ask unanimous consent that title VI be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The CHAIRMAN. Are there any amendments to title VI?

AMENDMENT OFFERED BY MR. HUGHES

Mr. HUGHES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUGHES: Page 64, after line 5, insert the following new section amendment to section 510 of the Housing Act of 1949—

SEC. 612. Section 510 of the Housing Act of 1949 (42 U.S.C. 1480) is amended by redesignating subsections (a) through (g) as paragraphs (1) through (7), respectively; by inserting "(a)" immediately before "In carrying out the provisions of this title,"; and by adding at the end thereof the following new subsection:

"(b) All property subject to a lien held by the United States or the title to which is acquired or held by the Secretary under this title other than property used for administrative purposes shall be subject to taxation by State, territory, district, and local political subdivisions in the same manner and to the same extent as other property is taxed: *Provided*, That no tax shall be imposed or collected on or with respect to any instrument if the tax is based on—

"(1) the value of any notes or mortgages or other lien instruments held by or transferred to the Secretary,

"(2) any notes or lien instruments administered under this title which are made, assigned, or held by a person otherwise liable for such tax, or

"(3) the value of any property conveyed or transferred to the Secretary,

whether as a tax on the instrument, the privilege of conveying or transferring or the recordation thereof. The failure to pay or collect any such tax shall not be a ground for refusal to record or file such instruments, or for failure to impart notice, or to prevent the enforcement of its provisions in any State or Federal court."

Mr. HUGHES (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. BROWN of Michigan. Mr. Chairman, I reserve a point of order against the amendment.

The CHAIRMAN. The gentleman from Michigan (Mr. BROWN) reserves a point of order against the amendment.

Mr. HUGHES. Mr. Chairman, the amendment that I have proposed is sorely needed. It is a simple matter of equity for local, county, and State governments, allowing them to levy property taxes on real property taken over by the Farmers Home Administration following default.

At present, all real property acquired by the FmHA is exempt from property taxation. Local municipalities are still providing services for these properties, even in the case where title is acquired by the FmHA following the owner's default on their loan. This puts an unfair tax burden on the remaining local property owners.

My amendment would correct this situation by permitting taxation of such property, in the same manner as other property. It would make the Housing Act of 1949 consistent with the Consolidated Farm and Rural Development Act, which already provides that all real property acquired or held by the Federal Government under the provisions of that act is subject to taxation by State, county, and local governments.

Due, no doubt, to oversight, the Congress failed to enact a similar provision under the 1949 Housing Act. This is a situation that we must correct today. I strongly urge my colleagues to support this amendment.

The CHAIRMAN. Does the gentleman from Michigan (Mr. BROWN) insist on his point of order?

Mr. BROWN of Michigan. I do not, Mr. Chairman.

The CHAIRMAN. The gentleman from Michigan (Mr. BROWN) withdraws his point of order.

The question is on the amendment offered by the gentleman from New Jersey (Mr. HUGHES).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title VI?

AMENDMENT OFFERED BY MR. BROWN OF MICHIGAN

Mr. BROWN of Michigan. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of Michigan: Page 59, line 5, section 604 is amended by striking "or other conditions not in conformance with such standards as he has prescribed under subsection (a)" and inserting in lieu thereof "defects".

Mr. BROWN of Michigan. Mr. Chairman, this amendment is intended to bring the Farmers Home Administration program into conformance with the FHA program.

Basically, when we consider the kinds of defects that are intended to be covered by this provision of the bill, I contemplate that they are supposed to track the FHA program. Instead, the language in the bill as presently written goes far beyond the FHA program and covers many situations other than structural defects, whereas this program has traditionally been limited to structural defects.

Mr. Chairman, I do not object to the program's being extended to Farmers Home Administration loans, but I do think this provision should be consistent with the FHA program.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Michigan. I yield to the gentleman from Oregon.

Mr. AuCOIN. Mr. Chairman, I appreciate the gentleman's yielding.

Is it my understanding that the gentleman is intending to restrict the ability of the consumer to redress a grievance that he may have concerning a defect arising from the purchase of a home?

Mr. BROWN of Michigan. It certainly is my intent to limit the liability of the Farmers Home Administration. That is certainly my intent, because the defect is not the responsibility of the Farmers Home Administration; the defect is the responsibility of the builder of the unit.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield further?

Mr. BROWN of Michigan. I yield to the gentleman from Oregon.

Mr. AuCOIN. It is true, is it not, that the Farmers Home Administration has the responsibility under this program to inspect these homes in the first instance, and if that inspection is to have any meaning whatsoever, the consumer ought to be able to feel that the inspection is sound?

Mr. BROWN of Michigan. Mr. Chairman, if I may recapture my time, I must say that the gentleman is absolutely wrong in his extrapolation of what such an inspection entails.

The FHA does not guarantee the structural perfection of a building, and the gentleman knows it. The gentleman also knows that the FHA does not insure the structural soundness of a building. It insures the mortgage.

The Farmers Home Administration finances the residence; it does not guarantee perfection as far as the construction and all defects are concerned. In the FHA program, in order to take care of the situation the gentleman has spoken about, we have limited it to structural defects.

I have no objection to extending the relief afforded under the FHA program to the Farmers Home Administration program, but it should not go beyond that and, as was suggested in committee, for instance, take care of a bad paint job.

Mr. AuCOIN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, we are talking about one of the largest investments a family will ever make in its lifetime, and that is the purchase of a home.

The Farmers Home Administration inspects the various homes within its jurisdiction, and when a consumer makes a purchase, I think the consumer is entitled to believe that after the Government has inspected the facility, the home is basically sound.

The gentleman from Michigan (Mr. BROWN) has no objection to providing remedies for structural defects, but he has objections to providing remedies for other defects that affect consumers just as seriously. I do not understand the gentleman's objections, because there are many nonstructural defects that can afflict a consumer, and I think the consumer has the right to have some redress of grievances that come about as a result of such defects.

It is not a structural defect, for example, if, after a house is built, the bor-

rower discovers that there is sewage boiling up in his yard because his septic tank mechanism is defective. If we are to accept what the gentleman from Michigan (Mr. BROWN) says with reference to his amendment, that consumer would not have any recourse to correct that defect.

It is not a structural defect under the law—and under the gentleman's amendment the consumer would not have redress of a grievance in this situation—if a contractor who has built a house has failed to properly grade the property and the consumer who buys the house finds that his basement floods every time a severe rainstorm occurs.

That is not a structural defect, but that consumer has a very serious grievance that would be unanswered by the gentleman's amendment.

I do not understand how these defects can be less significant than the structural defects the gentleman from Michigan (Mr. BROWN) says he is willing to address.

Mr. Chairman, let me mention some other defects that would be excluded by the gentleman's amendment. They are:

Specifying sheet glass rather than structural glass;

No. 18 electrical wiring rather than No. 14 electrical wiring;

Specifying 4-inch building piers rather than 8-inch building piers;

Specifying a pump and pressure tank inadequate for the deep well;

Failure to specify a lifting pump and holding tank for a house built below community sewer lines; and,

Wholly inadequate heating systems.

Those things are not technically structural defects, but they will lead to structural defects later; and the gentleman's amendment would preclude any redress of grievance in those instances.

Mr. Chairman, I think the gentleman's amendment is wrong. He places and almost makes sacrosanct similar language under the Development of Housing and Urban Development. But if conformity is his goal, I would suggest he join me in working to put this language into the HUD statutes.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. AUCOIN. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I would like to say that some consumers among my constituents in New Jersey ran into housing defects of this kind.

The Veterans' Administration has a very good list such as the one the gentleman may have been reading from, with respect to wiring, underwriter approval, sewerage, and other things.

I think that where the gentleman from Michigan (Mr. BROWN) is perhaps concerned is if we could attach it to some particular code such as the Inspection Code of the Veterans' Administration. If that were used, we would not get into cosmetic things like paint.

Mr. AUCOIN. Mr. Chairman, if the gentlewoman from New Jersey (Mrs. FENWICK) will let me have back my time, I think the legislative history on this is clear from the work in committee and here on the floor. We are not talking about paint jobs. We are talking about the kinds of problems I have just described.

We have a further problem particular to local FmHA administration. We have something like 1,700 county offices and a person in charge of one of those offices can determine whether a leaky roof is a structural defect or is not. There is a problem of uniformity of administration.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. AUCOIN) has expired.

(By unanimous consent, Mr. AUCOIN was allowed to proceed for 2 additional minutes.)

Mr. AUCOIN. To continue, Mr. Chairman, problems with electrical and plumbing and heating systems may or may not be considered structural defects, depending on the eye of the beholder in the local county office.

For all of those reasons, Mr. Chairman, I think we need to reject the gentleman's amendment, in the name of consumer protection, and we need to realize that the real problems for real consumers in real life instances are broader than those which the gentleman contemplates in his amendment.

Mr. TSONGAS. Mr. Chairman, will the gentleman yield?

Mr. AUCOIN. I yield to the gentleman from Massachusetts.

Mr. TSONGAS. Mr. Chairman, if, indeed, the situation the gentleman just referred to, the sewage problem, should also be the case next door, what is the recourse of the neighbor in that particular case?

Mr. AUCOIN. I know that many responsible home builder associations are developing their own home mortgage program. In places such as the State of Oregon those warranty programs would cover instances of the kind you mention. State legislatures are moving in the same direction, to provide warranty programs by State statute; but we have a Federal program before us; and I think we should not allow such a narrow definition of defects in such a program.

Mr. TSONGAS. Mr. Chairman, if the gentleman will yield further, is it not true that in the first case, the owner of that property would have exactly the same redress as his neighbor, but does not have the Farmers Home insurance? In other words, there is a form of redress, and the form of redress is exactly the same as that which the neighbor has. The difference is that in the first case the person is taking advantage of a Federal program; is that correct?

Mr. AUCOIN. Mr. Chairman, I would say to the gentleman that this is a case of a Federal program that has been inspected by a Federal agency, and therefore, has the implicit approval of the Federal Government. That is a big difference from the kind of residence the gentleman mentions.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. AUCOIN) has expired.

(On request of Mr. TSONGAS and by unanimous consent, Mr. AUCOIN was allowed to proceed for 2 additional minutes.)

Mr. TSONGAS. Mr. Chairman, will the gentleman yield for a second point?

Mr. AUCOIN. Yes, I will yield to the gentleman again.

Mr. TSONGAS. Does the gentleman have any objection to what I assume is the second part of the amendment which refers to judicial review?

Mr. AUCOIN. My understanding is that the gentleman from Michigan has a second amendment dealing with judicial review, which I also intend to oppose.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. AUCOIN. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, yes, I do intend to offer that amendment also.

Mr. TSONGAS. I thank the gentleman.

Mr. LUNDINE. Mr. Chairman, will the gentleman yield?

Mr. AUCOIN. I yield to the gentleman from New York (Mr. LUNDINE).

Mr. LUNDINE. Mr. Chairman, I would ask the gentleman from Oregon would it not be true that the Farmers Home Administration in this case could issue regulations addressing themselves to the tribal problem referred to by the gentlewoman from New Jersey, the Mashpee Indians?

Mr. AUCOIN. That is right. This agency is no more restricted in the adoption of regulations than is any other agency. It is obvious it could be done and it is obviously expected that it would be done.

Mr. LUNDINE. But it is true, is it not, that the distinction in the analogy of the gentleman from Massachusetts (Mr. TSONGAS) is that in one case you have a Federal agency making an inspection and approving the finances and in the other case you do not?

Mr. AUCOIN. The gentleman from New York is perfectly correct. That is the point I was trying to make as time ran out.

Mr. ROUSSELOT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, let me just briefly ask my distinguished colleague, the gentleman from Michigan (Mr. BROWN) whether what the gentleman is attempting to do here is to make sure that the Secretary of Agriculture is not authorized to pay compensation for construction defects that the FHA does not have to provide for, is that it?

Mr. BROWN of Michigan. If the gentleman will yield, that basically is it.

May I continue?

Mr. ROUSSELOT. Yes, please do.

Mr. BROWN of Michigan. I think the gentleman from Massachusetts (Mr. TSONGAS) hit the nail pretty much on the head when he said that by the bill's language without my amendment you are providing a different and additional remedy to a person who utilizes the Farmers Home Administration financing as compared with the person who goes out and uses any other type of conventional financing. It just seems to me we ought to recognize, as we have in the

FHA program that insuring a mortgage is not insuring the healthiness, the safety, the decency and the sanitariness of a home. And under the gentleman's language in the bill, financing by the Farmers Home Administration would amount to that, would make the Farmers Home Administration a guarantor of these residences under those conditions.

Mr. ROUSSELOT. So that if this amendment does not prevail, the Farmers Home Administration would be required to pay compensation and we do not even know what the costs might be.

Are there any estimates on the cost of this?

Mr. LUNDINE. Mr. Chairman, will the gentlemen yield?

Mr. ROUSSELOT. I yield to the gentleman from Massachusetts.

Mr. LUNDINE. I do know that section 518 of the National Housing has been in effect for the FHA for some time.

Mr. ROUSSELOT. Yes.

Mr. LUNDINE. And it has been followed.

Mr. ROUSSELOT. Of course the gentleman knows that that is true.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, the reason that section 518 is in the law is because the FHA does an inspection, just as the Farmers Home Administration does an inspection, and the reason the provision in the FHA law is limited to structural defects is because it was felt that the Government should have at least the responsibility to have discovered an obvious structural defect in connection with its inspection. I am willing to have that apply to the Farmers Home Administration. I do not know how to justify extending this kind of guarantee to the broad areas covered, and, if I may, I will quote section 509(a) which is the applicable section that this deals with:

SEC. 509. (a) The Secretary, for the purposes of this title, shall have the power to determine and prescribe the standards of adequate farm housing and other buildings, by farms or localities, taking into consideration, among other factors, the type of housing which will provide decent, safe, and sanitary dwelling for the needs of the family using the housing, the type and character of the farming operations to be conducted, and the size and earning capacity of the land.

(b) The Secretary may require any recipient of a loan or grant to agree that the availability of improvements constructed or repaired with the proceeds of the loan or grant under this title shall not be a justification for directly or indirectly changing the terms or conditions of the lease or occupancy agreement with the occupants of such farms to the latter's disadvantage without the approval of the Secretary.

Mr. ROUSSELOT. So, Mr. Chairman, I might say further that there is no estimate of the potential cost of this provision.

I think the committee ought to have an adequate explanation. I do not think we need to expand beyond what already has been done by FHA, although I know my colleague, the gentleman from Oregon (Mr. AuCoin), is anxious to help people. I think this simply goes far beyond that.

Mr. EVANS of Colorado. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Colorado.

Mr. EVANS of Colorado. I thank the gentleman for yielding.

One thought that really bothers me right now is that one of the difficulties we have in the Farmers Home Administration is a lack of adequate numbers of personnel. They are overburdened right now. If we add to their responsibilities the job of inspecting further these homes, they are going to be further behind than they are right now. For that reason I would be inclined to support the gentleman's amendment.

Mr. ROUSSELOT. So the gentleman makes the point that there may be a requirement for substantial numbers of additional personnel.

Mr. ROBERTS. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Texas.

Mr. ROBERTS. I thank the gentleman for yielding.

The gentleman from Colorado makes an excellent point. Most of the Farmers Home county officers have one man or two or three women stenographers. He has to be a farm supervisor; he has got to make loans to the farmer; he has got to be the banker; he has got to be the engineer; and if we put all these restrictions on him, we are just going to stop building homes under the Farmers Home Administration. I hope we support the gentleman's amendment.

Mr. ROUSSELOT. I think my colleague, the gentleman from Texas, has made an excellent point. I think this is so far beyond what was initially considered in FHA it would be unwise to expose it further to the Farmers Home Administration.

Mr. TSONGAS. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Massachusetts.

Mr. TSONGAS. I thank the gentleman for yielding.

I would hope that the gentleman from Colorado and the gentleman from Texas would also make the same argument on the next amendment referring to judicial review, because we are also concerned there with the increase of bureaucratic redtape.

Mr. ROUSSELOT. I am glad to hear my colleague is concerned about bureaucratic redtape.

Mr. LUNDINE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Just because FHA has a certain role does not make that holy or cause us not to accept that role in every case. The Farmers Home Administration has had a very successful housing credit program for years, more successful, I might say, than its counterpart in the more urbanized areas. They are now doing inspections. It would require no additional personnel to do inspections. They are doing them now.

This amendment is only intended to limit the homeowners' rights to structural defects. As has been pointed out by my colleague, the gentleman from Oregon, we have housing situations in rural areas with septic systems rather than community sewers common to urban areas, with individual water systems rather than community water systems. We believe that that inspector who is already doing this work should stand behind that inspection.

We have had experience with FHA 518 (a) and (b). We found that the cost of the program when it is applied to existing housing is extraordinary, but we have also found that the cost of the program applied to new housing is not extraordinary. So the provisions of this title have been carefully drafted to limit this guarantee to the newly constructed Farmers Home Administration housing. We have talked to officials of that agency who neither believe that the liability will be great nor that the burden on personnel will be at all substantial. I say for these reasons the amendment should be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. BROWN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BROWN OF MICHIGAN

Mr. BROWN of Michigan. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of Michigan: Page 59, line 18, section 604 is amended by inserting "Decisions by the Secretary regarding such expenditures or payments under this subsection, and the terms and conditions under which the same are approved or disapproved, shall not be subject to judicial review." immediately after "Rural Housing Insurance Fund.".

Mr. BROWN of Michigan. Mr. Chairman, I do not want, in view of the hour, to take a lot of time. This is the other, the companion amendment to the one just adopted which basically brings the Farmers Home Administration program into consistency with the FHA program insofar as judicial review is concerned. Inasmuch as the provisions of relief by a financing agency such as the Farmers Home Administration, just like FHA insurance, is somewhat of a privilege, and not a right, it is felt that the Administrator should be able to make determinations and not be tied up in court constantly by judicial review of that Administrator's decisions.

It is the same language applied to FHA and I urge its adoption.

Mr. TSONGAS. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Michigan. I yield to the gentleman from Massachusetts.

Mr. TSONGAS. Mr. Chairman, I commend the gentleman.

I urge adoption of the amendment.

Mr. AuCOIN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the gentleman's amendment.

Mr. Chairman, I agree that this is a companion amendment to the previous ill-considered amendment that was unfortunately passed.

I would say to my colleagues that, if we adopt this amendment, what we will be doing is giving the Administrator of the program carte blanche and no citizen escape valve whatsoever to correct any abuse of his authority or for misfeasance in the exercise of his authority. I think the mere presence of judicial review will help in the first instance to develop stronger, more sensible, more balanced, and more consumer-oriented regulations. The presence of judicial review to test those regulations is a guarantee that those regulations are going to be stronger in the first instance.

That is one of the reasons the committee adopted the judicial review provision in the committee.

I think the gentleman is wrong in wanting to deny this. He wants to conform this section of the bill to the FHA program. I say it is wiser to conform this feature, as the bill now does, to the Interstate Sales Act. That act does allow judicial review.

I think it is just a question of philosophy as to whether or not we think this escape valve ought to be created or not. I say consumers ought to have access to the courts in order to keep the Administration of the program on its toes and operating for the good of the public.

Mr. BROWN of Michigan. Mr. Chairman, if the gentleman will yield, the Administrator of the Farmers Home Administration and the FHA are intelligent and considerate and sincere, as is the Secretary of HUD. Does the gentleman know of any complaints with respect to those determinations by the Secretary of HUD?

Mr. AUCOIN. Mr. Chairman, reclaiming my time, I know the gentleman who is in the Agency right now as a compassionate man and so is the Secretary of HUD. But the gentleman and I know that we legislate on the basis of law and not people. We do not know who is going to be in this Agency for the next 10 years or the next 15 years or the next 20 years. We ought to put into the statute what we expect of Federal agencies and not rely on personalities.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. BROWN).

The question was taken; and on a division (demanded by Mr. AUCOIN) there were—ayes 25, noes 12.

As the amendment was agreed to.

AMENDMENT OFFERED BY MR. GOODLING

Mr. GOODLING. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GOODLING: Page 59, line 1, after "eighteen months" insert "or, in the case of aggregate structural defects exceeding $1,000, beginning thirty-six months".

Page 59, line 14, strike out "eighteen months" and insert in lieu thereof "thirty-six months".

Mr. GOODLING. Mr. Chairman, this is the amendment that was printed in the RECORD by Congressman GARY A. MYERS, who is absent because of a death in the family, and I have been asked to present this amendment. I must admit I have had very little time to properly prepare for it.

As I would understand, Congressman GARY A. MYERS testified before the committee and I would like to read just a portion of what he said at that time.

In the last two years, I have been inundated by problems from constituents in my District who have, in good faith, purchased a home under the Section 502 program. These individuals, who come from low to moderate income families, purchased what they considered to be decent, safe and sanitary housing of modest size, design and cost. They felt that, since it was a program designed by the federal government, their best interest would be served. Yet, the experiences of the last two years show that the opposite has been true.

It goes on to point out about 15 different examples of people in his district who have been caught in this manner.

The only opportunity I had to do any research was concerning the fact that this is not something new, it is not opening new doors. As I looked at the Housing and Community Development Act of 1974, I noticed that coverage was extended back to a period of 53 months. Then also, looking at the Housing Amendments of 1976, a new section was established in section 518, which provides retroactive coverage for a period of 3 years and 8 months; so it is not anything new. It deals with structural defects. It would appear to be a worthy amendment.

Mr. ASHLEY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I appreciate the intent of the gentleman. The fact of the matter is that the committee has not had the opportunity to review the amendment up to this time. We have had no opportunity to discuss it with the appropriate agencies.

I have got to say that the whole proposition of insuring against structural defects opens up an enormous can of worms. I think if we really deal with a certain time, if we say 18 months is good, 36 months is better. Why 36 months? Why not go back 5 years and say that everybody that can make a showing of structural defects can seek relief.

Mr. Chairman, I am sorry, but I go back to the original premise of the insurance program, which was to insure the mortgage and to facilitate the financing. I think the sooner we stop treating home buyers as absolute babies, the better off we will be. We say there are really only two classes of home buyers; one class for those who buy under a Federal program and the other is those that buy under conventional. Show me the conventional home buyers that are being treated and insisting on being treated in this grandfatherly way by the Federal Government. I think we are pursuing a treacherous course. We are promising more than we can deliver. The amendment, for that reason, should be voted down.

Mr. LUNDINE. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from New York.

Mr. LUNDINE. Mr. Chairman, I concur with the expressions of the distinguished subcommittee chairman, the gentleman from Oregon (Mr. AUCOIN). As authors of this, we felt 18 months was a reasonable time and although we have been defeated in a couple of our efforts, I guess one could say babying the consumer, we feel this is a reasonable amount of time and urge defeat of this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. GOODLING).

The amendment was rejected.

The CHAIRMAN. Are there further amendments to title VI?

AMENDMENT OFFERED BY MR. TAYLOR

Mr. TAYLOR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TAYLOR: Page 64, after line 5, insert the following new title:

TITLE VII—AMENDMENTS TO FLOOD DISASTER PROTECTION ACT OF 1973

SEC. 701. (a) Section 202(b) of the Flood Disaster Protection Act of 1973 is repealed.

(b) Section 3(a)(4) of such Act is amended by striking out all after "mortgages or mortgage loans" and inserting in lieu thereof the following: "but shall exclude assistance pursuant to the Disaster Relief Act of 1974 (other than assistance under such Act in connection with a flood);".

Mr. TAYLOR (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. TAYLOR. Mr. Chairman, my amendment is offered on behalf of the proud and self-reliant residents of many of our Nation's communities who are suffering an unnatural disaster of major proportions as a result of their failure to walk the line, or maybe I should say, accept the map boundaries, set down for them by officials administering the Federal flood insurance program.

As an example I will briefly describe what happened to the small town of Cassville, Mo., before explaining the details of my amendment because I think this city's experience will be repeated in a great many small communities across the country as the flood insurance program marches on.

According to testimony before the Appropriations Committee, HUD estimates there will be 22,000 communities identified as having special flood hazard areas by the end of 1977. Most communities are in the earliest stages of consideration of the program and do not know what lies down the road for them or that they will become "awash" in the flood insurance program. Only 1,585 communities will have final flood elevation studies completed by fiscal year 1977.

At the end of 1976 the Flood Insurance Administrator adopted a final flood elevation for the city of Cassville, prepared with no local input, which declares 60 percent of the city's business district and 50 percent of the corporate

area of the city to be within a 100-year special flood hazard area.

When the board of aldermen, who had not been previously informed of the full nature and extent of the flood insurance program, refused to adopt flood plain ordinances required by the program, the Administrator abrogantly invoked the sanctions contained in the Flood Disaster Protection Act of 1973 allowing him to terminate any Federal assistance, or any private lending banks or savings and loans, involving property located within the so-called 100-year flood plain. In other words, 60 percent of Cassville's business district and 50 percent of the town at large has been totally "redlined" from all forms of financing except for the cigar box variety and that doesn't go very far. It is an awesome thing and something deeply troubling to me, that an unelected Federal official has the power to essentially wipe a town off the map.

So now economic pressure brought by the heavy hand of the Federal Government is being brought to bear on the city of Cassville in the hopes of economically starving the city into submission. How long it can hold out I do not know. In today's economy, no individual or business can survive or prosper without the use of some conventional bank credit.

A few weeks ago, I joined with the distinguished senior Senator of Missouri, THOMAS EAGLETON, in holding hearings in Cassville on the impact of the flood insurance program.

Incidentally, the HUD official who was there took the opportunity the next day to attack the Senator and myself. The headline in the paper said, "Official From HUD Attacks Efforts by Taylor, Eagleton."

I quote further from the newspaper article:

> At one point the Federal employee said "Rednecks up in the hills" may oppose the Federal insurance program, but that it is the best program that the Government has brought about in many years.

Many witnesses established the severe financial impact of the program, but the testimony of a real estate appraiser with some years of experience stands out. He made sample appraisals of five affected blocks of property and found them to be depreciated by hundreds of thousands of dollars. Here is what he found:

Property A before the flood insurance program worth $25,000; now worth $2,000;

Property B before the flood insurance program worth $100,000; now worth $20,000;

Property C before the flood insurance program worth $100,000; now worth $15,000;

Property D before the flood insurance program worth $250,000; now worth $50,000; and

Property E before the flood insurance program worth $50,000; now worth $3,000.

While the sanctions of the act relating to the termination of Federal assistance for use in flood hazard areas may be proper, the sanctions go too far, in my opinion, when they prohibit a private lender, after appraising the risk, from making a loan within a federally proclaimed flood plain.

The total, absolute nature of the sanctions contained within the Flood Insurance Act of 1973 go beyond what is needed to further the underlying purpose of the Federal Flood Insurance Program, to take steps to eliminate the need for the Federal Government to make sizable flood disaster "bail-out" payments. The sanctions convert the program into a poorly disguised Federal land use program, which in my opinion invades the sovereign authority of the States and local levels of government which have traditionally exercised responsibility for property management.

Mr. Chairman, my amendment is a relatively simple one. The first section strikes section 202(b) of the Flood Disaster Protection Act of 1973, the sanction section of the act giving the Administrator authority to prohibit banks, savings and loans associations, and similar institutions, from making loans relating to property within a HUD designated special flood hazard area unless the community wherein the property is located is participating in the national flood insurance program.

It is important to note that the amendment does not affect section 202 (a) of the act which prohibits Federal assistance for acquisition or construction purposes being made available for use within special flood hazard areas of nonparticipating communities.

The second section of my amendment modifies section 3(a)(4) of the act to prohibit the flood related disaster assistance to communities who fail to participate in the program. This will prevent the Government from having to "bail out" individuals who undertake future development of an alleged flood-prone area without having taken adequate floodproofing measures.

My amendment does not harm the main features of the Federal flood insurance program and it is consistent with the findings of fact that provided the foundation for this program.

The Federal flood insurance program grew out of the recommendations made by an interdepartmental task force report submitted to the Congress in 1966.

The task force found that the flood plain encroachment occurs where full information as to the hazards of a flood is unavailable to owners of property and where the property owner sees the prospect of relief from flood protection through disaster assistance payments.

The country has come a long way since the report was issued more than a decade ago. Flood hazard information is now made available as a result of the mapping carried out as part of the regular flood insurance program. Where the maps are accurate and care is made to explain them to the local community, they will be effective in persuading persons not to locate in flood plains without taking adequate precautions, many communities who have found the HUD maps accurate will use them, willingly, and through the exercise of their own governmental powers.

The second section of my amendment makes it clear that in the future the Federal Government will not bail out an individual who locates within an alleged flood area. Furthermore, other provisions of the act require property purchasers to be given notice at the time they buy property that it is located within a flood hazard area. Therefore, property owners will not be able to justifiably expect to be bailed out by the Government.

My amendment leaves untouched section 202(a), the Federal assistance sanctions, which is more than enough incentive to get communities to participate. This sanction applies to direct Federal grant aid as well as to FHA and VA mortgages, and to subsidized housing.

My amendment would actually lead to an improvement to the administration of the program. As it is now, there is such an imbalance of power between agency officials and communities that the Agency does not see the need to carefully lay the groundwork for the adoption of the program, and does not exercise great care to see that their engineering work is completely accurate. The Agency is unwilling to respond to requests for corrections. This occurs in my opinion because the officials know that with the mighty weapon they have in the form of total sanctions, absolute redlining, the communities will have to go along with the Agency.

My amendment simply restores to the lending institution the right to lend their funds held on deposit from local citizens back into the local community through the private sector.

My colleagues, we have an opportunity here to restore the rights of a willing borrower and a willing lender to do business with one another with private not Government funds and without risk or exposure of loss of one dime of taxpayer's money.

We can restore to local governments the right of self-determination of what is best for their people, rather than being subject to unreal judgments of some faraway bureaucrat or regulator who never saw the community until he arrived in town to present his map that in many cases would have been more accurately drawn with the assistance of a ouija board in one hand, his mandated city ordinance in the other which he demands the city council to adopt without revision, accepting the authority and accuracy of the map, while carrying in his hip pocket unreasonable sanctions that forbid local private lending institutions loaning their funds to their customers, friends, and neighbors, loans based upon their prudent judgment and knowledge of values, morality and desire to serve and improve the economic growth and maintain the tax base of their local community.

Mr. Chairman, colleagues, I urge the adoption of this amendment.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. I thank the gentleman for yielding.

The gentleman's amendment does not in any way allow Federal grants to any

institution which desired to disregard a flood plain area?

Mr. TAYLOR. That is correct.

Mr. ROUSSELOT. If the gentleman will yield further, we in effect are not repealing the original Insurance Act to that degree?

Mr. TAYLOR. That is true. All that this amendment does is to allow a willing lender to lend money to a willing borrower in the private sector, with the assurance that not one dime of the Federal Government's resources will be exposed to loss by the taxpayers.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Ohio (Mr. WYLIE).

Mr. WYLIE. I thank the gentleman for yielding.

Mr. Chairman, as I understand the gentleman's amendment, it would allow a prudent banker the discretion to make a loan to someone in Cassville irrespective of the application of what is now mandatory language in the Flood Insurance Act?

Mr. TAYLOR. That is exactly right. It simply means that a banker or a loan officer of a savings and loan institution can, in his own prudent judgment, extend credit to someone living in the community, where they have lived together for 40, 50, maybe 60 years, where the banker knows the borrower, he knows the credit of the borrower, he knows the geography of the area, he knows the proneness of floods in the area, yet despite that, he is willing to make a loan to that particular loan applicant in that particular area.

Mr. WYLIE. Mr. Chairman, will the gentleman yield further?

Mr. TAYLOR. I yield to the gentleman from Ohio (Mr. WYLIE).

Mr. WYLIE. Mr. Chairman, I understood the gentleman to say a little earlier that Federal officials are in the process of wiping the town of Cassville, Mo., off the map.

May I say to the gentleman that I have been in Missouri several times, and I know where St. Louis is, I know where Kansas City, Mo., is, and I know where St. Joseph, Mo., is, I know where Sarcoxie, Mo., is. That is the gentleman's hometown. But I have never even seen a sign pointing to Cassville, Mo. I am wondering if it is a mythical place which does not exist and which the gentleman in the well has dreamed up.

Mr. TAYLOR. If the gentleman would be interested in knowing, when the flood insurance people described Cassville, Mo., they described it as a town of 1,900 people, the county seat of Barry County, located 16 miles northwest of Springfield. Actually, it is 65 miles southwest of Springfield. They had it located up in Congressman SKELTON's district. They can tell us how many inches deep the water will be on the courthouse square, but they cannot tell us where the town is located. I think they have the flood plain at the right place but the town moved on them.

Mr. WYLIE. I thank the gentleman. And if the gentleman will yield further, the gentleman's amendment then will allow local people in the community of Cassville some discretion to make a decision as to whether or not the community wants to participate in a Federal program.

Mr. TAYLOR. Yes. It is a very simple thing. It is back to the free enterprise system. They have been operating that way for 100 years. The two banks have been there for 100 years. They have been loaning people money in that town. There has not been an instance where anyone lost one thin dime because of flood hazard. It is wrong to tell people they cannot continue to loan money to people within the community.

Mr. BURLISON of Missouri. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Missouri (Mr. BURLISON).

Mr. BURLISON of Missouri. I thank the gentleman for yielding.

Mr. Chairman, I want to take this opportunity to commend the gentleman for the work he has done on this amendment. He is a Member with extraordinary ability, as his handling of this amendment has vividly demonstrated. I want to associate myself with his remarks and I firmly support his position.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. TAYLOR) has expired.

(On request of Mr. BURLISON of Missouri and by unanimous consent, Mr. TAYLOR was allowed to proceed for 2 additional minutes.)

Mr. BURLISON of Missouri. If the gentleman will yield further, I would like to ask the gentleman if under his amendment those who may build in the pate in the program will not be entitled flood plain or those who may not particito disaster assistance in case of a flood?

Mr. TAYLOR. That is right. Under the provisions of this act, section 1364, they must be advised when they move into a flood plain.

Mr. Chairman, at a later point my colleague, the gentleman from Missouri (Mr. ICHORD), is going to offer an amendment which will nail this down. That amendment will say with certainty that anyone who makes an application and borrows money within a flood plain area will be advised that it is a flood plain area. They will also be advised that in the event of a natural disaster caused by a flood they will not be eligible for disaster relief.

Mr. BURLISON of Missouri. Mr. Chairman, will the gentleman yield further?

Mr. TAYLOR. I yield to the gentleman from Missouri.

Mr. BURLISON of Missouri. Mr. Chairman, that seems to this Member to be an adequate penalty for failure to participate in the program. All the gentleman's amendment is doing is this: It is saying that a builder or a lender has the opportunity to take the risk of building in a flood plain area if he desires to do so.

Mr. TAYLOR. The gentleman is correct.

Mr. ICHORD. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Missouri.

Mr. ICHORD. Mr. Chairman, I hope that my distinguished and good friend, the gentleman from Ohio (Mr. ASHLEY), and my good friend, the distinguished gentleman from Michigan (Mr. BROWN), will accept this amendment.

I believe the amendment should be accepted, because what the gentleman asks for is not going to cost the Federal Government 1 dime, and the gentleman from Ohio (Mr. ASHLEY) made a speech just a few minutes ago in which he expressed a philosophy that precisely favors this amendment. The philosophy expressed a few minutes ago by the gentleman from Ohio is exactly the philosophy that motivates this amendment. Is that not true, I would ask the gentleman from Missouri?

Mr. TAYLOR. Mr. Chairman, that is exactly right. I wish to add that I was impressed by the speech of the gentleman from Ohio (Mr. ASHLEY).

Mr. ASHLEY. Mr. Chairman, if the gentleman will yield, I will say to the gentleman that I have been widely criticized since I made that speech.

Mr. SKELTON. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR. I yield to my friend, the gentleman from Missouri.

Mr. SKELTON. Mr. Chairman, I would like generally to associate myself with what the gentleman has said, and I commend him for offering his amendment, because I think it will help correct this problem.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. TAYLOR) has expired.

(On request of Mr. SKELTON and by unanimous consent, Mr. TAYLOR was allowed to proceed for 2 additional minutes.)

Mr. SKELTON. Mr. Chairman, if the gentleman will yield further, I would like to pass this thought on to the Members:

I have learned of an instance in my district where the gentleman's amendment would help clear up a problem that might very well exist.

HUD's contractor went to the city of Independence, Mo., and the contractor, after relying upon the two points set forth by the Corps of Engineers, set out the flood plain. Fortunately, the city of Independence has a pretty good engineering department itself. They went out and did their own survey, and they found two instances where the contractor who set out the flood plain area was 100 percent wrong.

What the gentleman's amendment would do is this: It would help create a situation where they could get the financing when and if they need it in the event of such mismanaged surveying as they obviously did in this instance.

So, Mr. Chairman, I certainly commend the gentleman, and I will certainly support his amendment.

Mr. TAYLOR. Mr. Chairman, I thank the gentleman very much.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Chairman, I thank the gentleman for yielding.

I certainly will support the gentleman's amendment. I have seen several

examples in my own district of the same situation.

I understand that the village the gentleman has been talking about is very high and dry; is that not the case?

Mr. TAYLOR. Mr. Chairman, Cassville, Mo., has one small stream going through it called Flat Creek. Once in a while it will get up and go over its banks slightly, but never has there been a flood of any significance there.

There is another town of Aurora, Mo., and I believe the gentleman from Missouri (Mr. ICHORD) can speak of that because it is in his area. Aurora is a plateau city; it is known as the "Summit City of the Ozarks."

There is not a stream within 5 miles of that city, and it is 2,000 feet above sea level, but it has been designated as a flood plain.

In Cassville, Mo., there is one area where they say the water will be 16 inches deep, another area where they say it will be 14 inches deep, and in the middle there is a hill and there they claim it will be 6 feet deep.

So the allegation is that the water will overflow that area, but there has never been any history of flooding.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. TAYLOR) has again expired.

(On request of Mr. WAGGONNER and by unanimous consent, Mr. TAYLOR was allowed to proceed for 3 additional minutes.)

Mr. WAGGONNER. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Louisiana.

Mr. WAGGONNER. Mr. Chairman, I thank the gentleman for yielding.

I certainly want to help the gentleman with his amendment, but I feel that he is concentrating now a little too much on Missouri.

This amendment will help the rest of us solve the same problem, will it not?

Mr. TAYLOR. Yes, this amendment will solve the same problem in other areas. I think it will correct the problem.

Mr. WAGGONNER. Mr. Chairman, I just do not see how we can fail to support the fine amendment offered by the gentleman from Missouri (Mr. TAYLOR).

Mr. HANLEY. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from New York.

Mr. HANLEY. Mr. Chairman, I thank the gentleman for yielding.

As a close observer of this program and as one of the cosponsors of the bill back in 1968, I know that it was never the intent of Congress to preclude the opportunity of an individual to enjoy participation in a Federal mortgage program.

Mr. Chairman, I am most aware of the situation that the gentleman cites in Missouri, as I am aware of other similar instances in other States of this Union, where innocent people, because of a controversy that exists between the Area Flood Plains Committee and the Flood Insurance Administrator, are denied the opportunity to move in the direction of purchasing that home under a Federal mortgage program, which is quite unfair. It has stagnated realty activity in every community that has been knocked out of the program.

Mr. Chairman, I commend the gentleman for what he is doing. The adoption of his amendment is going to make the flood insurance program a better program. It is also going to serve notice on the Administrator that they had better get with it with respect to the matter of compromising their differences with the Area Flood Plains Committee.

Again, Mr. Chairman, I salute the gentleman. I have hope very much that the chairman of the subcommittee would accept the amendment with the support of the gentleman on the other side of the aisle.

Mr. TAYLOR. Mr. Chairman, I thank the gentleman from New York (Mr. HANLEY) for his comments.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, I would first like to say that I go along with all of the rest of the Members who are commending the gentleman for his action here today. I am another one who is from Missouri.

Mr. Chairman, all we are asking this body really to do is to permit our people to build where they want to build, and they are not asking for any largesse from the Treasury. They are saying actually, "We do not want it. We just want to build where we want to build."

Many times it is not going to be flooded. Maybe some people are rednecked, but let us not be rednecked.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. TAYLOR) has expired.

(On request of Mr. ERTEL and by unanimous consent, Mr. TAYLOR was allowed to proceed for 3 additional minutes.)

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. Mr. Chairman, I would like to associate myself with the comments of the gentleman from Missouri (Mr. TAYLOR). I think they are very appropriate. We have a similar situation in the Susquehanna Valley with respect to various areas.

We have a situation in Pennsylvania where we have a small rural community made up of farmers. They want to build a dwelling or something else, and they cannot get a loan to build it. The land is good for farmland yet it is in the flood plain.

Mr. Chairman, it seems to me that this amendment gives them the opportunity to get money to build that farm dwelling so that they can go ahead and be productive.

I would agree with the gentleman from Missouri that this is a matter of freedom of choice. In making a very conscious effort, they are not asking anything from the Federal Government. They themselves are going to take the risk.

Mr. Chairman, I endorse the amendment.

Mr. WINN. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Kansas.

Mr. WINN. Mr. Chairman, I appreciate the gentleman's yielding.

As a former homebuilder who has built in an area completely financed through Federal mortgages, at one time we had 600 homes there. Then later on 120 of those homes were declared in the flood area. From then on, it is almost impossible to refinance those homes.

I happen to live in one of those homes.

Mr. Chairman, I fully sympathize with the gentleman from Missouri (Mr. TAYLOR), and I think he is making a giant step forward.

Mr. TAYLOR. I thank the gentleman from Kansas, Mr. Chairman.

Mr. WATKINS. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Oklahoma.

Mr. WATKINS. Mr. Chairman, I think the gentleman from Missouri (Mr. TAYLOR) has brought up a problem of extreme importance. I think we should take a careful look at it across this Nation because we have communities that cannot participate.

Mr. Chairman, when they are making a decision on a flood plain zone, they are not even taking into consideration the changes in our farming organizations; they are not taking into consideration the ponds that have been built or the stream flood-control dams that have been built.

Therefore, Mr. Chairman, I think we should look at this even in a broader context and look at what we are doing in these communities.

Again, Mr. Chairman, I commend the gentleman for bringing this matter up.

Mr. TAYLOR. Mr. Chairman, I think the gentleman's point is well made.

Mr. BAFALIS. Mr. Chairman, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from Florida.

Mr. BAFALIS. Mr. Chairman, I thank the gentleman for yielding.

I would like to commend him for his efforts and point out that 4 years ago when we put this provision into law, I stood here fighting the provision and predicting what was going to happen.

Mr. Chairman, 4 years' experience has shown us a great deal, and I believe the gentleman now has won support for correcting something we never should have enacted in the first place.

Mr. ASHLEY. Mr. Chairman, I move to strike the last word and I rise in lonely opposition to the amendment.

Mr. Chairman, I am fully aware that the floodgates are about to open and that I may well be the first victim of a sea of votes.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, I think it might be more appropriate to say we are about to take a bath in floodwater.

Mr. ASHLEY. I will take that under consideration, if I have time.

I do think it is important, Mr. Chairman, to remember that Congress wrote

into the law the present incentives for community participation and requirements for flood insurance for sound historical and fiscal reasons. Experience under the National Flood Insurance Act of 1968, not the current act but the previous act, proved conclusively that a purely voluntary program without lending prohibitions in nonparticipating communities simply would not reduce the spiraling Federal costs of annual flood disasters.

I would ask the Members to remember back to the period from 1968 to 1973, when flood-prone communities and flood plain propertyowners underestimated the local hazard or simply gambled, clearly content to rely on Federal disaster relief to aid in recovery efforts after a major flood. In Rapid City, S. Dak., only 29 flood insurance policies were in force in 1972 when flooding from Rapid Creek killed 236 people and resulted in over $150 million in property damage. In Wilkes-Barre, Pa., one of the most severely hit communities in the 1972 Agnes disaster which cost the Nation $3.1 billion, only two flood insurance policies had been bought.

The clearest demonstration of the prudence of Congress in enacting the current requirements for flood insurance—and I stress this, because this is what the amendment would undo—of sound floor plain management was the experience of Hurricane Eloise in 1975. Eloise traced the path of the 1972 tropical storm Agnes up the Atlantic seaboard, through the mid-Atlantic, into the Susquehanna River basin and on into New England. In the 1972 Agnes disaster—and again I remind the Members that this cost $3.1 billion, less than 1 percent of the insurable damages were covered by flood insurance. Now, by contrast, in the 1975 Eloise disaster, which came after only 2 years experience with the 1973 act with its requirements for flood insurance and community participation, those which would be undercut by the current amendment, some 25 percent of the insurable damages were covered by flood insurance and claims payments of about $50 million reduced Federal outlays for disaster relief to compensate victims.

So there is a real difference between the before and the after that we have got to take into account.

It is no particular fun to stand in the well knowing very precisely what is going to happen, knowing that I am putting myself in the position of undermining the free enterprise system. But that is not what is involved, that is still alleged to be involved.

Let there be a flood in the community of any of the gentlemen from Missouri, and I will tell the Members who the first people will be who will be insisting upon Federal disaster aid. One will be the very able Representative, the gentleman from Missouri who is standing before me now.

Mr. ICHORD. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Missouri.

Mr. ICHORD. I thank the gentleman for yielding.

The amendment specifically states that they shall not be eligible for Federal disaster relief. I can assure the gentleman on the part of this Member that he will never find me in here asking for any kind of relief. This is not an amendment for Missouri alone; this is for every State in the Union.

Mr. ASHLEY. I know how the people of Ohio would feel. They would feel just the same way as the people from Missouri felt at the time of the Agnes disaster. We really try to help our own regardless of the circumstances, but it is patently unfair.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. ASHLEY was allowed to proceed for 4 additional minutes.)

Mr. ASHLEY. It is patently unfair, if I may conclude for a moment. What I am saying is that it is very unfair to expect the premium for flood insurance to be paid by the taxpayers of this country while the participants in the flood plain legislation, the beneficiaries, are unwilling to change their construction, their building, their living habits sufficiently to obviate the dangers.

Let me just remind the Members of what we have done since 1973. Since the 1973 Flood Disaster Protection Assistance Act, here is how the Congress has attempted to alleviate some of the problems involved in the very tough Federal sanctions of the flood insurance program. I am simply trying to say, Mr. Chairman, that since the adoption of the 1973 Flood Disaster Protection Assistance Act the Congress has provided exemptions for existing structures in place prior to March 1, 1976. We have provided exemptions for small businesses occupied and in place prior to January 1, 1976. We have provided exemptions for home improvement loans not to exceed $5,000. We have provided exemptions for nonresidential agricultural related buildings. Finally, the amendment just adopted, the Ertel amendment, provides improvements to property suffering nonflood damages up to 80 percent of the value of the residence. The Members can see we really are trying to accommodate in a sensible way some of the problems that have arisen since the adoption of the 1973 act.

However, what we are being asked to buy now is a continuation on the part of those who want to live in flood-prone areas without the sanctions that were written into and were a very basic part of the 1973 legislation. All we are really saying by virtue of this amendment is: Look, if we just put our money so that we can have it both ways—but I do not think we can. That is why I would urge the defeat of the amendment.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Oregon.

Mr. AuCOIN. I appreciate the gentleman's yielding.

One of the problems of the amendment that bothers me most is what I think to be the false promise that there will be no disaster aid to the communities that might be afflicted. Is it not true, I ask the gentleman in the well, that the general statute dealing with disaster aid has a notwithstanding provision that says notwithstanding any other law, disaster aid shall be granted to communities that are affected by calamities of this kind? I ask the gentleman that question.

Mr. ASHLEY. Yes, that is so, but we know already that we are not going to withhold Federal assistance where calamities have struck. We know that.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORHEAD of Pennsylvania. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I hate to see my distinguished chairman left in a lonely position. I believe—and I have voted time after time for assistance to disaster areas, floods in Pennsylvania and in other parts of the country—that the only solution is a sound, firm flood insurance program, and that is the program that we have. Therefore, I oppose the amendment.

Mr. PATTERSON of California. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I know the hour is late. I will not use my 5 minutes. I want to say to this body there is not one Member who had more problems with flood insurance in the previous 2 years than I did. We had over 13,000 kinds of problems in my district in southern California with regard to flood insurance. But this amendment is a bad amendment. This amendment throws the baby out with the bath water. Let me tell the Members why.

The flood insurance maps can be wrong and they can be corrected and there is money in this bill that will correct the flood insurance maps, which is where the problem lies.

The need for flood insurance is real, let me assure you, because the owners of property will build in the flood hazard areas, the lenders will loan in areas that are flood hazards, and the people will buy in areas that are flood hazards, and when the flood comes the Federal taxpayers will pick up the tab and pay for the disasters because out of the compassion in our hearts we will send money to those areas, and all of us know it.

If we delete the flood insurance program we will take away the financial ability to insure one's self for such a disaster as flood. I urge the defeat of this amendment.

Mrs. FENWICK. Mr. Chairman, I move to strike the requisite number of words but I will not take the 5 minutes.

I would just like to say that this is what was written by HUD:

> National flood insurance program will . . . cut a potential $1 billion drain on the U.S. Treasury for flood disaster relief in the year 2000 to less than $200,000, and cut a potential $1.9 billion of uncompensated losses to disaster victims to less than $100,000.

We cannot go on year after year. The River Coalition is against any change. The Commonwealth of Pennsylvania, the Department of Community Affairs is

against change. The manager of Minot, the town that suffered five disastrous floods in 8 years, wrote me unsolicited and said that we cannot continue to have this building in the flood plains. I live along the Millstone River. There was not a farmer in the old days that did not have enough sense not to put a barn along the flood plain. All along the flood plain was pasture. That is what the sensible man put on the flood plain. One does not build in the flood plain unless he knows he is going to be rescued with other people's money.

I do not know how we are going to have our rivers in order and our country in order if we do not use commonsense.

I was going to offer an amendment but I can see it is not in the mood of the House so I will not offer it.

AMENDMENT OFFERED BY MR. ICHORD TO THE AMENDMENT OFFERED BY MR. TAYLOR

Mr. ICHORD. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. ICHORD to the amendment offered by Mr. TAYLOR: In the amendment offered by Mr. TAYLOR, strike out subsection (a) and insert in lieu thereof the following:

(a) Section 202(b) of the Flood Disaster Protection Act of 1973 is amended to read as follows:

"(b) In addition to the requirements of section 1364 of the National Flood Insurance Act of 1968, each Federal instrumentality described in such section shall by regulation require the institutions described in such section to notify (as a condition of making, increasing, extending or renewing any loan secured by property described in such section) the purchaser or lessee of such property of whether, in the event of a disaster caused by flood to such property, Federal disaster relief assistance will be available to such property.".

The CHAIRMAN. The gentleman from Missouri (Mr. ICHORD) is recognized for 5 minutes in support of his amendment.

Mr. ICHORD. Mr. Chairman, the amendment which I have offered and I did hand copies to both the chairman and the ranking minority Member prior to the introduction of the amendment, should remove the last vestiges of the objection of my good and distinguished chairman of the committee and also my friend, the gentleman from Michigan. I hope they will accept this amendment and accept the Taylor amendment, as amended.

I have nicknamed this amendment as the "Gene Taylor pointy-headed bureaucrat elimination amendment," because it was indeed a pointy-headed bureaucrat who prompted this amendment. I invite the Members to come down and look at this photograph, an enlarged photo from the Aurora Advertiser, which I hold in my hand. This photograph depicts a pointy-headed bureaucrat laying down the law to the people in Aurora, Mo., 2,100 feet above sea level, called the Summit City of the Ozarks, and my friends, it is a realy pointy-headed bureaucrat. The photographer should be rewarded with the Pulitzer prize for taking the photograph.

Let me state to my good friend, the gentleman from Ohio, and my good friend, the gentleman from Michigan, that this pointy-headed bureaucrat is not the illegitimate son of the bureaucracy. He is the illegitimate son of this Congress. I am sure that the gentleman from Ohio and the gentleman from Michigan do not want to lay claim to be the sire of such a pointy-headed bureaucrat.

Now, does anyone know where this pointy-headed bureaucrat is now? He is out in Kansas. Poor MARTHA, poor JOE, poor HARRY, and poor DAN, and for the reader of the CONGRESSIONAL RECORD I state that I am mentioning the first names of the Kansas delegation.

Mr. SKUBITZ. Mr. Chairman, will the gentleman yield?

Mr. ICHORD. I yield to the gentleman from Kansas, since I am mentioning the first names of the Kansas delegation.

Mr. SKUBITZ. Mr. Chairman, do I understand the gentleman to say they are sending that man to Kansas?

Mr. ICHORD. They have already moved him to Kansas after he pulled this caper in Missouri. There are other pointy-headed bureaucrats like this who are not only going to be in Kansas, but they are going to be in Louisiana, they are going to be in Colorado, they are going to be in Wyoming. They are going to be all over the United States.

Now, my good friend, the gentleman from Ohio, supports the free enterprise system. The amendment of the gentleman from Missouri (Mr. TAYLOR) states that if a banker wants to lend a person money to build a flood plain, he can do so, but that person shall not be eligible for any Federal disaster relief.

The opponents of this amendment have not addressed themselves to the Taylor amendment. My amendment adds to the Taylor amendment. The Taylor amendment provides that if a banker decides to make a loan to any person in a flood plain area, he can do so, however the borrower will not be entitled to Federal disaster relief. My amendment states that the Banker must further specifically notify the borrower or owner that he will not be entitled to such relief. Aurora, Mo., my friends, is 2,100 feet above sea level, and I state to my friend, the gentleman from Wyoming, they only have one little "creek" or "crick" or "run" or whatever you want to call it. The gentleman from Wyoming could step halfway across it at flood level and if he took one sip of the white lightning they used to make in this section of Missouri, he could step all the way across it; but still they want to refuse the bank the right to make any loans whatsoever.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

(By unanimous consent, Mr. ICHORD was allowed to proceed for 1 additional minute.)

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. ICHORD. I yield to the gentleman from Ohio.

Mr. ASHLEY. Mr. Chairman, I appreciate the gentleman yielding.

I do not think we need to pursue this. The gentleman is making quite a point of the fact that under no circumstances would there be any Federal relief ordered to a nonflood plain area which suddenly becomes engulfed in a tragedy. We know that. Many of us really have serious doubts as to whether that is so.

The other point is that the gentleman says that if a conventional lender is going to make loans in a flood plain area, that he has the right to do so pursuant to our free enterprise system. It happens that the FDIC insures those accounts.

Mr. ICHORD. If I may reclaim my time, I would say to my distinguished friend that he is still not addressing the amendment. I well appreciate the Federal Government's interest in wishing to avoid payment for other people's mistakes, but why do we want to play the part of Big Brother? Are you serious in contending that the bankers might bankrupt themselves? You can not be serious. The basic issue here is: What is the proper role of the Federal Government in the situation at hand? Mr. Chairman, without the Taylor amendment as amended by my amendment the national flood insurance program will continue to stand as one of the worst examples of coercive and inequitable Federal land use controls ever devised. It is blatantly unfair; unnecessarily and ridiculously exaggerated in scope and particularly punitive in nature and highly destructive to the free enterprise system and the independence of free Americans.

Mr. BROWN of Michigan. Mr. Chairman, I move to strike the requisite number of words.

I would say that I generally concur with the statements made by the gentleman from Ohio (Mr. ASHLEY). I think that an appropriate amendment, perhaps, would be to restrict the percentage of mortgages that may be written by an institution that is insured under FDIC or FSLIC to, say, 10 percent or 20 percent in a flood plain area.

This amendment goes far beyond that. I think that if we are going to have this program be effective, there must be sanctions. It was tried on a voluntary basis, and it never worked. Nobody did anything. So, in looking after the taxpayers' dollars, I do not think we can say that we will guarantee against loss, a person building in a high-risk area, and then if he suffers a loss in this area, as he surely will, we will insure him again. It just goes not make sense.

I think, in conclusion, Mr. Chairman, this amendment would probably not be before us if the administration of the program had been a little more compassionately and carefully guided. I think very possibly the manner in which flood plains have been established, has irritated many, many people. It is obvious that we are reaping the benefits of that criticism at the present time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. ICHORD) to the amendment offered by the gentleman from Missouri (Mr. TAYLOR).

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. TAYLOR), as amended.

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. ASHLEY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 220, noes 169, not voting 43, as follows:

[Roll No. 222]

Florio	Price	

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Ms. Holtzman against.
Mr. Bevill for, with Mr. Heftel against.

Messrs. PERKINS, ROSE, and TUCKER changed their vote from "no" to "aye."

So the amendment, as amended, was agreed to.

The result of the vote was announced as above recorded.

Mr. HANNAFORD. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the provisions of the Housing and Community Development Act of 1977 contain in embryonic form the makings of a new program for the allocation of community development funds, the impact of which will be felt by many Southern and Western States in the years ahead. In striving for a coherent national urban policy, it is essential that legislators understand what the long-term implications of today's actions may be.

The new formula for the allocation of housing funds to certain areas of the country fails to take into consideration that the imbalance it creates will likely endure permanently. In my own State of California, estimates are that the population may increase by 10 million, or by 50 percent by the year 2000. This means a greater need for more housing and more housing funds. The population and housing overcrowding elements of the old formula, however, are no longer a part of the new formula.

I ask my colleagues to seriously consider what the potential impact of this new program will mean. What does it imply for those growing cities of the South and West? If the burden shifts in future years, those preferred States today will not concede their privileges to other disadvantaged sections of the country.

Citizens in the State of California are being asked to pay higher taxes so that more funding can go to selected regions on the basis of what is at best an arbitrary formula, making the taxpayers of my State less able to meet the fiscal demands of a mushrooming population in the years ahead. This is a direction we have taken and I hope that it is not repeated. What will happen when the bill is considered for renewal 3 years hence? Will a similar formula be used when other Federal subventions to cities is voted, such as revenue sharing? These questions give me grave concern.

Mrs. COLLINS of Illinois. Mr. Chairman, as a Member of Congress representing one of the largest urban areas in the country. I have an obligation to promote and insure the establishment and maintenance of adequate housing for all residents of the beleaguered cities of our Nation. Like other Members whose districts lie predominantly within major American cities, I have firsthand knowledge of the conditions that government housing programs are designed to ameliorate.

My interest in the Housing and Community Development Act extends beyond my responsibilities as a representative of my Chicago constituents to my duties and agenda as chairwoman of the Government Operations Subcommittee on Manpower and Housing, which has oversight jurisdiction of the economy and efficiency of the programs of the Department of Housing and Urban Development.

All of us can agree on the need for effective government operation in the housing market, because without such action, our less fortunate citizens will be without adequate housing. In order to aid the disadvantaged, is it enough that government housing programs be well-intentioned? No. They must be functional to the extent that they produce housing which is within the reach of low-income citizens. As a result of a great deal of trial and error, we have learned that while categorical grant programs had the appearance of being responsive to congressional intent, it is a well known fact that they were often burdensome

on the cities and neighborhoods they were to benefit.

Because of the wide variance of needs among the urban centers of the Nation, the community development block grant program was instituted to afford cities and towns the opportunity to determine their funding priorities within a framework established by Congress. Notwithstanding the fact that efforts are underway to improve the operation of the block grant program, we as representatives of the people should acknowledge the reality that the voices of the disadvantaged are often drowned out, and act accordingly.

For these reasons, I support H.R. 6655 and urge my colleagues to join me. The Congress intends that these funds benefit the less fortunate, even though they are spent through mechanisms that allow greater flexibility.

We have made too many promises to the underprivileged that somehow fail to come to fruition. In the vital area of housing, it is time for renewed efforts to assure that programs aimed at benefiting the disadvantaged do so effectively. I would add that my subcommittee intends to maintain surveillance over categorical and other housing programs to assure that the delivery system operates according to congressional intent.

Ms. OAKAR. Mr. Chairman, the first Housing and Community Development Act, Public Law 93-383, included a nondiscrimination section—section 109. That section begins:

> No person in the United States shall on the ground of race, color, national origin, or sex be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity funded in whole or in part with funds made available under this title.

When Congresswoman SPELLMAN tried, in the Banking Committee markup, to add the persons with handicapping conditions to the groups to be held free of discrimination, I supported her effort. The HUD representative cautioned that the Spellman amendment would create problems for HUD. Later, he offered to provide language which would achieve the desired protections without inconvenience to HUD.

When I saw the language HUD felt was appropriate I thought of the programs and projects intended to serve the elderly and handicapped which have been such disasters in my congressional district, and in so many other districts. I thought of the high rise for the elderly with its excellent facilities and ramps and I recalled that the handrails in the bathtubs were so insecure in the walls that there were signs posted, saying "do not use this handrail." Those who did quickly learned that the handrail can easily pull out of the wall.

When I saw the language HUD felt was appropriate to protect persons who are elderly or who have handicapping conditions, I felt that that language provided about as much protection as those handrails.

Someone, somewhere, should have refused to accept the buildings with those insecure handrails. Someone should have refused to pay the contractors until the handrails were secured properly.

I asked my staff to seek expert opinion about the language HUD proposed as protections of the rights of the handicapped and the elderly.

What I learned was no surprise to me. The "protections" offered by HUD were unlikely to have any effect in the immediate future. They would probably lead to arguments but were too weak to support even a lawsuit, just as those handrails were too weak to support even a frail person.

In the course of trying to develop an amendment that would provide the desired protection, I learned a great deal. I learned that there are a great many problems in any effort to draw a legislative line of protection around persons who are handicapped and persons who are elderly. I learned that there are many factors which must be considered, but the thing that was most disheartening was that there is a widespread concern about giving elderly and handicapped persons what may be termed, "excessive rights." I was told, for example, that a simple antidiscrimination clause might result in the hiring of a blind person as a security guard. When one lawyer suggested that we use language to limit the rights of the handicapped, indicating that such persons could be refused employment on the basis of a "bona fide occupational qualification," a second attorney expressed concern about the number of judicial decisions that upheld what could properly be called AGEISM, the presumption of the would be employer that age is the same as incapacity.

What concerns me about all of this is that there seems to be a great deal of tolerance about the aged and the handicapped—but the tolerance is not tolerance of the persons who are aged or handicapped. It is tolerance of the bias against the aged and the handicapped.

There is a sense that if there must be a problem, the aged and the handicapped must suffer the problem.

There is a sense that if there will be errors of judgment, the errors that keep out the aged and the handicapped can be tolerated while the errors of judgment that result in the employment of a handicapped or aged person cannot be tolerated.

Finally, there is a sense that, yes, the elderly and the handicapped have been unfairly excluded from programs and from facilities, but after all, it would be too expensive to assure them their rights.

In connection with that point, I include at this point in the RECORD, an excellent article by George F. Will of the Washington Post, concerning the need to pay the price to assure to the handicapped the rights of full citizenship:

[From the Cleveland Plain Dealer, May 8, 1977]

UNITED STATES MUST INSURE FULL CITIZENSHIP FOR THE HANDICAPPED

(By George F. Will)

WASHINGTON.—Handicapped persons are acquainted with disappointment, and they have experienced much of it since 1973, when Congress grandly declared that "no otherwise qualified handicapped individual . . . shall solely by reason of his handicap" suffer discrimination under any program or activity receiving federal financial assistance.

In this heavily subsidized society, that can have a broad reach. But such broad sweeps of sentiment are law only in a hollow, technical sense. They require the executive branch to make regulations that "make" the law.

The Department of Health, Education and Welfare, which is not reluctant to write regulations, wrestled with the task of giving substance to Congress' sentiments. Recently, after more than three years, it produced 48 dense pages of rules, plus 106 pages of related documents.

With feigned precision, HEW guesses that the new requirements will cost society (especially school systems) $2.4 billion. Actually, no one knows even how many millions of people (probably more than 40 million) are "handicapped" in the sense of having "a physical or mental impairment which substantially limits one or more major life activities." But the significance of the regulations is that now the nation must stop rationing citizenship, almost absent-mindedly allocating to the handicapped only as much as is convenient.

The regulations require elimination of physical barriers to the handicapped wherever federal funding is involved. And they stipulate that handicapped children, regardless of the nature or severity of the handicap, are entitled to free public education appropriate to their needs.

Public education has been the distinctive American right. The extension of it, especially to the mentally handicapped, will generate legitimate controversy. Imagine, for example, the agonizing judgments required by the rule that the handicapped "must be educated with the non-handicapped in regular classrooms to the maximum extent possible."

The new rules require an endless exercise of sensitive discretion by public officials, especially at the local level.

To be fully effective, the new HEW regulations really require a degree of social sensitivity which, if it existed, would make the regulations unnecessary. They are an attempt by the central government to improve society's treatment of the handicapped in face-to-face situations, and to manage this improvement by codifying standards of behavior that are better than prevailing standards.

Modern government has extended the citizen's claims of entitlement, and now the handicapped are moving toward full citizenship. This has been a long time in coming because the handicapped are a varied and often invisible minority, invisible in part because of discrimination. This discrimination often involves a natural human failure of "imaginative sympathy," a failure by the majority to imagine how life looks to persons less fortunate.

I collect comical examples of such failure. In the 1920s a Beacon Hill dowager, told that many Boston homes lacked indoor plumbing, exclaimed: "You would think the people who lived in them would have found out before moving in!" In the 1930s an industrialist declared that it didn't pay to run radio advertising on Sunday because "everybody is playing polo."

Gov. Nelson Rockefeller told an audience that the tax burden falls "on the average person like you and me." Charles Reich, a Yale professor trendy in the 1960s (he wrote "The Greening of America"), said he had attended prep school and an Ivy League college and law school, "like everyone else."

But failure of "imaginative sympathy" by government is common, and not comical.

A society deficient in "imaginative sympathy" surrounds the crippled with thoughtlessly designed facilities which provide no convenient access for wheelchairs, facilities that shout society's indifference. A society

deficient in "imaginative sympathy" consigns the retarded to "education" programs that reinforce rather than ameliorate the cruel capriciousness of nature, and express through exclusions from basic rights the barbarous thought that weakness is akin to crime in the kingdom of the strong.

The new regulations announce the beginning of a costly but welcome era.

Finally, I am very happy that Mrs. SPELLMAN was able to persist and to secure approved language which will serve to notify HUD and other departments and agencies that it is the intent of Congress to assure full participation to all citizens—including persons with handicapping conditions.

Mr. BRADEMAS. Mr. Chairman, I rise in support of the amendment of my Indiana colleague, Mr. EVANS, and congratulate him on a most constructive proposal.

Mr. Chairman, we have all been shocked by the skyrocketing average cost of new conventional housing. Clearly, young families unable to make a substantial downpayment and older Americans living on fixed incomes are finding it more and more difficult to find affordable housing.

As a result, more and more American families have been turning to manufactured housing to meet their needs. Last year, 76 percent of all homes sold in this country priced at less than $30,000 were mobile homes and of all homes sold for less than $20,000, nearly all—96 percent—were mobile homes.

The Evans amendment seeks to make mobile homes more readily available to those who seek them by raising the FHA guaranteed mortgage limit from $12,500 to $15,000 for single-wide mobile homes and from $15,000 to $20,000 for the so-called double-wide units.

These proposed limits are not excessive but rather reflect both the effects of inflation and the more rigid construction standards on the price of manufactured housing.

Adoption of the Evans amendment will mean that more Americans will be able to take advantage of the low-cost, high-quality shelter offered by manufactured housing. I urge its adoption.

Mr. MILLER of Ohio. Mr. Chairman, regrettably I must rise in opposition to this bill in its present form. While the bill contains some worthwhile provisions, I am concerned over the potential impact of several changes in the community development block grant—CDBG—program and the inflationary impact of the section 8 rent subsidy program.

In its effort to present the Congress with a new housing authorization bill, the House Banking, Finance and Urban Affairs Committee determined that a continuation of the present CDBG hold-harmless program is undesirable. As a result, the hold-harmless program will start a 3-year phaseout beginning in fiscal year 1978. The committee chose, instead, to initiate a multifaceted approach to the community development block grant program which, I fear, will not give the nonmetropolitan areas the level of attention and assistance they deserve. H.R. 6655 implements a dual formula system for the distribution of block grant funds. Metropolitan areas will again be given priority in the allocation of funds. The phaseout of the hold-harmless provision which benefited some 450 rural municipalities is serious enough. But what about the smaller non-hold-harmless communities which will now have to compete for limited discretionary funds? Rural areas certainly deserve better from the Congress.

In addition to my concern over the CDBG program and the budget-busting costs in this bill, my primary concern, Mr. Speaker, is the section 8 rent subsidy program and the taxation insult it throws in the face of working Americans. Two years ago in remarks before the House, I pointed out that the section 8 rent subsidy program went far beyond providing decent modern housing. It provided extraordinarily good housing—at the expense of the working family. I offered an amendment to terminate some of the section 8 foolishness and it was defeated. Here we are again today, in the midst of the same debate over these multibillion-dollar rent subsidies. And again, it is the working man who will carry the burden of nonworking. In 1975, HUD's fair market rent table indicated that a family living in Washington in a two-bedroom unit could be subsidized under section 8 to the tune of $374 monthly. The same table indicated that a New York family living in a unit of four or more bedrooms could be subsidized up to $9,250 annually under section 8. That figure has since increased. According to HUD's fair market rent projection for 1978, it is possible that the same New York tenant—living in a four bedroom unit—could receive up to $10,476 in rental assistance under section 8—an increase of more than $1,200 from when I last called this matter to the attention of the House. The matter does not end here. Under section 8, the rental subsidy allotment could be increased by an additional 20 percent at the discretion of HUD. In other words, the taxpayers would pay a rent subsidy of $1,049 per month. While this case may be the exception rather than the rule, the point remains the same: the taxpayer is being smothered. It is time for a change. I urge my colleagues to give these points serious consideration.

Mr. FRASER. Mr. Chairman, I am pleased to see that title I of this bill addresses the community development needs of the smaller, nonentitlement communities.

Under an amendment offered in the Housing Subcommittee by the gentleman from New York (Mr. LUNDINE), the Secretary of HUD will be authorized to make funding commitments of up to 3 years to nonentitlement communities. The Lundine amendment also establishes a dual formula for distributing metropolitan and nonmetropolitan discretionary balances. The second formula option, which takes account of age of housing, will be particularly helpful to older, first-ring suburbs which share many of the development needs of the central cities.

The city of Columbia Heights in my district is a typical first-ring suburb. Demographically, this community, with a population of 24,000 resembles its neighbor to the south, Minneapolis.

Columbia Heights is still a strong, stable family-oriented community, but its housing stock is aging, its central business district is deteriorating, and its residents are hard pressed by rising housing and home maintenance costs.

Up until this year, Columbia Heights has not received Federal community development aid. Earlier this month, the city was notified by HUD that it would receive $355,000 in community development funds for acquisition and rehabilitation of substandard housing.

In the past, first ring suburbs such as Columbia Heights have beer. disadvantaged by the application of HUD's rating system for metro area discretionary proposals. Initially, HUD measured poverty, one of the factors in the rating formula, in terms of percentages rather than in absolute numbers. This application of the formula tended to skew funding toward the smallest communities in the metropolitan area. While this problem has been corrected in part, I would hope that HUD could clarify the use of the poverty factor when regulations are issued for the community development program. The Department might want to define poverty in terms of absolute numbers of persons living below the poverty level, as defined by 50 percent of the median family income for each housing market area.

The CHAIRMAN. If there are no further amendments, under the rule the Committee rises.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. STUDDS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6655) to amend certain Federal laws pertaining to community development, housing, and related programs, pursuant to House Resolution 541, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken and the Speaker announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 369, nays 20, not voting 43, as follows:

[Roll No. 223]

The Clerk announced the following pairs:

Ms. Holtzman with Mr. Lujan.
Mr. Teague with Mr. Moss.
Mr. Dent with Mr. Burgener.
Mr. Bevill with Mr. Ammerman.
Mr. Stratton with Mr. Cederberg.
Mr. Price with Mr. Conable.
Mr. Shipley with Mr. Guyer.
Mr. Heftel with Mr. Moffett.
Mr. Florio with Mr. Dickinson.
Mr. Van Deerlin with Mr. Andrews of North Carolina.
Mr. Weaver with Mr. Madigan.
Mr. Biaggi with Mr. Miller of California.
Mr. Downey with Mr. Gary A. Myers.
Mr. Fountain with Mr. Butler.
Mr. Koch with Mr. Conte.
Mr. Roe with Mr. Rinaldo.
Mr. Walgren with Mr. Del Clawson.
Mr. Weiss with Mr. Hillis.
Mr. Young of Missouri with Mr. Hansen.
Mr. Nolan with Mr. Quillen.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING CLERK TO MAKE TECHNICAL CORRECTIONS ON H.R. 6655

Mr. BLANCHARD. Mr. Speaker, I ask unanimous consent that, in the engrossment of the bill, the Clerk be authorized to make technical corrections, such as correcting section numbers, punctuation, and cross references, in order to correctly reflect the actions of the House in amending the bill H.R. 6655.

The SPEAKER pro tempore (Mr. DANIELSON). Is there objection to the request of the gentleman from Michigan?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, are there that many problems with this bill? Are there that many technical corrections to make?

Mr. BLANCHARD. There are some technical corrections.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

GENERAL LEAVE

Mr. BLANCHARD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON SENATE CONCURRENT RESOLUTION 19, FIRST CONCURRENT BUDGET RESOLUTION, FISCAL YEAR 1978

Mr. GIAIMO. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on Senate concurrent resolution (S. Con. Res. 19), the first concurrent budget resolution for fiscal year 1978.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, can the gentleman tell us that the conference is now complete?

Mr. GIAIMO. The conference is complete, and we hope to bring the conference report up sometime next week.

Mr. ROUSSELOT. What happened to the defense section?

Mr. GIAIMO. We will get into that when we get the report filed at midnight, and have all the accurate figures. The gentleman was present, and he knows what the figures are.

Mr. ROUSSELOT. I know that my chairman was very patient in trying to work out the differences.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 4975, HEALTH ASSISTANCE PROGRAMS EXTENSION ACT OF 1977

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill H.R. 4975, to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for biomedical research and related programs, with the Senate amendment

thereto, concur in the Senate amendment to the text of the bill with an amendment consisting of the texts of the bills H.R. 4974, H.R. 4975, and H.R. 4976, as passed by the House, and concur in the Senate amendment to the title.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. DANIELSON). The Clerk will report the Senate amendment.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

SHORT TITLE; REFERENCE TO ACTS

SECTION 1. (a) This Act may be cited as the "Health Assistance Programs Extension Act of 1977".

(b) Wherever in title I an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provisions of the Public Health Service Act. Wherever in title II an amendment is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be made to a section or other provision of the Community Mental Health Centers Act.

TITLE I—AMENDMENTS TO THE PUBLIC HEALTH SERVICE ACT

SEC. 101. Section 208(g) is amended by (1) striking out "one hundred and fifty positions" and inserting in lieu thereof "one hundred and fifty-five positions" in the first sentence thereof and (2) inserting after "National Institutes of Health" the following: "and of which not less than five positions shall be for the National Institute on Alcohol Abuse and Alcoholism,".

SEC. 102. (a) Section 308(a)(2) is amended by striking out "September 1" and inserting in lieu thereof "December 1".

(b) The first sentence of section 308(i)(1) (relating to authorizations for the National Center for Health Services Research) is amended by (1) striking out "and" after "1975," and (2) striking out the period at the end of the first sentence thereof and inserting in lieu thereof ", and $29,600,000 for the fiscal year ending September 30, 1978.".

(c) Section 308(i)(2) (relating to authorizations for the National Center for Health Statistics) is amended by (1) striking out "and" after "1975," and (2) striking out the period at the end thereof and inserting in lieu thereof ", and $35,000,000 for the fiscal year ending September 30, 1978.".

SEC. 103. (a) Section 314(d)(7)(A) (relating to authorizations for formula grants to States for comprehensive public health services) is amended by (1) striking out "and" after "1976," and (2) striking out the period at the end thereof and inserting in lieu thereof ", and $110,000,000 for fiscal year 1978.".

(b) Section 314(d)(7)(B) (relating to authorizations for grants for hypertension programs) is amended by (1) striking out "paragraph (1)" and inserting in lieu thereof "paragraph (1)"; (2) striking out "and" after "1976,"; and (3) striking out the period at the end thereof and inserting in lieu thereof ", and $15,000,000 for fiscal year 1978.".

SEC. 104. (a) Section 319(h)(1) (relating to authorizations for migratory health planning and development) is amended by (1) striking out "and" after "1976," in the first sentence thereof; (2) striking out the period at the end of the first sentence thereof and inserting in lieu thereof ", and $4,000,000 for fiscal year 1978."; and (3) striking out "for the next fiscal year" in the second sentence thereof and inserting in lieu thereof "for the next two fiscal years".

(b) Section 319(h)(2) (relating to authorizations for operation of migrant health centers) is amended by (1) striking out "and" after "1976," in the first sentence thereof; (2) striking out the period at the end of the first sentence thereof and inserting in lieu thereof ", and $35,000,000 for fiscal year 1978."; and (3) striking out "fiscal year 1977" in the third sentence thereof and inserting in lieu thereof "fiscal years 1977 and 1978".

(c) Section 319(h)(3) (relating to authorizations for inpatient and outpatient hospital services) is amended by striking out "and" after "1976," and (2) striking out the period at the end thereof and inserting in lieu thereof ", and $5,000,000 for fiscal year 1978.".

SEC. 105. (a) Section 330(e)(1) is amended by striking out "subsection (e)" in the first sentence thereof and inserting in lieu thereof "subsection (c)".

(b) Section 330(e)(2)(D) is amended by striking out "agency" and inserting in lieu thereof "agency".

(c) Section 330(g)(1) (relating to authorizations for planning and development of community health centers) is amended by (1) striking out "and" after "1976," and (2) striking out the period at the end thereof and inserting in lieu thereof ", and $6,000,000 for fiscal year 1978.".

(d) Section 330(g)(2) (relating to authorizations for operation of community health centers) is amended by (1) striking out "and" after "1976," and (2) striking out the period at the end thereof and inserting in lieu thereof ", and $272,000,000 for fiscal year 1978.".

SEC. 106. Section 390(c) (relating to authorizations for medical libraries) is amended by (1) striking out "and" after "1975," and (2) striking out the period after "1976" and inserting in lieu thereof ", and $20,000,000 for the fiscal year ending September 30, 1978.".

SEC. 107. Section 408(a) is amended by inserting "basic or" before "clinical research" in the first sentence thereof.

SEC. 108. Section 408(b) is amended by (1) inserting "basic or" before "clinical research" in the first sentence thereof and (2) striking out "but support under this subsection (other than support for construction) shall not exceed $5,000,000 per year per center" and inserting in lieu thereof "the aggregate of payments (other than payments for construction) made to any center under such an agreement for its costs (other than indirect costs) described in this subsection may not exceed $5,000,000 in any year, except that the aggregate of such payments in any year may exceed such amount to the extent that the excess amount is attributable to increases in such year in such costs as reflected in the Consumer Price Index published by the Bureau of Labor Statistics.".

SEC. 109. Section 409(b) (relating to authorizations for cancer control programs) is amended by (1) striking out "and" after "1976," and (2) striking out the period at the end thereof and inserting in lieu thereof ", and $100,000,000 for the fiscal year ending September 30, 1978.".

SEC. 110. Section 410(a)(1) is amended by (1) striking out "one hundred" and inserting in lieu thereof "two hundred" and (2) inserting after "qualifications" the following: ". Such personnel may be paid or reimbursed for their expenses associated with traveling to and from their assignment location in accordance with 5 U.S.C. 5724, 5 U.S.C. 524a(a)(1), 5 U.S.C. 5724a(a)(3), and 5 U.S.C. 5728(c)".

SEC. 111. Section 410C (relating to authorizations for programs of the National Cancer Institute) is amended by (1) striking out "and" after "1976"; and (2) striking out the period at the end thereof and inserting in lieu thereof ", and $1,000,000,000 for the fiscal year ending September 30, 1978.".

SEC. 112. Section 413(c)(1) is amended by inserting after "qualifications" the following ". Such personnel may be paid or reimbursed for their expenses associated with traveling to and from their assignment location in accordance with 5 U.S.C. 5724, 5 U.S.C. 5724a(a)(1), 5 U.S.C. 5724a(a)(3), and 5 U.S.C. 5726(c)".

SEC. 113. Section 414(b) (relating to authorizations for heart, blood vessel, lung, and blood disease prevention and control programs) is amended by (1) striking out "and" after "1976," and (2) striking out the period at the end thereof and inserting in lieu thereof ", and $30,000,000 for fiscal year 1978.".

SEC. 114. The first sentence of section 419B (relating to authorizations for the National Heart, Lung, and Blood Institute) is amended by (1) striking out "and" after "1976," and (2) striking out the period at the end thereof and inserting in lieu thereof ", and $446,000,000 for fiscal year 1978.".

SEC. 115. The first sentence of section 472(d) (relating to National Research Service Awards) is amended by (1) striking out "and" after "1976," and (2) striking out the period at the end thereof and inserting in lieu thereof ", and $185,000,000 for fiscal year 1978.".

SEC. 116. Title V is amended by adding at the end thereof the following new section:

"PUBLIC HEALTH PROGRAMS; STANDARDS

"SEC. 514. (a) The Secretary, in cooperation with appropriate professional entities and individuals, shall establish within one year after the date of enactment of this section standards with respect to preventive health care for identifiable populations within public health programs. Such standards shall be developed to identify populations in need and to maintain population-directed preventive health programs.".

TITLE III—MISCELLANEOUS AMENDMENTS

SEC. 301. (a) Section 602(a)(5) of Public Law 94-63 (relating to authorizations for home health services) is amended by inserting after "1977" ", and $8,000,000 for fiscal year 1978,".

(b) Section 602(b)(4) of such Public Law (relating to authorizations for home health services training) is amended by (1) striking out "and" after "1976,", and (2) inserting after "1977" ", and $4,000,000 for fiscal year 1978,".

STUDIES OF INTERNATIONAL HEALTH ISSUES AND OPPORTUNITIES

SEC. 302. (a)(1) The Secretary of Health, Education, and Welfare (hereinafter in this section referred to as Secretary") shall arrange for the conduct of a study or studies to determine opportunities, if any, for broadened Federal program activities in areas of international health. Such study or studies shall consider biomedical and behavioral research, health services research, health professions education, immunization and public health activities, and other areas that might improve our and other nations' capacities to prevent, diagnose, control, or cure disease, and to organize and deliver effective and efficient health services.

(2) An interim report on such study or studies shall be completed no later than October 1, 1977. A final report thereon shall be completed no later than January 1, 1978. Both reports shall be submitted to the Secretary, the Committee on Human Resources of the Senate, and the Committee on Interstate and Foreign Commerce of the House of Representatives.

(b)(1) The Secretary shall request the National Academy of Sciences (hereinafter in this section referred to as "Academy") to conduct such study or studies under an arrangement whereby the actual expenses incurred by the Academy directly related to the conduct of such study or studies will be paid by the Secretary. If the Academy is willing to do so, the Secretary shall enter into such an arrangement with the Academy.

(2) If the Academy is unwilling to conduct one or more of such studies under such an arrangement, then the Secretary shall enter into a similar arrangement with other appropriate nonprofit private groups or associations to conduct such study or studies and prepare and submit the reports thereon as provided in subsection (a)(2).

SEC. 303. (a) Section 212(a)(32) of the Immigration and Nationality Act (8 U.S.C. 1182(a)) is amended by inserting after "graduates of a medical school" in the first sentence thereof "not accredited by a body or bodies approved for the purpose by the Commissioner of Education (regardless of whether such school of medicine is in the United States),".

(b) Section 212(j)(1)(B) of such Act is amended by inserting after "that the alien" the following: "is (i) a graduate of a school of medicine which is accredited by a body or bodies approved for the purpose by the Commissioner of Education regardless of whether such school of medicine is in the United States); or (ii)".

SEC. 304. (a) Effective October 12, 1976, section 408(b)(2)(B) of Public Law 94-484 (relating to the payback requirement of the Public Health and National Health Service Corps scholarship program of section 225(f)(1) of the Public Health Service Act) is amended by striking out "any school year ending before September 30, 1977" and inserting in lieu thereof "any school year ending before September 30, 1978".

(b) Effective October 12, 1976, section 408(b)(2)(C) of such public law (relating to periods of internship or residency under section 225(b) of the Public Health Service Act) is amended by (1) striking out "before September 30, 1976" and (2) inserting after "agreement entered into" the following: "before October 12, 1976".

(c) Section 901 of such Public Law is repealed.

SEC. 305. Unless otherwise indicated, the amendments made by this Act shall become effective upon the date of enactment.

SEC. 306. (a) Section 501 of the Social Security Act (relating to authorizations for maternal and child health and crippled children's services) is amended (1) by striking out "and" after "1972,", and (2) by striking out "and each fiscal year thereafter" and inserting in lieu thereof the following: "and for each of the next four fiscal years, and $399,864,200 for the fiscal year ending September 30, 1978, and for each fiscal year thereafter".

(b) Section 249B of the Social Security Amendments of 1972 (relating to compensation under medicaid for nursing home inspectors) is amended by striking out "June 30, 1977" and inserting in lieu thereof, "September 30, 1980".

SEC. 307. Section 603(b) of Public Law 94-63 is amended by striking out "Not later than two years from the date of enactment of this Act" and inserting in lieu thereof "Not later than August 30, 1977,".

SEC. 308. (a) The first sentence of section 302(a) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (42 U.S.C. 4572) is amended by adding at the end thereof the following new sentence: "Notwithstanding the preceding sentence, in a fiscal year in which appropriations for the purposes of section 301 are equal to or greater than the appropriations made for such purposes in the fiscal year ending June 30, 1976, no State shall receive an amount which is less than the amount it received in the fiscal year ending June 30, 1976.".

SEC. 309 (a) The first sentence of section 735(c)(2) of the Public Health Service Act is amended by striking out all that follows "in an amount" and inserting instead "determined in accordance with the formula

$$A=3\phi\left(\frac{t-s}{t}\right)$$

in which 'A' is the amount the United States is entitled to recover; 'ϕ' is the sum of the amounts paid by the Secretary under the agreement to or on behalf of the individual and the interest on such amounts which would be payable if at the time the amounts were paid they were loans bearing interest at the maximum legal prevailing rate, as determined by the Treasurer of the United States; 't' is the total number of months in the individual's period of obligated service; and 's' is the number of months of such period served by him in accordance with the agreement.".

(b) Section 735(c)(4) of that Act is amended (1) by inserting "any obligation of service or" after "suspension of", and (2) by striking out "which was breached".

(c) Section 735(c) of that Act is amended by adding after paragraph (4) the following new paragraph:

"(5) Any obligation of an individual under this subsection for payment of damages may be released by a discharge in bankruptcy under title 11 of the United States Code only if such discharge is granted after the expiration of the five-year period beginning on the first date that payment of such damages is required.".

(d) The first sentence of section 754(c) of that Act is amended by striking out everything after "entitled to recover" but before "bearing interest" and inserting instead "; 'ϕ' is the sum of the amounts paid under this subpart to or on behalf of the individual and the interest on such amounts which would be payable if at the time the amounts were paid they were loans".

(e) This section is effective October 1, 1977.

SEC. 310. Effective October 1, 1977, section 732(d) of the Public Health Service Act is amended to read as follows:

"(d) The rights of an eligible lender arising under insurance evidenced by a certificate of insurance issued to it under this section may be assigned by such lender, subject to regulation by the Secretary, only to (1) another eligible lender, or (2) the Student Loan Marketing Association.".

SEC. 311. Effective October 1, 1977, section 731(a)(2)(C)(i) of the Public Health Service Act is amended by inserting "(or at an institution defined by section 435(a) of the Higher Education Act of 1965, which is not a school of medicine, osteopathy or dentistry)" after "eligible institution".

SEC. 312. Title VI of the Health Professions Educational Assistance Act of 1976 is amended by adding the end thereof the following:

"SEC. 602. (a) For purposes of section 212(a)(32) and section 212(j)(1) of the Immigration and Nationality Act, as amended (8 U.S.C. 1182), an alien who is a graduate of a medical school shall be considered to have passed parts I and II of the National Board of Medical Examiners Examination if that alien—

"(1) was on January 9, 1977, a doctor of medicine legally authorized to practice medicine in a State,

"(2) held on that date a valid specialty certificate issued by a constituent board of the American Board of Medical Specialties,

"(3) was on that date practicing medicine in such State exclusively within the specialty

for which such alien held such specialty certificate, and

"(4) after that date continues to practice medicine in such State exclusively within the specialty for which such alien holds such specialty certificate.

(b) For purposes of this section, the term "State" means a State as defined in section 101(a)(36) of the Immigration and Nationality Act, as amended (8 U.S.C. 1182).

(c) Section 101(a)(41) of that Act is amended by inserting "a" after "graduates of".

(d) This section is effective January 10, 1977.

The SPEAKER pro tempore. The Clerk will report the House amendment to the Senate amendment.

The Clerk read the House amendment to the Senate amendment, as follows:

In lieu of the matter proposed to be inserted by the Senate engrossed amendment to the text of the bill, insert:

TITLE I—HEALTH PLANNING AND HEALTH SERVICES RESEARCH AND STATISTICS EXTENSION

SEC. 101. This title may be cited as the "Health Planning and Health Services Research and Statistics Extension Act of 1977".

SEC. 102. (a) Section 1516(c)(1) of the Public Health Service Act (relating to authorizations for planning grants) is amended by striking out "for the fiscal year ending June 30, 1977" and inserting in lieu thereof "each for the fiscal years ending September 30, 1977, and September 30, 1978".

(b) Section 1525(c) of such Act (relating to authorizations for State health planning and development agencies) is amended by striking out "for the fiscal year ending June 30, 1977" and inserting in lieu thereof "each for the fiscal years ending September 30, 1977, and September 30, 1978".

(c) Section 1526(e) of such Act (relating to authorizations for grants for rate regulation) is amended June 30, 1977" and inserting in lieu thereof "each for the fiscal years ending September 30, 1977, and September 30, 1978".

(d) Section 1534(d) of such Act (relating to authorizations for centers for health planning) is amended by striking out "for the fiscal year ending June 30, 1977" and inserting in lieu thereof "each for the fiscal years ending September 30, 1977, and September 30, 1978".

SEC. 103. (a) Section 1613 of the Public Health Service Act (relating to authorizations for construction) is amended by striking out "for the fiscal year ending June 30, 1977" and inserting in lieu thereof "each for the fiscal years ending September 30, 1977, and September 30, 1978".

(b) Section 1640(d) of such Act (relating to authorizations for area health services development) is amended by striking out "for the fiscal year ending June 30, 1977" and inserting in lieu thereof "each for the fiscal years ending September 30, 1977, and September 30, 1978".

SEC. 104. (a) Section 308(1)(1) of the Public Health Service Act (relating to authorizations for the National Center for Health Services Research) is amended (1) by striking out "and" after "1975,", and (2) by inserting after "1976" the following: ", and $27,600,000 for the fiscal year ending September 30, 1978".

(b) Section 308(1)(2) of such Act (relating to authorizations for the National Center for Health Statistics) is amended (1) by striking out "and" after "1975,", and (2) by inserting after "1976" the following: ", and $31,740,000 for the fiscal year ending September 30, 1978".

SEC. 105. (a)(1) Section 1903(m)(2)(A) of the Social Security Act is amended to read as follows:

"(2)(A) Except as provided in subparagraphs (B) and (C), no payment shall be made under this title to a State with respect to expenditures incurred by it for payment (determined under a prepaid capitation basis or under any other risk basis) for services provided by any entity which is responsible for the provision of inpatient hospital services and any other service described in paragraph (2), (3), (4), (5), or (7) of section 1905(a) or for the provision of any three or more of the services described in such paragraphs unless—

"(i) the Secretary (or the State is authorized by paragraph (3)) has determined that the entity is a health maintenance organization as defined in paragraph (1); and

"(ii) less than one-half of the membership of the entity consists of individuals who are insured under parts A and B of title XVIII or recipients of benefits under this title.".

(2) Section 1903(m)(2)(C) of such Act is amended by striking out "(A)(iii)" each place it occurs and inserting in lieu thereof "(A)(ii)".

(3) The amendments made by paragraphs (1) and (2) shall apply with respect to payments under title XIX of the Social Security Act to States for services provided—

(A) after October 8, 1976, under contracts under such title entered into or renegotiated after such date, or

(B) after the expiration of the one-year period beginning on such date,

whichever occurs first.

(b) Section 1309(a) of the Public Health Service Act is amended by striking out "September 30, 1977" the second time it occurs and inserting in lieu thereof "September 30, 1979".

SEC. 106. (a)(1) The third sentence of section 1503(b)(1) of the Public Health Service Act is amended by inserting "established" before "under section 1524".

(2) The first sentence of section 1511(a) of such Act is amended by striking out "There" and inserting in lieu thereof "Except as provided in section 1536, there".

(3) Section 1511(b)(5) of such Act is amended by striking out "1535" and inserting in lieu thereof "1536".

(4) Section 1512(c) of such Act is amended by striking out "agencies" and inserting in lieu thereof "agency's".

(5) The first sentence of section 1513(a) of such Act is amended by striking out "the provision" and inserting in lieu thereof "provision".

(6) The last sentence of section 1513(a) of such Act is amended by striking out "(g)" and inserting in lieu thereof "(h)".

(7) The margin of the last sentence of paragraph (1) of section 1513(b) of such Act is indented to align with the margin of paragraph (2) of such section.

(8) Section 1513(b)(2)(C) of such Act is amended by striking out "is consistent" and inserting in lieu thereof "are consistent".

(9) The first sentence of section 1513(d) of such Act is amended by striking out "health system" and inserting in lieu thereof "health systems".

(10) Section 1514 of such Act is amended by inserting "public or" before "nonprofit private".

(11) Section 1515(d) of such Act is amended by striking out "health services area" and inserting in lieu thereof "health service area".

(12) Section 1521(a) of such Act is amended by striking out "other than" and all that follows in such section and inserting in lieu thereof a period.

(13) Section 1521(d) of such Act is amended by striking out "Policy, Planning," and inserting in lieu thereof "Planning".

(14) Section 1523(c) of such Act is amended by striking out "(6), or (7)" and inserting in lieu thereof "or (6)".

(15) Section 1526(a) of such Act is amended by inserting "grants" after "may make".

(16) Section 1536(a) of such Act is amended by striking out "Territories in" and inserting in lieu thereof "Territory of".

(17) Section 1536(b)(4) of such Act is amended (A) by striking out "office" and inserting in lieu thereof "officer", and (B) by striking out "the regulation" and inserting in lieu thereof "regulations".

(18) Section 1602(5) of such Act is amended by striking out "1503" and inserting in lieu thereof "1603".

(19) The second sentence of section 1602 of such Act is amended by striking out "supports" and inserting in lieu thereof "support".

(20) Sections 1603(a)(4), 1603(a)(5), 1603(a)(6), 1064(b)(1)(C), 1604(b)(2)(A) and 1604(c)(1)(2)(B) of such Act are each amended by striking out "1602(a)" and inserting in lieu thereof "1602".

(21) Section 1603(a)(6) of such Act is amended by striking out "(4)" and inserting in lieu thereof "(5)".

(22) Section 1603(a)(7) of such Act is amended by striking out "standards" and inserting in lieu thereof "requirements".

(23) Section 1610(a) of such Act is amended by striking out "1513" and inserting in lieu thereof "1613".

(24) Section 1613 of such Act is amended by striking out "1510" and inserting in lieu thereof "1610".

(25) Section 1622(c) of such Act is amended by adding after paragraph (4) the following new paragraph:

"(5) If any loan to a public entity under this part is sold and guaranteed by the Secretary under this subsection, interest paid on such loan after its sale and any interest subsidy paid, under paragraph (3)(A)(ii), by the Secretary with respect to such loan which is received by the purchaser of the loan (or the purchaser's successor in interest) shall be included in gross income for the purpose of chapter 1 of the Internal Revenue Code of 1954.".

(26) Section 1622(e)(2) of such Act is amended by striking out "June 30, 1977" and inserting in lieu thereof "September 30, 1977".

(27) Section 1633(4) of such Act is amended by striking out "title XIV" and inserting in lieu thereof "title XV".

SEC. 107. Section 2(f) of the Public Health Service Act (relating to the definition of the term State) is amended (1) by striking out "and" after "Islands,", and (2) by adding before the period the following: ", American Samoa, and the Trust Territory of the Pacific Islands".

TITLE II—BIOMEDICAL RESEARCH EXTENSION

SEC. 201. This title may be cited as the "Biomedical Research Extension Act of 1977".

SEC. 202. Section 390(c) of the Public Health Service Act (relating to authorizations for medical libraries) is amended (1) by striking out "and" under "1975,", and (2) by inserting after "1976" the following: ", and $9,200,000 for the fiscal year ending September 30, 1978".

SEC. 203. (a)(1) Section 409 of the Public Health Service Act (relating to authorizations for cancer control programs) is amended (A) by striking out "and" after "1976,", and (B) by striking out "June 30, 1977" and inserting in lieu thereof "September 30, 1977, and $69,116,150 for the fiscal year ending September 30, 1978".

(2) Section 410C of such Act (relating to authorizations for programs of the National Cancer Institute) is amended (A) by striking out "and" after "1976;", and (B) by striking out "June 30, 1977" and inserting in lieu thereof 'September 30, 1977; and $847,162,450 for the fiscal year ending September 30, 1978".

(b)(1) The second sentence of section 408(b) of such Act (relating to national cancer

research and demonstration centers) is amended by striking out "; but support under this subsection (other than support for construction) shall not exceed $5,000,000 per year per center.", and inserting in lieu thereof a period and the following: "The aggregate of payments (other than payments for construction) made to any center in support of such an agreement for its costs (other than indirect costs) described in the first sentence may not exceed $5,000,000 in any fiscal year, except that if in any fiscal year there is an increase, as reflected in the Consumer Price Index published by the Bureau of Labor Statistics, in the costs of a center for which payments may be made under such an agreement, the aggregate of payments in such year for such center may exceed $5,000,000 to include such increase and any such increase in any preceding fiscal year for which payments were made to such center under such an agreement to the extent that such increase resulted in payments in excess of $5,000,000. As used in this section, the term 'construction' does not include the acquisition of land, and the term 'training' does not include research training for which fellowship support may be provided under section 472.".

(2) Section 410(a)(1) of such Act (relating to the National Cancer Advisory Board) is amended (A) by inserting "Policy" after "Technology", and (B) by striking out "(or his designee)" and inserting in lieu thereof "(or their designees)".

SEC. 204. (a)(1) Section 414(b) of the Public Health Service Act (relating to authorizations for heart, blood vessel, lung, and blood disease prevention and treatment programs) is amended (A) by striking out "and" after "1976,", and (B) by striking out "fiscal year ending September 30, 1977, and $29,900,000 for the fiscal year ending September 30, 1978".

(2) Section 419B of such Act (relating to authorizations for the National Heart, Lung, and Blood Institute) is amended (A) by striking out "and" after "1976,", and (B) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $406,636,550 for the fiscal year ending September 30, 1978".

(b)(1) Section 415(a)(1) of such Act (relating to national research and demonstration centers) is amended—

(A) by striking out "diseases and for research in the use of blood and blood products and in the management of blood resources" in subparagraph (A) and inserting in lieu thereof "and blood vessel diseases", and

(B) by striking out ", blood vessel diseases, research in the use of blood products, and research" in subparagraph (C) and inserting in lieu thereof "diseases and research into blood, in the use of blood products and".

(2) The third sentence of section 415(b) of such Act (relating to national research and demonstration centers) is amended by striking out "in any year" and all that follows in such sentence and inserting in lieu thereof the following: "in any fiscal year, except that if in any fiscal year there is an increase, as reflected in the Consumer Price Index published by the Bureau of Labor Statistics, in the costs of a center for which payments may be made under such an agreement, the aggregate of payments in such year for such center may exceed $5,000,000 to include such increase and any such increase in any preceding fiscal year for which payments were made to such center under such an agreement to the extent that such increase resulted in payments in excess of $5,000,000.".

(3) Section 417(a)(1) of such Act (relating to the National Heart, Lung, and Blood Advisory Council) is amended by striking out "National Science Foundation" and inserting in lieu thereof "Office of Science and Technology Policy".

(4) Section 419A(a) of such Act (relating to administration) is amended by striking out "made pursuant to section 414".

SEC. 205. Section 472(d) of the Public Health Service Act (relating to National Research Service Awards) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $137,770,000 for the fiscal year ending September 30, 1978".

TITLE III—HEALTH SERVICES EXTENSION

SEC. 301. This title may be cited as the "Health Services Extension Act of 1977".

SEC. 302. (a)(1) Section 314(d)(7)(A) of the Public Health Service Act (relating to authorizations for formula grants to States for comprehensive public health services) is amended (A) by striking out "and" after "1976,", and (B) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $103,500,000 for the fiscal year ending September 30, 1978"

(2) Section 314(d)(7)(B) of such Act (relating to authorizations for grants for hypertension programs) is amended (A) by striking out "and" after "1976,", and (B) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $10,350,000 for the fiscal year ending September 30, 1978".

(b) Section 314(d)(7)(B) of such Act is further amended by inserting after "treatment of" the following: ", and, where appropriate, for ambulatory care for,".

SEC. 303. (a)(1) Section 319(h)(1) of the Public Health Service Act (relating to authorizations for planning and development of migrant health centers) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977 and $1,897,500 for the fiscal year ending September 30, 1978".

(2) The second sentence of section 319(h)(1) of such Act is amended by striking out "the next fiscal year" and inserting in lieu thereof "each of the next two fiscal years".

(b)(1) The first sentence of section 319(h)(2) of such Act (relating to authorizations for operation of migrant health centers) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $29,152,500 for the fiscal year ending September 30, 1978".

(2) The third sentence of section 319(h)(2) of such Act is amended by striking out "fiscal year 1977" and inserting in lieu thereof "fiscal years ending September 30, 1977, and September 30, 1978".

(c) Section 319(h)(3) of such Act (relating to authorizations for inpatient and outpatient hospital services) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $3,450,000 for the fiscal year ending September 30, 1978".

SEC. 304. (a)(1) Section 330(g)(1) of the Public Health Service Act (relating to authorizations for planning and development of community health centers) is amended (A) by striking out "and" after "1976,", and (B) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $5,750,000 for the fiscal year ending September 30, 1978".

(2) Section 330(g)(2) of such Act (relating to authorizations for operation of community health centers) is amended (A) by striking out "and" after "1976,", and (B) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $241,670,200 for the fiscal year ending September 30, 1978".

(b)(1) Section 330(b)(3) of such Act (relating to the definition of medically underserved population) is amended by adding at the end thereof the following: "In designating urban and rural areas for purposes of this paragraph, the Secretary shall take into account unusual local conditions which are a barrier to access to or the availability of personal health services.".

(2) The first sentence of section 330(e)(1) of such Act is amended by striking out "subsection (e)" and inserting in lieu thereof "subsection (e)".

SEC. 305. (a) Section 1001(c) of the Public Health Service Act (relating to authorizations for family planning projects) is amended (1) by striking out "and" after "1976;", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977; and $123,625,000 for the fiscal year ending September 30, 1978".

(b) Section 1003(b) of such Act (relating to authorizations for training) is amended (1) by striking out "and" after "1976;", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977; and $3,450,000 for the fiscal year ending September 30, 1978".

(c)(1) Section 1004(b)(1) of such Act (relating to authorizations for research) is amended (A) by striking out "and" after "1976,", and (B) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $67,838,000 for the fiscal year ending September 30, 1978".

(2) Section 1004(b)(2) of such Act (relating to limitation on source of funds) is amended by adding immediately before the period the following: "or for the administration of this section".

(d) Section 1005(b) of such Act (relating to authorizations for informational and educational materials) is amended (1) by striking out "and" after "1976;", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977; and $690,000 for the fiscal year ending September 30, 1978".

SEC. 306. (a) Section 1121(b)(5) of the Public Health Service Act (relating to authorizations for sudden infant death syndrome programs) is amended (1) by striking out "and" after "1976", and (2) by striking out "fiscal year 1977" and inserting in lieu thereof the following: "ending September 30, 1977, and $2,300,000 for the fiscal year ending Septmber 30, 1978".

(b) Section 1131(f) of such Act (relating to authorizations for hemophilia programs) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $3,450,000 for the fiscal year ending September 30, 1978".

(c) Section 1132(e) of such Act (relating to authorizations for blood separation centers) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $3,450,000 for the fiscal year ending September 30, 1978".

SEC. 307. (a)(1) The first sentence of section 708(a) of the Public Health Service Act (relating to health professions data) is amended (A) by inserting "program" after "health profesions personnel which", and (B) by striking out "United States and its

territories and possessions" and inserting in lieu thereof "States".

(2) Section 708(e)(1)(C) of such Act is amended by inserting "use" after "personnel data which".

(b) Section 721(f) of such Act (relating to regional health professions programs) is amended by striking out "subsection (a)" in paragraphs (1) and (2) and inserting in lieu thereof "subsection (a) of section 720".

(c) Effective October 1, 1977, section 731 (a)(2)(B) of such Act (relating to loan repayment period) is amended (1) by inserting "nor later than 12 months" after "9 months", and (2) by striking out ", and not later than the earlier of 12 months after such date or of 3 years after the date he" and inserting in lieu thereof "or".

(d) Effective October 1, 1977, section 736 of such Act (relating to participation of Federal credit unions) is amended by striking out "Director of the Bureau of Federal Credit Unions" and inserting in lieu thereof "Administrator of the National Credit Union Administration".

(e) Effective October 1, 1977, section 737 (1) of such Act (relating to definition of eligible institution) is amended by striking out "that is receiving, or the Secretary determines is eligible to receive, a grant under section 770 for such fiscal year" and inserting in lieu thereof "that received a grant, or the Secretary determines met the requirements for receipt of a grant, under section 770 for the preceding fiscal year."

(f) Section 741(f)(1)(B) of such Act (relating to loan forgiveness) is amended by inserting before the semicolon the following: "or who obtained, before October 12, 1976, any other educational loan for his costs at a school of medicine, osteopathy, dentistry, veterinary medicine, optometry, pharmacy, or podiatry".

(g) Effective October 1, 1977, section 748 (b)(2) and 749(b)(2) of such Act (relating to traineeships) are each amended by inserting "tuition and fees and" before "such stipends".

(h) Effective October 1, 1977, section 758 (a) of such Act (relating to scholarships for first-year students of exceptional financial need) is amended by striking out "in the school year ending in the fiscal year in which such grant is made".

(i) (1) Effective October 1, 1977, the first sentence of section 771(b)(2)(C) of such Act (relating to residences in primary care) is amended by striking out "training program of such school in primary care" the second time it occurs and inserting in lieu thereof "training program of any school in primary care".

(2) Effective October 1, 1977, section 771 (b)(2)(E) of such Act (relating to termination of affiliation with medical residency training programs) is amended by striking out "in the fiscal year".

(3) Effective October 1, 1977, section 771 (b)(3)(A) of the Public Health Service Act (relating to eligibility for capitation grants) is amended by striking out "immediately before" and inserting "in".

(4) Effective October 1, 1977, section 771 (b)(3)(B) of such Act (relating to the enrollment of student of foreign schools of medicine in schools of medicine in the United States) is amended to read as follows:

"(B) No later than August 15, 1977, and August 15 of each of the next two years, the Secretary shall identify the citizens of the United States who—

"(i) before October 12, 1976—

"(I) were students in a school of medicine not in a State, or

"(II) were enrolled in programs of institutions of higher education (other than schools of osteopathy or schools of medicine of more than two years) which programs were in existence in the States before such date and which prepare students to enter the third year of schools of medicine in the States; and

"(ii) by date of the identification made under this subparagraph—

"(I) in the case of a student described in clause (i)(I), successfully completed at least two years in a school of medicine not in a State, and, in the case of a student described in clause (i)(II), successfully completed a program described in such clauses, and

"(II) successfully completed part I of the National Board of Medical Examiners' examination (or any successor to such examination).

The Secretary shall equitably apportion a number of positions among the schools of medicine in the States adequate to fill the needs of students identified in accordance with the preceding sentence.".

(j) Effective October 1, 1977, section 781 (d)(2)(C) of such Act (relating to residency program requirement) is amended by striking out "or general internal medicine" and inserting in lieu thereof ", general internal medicine, or general pediatrics".

(k) Section 789(a)(1) of such Act (relating to training in emergency medical services) is amended by striking out "and to assist in meeting the cost" and all that follows in such section and inserting in lieu thereof the following: ", to assist in meeting the cost of training (including the cost of establishing programs for the training) of physicians in emergency medicine, especially training which affords clinical experience in emergency medical services systems receiving assistance under title XII of this Act, and to assist in meeting the cost of traineeships for individuals in graduate medical education programs who are in need of the traineeships and who plan to specialize or work in the practice of emergency medicine. Traineeships provided under grants or contracts under this paragraph shall provide for tuition and fees and such stipends and allowances (including travel and subsistence expenses and dependency allowances) as the Secretary may deem necessary.".

(l) Effective October 1, 1977, section 796 (a)(4) of such Act (relating to project grant and contracts) is amended by striking out "of methods" and inserting in lieu thereof "or improvement of programs".

(m) Effective October 1, 1977, section 796 (c) of such Act (relating to eligibility for allied health special project grants and contracts) is amended (1) by striking out "or" at the end of paragraph (2), (2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; or", and (3) by adding after paragraph (3) the following new paragraph:

"(4) other public or nonprofit private entities capable, as determined by the Secretary, of carrying out projects, described in subsection (a).".

(n)(1) Effective October 1, 1977, subpart IV of part C of title VII of such Act (relating to national Health Service Corps Scholarships) is amended by adding at the end thereof the following new section:

"INDIAN HEALTH SCHOLARSHIP PROGRAM

"SEC. 757. (a) In addition to the sums authorized to be appropriated under section 756(a) to carry out the Scholarship Program, there are authorized to be appropriated $5,450,000 for the fiscal year ending September 30, 1978, $6,300,000 for the fiscal year ending September 30, 1979, $7,200,000 for the fiscal year ending September 30, 1980, and for each of the succeeding four fiscal years such sums as may be specifically authorized by an Act enacted after the date of enactment of this section, to provide scholarships under the Scholarship Program to provide physicians, osteopaths, dentists, veterinarians, nurses, optometrists, podiatrists, pharmacists, public health personnel, and allied health professionals to provide services to Indians. Such scholarships shall be designated 'Indian Health Scholarships' and shall be made in accordance with this subpart, except as provided in subsection (b).

"(b)(1) The Secretary, acting through the Indian Health Service, shall determine the individuals who shall receive the Indian Health Scholarships, shall accord priority to applicants who are Indians, and shall determine the distribution of the scholarships on the basis of the relative needs of Indians for additional services by specific health professions.

"(2) The active duty service obligation prescribed in the written contract entered into under this subpart shall be met by the recipient of an Indian Health Scholarship by service in the Indian Health Service, in a program assisted under title V of the Indian Health Care Improvement Act, or in the private practice of his profession if, as determined by the Secretary in accordance with guidelines promulgated by him, such practice is situated in a physician or other health professional shortage area and addresses the health care needs of a substantial number of Indians.

"(c) For purposes of this section, the term 'Indians' has the same meaning given that term by subsection (c) of section 4 of the Indian Health Care Improvement Act and includes individuals described in clauses (1) through (4) of that subsection.".

(2) Section 105(a) of the Indian Health Care Improvement Act is amended by striking out 'pursuant to section 104" and inserting in lieu thereof "pursuant to section 757 of the Public Health Service Act".

(o)(1) The second sentence of section 810(a) of the Public Health Service Act (relating to computation of capitation grants for nursing schools) is amended by inserting "for each fiscal year" after "shall be computed".

(2) Paragraphs (1), (2), and (3) of such section 810(a) are each amended by striking out "such year" each place it occurs and inserting in lieu thereof "such fiscal year".

(3) Sections 810(c)(1)(A), 810(c)(2)(A), and 810(c)(2)(B) of such Act (relating to requirements for nursing school capitation grants are each amended by striking out "beginning after" and inserting in lieu thereof "beginning in".

(4) Section 810(c)(1)(B) of such Act is amended by striking out "fiscal" each place it occurs and inserting in lieu thereof "school".

SEC. 308. (a) Section 202(d) of the Community Mental Health Centers Act (relating to authorizations for planning of community mental health center programs) is amended (1) by striking out "and" after "1976,", and (2) by striking out for the fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $100,000 for the fiscal year ending on September 30, 1978".

(b) Section 203(d)(1) of such Act (relating to authorizations for initial operation) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $22,775,000 for the fiscal year ending September 30, 1978".

(c) Section 204(c) of such Act (relating to authorizations for consultation and education services) is amended (1) by striking out "and" after "1976", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $15,000,000 for the fiscal year ending September 30, 1978".

(d) Section 205(c) of such Act (relating to authorizations for conversion grants) is amended (1) by striking out "and" after

"1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $22,000,000 for the fiscal year ending September 30, 1978".

(e) Section 213 of such Act (relating to authorizations for financial distress grants) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $12,000,000 for the fiscal year ending September 30, 1978,".

(f) Section 231(d) of such Act (relating to authorizations for rape prevention and control) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $5,750,000 for the fiscal year ending September 30, 1978".

(g) Section 203(e)(1)(A)(i) of such Act (relating to conversion grants) is amended by striking out "two grants" and inserting in lieu thereof "three grants".

SEC. 309. (a) Section 501 of the Social Security Act (relating to authorizations for maternal and child health and crippled children's services) is amended (1) by striking out "and" after "1972,", and (2) by striking out "and each fiscal year thereafter" and inserting in lieu thereof the following: "and for each of the next four fiscal years, and $399,864,200 for the fiscal year ending September 30, 1978, and for each fiscal year thereafter".

(b) Section 249B of the Social Security Amendments of 1972 (relating to compensation under medicaid for nursing home inspectors) is amended by striking out "June 30, 1977" and inserting in lieu thereof "September 30, 1980".

SEC. 310. (a) Section 602(a)(5) of Public Law 94-63 (relating to authorizations for home health services) is amended by inserting atfer "1977" the following: ", and $8,000,000 for the fiscal year ending September 30, 1978,".

(b) Section 602(b)(4) of such Public Law (relating to authorizations for home health services training) is amended (1) by striking out "and" after "1976,", and (2) by inserting after "1977" the following: ", and $4,000,000 for the fiscal year ending September 30, 1978,".

SEC. 311. (a)(1) Section 303(a) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 (relating to State plans) is amended by adding after and below paragraph (16) the following:

"Each State plan shall pertain to the twelve-month period of the State fiscal year which commences in the calendar year in which the plan is submitted and shall be submitted not later than July 15 of each calendar year.".

(2) Section 303(b) of such Act is amended by adding at the end the following: "A State plan submitted under subsection (a) may also contain provisions relating to drug abuse or mental health. The Secretary, acting through the National Institute on Alcohol Abuse and Alcoholism, shall establish procedures by which the Institute shall review each State plan submitted under subsection (a) and under which it shall complete its review of each such plan not later than September 15 of the calendar year in which the plan is submitted or not later than sixty days after the plan is received by the Institute, whichever is later.".

(3) The second sentence of section 409(e) of the Drug Abuse Office and Treatment Act of 1972 (relating to State plans) is amended by striking out "commencing October 1 of the calendar year" and inserting in lieu thereof "of the State fiscal year which commences in the calendar year".

(b)(1) The first sentence of section 302(a) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 (relating to allotments) is amended by striking out "shall be less than $200,000." and inserting in lieu thereof the following: "shall, except as provided in paragraph (2), be less than the greater of (A) $200,000, or (B) the amount of such State's allotment for the fiscal year ending June 30, 1976, unless the amount appropriated under section 301 for allotments for the fiscal year ending June 30, 1976, was greater than the amount appropriated for the fiscal year for which the minimum allotment determination is being made, in which case the minimum allotment prescribed by this clause shall be an amount which bears the same ratio to the amount allotted for the fiscal year ending June 30, 1976, as the amount appropriated for the fiscal year for which the minimum allotment determination is being made bears to the amount appropriated for the fiscal year ending June 30, 1976.".

(2) Section 302(a) of such Act is further amended (1) by inserting "(1)" after "(a)" and by adding at the end the following:

"(2) If the amount appropriated under section 301 for any fiscal year is less than the amount required to make for such fiscal year the minimum allotment prescribed by paragraph (1) to each State with an approved State plan, the minimum allotment for such fiscal year for a State with an approved State plan shall be an amount which bears the same ratio to the minimum allotment prescribed by paragraph (1) for such State as the amount appropriated under section 301 for such fiscal year bears to the amount of appropriations required to make the minimum allotment, as so prescribed, to each State with an approved State plan.".

(c) Section 311(c)(2)(B)(i) of such Act (relating to review of applications) is amended by striking out "his" and inserting in lieu thereof "its".

(d) The second sentence of section 202 of the Drug Abuse Office and Treatment Act of 1972 (relating to the Director of the Office of Drug Abuse Policy) is amended by striking out "any other department or agency of the United States" and inserting in lieu thereof "any department or agency of the United States engaged in any drug traffic prevention function (as defined in section 103)".

(e) Section 408(b)(2) of the Health Professions Education Assistance Act of 1976 (Public Law 94-484) (relating to effective date of revision of National Health Service Corps Scholarship Program) is amended—

(1) by striking out "Except as provided in subparagraph (B)" in subparagraph (A) and inserting in lieu thereof "Except as provided in subparagraphs (B) and (C)"; and

(2) by amending subparagraph (C) to read as follows:

"(C) If an individual received a scholarship under the Public Health and National Health Service Corps Scholarship Program for any school year ending before September 30, 1977, periods of internship or residency served by such individual in a facility of the National Health Service Corps or other facility of the Public Health Service shall be creditable in satisfying such individual's service obligation incurred under that Program for such scholarship or for any scholarship received under the National Health Service Corps Scholarship Program for any subsequent school year.".

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, will the gentleman explain why this unanimous-consent request is needed?

Mr. STAGGERS. I would be very happy to. The House passed three bills, H.R. 4974, H.R. 4975, and H.R. 4976. They are all related bills.

When they went over to the Senate, the Senate had only one bill. They passed that bill, and they put the two bills we had on to it as amendments, so we wanted to concur in those amendments and appoint conferees tonight.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, the gentleman can assure us that these three bills have been well considered by the House and there are no surprises?

Mr. STAGGERS. That is right.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent that the House insist upon the House amendment to the Senate amendment to the text of the bill and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia? The Chair hears none, and appoints the following conferees: Messrs. STAGGERS, ROGERS, SATTERFIELD, CARTER, and BROYHILL.

ESSAY "THE FUTURE OF AMERICAN POLITICS" PREPARED BY HIGH SCHOOL STUDENT KIM D. MEYER OF JONESTOWN, PA.

(Mr. ERTEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ERTEL. Mr. Speaker, I would like to call to the attention of my House colleagues today an essay written by a student in my congressional district on "The Future of American Politics." This essay was prepared by Kim D. Meyer, of R.D. No. 1, Jonestown, Pa., a student at Northern Lebanon High School. Kim is the daughter of Samuel Meyer.

Kim's prize-winning essay was among the entries in the Marlin L. Gahres American Legion Post No. 883 essay contest.

I commend Kim for her effort and urge my colleagues to read this prediction of the future of American politics:

THE FUTURE OF AMERICAN POLITICS

When beginning this paper, the future of American politics seemed to me to be in grave danger. The scandals on Capitol Hill proved to be damaging to the American public, and the belief in our government was diminishing. The Watergate and Sex scandals seemed to be overplayed at intermittent periods of time. In reality the overplaying was enlightening the public about the misdemeanor of some of the most prominent men in our politics. Investigation of their crimes is now helping to remove incompetent people from the taxpayers' payroll. The discoveries unveiled the deceitfulness of some of our trusted politicians, thereby disclosing the real meaning of our democracy. The securities have been tightened, lessening the possibility of future dubious endeavors. Our politics are gradually becoming purer and purer. No other political system surpasses that of the United States.

The prime minister of Japan truly enlightened me on the subject of our government; his name is Takeo Miki. Prime Minister Miki said that our way of life truly impressed him. He related his feelings by comparing the Depression of the thirties to future events in our country. When he traveled throughout the world during the Depression, he received the impression that the Americans had confidence in future prosperity. He said that the people strived to better their lives and that our system is most difficult and rewarding. I agree with what Prime Minister Miki stated. He said, "Yes, by making common cause of your unflagging pursuit of individual liberty, dignity and fulfillment, you Americans have forged out of your diversity a unity and power unrivaled in the world." No matter how many heinous confrontations we may have during our American future, we shall resolve them.

The Watergate scandal was truly a temporary setback of the United States' political system. Other countries probably do not comprehend how one of our top leaders could be lowered to a mere commoner. Although former President Nixon was not proven guilty in a court of law, he did resign. The resignation of Nixon changed our democracy into a more truthful one. Therefore, the Watergate scandal and the resignation of Nixon will remain a reference of our true democracy in the future of American politics.

Our foreign policy enhances our superb democracy because we are permitted to travel to any country in the entire world. Our citizens do not have a fear of being shot when crossing our country's boundary. The Secretary of State and the President travel to meet with foreign diplomats, thereby diminishing a threat of war. The future of American politics allows our representatives to communicate with communistic countries, relaying our thoughts of capitalism to their leaders. If we continue to communicate with foreign countries, our American politicians may discuss our means of enforcing governmental laws with them. If a country is communistic, hopefully our politicians will relay the message to us that our country's political system is fantastic! In our country we have our own individual rights; in communistic countries they have virtually no rights. Our political system will protect us from a "kangaroo court" or preserve our "right to remain silent." We may better appreciate our politically free system if we realize how unjust some political systems are in the world. We vote for the best and most qualified person rather than a single nomination for a particular office. In other words, our elections are not decided before the actual voting has occurred.

As a country ruled by its own people, rather than a dictator or fascist, we are permitted to amend our laws. If people feel a particular law is unjust, the law may be taken to the Supreme Court. The Supreme Court will decide a ruling about the law, and if the nine justices consider the law unconstitutional, it will be amended. In a communistic country one may be considered a radical and placed in jail if he were to slander the country's law.

Our capitalistic politics aids our economic needs. Our people are competitive and strive for perfection. Our products are carefully produced for marketing. We have numerous variations of products from which one may choose. If, for example, Brand A is better than Brand B, Brand B will improve the quality of its product. How untrue this situation is in many countries of the world where variety plays no role in consumer economics!

I do believe our forefathers were extremely intelligent people, and I believe our political system will continue to prosper as long as we have intelligent leaders. Our generation has those intelligent people, and we shall continue to support our system. We shall strive to better our system in every possible way. Our system has the capacity to remain number one in the world because we are free. We govern ourselves, support ourselves, and discipline ourselves in everyday situations. I am proud to be a part of that system because we are unique. We are the youngest country; however, we have the oldest written constitution and it works. We shall remain a democracy, and that same democratic structure will continue to flourish.

THE 150TH BIRTHDAY OF CLAY, N.Y.

(Mr. HANLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HANLEY. Mr. Speaker, I would like to take a moment to bring attention to an historic occasion for some residents of New York's 32d Congressional District. They are celebrating a birthday, the 150th birthday, in fact, of the town of Clay.

The township of Clay is centrally located on the northern edge of Onondaga County on the Oneida River, and bordered on the west by the Seneca River. The area which the town of Clay now encompasses was the scene of much early New York State history. Historical markers point out that Three Rivers was once the site of numerous Indian councils, and thus served as a meeting place for Indians, French, and British traders, explorers and military officers alike. The Oak Orchard Reef and Caughdenoy Reef areas were prime fishing grounds and fording spots. An extensive Indian burial ground was, at one time, located at Oak Orchard.

After the American Revolution, this area, along with the township of Cicero, became part of a military land grant made to Revolutionary War veterans. Much of Clay's early history is incorporated in the history of the town of Cicero, of which it was a part until 1827, when the western portion of the town of Cicero, along with the easternmost part of the town of Lysander, became the new town of Clay. The township was named in honor of the popular statesman and "great compromiser" Henry Clay.

The first white settler in the town of Clay was Patrick McGee, who built a log cabin at Three Rivers in 1793. Other settlers followed over the next decade. In 1813, a family of Palatine Germans settled in the area near the present Caughdenoy and Ver Planck Roads. Because of their native German language, this area was known for some time as "Dutch settlement." In 1824, these families organized the first church in the town, a Lutheran congregation, and erected a church in the village of Clay.

The village of Clay was known for a number of years as Cigarville, because of its local industry, Coughtry's and Cullum's cigar factories. The tobacco for these factories was grown on surrounding farms.

By the mid-1800's, many small communities were flourishing in the town of Clay, with shops, businesses, churches and post offices serving the surrounding farm area.

Today, the town of Clay encompasses a large residential area. A major portion of north Syracuse is in the town, as are many of the growing residential areas, such as Cherry Heights, Hollyrood, and Oak Ridge. Clay has been evolving from a primarily rural and agricultural area to a suburban one in which are located many industries and businesses, shopping centers, schools, churches, parks and residential dwellings.

In its history of 150 years, the population of the town of Clay has grown from 700 to about 50,000. It is now one of the fastest growing townships in New York State. I am certain that my colleagues join me in sending our warmest wishes and best regards to the people of the town of Clay as they celebrate their sesquicentennial.

FLOOR REMARKS RE SSI BENEFITS BILL

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PEASE. Mr. Speaker, current Federal law allows aliens to collect supplemental security income—SSI—benefits after being in the United States just 30 days, without ever having contributed significanty to the American economy or paid taxes. The possibility exists that some aliens have come here to take advantage of this loophole in the law and to collect benefits.

A recent Supreme Court ruling has made it possible for Congress to correct this oversight and to curtail this misuse of SSI funds. On June 1, 1976, the Supreme Court held that, in effect, the Congress has no constitutional duty to provide all aliens with the welfare benefits provided to U.S. citizens—Mathews versus Diaz et al. The Court also ruled that a residency requirement for aliens is permissible in determining eligibility for welfare benefits. Prior to the 1976 ruling, no action had been taken to close the SSI loophole because a 1971 court ruling held that State laws establishing residency requirements violated the equal protection clause of the Constitution and encroached upon exclusive Federal jurisdiction over immigration policy.

I am introducing a bill to close this loophole in the SSI program and to respond to U.S. citizens who are concerned about "instant welfare" for aliens. My bill has two main provisions that make it effective and enforceable.

First, my bill restricts payment of SSI benefits to U.S. citizens and to legally admitted permanent resident aliens who have lived in the United States for at least 5 years.

Second, my bill makes the financial obligation that a sponsor assumes on behalf of an incoming alien in an affidavit of support a legal obligation—in the sense of a binding contract—and not just a moral obligation as it is in the current law.

The legal obligation of the sponsor to financially support an alien would be limited to the first 5 years the alien is in the United States. If the alien becomes a public charge during that time, the sponsor would have a legal obligation to provide a minimum standard of living for the alien. The minimum standard of living would be determined by calculating 125 percent of the Census Bureau poverty threshold appropriate to the alien's marital and family status.

To enforce this legal obligation, my bill provides that the sponsor shall be subject to being sued in a civil suit in Federal district court. Such civil suits could be filed by district attorneys acting on behalf of the U.S. Attorney General or by the alien himself. This enforcement approach would minimize the need to hire additional personnel to track down SSI abuses. It also takes into account the limited resources of the hard-pressed Immigration and Naturalization Service.

My bill is an evenhanded approach at putting some statutory controls on escalating welfare costs, particularly in the SSI program.

Thank you.

PRESIDENT'S ENERGY PROGRAM

(Mr. SKUBITZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SKUBITZ. Mr. Speaker, I would like to share with my colleagues the following letter regarding the President's energy program. While the letter is admittedly rather simplistic in its approach to the energy question, I, nevertheless, feel it is worthy of the consideration of the President and the Members of this body:

DEAR CONGRESSMAN JOE: I'm just an old dirt farmer, an old clod trying to make a living as best as I can and pay my taxes. Like Will rogers, all I know is what I read in the newspaper. What I been readin' lately about the President's energy program just don't make a lick of sense to me.

Now Joe, some people in this country are gonna conserve energy—and some ain't. I refer to those two groups as "them who will" and "them who won't."

As I understand old Mr. Carter's declamation he ain't got no beef with "them who will" conserve, it's them who won't" conserve thats got his goat.

So what does our President propose to do about that latter group of folks who ain't patriotic enough or poor enough to change their evil ways? He's a gonna ask you Congressmen to let him put a 5 cent a gallon tax on gasoline.

Now I ask you Joe—what is that going to accomplish? The poor people ain't bought no gas for so long that they can't remember what to do with it, anyway—and the rest of middle America is a fighten with one another to be the first in line to pay $5.60 a pound for coffee and 60 cents a pack for cigarettes. You think 5 cents a gallon is gonna stop them from buyin gas—why it will be six months before they even discover the price has gone up.

If yu wanna save gas, Joe, I'll tell you and Mr. Carter how to save gas—make the tax 50 cents a gallon—or a dollar a gallon on gas. That will make "them who won't conserve" pay attention.

Now, while I know I ain't as smart as you fellas in Congress, I do realize that my plan needs what you all in Washington call an "exclusion for essential employment related petroleum acquisition and consumption by end users". We on the farm call that a "don't tax the tractor gas clause"—but the idea is the same. The plan needs some way to keep from taxing the gas us folks really need. You know Joe, gas to go to work, gas for taxi drivers, gas for the farmers equipment, and other gas used for necessary purposes is what I'm gettin at. Well, excluding that necessary gas wouldn't be hard to do.

You fellows back in Washington had you an allowment system fixed up for gasoline during the Big War that calculated how much gas us folks needed, and it worked just fine. Surely you haven't forgotten all them Department of Agriculture County War Boards and the Office of Defense Transport, have you Joe?

Why old Mr. Roosevelt and his boys had their system down to where we was all issued "Certificates of War Necessity" that was based on the necessary driving of all us civilians. They had them certificates all made up to cover trucks, b[illegible]es, taxis, rent-o-cars, official government cars, farm trucks and equipment, and regular folks' cars for both business and personal needs.

Once you know how much gas is consumed out of necessity you call that the base amount and all gas above that is taxable. When you go to the gas station you would present your little government gas card (that looks just like the card I use now at Ernie's Skelly to pay for my gas). When Ernie fills out my purchase slip he gives me the receipt which I would save. Every 3 months I would send all my receipts from Ernie's Skelly to the Revenoors. The Revenoors would calculate from my "basic necessity allocation" how much I would get back from all the 50 cent a gallon taxes I paid to Ernie. Of course when Ernie collected my 50 cents each time he would send it to Washington.

Now Joe, I know what your a-gona say. "It's too much trouble to use a little government gas card and keep track of the tax." Joe, we all use little plastic cards at Ernie's Skelly now. We don't get aggravated—Ernie don't get aggravated—and all Ernie would have to do different is make darn sure he got our license tag number on our receipt with our name so nobody would cheat.

If anybody tried to cheat I'd throw the book at them. If energy is that scarce then we had better enforce the law. Also, if poor people need their gas tax money returned before the end of the year, they could file forms at the county court house to request it. In fact, this just might be a better way to do some of that there official record keeping. You could let the count, or the state keep 5 or 10 cents a gollon for taking care of the Durden.

I don't know, Joe, it just seems to me that if you Congressmen and Mr. Carter are serious about saving energy, you ought to approach it right. But dern it, Joe, don't try to put some half-baked plan into effect over night! Think it through and get your ducks in order before you start makin any of the O-fficial pronouncements.

Joe, you can take this letter for what it's worth but I just wanted to yet you know how I feel.

Sincerely,

BILL "SPUD" CABBAGEHEAD.

OPPOSE EXPORT OF ADVANCED CYBER 76 COMPUTER TO THE SOVIETS

The SPEAKER pro tempore (Mr. DANIELSON). Under a previous order of the House, the gentleman from Ohio (Mr. ASHBROOK) is recognized for 15 minutes.

Mr. ASHBROOK. Mr. Speaker, within the next 60 days a decision on selling the Cyber 76 computer to the Soviet Union is expected. A decision to export this advanced computer to the Soviet Union would be disastrous.

The argument for selling the computer is that it will be only used for weather forecasting purposes. In the United States this computer is being used by the Pentagon, the U.S. Air Force, National Security Agency, and NASA.

Cyber 76 is considered one of the most advanced computers in the world. It has been described as serving as the "brain center" of the Pentagon and the other agencies I previously discussed.

The Soviet Union has been hampered in its military development by a lack of advanced computer technology. Soviet computer technology is behind that of the West. The export of the Cyber 76 computer would give the Soviets a quantum leap in this area.

I am contacting the President's national security adviser and the Secretary of Commerce expressing my opposition to exporting the Cyber 76. Transfer of this computer to the Soviets would be to give military assistance to the Soviets. Such technology exports work against our Nation's basic security.

At this point I include the text of two articles on the sale of this computer to the Soviets:

[From Human Events, Feb. 19, 1977]

WILL BRZEZINSKI GIVE SOVIETS ADVANCED COMPUTER?

Jimmy Carter's national security adviser, Zbigniew Brzezinski, is facing a major test that could affect the future of detente: will he reassess the Kissinger policy of transferring to the Soviet bloc sophisticated technology with critical, strategic implications?

What's particularly worrying military and intelligence officials is whether Control Data Corp. will be permitted to deliver to the Soviet Union the world's largest and most sophisticated computer, the Cyber 76. Control Data has closed a tentative deal with Moscow, and the application for an export license is pending before the Commerce Department. But Commerce won't give the go-ahead unless the National Security Council—where Brzezinski, as Carter's personal aide, plays a key role—gives a nod of approval.

There are several other applications by Control Data for the sale of advanced computers to Communist nations, but none of the computers involved can match the strategic potential of Cyber 76.

Cyber 76, according to Miles Costick, an expert on U.S. computer policy, is "a very high-speed, large volume, fourth generation scientific computer which processes a phenomenal 100 million instructions per second." He stresses it "is at least 15 years ahead of anything that the Communist country is able to produce." Only two dozen of these computers exist, with the bulk of them installed in such sensitive military and military-related agencies as the Pentagon, the U.S. Air Force, the Atomic Energy Commission, NASA and the National Security Agency.

Last year, Costick informed Human Events, former President Ford vetoed the extension of the Export Administration Act, leaving the country without effective controls over strategic exports to the Communists. This meant that all significant restrictions on Soviet bloc purchases had collapsed. Ford, however, reimposed the controls under authority vested in him by the War Powers Act. The Executive Order gave the National Security Council a predominant role in exercising authority over strategic exports.

But the question is, will Brzezinski continue in the Ford-Kissinger manner? On September 30 of last year, notes Costick, President Ford and his National Security Council, with Lt. Gen. Brent Scowcroft then fulfilling the Brzezinski role, discretely approved the sale of Control Data's Cyber 73 computer system to the USSR. The value of this transaction to Control Data was about $6 million, but to the Soviets it meant "a 10-year leap in computer technology," says Costick. The stated purpose of the computer sale was the improvement of Soviet oil exploration.

On October 12, the National Security Council also approved the sale of two Control Data Cyber 172 computer systems to Red China, with a value of $6 million. Through acquisition of the Cyber 172's, the Chinese Communists, according to Costick, received computers 15 to 20 years ahead of their own. Supposedly, the computer sale to Red China was to help enhance the detection of both oil and earthquakes.

The Energy Research and Development Administration (ERDA) and the Pentagon objected to the sale of both the Cyber 73 and the Cyber 172 on the grounds that they were suitable for nuclear weapons calculations, for anti-submarine warfare, for large phased-array radar to track enemy ICBMs and for anti-ballistic missile systems.

A number of U.S. government officials, says Costick, "confirmed that Dr. Kissinger and his assistant at the State Department, Winston Lord, prevailed over the opposition at Pentagon and ERDA."

"If there were no potential military applications," noted one Commerce Department official, "there would have been no reason to take a full year to review the sales and no reason to impose safeguards on the use of the equipment."

There is a general consensus among the experts, however, that there are no effective safeguards so far as application of computers is concerned. Today, the U.S. Department of Defense deploys about 9,000 so-called general purpose computers for military purposes. The same type of computers are being used in a wide variety of civil applications from R&D in industry, to crime control and psychiatry.

"Obviously," says Costick, "the national security implications of this trade are enormous." And the big question today is: what will Brzezinski do? If the Soviets get the Cyber 76, there will be no question as to what direction the Carter Administration intends to lead this country.

[From the Birmingham News, Feb. 13, 1977]

U.S. COMPANIES WANT TO SELL COMPUTERS TO SOVIETS

(By Miles Costick)

(EDITOR'S NOTE.—A congressional consultant, Miles Costick is the author of the book The Economics of Detente and of the forthcoming study, The U.S. Soviet Computer Capabilities. The following article was written especially for The Birmingham News.)

Jimmy Carter's national security advisor, Zbigniew Brzezinski, has said that detente must be reciprocal in order to be enduring. But what remains to be seen is whether the Carter administration will also reassess the Kissinger policy of transferring to the Soviets advanced technology of critical military importance.

A test of this would be whether Control Data Corp. is permitted to deliver to the Soviet Union the world's largest strategic computer the Cyber 76. The deal has been closed and the export license application is pending before the Commerce Dept. There are also several additional pending applications for sale of military computers to the Communist governments on behalf of Control Data, IBM, UNIVAC and Honeywell. None of the computers involved, however, can match the strategic potential of CDC's Cyber 76.

Cyber is a sensitive topic. It is a very high speed, large volume, advanced scientific computer which processes a phenomenal 100 million instructions per second, and has a memory storage capacity at least 15 years ahead of anything that a Communist computer maker is able to construct. Only about two dozens of such installations even exist. Typical installations: The Pentagon, U.S. Air Force, the Atomic Energy Commission, NASA, and the top secret National Security Agency.

Last year President Ford vetoed the extension of the Export Administration Act leaving the country without effective controls over export of strategic items to the Communists. This meant that all restrictions on Soviet bloc purchases in the U.S. have lapsed. Mr. Ford, however, had issued an executive order reimposing controls on exports under authority vested in him by the War Powers Act. The executive order placed the National Security Council in a position of authority to permit or decline strategic exports to the communists.

The select informed few knew what most had missed: For the executive order to become an effective barrier to export of strategic goods, the President would have to designate the recipient country as an "enemy country." Obviously under Henry Kissinger's detente, the President could hardly declare the Soviet Union or Red China an enemy.

NUMEROUS APPLICATIONS

In the order tube, ready to pop out when the cap was removed on Oct. 1, 1976 were numerous applications for export of strategic items of critical military significance. The most important were the applications for export of military computer systems.

On Sept. 30, 1976 President Ford and his National Security Council under Kissinger appointee Lt. Gen. Brent Scowcroft, in strict discretion, have approved the sale of the Control Data's Cyber 73 computer system to the USSR. The value of the transaction to CDC was about $6 million and to the Soviets about a 10-year leap in computer technology plus a new acquired strategic capacity.

On Oct. 12, the National Security Council approved the sale of two CDC Cyber 172 computer systems to Red China. The announced value of transaction was $6 million. Through acquisition of Cyber 172 computers the Chinese communists gained capabilities which they have lacked before, since their computer technology is about 15 to 20 years behind that of the United States.

The stated purpose of computer sales to Red China was oil exploration and earthquake detection.

An inquiry revealed that the stated purpose of computer sales to the Soviet Union was oil exploration.

However, the Pentagon and the Energy Research and Development Administration (ERDA) objected to the sale of computers on the grounds that both systems—the Cyber 73 and Cyber 172—were suitable for nuclear weapons calculations, for anti-submarine warfare, for large phased-array radar to track enemy ICBMs and for other military applications.

OBJECTIONS OVERRULED

A number of U.S. officials confirmed that Dr. Kissinger and his assistant at the State Department, Winston Lord, prevailed over the opposition of the Pentagon and ERDA.

One Commerce Dept. official commented, "If there were no potential military applications there would have been no reason to take a full year to review the sale . . . of the equipment."

Today, the U.S. Defense Dept. deploys about 9,000 of the so-called general purpose computers for military purposes. The same type of computers could be used in a wide variety of civil applications from research and development in industry to crime control.

Obviously the national security implications of this trade are enormous. Concern in the United States had led the Defense Department's Science Board task force under J. Fred Bucy of Texas Instruments to recommend restrictions on the transfer of strategic technology to the Communist superpowers and their satellites.

Six high-technology trade associations, however, through their spokesmen, have warned Congress against permitting the Defense Department to control transfer of strategic technology. "In a civilian government such as ours, the control and administration must reside apart from the military," demanded Peter F. McCloskey, president of the Computer and Business Equipment Manufacturers' Association.

It seems that McCloskey and his friends from the industry agree with William Norris of Control Data who stated that, "Our biggest problem isn't the Soviets, its the damn Defense Department."

Businessmen should remember Lenin's words that when it was time to hang the world's capitalists, they would trip over each other in their eagerness to sell the Communists the necessary ropes.

UNIVERSAL VOTER REGISTRATION—A PANDORA'S BOX OF FRAUD AND ABUSE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. BURKE) is recognized for 15 minutes.

Mr. BURKE of Florida. Mr. Speaker, a concerted effort is being made to push through Congress H.R. 5400—the Instant Voter Registration Act—which would allow individuals to register and vote on the same day in Federal elections.

At first glance, this might sound like a good way to increase the number of voters participating in the electoral process. However, a closer look reveals that this approach is both unnecessary and impractical, and it does in fact contain a great potential for fraud and abuse.

The first question I would like to ask is whether or not people refuse to vote because of the difficulties involved in registration? I submit that the evidence clearly says no!

In a 1974 study, the Bureau of Census reported that out of the 31.9 percent who failed to register only 3.8 percent gave as the reason "unable to register." The rest said they were either "not interested" or they "dislike politics."

Mr. Speaker, I do not believe that our election process would be improved by making those who were "not interested" or who "disliked politics" to vote. To compel people to vote would be to undermine free participation in our demo-

cratic process. It would threaten, not help, our system.

Perhaps we should remember that in the Soviet Union over 95 percent of the people vote during their elections, yet, can we say that they have a more democratic system of government simply because of the fact that so many people participate? I do not and I am sure my colleagues do not think so. In fact, quite the opposite is the case!

Since 1900 there have been many attempts to broaden voter participation. Poll taxes, literary tests, sex and age requirements, and so forth, have been lowered or removed altogether. And yet, voter participation has declined from 73 percent in 1900 to 54 percent in 1976. There is no reason to believe that further relaxation of requirements will make the situation any better .

In fact, the 10 States in which it is the hardest to register and vote have voter turnouts roughly equivalent to the average turnout for the entire country!

Mr. Speaker, the plain fact is that some people just do not want to vote! I do not think there is any way a simplified voter registration is going to change apathy, but, it can create the potential for more fraud and abuse.

If people were given the opportunity to register and vote on the same day, I think they would do so. But, this would not lead to more intelligent voting nor make it any less inconvenient. I believe it would instead create such longer lines at the polling places that many would discourage many previously registered voters who might leave the polls without voting because they did not have the time to stand in line. I further believe that the natural reaction of election officials would be to try to hurry with the result that many would be allowed to vote without being properly checked. Instead of improving the system, universal voter registration could create a burden impossible to administer.

I also believe that this legislation would increase the role of the Federal Government in the election process at the expense of the State and local officials. This expansion of Federal power would come at a time when the American people are becoming increasingly skeptical about Government interference in their lives.

Another danger of which I think we should be aware comes from the added leverage given to groups trained to organize and turn out masses of people through pressure and intimidation. At the very last minute of an election, a group of well-trained individuals could force the results of an election and thereby rob the American people of their own decision.

Mr. Speaker, I am also concerned that last minute political smears could bring out an emotional reaction bringing large numbers of voters to the polls on the basis of distorted facts.

In summing up the pros and cons of H.R. 5400, I do not believe that such instant "on site" voting will result in a substantially increased number of voters coming to the polls. I believe that it will instead open up a pandora's box of fraud and abuse with potentially disasterous consequences for the American people. It is for this reason that I oppose this legislation and will vote against it when it comes to the floor for a vote. I urge my colleagues to join me and to defeat H.R. 5400.

MOTHER SHOULD NOT LET CHILDREN SLEEP IN CHEMICALLY TREATED SLEEPWEAR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. COLLINS) is recognized for 30 minutes.

Mr. COLLINS of Texas. Mr. Speaker, mothers of America, take any children's sleepwear garments that you have bought since 1971 and throw them in the trash can.

After sitting in these most enlightening hearings this morning, I immediately came back to my office and called my daughters. I wanted to be sure that my grandchildren were not sleeping in any Government-mandated cancerous pajamas.

For the past 7 years sleepwear manufacturers have been mandated, by Government decree, to make sleeping clothes fireproof by using chemicals. Now there is proof of what many of us have suspected for years—that these chemicals have a cancerous effect on children via absorption through the skin.

The original purpose of this inflammable fabrics law was to prevent the estimated 500 deaths of children each year from fabric fires. It is my understanding that last year this was cut in half, so they had been able to save 250 children. At the same time, over 50 million children have received this cancerous insemination, which cannot be measured in terms of mortality for over 20 years, but according to estimates, may eventually result in 500,000 to 5 million additional cases of cancer.

This morning I noted that very few people in the conference room were smoking cigarettes. It seems to be proven that tobacco has a cancer-causing potential, but we allow Americans the option of smoking or not smoking. With this sleepwear we have mandated that all children must be in it. Chairman Moss of our Oversight Committee is taking an aggressive position in following up this investigation.

I want to thank Dr. Robert Harris and the Environmental Defense Fund for their sustained fight in bringing this matter to the public's attention. I was also impressed today with Dr. Kingsley Kay from the Mount Sinai School of Medicine and Dr. Bruce Ames, a professor at the University of California at Berkeley.

Dr. Kay presented convincing evidence of the cancerous effects of the chemical. Dr. Kay has been telling this to the Consumer Product Safety Commission for years and has been ignored.

Dr. Ames spoke in plain commonsense language that left me with one thought in my mind—to be sure that my grandchildren never sleep in this type of pajamas again. You will be interested in knowing that Dr. Ames buys his children's pajamas abroad. Dr. Harris of the EDF has his baby in hand-me-downs that were made before we mandated these homicide jackets for children.

One factor that was interesting was Dr. Ames' conclusion that most cancer comes from the environment. I believe he is absolutely correct. To think that Congress has mandated this atrocity on America is staggering. This country has more Government than it needs, more Government than it wants and more Government than it can afford. Congress makes you suffer while you are awake, and with this Flammable Fabrics Act they make children suffer while they sleep.

At the time the bill was passed there was a fight about sampling. Many of us insisted on having extensive sampling on any product or any chemical before it was mandated. However, the intellectual majority vote prevailed as they demanded full compliance on theory despite the lack of adequate testing, and required that all regulations be promulgated immediately.

In the hearings, expert authorities repeated over and over that washing these treated pajamas or nightgowns 50 times still does not clear the chemicals from the cloth. I recommend to every mother in America who has a child between 1 and 14 that she take any sleepwear she bought in the past few years and throw it in the trash can. They can buy any natural cloth that they choose at a fabric store, but I would recommend pure cotton. Sit down at the sewing machine and make your children some safe, usable garments. Adults are not required to sleep in this material, so an alternative is to buy adult sleepwear and trim it down to size.

I have called on the Chairman of the Consumer Safety Commission to check on the staff members of the Consumer Product Safety Commission to see if they were negligent in promulgating these rules. For years I have contacted the CPSC chairman on this subject, but have always gotten pages of double talk. One fear that I had about the garments was the fact that the cloth did not breathe and that all the skin would absorb was the texture of this impregnated fabric. Now the results are in and we find that the Government actually was mandating an impregnated fabric of carcinogenic material.

It seems like every week we have a new plan to do something for the people in this country on the assumption that Congress knows all the answers and the American people are a bunch of idiots. This country was better off when we had less Government and more freedom of choice.

Next week we have a bill coming up on summer camp safety. By the time all of these camp regulations are adopted, it would close the church camps, the Y camps; it will mean that only rich children can go to the camps that can afford the contraptions we require. Yet, I wonder why we should approve this camp bill when all statistics prove that a child

is safer in summer camp than he is in his own home.

Right now we are moving to insulate the homes of America. In our Energy Committee hearings today it was brought out that asbestos and other insulation items have a tremendously hazardous potential. Before we start mandating materials this time, let us make a full review of the health impact on America first.

The industry of America did not ask for this type of sleepwear, but they were forced to make the garments this way. Now they are caught with a tremendous inventory of unusable cloth and garments. With all of the class actions that Congress has legislated, the American people may consider suing Congressmen who mandated these cancer induction regulations.

A doctor from my home area has been very much concerned about the skin irritations that have developed since this mandated sleepwear came on the market. Dr. William J. Rea has given us case studies which were passed on to the Consumer Product Safety Commission and all he has gotten back have been generalized answers. Yet, when the doctor had these children wear natural cotton fabrics, they were all right. Let us put all of America's children back into natural cotton or other good solid fabrics and give them a chance to grow up for a healthy future.

As we sat in the Sam Rayburn Building in these hearings, I remember the great proverb that Mr. Sam always said, "When in doubt, don't." America has plenty of doubt about this sleepwear. My recommendation to the parents of America is do not let your children sleep in this chemically treated material 1 night longer.

THE DAVIS-BACON ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. HAGEDORN) is recognized for 15 minutes.

Mr. HAGEDORN. Mr. Speaker, as dubious are the premises of the Davis-Bacon Act, it has been the administration of this shop-worn act that has stirred the greatest controversy over the years. Had the Department of Labor, through its regulations and enforcement efforts, simply attempted to determine as accurately as possible actual area "prevailing wages," I believe that most of the critics of the act would have learned to live with it—albeit uncomfortably.

This has not been the posture of the Labor Department, however. Rather, they have seized upon virtually every available opportunity to reinterpret the act to justify higher and higher "prevailing wage" determinations. A relatively conservative estimate was made by the General Accounting Office that inaccurate determinations by the Labor Department on Davis-Bacon projects resulted in increased labor costs of 5 to 15 percent.

Inaccurate determinations caused by sheer work volume—largely self-imposed, and attributable to time constraints and normal human error must be distinguished from inaccurate determinations which are the necessary result of DOL regulations and administrative actions.

Perhaps the best illustration of the latter is the Department's 30-percent rule. The rule is an important aspect of wage rate administration and has been found in various studies to be responsible for a majority of DOL wage determinations. Once the Department has completed the wage surveys that are required of it, the "prevailing wage" is determined, in the first instance, by any wage rate received by at least 30 percent of the workers in a particular classification. Only in the event that no such wage rate is identified will the simple weighted average of all appropriate wage rates be considered.

The 30 percent rule has been adopted despite the complete absence of a specific legislative basis for doing this. This simple egect is that, in any area where unions have organized 30 percent or more of the workers, the negotiated wage scale will almost automatically be adopted. This is particularly true in light of the fact that DOL applies this rule only where the wages are identical to the last cent. In the absence of a collective bargaining agreement, it is extremely unlikely that such a concentration of workers will be receiving the identical rate at any one time.

Thus, given a hypothetical situation where 30 percent of the work force is organized and earning $9 per hour, while the remaining 70 percent are evenly divided between laborers earning $8, $8.02, and $8.03 per hour. the "prevailing" rate will automatically be set at $9 per hour, a figure substantially higher than 70 percent of the work force. Even when properly applied, the 30 percent rule results in substantially higher public construction costs than could reasonably be expected under the Davis-Bacon Act. The General Accounting Office concludes that—

> The Department's application of the so-called 30% rule . . . as a method of determining the prevailing wage rates in an area has led to some unrealistic wage determinations and to inequities among the contractors and workers affected thereby. We believe that these cases show a need for a more equitable rule.

To assure my colleagues that the Labor Department is constantly on guard to discover new ways to add to the costs of public construction, I would like to insert at this point a brief memorandum from the Associated General Contractors of America noting the latest trends in Davis-Bacon administration. Each of them seems designed with one overriding goal in mind: To insure that, wherever and whenever possible, public construction costs be established on the basis of the highest wage rates identified in an area:

1. BACKDATING THE NEW UNION RATE TO OLD PROJECTS FOR WAGE SURVEY PURPOSES

The Davis-Bacon Administration has adopted a new technique of backdating the new union rate to all old union projects and payrolls that had been using the old lower union rate. If 30 carpenters were paid $8.00 an hour in an area last December and 10 were paid $10.00 an hour on another project in the area in April, Davis-Bacon would backdate the $10.00 to the December payrolls and conclude that they had 40 carpenters in the area at $10.00 an hour for wage determination purposes.

While adding all union employees on various projects together at the new union rate, whether received or not, Davis-Bacon will not add open shop employees together unless each of them receive exactly the same dollars and cents rate. This is a double standard that is prejudicial to open shop construction. The unfairness of the technique is illustrated below:

December, 1976 (project A):

30 carpenters at $8.00 an hour (union agreement).

40 carpenters at $6.00 an hour (open shop)

April, 1977 (project B):

30 carpenters at $10.00 an hour (union agreement).

40 carpenters at $7.00 an hour (open shop).

On this survey information, Davis-Bacon would conclude that it has 60 carpenters at $10.00 an hour compared with 40 at $6.00 an hour and 40 at $7.00 an hour and therefore would find $10.00 an hour to be prevailing.

The 30 percent rule was invented by Davis-Bacon some 40 years ago to give artificial respiration to the union rates at that time. Today, even the 30 percent rule is not sufficient to support the union rates, on a "rate paid" basis, and therefore, the backdating technique has been invented to support the union rate even when it does not even constitute 30 percent of the various rates paid in an area.

Correspondence is attached that documents the Davis-Bacon position in this matter. The new technique would appear to be arbitrary and capricious since it fails to reflect "the rate paid" as required by the Act and the regulations. It would appear to be unauthorized since it is a substantial innovation without due notice and hearings, contrary to existing regulations. The wasteful and inflationary impact of the new backdating procedure should be quite evident.

2. SETTING BUILDING RATES FOR HEAVY WORK ON AN "INTEGRATED PROJECT" RATIONALE

Another new technique is the setting of building rates for heavy work on large projects which involve building construction work as well. The rationale is that a construction project should be considered an "integrated project", meaning that it is all building, or all heavy, or all highway, and cannot involve the use of heavy rates and building rates at the same time. This new technique, of course, is a willful disregard of the area practices prevalent in most parts of the country to pay heavy construction rates for heavy work and building construction rates for building work, even though both types of work are involved on the same construction site. The unrealistic results of the new technique are demonstrated by the requirement to pay building rates on a 17-acre parking lot work because it was part of a project complex that included a large parking garage and passenger terminal for a city transit system. The unrealistic results are also indicated by the requirement to pay building rates on heavy portions of water treatment plant projects on grounds that some building structures will be part of the project.

The second technique, like the first one, appears to be unrealistic and unauthorized because it seeks to ignore the realities of the construction industry that ought to govern the administration of the prevailing wage laws.

3. STRIPPING WORK ITEMS FROM GENERAL HEAVY AND HIGHWAY WAGE DETERMINATION

The third change is the stripping of work items from general heavy and highway wage determinations including such items as air-

port runways and taxiways, bridges over navigable streams, water treatment plant projects, tunnels and railroads, among other things. The navigable stream, incidentally, refers to the Corps of Engineers definition. This change has been reported in many areas of the country so far and may become a general Davis-Bacon policy.

The effect will make the general heavy and highway wage determination inapplicable to the excluded work items and necessitate wage determinations for them as they arise. Davis-Bacon can then decide whether they will require building rates or other non-heavy-and-highway rates when the time comes. No evidence has been received that this action will result, but these possibilities arise from the shift in Davis-Bacon policy and should be carefully monitored by chapters and contractors interested in such work.

THE NEED FOR TIME TO STUDY THE NATIONAL TELECOMMUNICATIONS POLICY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI), is recognized for 10 minutes.

Mr. ROSTENKOWSKI. Mr. Speaker, the 95th Congress is faced, as with the 94th Congress, with the arduous task of analyzing the validity and viability of our Nation's telecommunications policy. The Federal Communications Act of 1934 was a farsighted and progressive measure which laid a framework of laws designed to foster the growth and refinement of a then still embryonic telecommunications system. The intervening years have shown the wisdom of the act in the unparalleled technological improvement of the system. Today, we enjoy, rely on and indeed take for granted, the day-to-day reality of instant communications which are constant and reliable.

However, as with any technological evolution imbued with the public interest, we need to take stock from time to time and reevaluate the premises upon which our progress depends in order to determine if, indeed, the public is well-served. I believe we have reached such a watershed point. This is why numerous pieces of legislation are before this body calling for just such an analysis. It is apparent, however, that certain recent decisions of the Federal Communications Commission pose a threat to the timeliness of proposed legislation. While it is not clear that these decisions will invariably lead to a shift from the basic policies laid out by the 1934 act, they do imply a change in those premises which spawned the progressive improvement in telecommunications which we have enjoyed to date. It is my judgment that such basic policy decisions should be made by Congress.

What the resolution I am introducing today calls for is time—a moratorium on further FCC decisions in this area. The moratorium is limited in its existence to the completion of a study of the impact of FCC decisions completed by the 95th Congress or the adjournment sine die of the 95th Congress, whichever is sooner. The impending expiration of the moratorium will hopefully inspire prompt, expeditious action in this area, and reduce the risk of simply maintaining a de facto "drift" into a shift in policy from the 1934 act. At the same time it allows for a prompt return to current FCC policies should Congress find them worthy or fail to change them.

Mr. Speaker, I urge my colleagues to support this timely legislation:

H. RES. 564

Resolved, Whereas the Communications Act of 1934 called for the development of a high-quality, nationwide communications service available to all the people of the United States at reasonable costs;

Whereas recent decisions by the Federal Communisations Commission, which imply a change in the basic concepts under which our national telecommunications system has been structured, may have a substantial impact on the cost of residential telephone service;

Whereas a number of bills have been introduced to provide the basis for a study by Congress of telecommunications regulatory policy, and an investigation of this matter was initiated in the Ninety-fourth Congress and is continuing in the Ninety-fifth Congress;

Now, therefore, be it resolved that this Congress should expeditiously determine the future telecommunications policy of this Nation with the purpose of insuring that high quality telephone service continues to be widely available at the lowest rates reasonably possible;

Resolved further that Congress call for a moratorium on further steps by the Federal Communications Commission to implement new decisions which change basic structural concepts of the national telecommunications system until the 95th Congress has completed its study on the matter and determined what the national policy should be.

CONCORDE AGAINST BEST INTERESTS OF NEW YORK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WOLFF) is recognized for 15 minutes.

Mr. WOLFF. Mr. Speaker, I have just received word that the long-awaited decision on Concorde SST landing rights at New York's John F. Kennedy Airport has been handed down by Federal District Judge Milton Pollack. While I do not ordinarily comment on the decisions of the judicial branch of our Government, today's ruling so clearly and adversely affects my constituents, and the people of New York, that I must speak out.

Judge Pollack's unfortunate decision today flies in the face of the best interests of the people of New York, and appears to fly in the face of logic as well. His Honor has apparently taken it upon himself to tell two Secretaries of Transportation, as well as the President of the United States, that they do not know what they are talking about.

I refer to the fact that even though former Transportation Secretary William Coleman recommended the test series for JFK, Mr. Coleman repeatedly affirmed the right of the Port Authority to ban Concorde—something he, of course, hoped they would not do. Transportation Secretary Brock Adams has taken the same position as his predecessor, and President Carter has on at least two occasions told the British and French that the Federal Government does not have the power to force the Port Authority to accept Concorde.

The trouble with today's decision, aside from the damage it may ultimately inflict on the people of New York, is that it goes beyond interpreting the law to actually writing the law. The reason Dulles International Airport is the only airport presently allowing Concorde to land is that the Federal Government has accepted the legal precedent for local control—Dulles is the only acceptable airport which is controlled by the Federal Government.

JFK is controlled by the Port Authority, and the people of New York, and the Federal Government has respected that control even during President's Nixon's initial attempts to favor Concorde regardless of the environmental facts.

A principal reason for the Federal hands-off policy regarding JFK, or any local airport, is that the Federal Government has long maintained that since it does not set the local standards, it does not have to bear the liability for aircraft noise damage. The Federal Government, and the Supreme Court, have consistently acted on the axiom that the burden of liability rests with those responsible for the standards.

Now we have a situation where the Port Authority is apparently being told it does not have the right to safeguard the people of New York against either the noise of the Concorde, or the cost of the damage which can be caused by the Concorde. This is clearly as irresponsible as it is unfair.

If the burden is somehow shifted to the Federal Government, I hope the executive branch will set aside the millions or even the billions of dollars which will be necessary to back up Judge Pollack's decision.

For my part, I am today writing to President Carter and Secretary Adams, urging them to back up their repeated public statements that the Port Authority has the right to carry out its duties in the best interests of the people of New York and, indeed, in the best interests of the Federal Government as well.

OUR NATION'S GROWING INVOLVEMENT WITH GOVERNMENT OF ZAIRE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. BONKER) is recognized for 5 minutes.

Mr. BONKER. Mr. Speaker, as you know, I have continued to question this Nation's growing involvement with the Government of the central African nation of Zaire.

One troubling and recurring theme emerged from the recent debates in the House International Relations Committee on the subject that is, that the United States is offering military assistance to Zaire for essentially political reasons. Throughout the markups on the security assistance bill, nobody—not even the executive branch—contradicted my statements that further arms aid credits for Zaire were indefensible on military grounds.

Quite frankly, Mr. Speaker, I am very worried by the arguments for supplying aid to Zaire on political grounds when the military rationales are admittedly so deficient. What are those political grounds? Will further U.S. aid to Mobutu create an effective, spirited fighting force out of an army now demoralized by the corruption, favoritism, and inefficiency that are endemic to his regime? Do we take no notice of the fact that the 40,000-man Zaire army, backed by pygmies in loincloths, war supplies from several nations, and French advisers could not beat 1,500 ragtag Katangese gendarmes? And will other African regimes breathe easier because of our rash offer of another $15 million in military credits to one of the richest but least enlightened rulers in Africa?

Mr. Speaker, the arguments for our initial involvement in Vietnam were also political: American money and training and military supplies were supposed to make up for a lack of political support caused by endemic social and economic ills. I am not now contending, Mr. Speaker, that Zaire is Vietnam or that Mobutu is another Ngo dinh Diem. But certainly it is equally rash to keep referring to Mobutu as our "longstanding friend" only because we have been buttering each other's bread for the last decade.

Mr. Speaker, history clearly shows that political stability is more truly gained in the Third World by fulfillment of the basic social and economic needs of the whole population, not by repression, favoritism, Machiavellian balancing of rivals and selective currying of gullible outside interests.

The current crisis in Shaba Province has put a spotlight on many of the failings of the Mobutu regime. The consensus view of professional Zairian specialists outside official Washington circles is that his government is unlikely to survive more than a year or two no matter what external aid he receives.

The "political" arguments for sending Mobutu continued military aid that he does not need could blindly send us down a course with only the thinnest prospects of gaining the stability in Central Africa that we would like to see.

Mr. Speaker, I insert in the RECORD three documents which expand on my remarks. The first two are papers prepared by my staff. The third is an analysis from the New Republic of May 7.

The documents follow:

JUSTIFICATION FOR CUTTING FISCAL YEAR 1978 FMS CREDITS FOR ZAIRE

Detailed justification for cutting fiscal year 1978 FMS credits for Zaire was contained in my recent letter to Committee members. In brief:

The Administration's FMS credit requests for Zaire are based on a technical assessment done in 1976. Given the poor performance of the Zaire Army during the current crisis and the problems of corruption, mismanagement and social irresponsibility in the Mobutu regime spotlighted by this crisis, a renewed assessment of Mobutu and his Army is needed before we commit ourselves further to his support. President Carter has already expressed his reservations about M-60 tanks for Zaire, for example. (M-60 tanks were a major element recommended by the 1976 assessment).

The Administration's security assistance plan of Zaire currently consists of a phased 3-4 year Army upgrade program now costed at $38 million. Approximately $26 million already exists from fiscal year 76T and fiscal year 77 appropriations to begin implementation of this program. Because of the Shaba crisis, implementation can't start until calendar 1978 in any case. The Administration would lose nothing by starting the upgrade program off with already appropriated funds while we reassess our commitment to Zaire. If in fact our assessment proves positive, fiscal year 1979 is time enough to complete funding for the upgrade program. It makes no sense to throw $30 million on top of an upspent $26 million for a program that won't even start until 1978—and whose major element has already been challenged by the President.

The Administration has argued that a complete cutoff of FMS credits to Zaire for fiscal year 1978 could be interpreted as "pulling the rug out from Mobutu." On the contrary, significant amounts of FMS credits were appropriated for Zaire beginning only in fiscal year 76T, to fund an Army upgrade program which has yet to start. In short, we are in the process of putting a rug under Mobutu and the time for reassessment is now. Moreover, Mobutu will continue to enjoy a wide variety of U.S. and other Western support even if fiscal year 1978 FMS credits are postponed:

$26 million FMS credits already appropriated;

$10 million in fiscal year 1978 security supporting assistance;

$15 million fiscal year 1978 PL-480 and Peace Corps aid;

$2.5 million FY78 military training assistance;

$85 million IMF economic stabilization package (April 1977);

$250 million "bail-out" loan being organized in 1977 by Citibank of New York.

I submit that these projects total a lot of rug remaining under Mobutu.

The postponement of further FMS credits to Zaire pending reassessment is indeed a political signal, as others have noted, but it is a signal that should be sent;

To Mobutu, we reaffirm the signal already sent by refusing to supply lethal equipment during the current crisis, i.e.; We will not send a blank check. We intend to monitor both Mobutu's performance and our aid every step of the way. We will continue to carefully measure further US involvement in what to us is a very uncertain situation;

To other African states, we signal that US military assistance is both rational and realistic. We make no promise of unqualified military support, especially to regimes whose lack of economic and social responsibility endangers the very stability that our assistance is designed to maintain. We signal further that we will not throw $30 million in excess credits at a man who is one of the least enlightened in Africa.

To the American public we signal that both the President and the Congress intend to honor their respective promises to closely scrutinize US arms sales commitments and to stop those which fail to meet reasonable criteria of military necessity and US national interest. We signal further that the Congress is fully aware of the risks of closer military involvement in Central Africa and intends to monitor initiatives closely.

MEMO: ZAIRE FISCAL YEAR 1978 MILITARY AID ($32.5 MILLION) AND SUPPLEMENTARY ASSISTANCE REQUESTS ($10 MILLION)—SOME BROAD PERSPECTIVES AND WHAT THEY SUGGEST

The Executive branch argues that Mobutu can be sustained and the U.S. should join tangibly in doing so. Strategic, political and economic reasons are offered. In a half dozen professional papers in the last year, Zaire specialists in the U.S. have unanimously argued aspects of the reverse, that stability in such a society is impossible to maintain and is against the long term interests of the majority of Zairians and Americans.

INTERNATIONAL THEMES

1. As Senator Clark put it: "The U.S. stands for principles not cliques or individuals." (New York Times 4-3-77). The case for legitimizing Mobutu has not been made within U.S. principles. African fears of precedent setting are not persuasive; neither they nor we would be likely to oppose a comparable train of events in Uganda.

2. Rapidly growing economic ties between Zaire and South Africa appear unsavory to much of Africa. Supporting Zaire thus helps support South Africa's image. A neutral line for the U.S. would pay far more heed to the positions of Nigeria, Tanzania, etc.

3. Open-ended support of Mobutu greatly limits the possibility of rapprochement with Angola which has nearly the same potential of natural resources.

4. Zaire represents the most blatant CIA adventurism in Africa. Complicity in the assassination of Lumumba is strongly suggested. John Stockwell's piece (W.P. 4-17-77) eloquently pleads the case for basic reform. U.S. aid to Mobutu, coupled with pressure for and support of surrogate Euopean and African aid, rearouses the worst international suspicions of a perpetuation of the past.

5. U.S. business concerns would be better off under an efficient government that enjoys mass support regardless of its ideology. Any Zairian government will want aid and trade and will have to consider U.S. interests with these in mind. We don't have to repeat the Angolan debacle.

NATIONAL THEMES

1. Executive branch portrayals of (political) human rights in Zaire cannot be squared with empirical evidence. Abuses are as visible as a 4-21-77 W.P. story. Independent Zaire specialists can provide many cases and are sorry Amnesty International has done no recent investigations.

2. Human rights violations are, however, fundamentally economic. The poor rural majority are starving. In the cold prose of the World Bank. "About one-third of the rural population suffer from insufficient caloric intake . . . a grave shortage of proteins is characteristic of most of the population of the country." A less urban-based and corrupt government could use resources and pricing policies to produce considerable surpluses; but the needs and lures of international capital create and sustain an elite with a fundamentally selfish political vision.

3. Any aid to Mobutu assumes an economically viable state even in the short term. The World Bank confidential study (7-75) is among several to argue that it is not viable. Periodic debt rescheduling is just a surface symptom hiding fundamental structural flaws that cannot be patched over indefinitely. There is more to the functioning of any economy than the IMF's narrow focus admits.

4. Aiding insecure governments, even symbolically, builds commitments and provides an aura of legitimacy where there may be no substance.

5. Military aid and force modernization cannot be divorced from their social, political and economic context; we modernized the South Vietnamese army for years. Military training programs provide a totalitarian elitist ideology and the comparative skill and confidence for political action among a small group in the modern sector. It is uneven institutional modernization working against the possibility of a civilian democracy. A generation of such effort in Latin America did much to create there the present collection of military dictatorships.

6. Zaire under Mobutu has institutionalized a management crisis characterized by a yearly turnover of the cabinet and the 20–25 man Bureau Politique which rubberstamps the decisions. Notable Zairians fear a call to serve knowing the impossibility of progressive reform. A brilliant 1975 dissertation documents the lack of correlation between government structure and its activity. A recent paper by another scholar shows the gap between decision-making and action. External resources will not alter these forms of paralysis, for it is largely external processes that led to their creation.

7. Mobutu is reportedly on Fortune's list of the world's wealthiest. The example of corruption set at the highest level is emulated at every level below him.

8. Private interests in Zaire have suffered enormously in four years of Mobutu's jerky policy reversals. The march toward a fascist form of state capitalism since 1973 has vastly increased the field for corruption and the black market. One cannot claim on business terms that this is an economic environment worth maintaining.

9. Public and private international banks naturally want to assure the sanctity of their Zaire portfolios. It is hard to see why the American taxpayer should bail out these bad loans via bilateral aid to Zaire. Risk is, after all, the reason why banks are permitted to charge interest. Altering the rules by dunning the U.S. taxpayer will encourage even further irresponsibility by all concerned.

IN SUM

By conceiving of Zaire essentially as Mobutu and resources, the Executive branch and much of the media have created a fundamentally false picture of a highly corrupt, unstable, and complex society facing very basic structural and historical change. Myths and massive foreign aid can perhaps put this transition off a few months or years. But it is massive external aid and trade that has caused and sustains Zaire's most basic problems.

The most critical lessons of Vietnam seem still unlearned by an Executive branch which perceives reality as undimensional and ahistoric. Washington is still without historical frameworks that show processes unfolding and the system at work that sustains wealth and poverty. It is still without the crosscultural sensitivity to understand that words like army or government carry different operational meanings in different societies.

SOME RESEARCH SUGGESTIONS AND GUIDES TO LITERATURE

Herbert Weiss, testimony of March 28, 1977 before the Subcommittee on Africa, House International Relations Committee.

David Gould, "From Development Administration to Underdevelopment Administration: A Study of Zaire. . . .", paper for ASPA (American Society for Public Administration) Atlanta conference 3-30—4-2-77.

Guy Gran, "Policy Making and Historic Process: Zaire's Permanent Development Crisis", paper presented at the African Studies Association meeting, Boston, November 4, 1976.

Stephen Weissman, Statement before the Subcommittee on Africa of the Committee on International Relations, House of Representatives, April 28, 1977.

OUR MAN MOBUTU

At the close of an obscure and otherwise customarily dull congressional hearing last week, a State Department aide startled the lone remaining senator, Dick Clark, Democrat of Iowa, with an interesting little revelation. By the way, the official added almost as an afterthought, the Carter administration wanted Congress to approve $30 million worth of M-60 tanks and armored personnel carriers for the regime of Zaire's President Mobuto Sese Seko, who already is getting $13 million in special "non-lethal" U.S. aid to wage a shadowy guerrilla war in the country's copper-rich Shaba Province.

Amid the controversy (and some incredulity) that followed, President Carter himself retreated to equivocation, by saying it was "highly unlikely" he would approve the tank deal. But the incident remained an apt reminder of the larger historical folly of American policy toward Zaire, and of the hypocrisy of the new administration in resting its ostensibly new African diplomacy on our old friend Mobuto. Since 1962 Washington has poured $350 million in public economic and military aid into the large central African state, while the CIA has paid more than $150 million in covert money directly to General Mobutu.

What is the monument to our patronage? Potentially one of the richest countries in Africa, with vast natural resources, for a decade one of the chief aid recipients in Africa, Zaire remains an unrelieved calamity of poverty and exploitation. Between 1960 and 1970 it recorded almost no tangible economic growth. In 1973 the UN chose Zaire, for all its mineral wealth, as one of the truly destitute nations of the third world.

The plight of the average Zairean, of course, is not readily visible in the person of General Mobutu, who personally pockets Western corporate kickbacks as well as the CIA money, whose family controls a private monopoly over the nation's huge and still untapped diamond deposits, and whose ethnic-tribal dictatorship simply murders or imprisons internal critics. Now in conspicuous disarray fighting in Shaba, Mobutu's army, trained and armed by the USA, is a vivid emblem of the regime's squalor. Diplomatic folklore brims with stories of this force manqué, as when a multi-million-dollar US paratroop training program in the 1960s climaxed when a demonstration for VIPs in which the elite brigade took off to stage their drop, only to discover over the site that they had forgotten their chutes. But the latest "Congo follies," as they are known in the State Department's more cynical precincts, are not so comic-opera amusing. While Mobutu's corruption and Zaire's poverty deepened, the army was purged of all but the general's regional and tribal serfs, whose continuing loyalty in an officially bankrupt government was purchased by periodic authorized episodes of plunder and looting, mainly at the expense of traditional tribal rivals. Many observers worry that if Mobuto does manage to subdue the Shaba rebellion, with U.S. and French aid, the sequel will be a brutal episode of repression and conceivably even genocide among local tribes suspected of sympathy for the invaders.

As it is, the army frequently takes matters into its own hands. Uniformed Zairean troops actually broke into the US Consulate in Lubumbashi on July 4, 1976, and, presumably in their own celebration of the American bicentennial, lifted $10,000 in local currency. The Ford administration buried official reports of the incident. The Lubumbashi caper drew only a tame protest from Washington at the time. A generation of money and careers invested in Zaire (much as in Vietnam) has spawned an officialdom in State and the Pentagon who instinctively look the other way when Mobutu & Co. savage their own people, or dip into the petty cash of US consulates. But Washington's devotion is not only a matter of bureaucratic indulgence. The CIA needs to show both the Russians and rival US agencies that it can still "run" a decent little operation (and keep its client in power), after the 1975-76 debacle in neighboring Angola. And beyond the intelligence game, there are powerful American economic interests, beginning with the Chase Manhattan Bank, who wish to keep Mobutu atop the mess, if only because a successor regime might naturally repudiate the hundreds of millions in international debts (the exact figure is a guarded corporate and official secret) incurred by Zaire over the past decade. So CIA clandestine subsidies are painstakingly laundered, then spent hiring mercenaries to shore up Mobutu's combat-sharp veterans; corporate pressure mounts on the State Department for more military aid; and officials who talks about the large and small scandals of the policy are openly fearful of career reprisals if their dissent becomes known within the government. In miniature—and with all the obvious differences in time and place—it is uncomfortably reminiscent of Southeast Asia. With nervous chuckles, officials refer to Kinshasa as "Saigon noire."

The M-60 backtracking suggests that the administration probably is not going to wade much deeper into the Zaire swamp. But the more important point is that the US has no good reason to go on supporting the Mobutu regime at all. Whoever the Shaba invaders may be (the evidence is that they are mostly embittered Zaireans Mobutu and the CIA sent into Angola in 1975), however they are backed (probably by the Soviets and Cubans as well as Mobutu opponents in Zaire), whatever their goals (probably the overthrow of Mobutu), then are exploiting an authentic popular agony in Zaire that will explode later if not now. Once again, by sheer inertia, we are on a losing side with neither principle nor national interest to justify the sacrifice. Jimmy Carter should stop a good deal more than a few symbolic tanks.

ROGER MORRIS.

THE 10TH OF MAY: ROMANIA'S INDEPENDENCE DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ADDABBO) is recognized for 5 minutes.

Mr. ADDABBO. Mr. Speaker, the traditional day of the Romanian people is the 10th of May. On this day for years, the Romanians have commemorated the achievement of the nation's independence and the founding of the Kingdom of Romania.

This year, the commemoration has a special significance marking the centennial anniversary of Romania's independence, won on the battlefields of the 1877 war against the Turks. Since that time and until the end of the Second World War, Romania made striking economical and social progress, including massive agrarian in 1918, when practically all land in the nation was distributed to those who would till it.

But in the last 30 years, since the takeover of the Communist regime, the Romanian people do not enjoy a true independence.

Since the traditional observance of the holiday has been suppressed by the Communist regime in Romania, with the obvious intent of weakening the will for freedom, it has been our custom in the House of Representatives to express to the world the added meaning of the commemorative day as a means of keeping alive sacred traditions.

I would like to insert into the RECORD a brief summary of the national history of the Romanian people and the celebration of the 10th of May which marks three great events in Romania's history.

Mr. Speaker, I insert this document in the RECORD at this point:

THE TENTH OF MAY: RUMANIA'S INDEPENDENCE DAY

The Tenth of May is the national holiday of the Rumanian people, celebrating three great events of its history.

On May 10, 1866, Charles, Prince of Hohenzollern-Sigmaringen, a scion of the Southern and Catholic branch of the Prussian royal family, was proclaimed in Bucharest Prince of Rumania, and thus founded the Rumanian dynasty. It was the successful outcome of the nation's long struggle to acquire the right of electing as its sovereign a member of one of the Western non-neighboring reigning families in order to put an end to the strifes and rivalries among native candidates to the throne. This ardent wish, though officially expressed as far back as 1857 by the Moldavian and Wallachian Assemblies—the "Ad-hoc Divans"—convened as a result of the Paris Treaty of 1856, was nevertheless opposed by the Russian and Austrian empires, equally disquieted by the growth in power and prestige of the young bordering nation they both secretly hoped to absorb some day. It was due to unrelenting efforts made and wise steps taken by Rumanian patriots, and also to the constant diplomatic assistance of Napoleon III, Emperor of the French (to whom Prince Charles was related through the Beauharnais and Murat families) that all political obstacles were gradually removed and what was to be the prosperous and glorious reign of Charles I could be inaugurated on May 10, 1866.

Eleven years later, on May 10, 1877, during the turmoil of the Russo-Turkish War, the Principality of Rumania, until then nominally a vassal of the Sultan, proclaimed her independence by severing the old and outdated bonds that linked her with the Ottoman Empire. This independence had to be fought out on the battlefields south of the Danube, where the young Rumanian Army, as an ally of Russia, played a noteworthy part in the defeat of the Turkish forces. The Congress of Berlin of 1878 confirmed Rumania's independence and conferred Europe's official recognition, a bright page in the country's dreary history though marred unfortunately by the loss of Bessarabia, cynically wrenched by Czar Alexander II and his government from the ally who helped them obtain victory over the Turks.

Another four years elapsed after the Rumanian people had proclaimed their independence and a further step was taken as they decided to raise their country to the rank of a kingdom. On May 10, 1881, Charles I was crowned, by the will of his people, King of Rumania. A prosperous era, which lasted over six decades, opened on that day for the nation. Its apex was attained when national unity within the historic boundaries was reached after World War I. The socially progressive country had now become a factor of peace and equilibrium in the South-East of Europe.

During all those years and up to the present time, Rumanians have cherished and revered the Tenth of May as their national holiday, the anniversary of happy and glorious events in their history, in which achievements of Monarchy and people were interwoven. It remains the symbol of their permanency and perseverence through woes and hardships to reach the ultimate end of freedom and well being.

The ruthless foreign rule which now oppresses the Rumainan nation has not been able to uproot the peoples attachment to the traditional celebration of the 10th of May. In order to try and alter at least its significance, official celebrations were shifted from the 10th to the 9th of May, anniversary of the Soviet victory. But, though flags are now hoisted on May 9th, Rumanians in their captive homeland celebrate in their hearts the following day, awaiting with faith and courage the dawn of new times, when freedom shall be restored to them.

THE NEED FOR SAFE SCHOOLS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 15 minutes.

Mr. BINGHAM. Mr. Speaker, recently, I received another of the constant cries for help voiced by the deteriorating school system of New York City. During the past 3 years, the board of education of the city of New York has tried repeatedly to obtain some sort of financial assistance to help combat crime in the city's schools. I have been involved directly with this fight, having introduced the Safe Schools Act as early as 1971. In January of 1974, my Safe School Study Act was passed by Congress, which directed the Department of Health, Education, and Welfare to spend 2 years analyzing the problem of crime in our Nation's schools. This study is now in its final stages and should be completed by August 31, 1977.

Although the safe school study was a step in the right direction, it still will only provide us with information and analysis. It will not provide funding or relief for many of our Nation's schools which are dangerously disrupted by crime and criminal offenses. It will not suggest methods of combating or coping with delinquency. It also will not suggest a remedy for the fears experienced by the students and faculty who are victimized by the crime-infested atmosphere. Because of this, I have continued to push for enactment of the Safe Schools Act in the 95th Congress. H.R. 193, the Safe Schools Act of 1977, would amend the Elementary and Secondary Education Act of 1965 to allow funding for anti-crime measures. I am sure that the educational community, in both urban and nonurban areas around the country, would appreciate this kind of financial relief if it was made available to them.

The plight of the New York City School System and many other big city systems is twofold: not only is crime on the increase in the schools, but because of New York City's financial problems, staff has also had to be cut back. The letter I recently received from the chancellor of the board of education of the city of New York, Mr. Irving Anker, says in part:

The impact of crime and violence becomes more evident daily in our city. The New York City school system has been affected more severely than perhaps any other large urban institution. During the two-year period between 1973–74 and 1975–76, incident reports received by the Board of Education's Office of School Safety increased 174.4 percent. Because of critical budget stringencies, however, monies for school security were reduced by 44 percent, resulting in a 61 percent cut in school safety officers.

These statistics are staggering. Mr. Anker also included a breakdown of the problems of coping with school crime, and some very troubling statistics compiled by the New York City School System's own study on crime. I am including this report at the end of my statement as I am sure that many of my colleagues will find it of interest:

NEW YORK CITY SCHOOL SAFETY PROGRAM

1. *Statement of problem*

1.1 Incidents of School Violence

The number of incidents in New York City public schools, based upon those reported to the Office of School Safety, has increased approximately 174.4 percent in the past two years. Since many incidents remain unreported, the actual figure of incidents which occur would be much higher. "Incidents," as categorized by the Office of School Safety, include assault, robbery, trespass, narcotics, sex offense, illegal possession of weapons, disorderly conduct, reckless endangerment, extortion, disturbance, criminal mischief, harassment, larceny, fire, bomb threats, arson, demonstrations, gang fights and others.

Increases in incidents in New York City public schools from 1973–74 to 1975–76 are summarily presented as follows:

TOTAL NUMBER OF INCIDENTS RECEIVED BY THE OFFICE OF SCHOOL SAFETY, SCHOOL YEAR 1973–74 AND 1974–75 AS COMPARED TO SCHOOL YEAR 1975–76

	1973–74	1974–75	1975–76
Total number of incidents	3,971	6,817	10,896
Increases, year to year (percent)		+71.7	+59.8
Total increase (percent)		+174.4	

1.2 Vandalism

Widespread reports on the rise of school vandalism constantly appear in newspapers and on news broadcasts. The situation, which has recently become a source of nationwide concern, has plagued New York City public schools for many years. "Vandalism Replacement Costs" have been computed by the Division of School Buildings since 1969. Figures represent the replacement costs of broken glass, unlawful entries and fires. Other items, including defacing walls and furniture, breaking fixtures and furniture, among others, are not included.

Vandalism replacement costs for the past three calendar years, 1972–75, totaled $12,719,494. A review of the available data indicates a significant inverse correlation between vandalism replacement costs and the number of School Safety Officers employed.

1.3 Fear

Reports of fear of attending and working in New York City schools have become commonplace. The causes were well summarized in a WCBS–TV News Editorial aired on May 12, 1975 at 6:55 p.m.:

"Violence is stalking the schools. Teachers and students are being victimized by brutal assaults, robbery, rape, and even murder in the halls and classrooms of the nation's public schools. And, according to a Senate subcommittee, the situation is getting worse. In fact, New York City police have reported the arrests in city schools went up 95 percent last year."

Accounts of personal fear in New York

City schools, as expressed by students, parents, teachers and other school personnel, bulge from the files of the Board of Education's Office of Public Affairs. The media abounds with statements such as the one appearing in an article in the New York Teacher (October 3, 1976, p. 15): "Teaching in New York City schools has become one of the most dangerous professions in the country due to staff cuts which have opened the door to increased violence. Parental protests against the cuts in guards have given rise to demonstrations, such as one in front of Public School 306 in East New York, where signs being carried read: "Children are Human. Money isn't. Save a life." Students in violence-plagued schools increasingly cite fear as the main reason for increases in cutting, absenteeism and even permanent dropout. Numerous victimized students, as well as teachers, have refused to return to their schools. Learning ceases when fear prevails.

1.4 Budget Reductions

The budgetary constraints placed on the New York City Public Schools during the 1975–76 school year are dramatically reflected in the reduction in School Safety Officers, and the spiraling number of incidents of school violence and vandalism. This pattern has continued in 1976–77.

A reduction of 1,385 School Safety Officers in New York City Public Schools has resulted in the past year. On a borough-wide basis, reductions in School Safety Officers have occurred, as follows:

Borough	Number of school Safety officers [1] 1974–75	1975–76	Change	Percent change
Manhattan	400	182	−218	−55
Brooklyn	885	302	−583	−66
Queens	426	188	−238	−56
Bronx	445	166	−279	−63
Staten Island	108	41	−67	−62
Total	2,264	879	−1,385	−61

[1] Figures are approximate, based upon community school district reallocations of school safety officer hours, and, therefore, The number of persons employed.

During the past year, the services of School Safety Officers were cut 44%, in terms of dollars, as shown below:

School level	Budget 1974–75	1975–76	Reduction	Percent change
High schools	$5,100,937	$2,856,721	$2,244,216	−44
Community school districts	3,028,502	1,694,146	1,334,356	−44
Total	8,129,439	4,550,867	3,578,572	−44

The reductions in school safety staff, compounded by those in the numbers of teachers, paraprofessionals, guidance counselors, supervisors and other school personnel, support the drastic increase in school incidents which are presently occurring in New York City Schools (see Item No. 1.1). In no other city agency can figures as devastating as the above-cited be provided.

1.5 Impact of Problems on Students, Staff, and Schools

The devastating effects of the increase in school violence resulting from severe decreases in School Safety Officers include, but are not limited to, the following:

1.5.1—Loss in instructional time, and decrease in student achievement levels, resulting from increased incidence of school violence.

1.5.2—Increase in number of students and teachers victimized in public schools.

1.5.3—Increase in rate of student cutting, absence and dropout.

1.5.4—Transfer of students to private schools and movement out of city.

1.5.5—Increase in number of court cases resulting from assaults on students and teachers.

1.5.6—Increase in number of "Leaves of Absence" applied for by experienced staff members.

1.5.7—Public adverse criticism of and rapid decline in support of public school education.

II. STATEMENT OF NEEDS

There is a need to provide school safety services in New York City Public Schools, to reduce the sharply increasing number of incidents of violence, which have resulted to the endangerment of students and staff, as a result of budgetary reductions from 1974–75 levels.

There is a need for approximately 1,000 additional School Safety Officers in New York City Public Schools.

There is a need to provide additional School Safety personnel in high schools and community school districts (elementary/junior high/intermediate schools) in accordance with incident occurrences and school registers.

There is a need to provide schools with trained and skilled School Safety Officers, under the direction of experienced supervisors, to: patrol school buildings; enforce school regulations; eliminate and prevent the entry of intruders; respond to emergencies; and, perform other functions as to improve the safety of students and school personnel during instructional hours.

III. OBJECTIVES

(A) By the conclusion of the project period of July 1, 1977 to June 30, 1978, the rate of increase of reported incidents of crimes committed in and around New York City school properties will have been decreased by 50% as a result of increasing the number of school security officers by 1,000, as measured by intensive data collection and analysis of reported school incidents.

(B) By the conclusion of the project period of July 1, 1977 to June 30, 1978, the rate of apprehension of trespassers and intruders in the schools, as well as of those who commit assaults against students and staff, will have been increased by 35%, as a result of increasing the number of school security officers by 1,000, as measured by intensive data collection and analysis of reported school incidents.

IV. IMPLEMENTATION OF PROJECT—ACTIVITIES

The program will be implemented and supervised by the Office of School Safety of the Division of Community School District Affairs of the Board of Education of the City of New York.

Specific procedures for screening of personnel, placement, etc., will be developed in accordance with those currently used by the Office of School Safety. Personnel will be recruited, screened and hired in accordance with the procedures of the Division of Personnel and Office of School Safety.

In view of the need for personnel sensitive to the variety of factors comprising the school environment, a full-time summer training program will be implemented by the Office of School Safety. All newly-hired safety officers will be given training in, and made sensitive to the special problems and conditions which might be encountered in incidents relating to school crime.

The Director of the Office of School Safety, Mr. Carleton Irish, will supervise and coordinate all project activities. Mr. Irish is the former Director of the Mayor's Education Task Force. A graduate of New York City Public Schools, Mr. Irish received a Bachelor of Science degree from John Jay College of the City University of New York. In addition, he has attended the City College School of Business Administration. Mr. Irish entered the Police Department in 1954 as a patrolman. In 1966, he won the assignment of Community Relations Specialist and Aide to the Office of the Assistant Chief Inspector. Mr. Irish's extensive experience as liaison between the Department and community groups qualified him for this assignment. Mr. Irish became Director of the Office of School Safety on July 15, 1975.

V. EVALUATION

The program will be evaluated by the Office of Educational Evaluation, in cooperation with the Office of School Safety.

VI. COMMENTS

It is already evident that City budgeting restrictions for 1977–78 will have an even greater devastating impact on the number of School Safety Officers in New York City Public Schools, with a related increase in school violence and vandalism. It is evident that teachers cannot teach and children cannot learn unless a climate for instruction exists. Financial assistance from funds provided under the Juvenile Justice and Delinquency Act of 1974 and Omnibus Crime Control and Safe Streets Act of 1968, as amended, is critically needed in order to maintain a school environment conducive to learning.

THE URUGUAYAN MILITARY DICTATORSHIP CONTINUES ITS REPRESSION OF HUMAN RIGHTS, BUT NO LONGER WITH THE SUPPORT OF THE UNITED STATES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KOCH) is recognized for 15 minutes.

Mr. KOCH. Mr. Speaker, last year I secured a ban on military aid to Uruguay, because of the repression there. I was pleased when, earlier this year, the Carter administration affirmed my position when it announced the continuation of that ban on military aid. While the effect of that cutoff was somewhat blunted by the comments of the U.S. Ambassador in Montevideo, that Ambassador has now finished his tour in that country. Hopefully, the United States can begin anew its relations with Uruguay. What then is the prospect for relations with Uruguay?

The United States has taken some encouraging steps with regard to the human rights issue in Uruguay. We supported efforts to have the OAS Inter-American Commission on Human Rights conduct an onsite investigation in Uruguay. While Uruguay rejected that request, I want to commend the Chairman of the Human Rights Commission, Mr. Andres Aguilar, for his forthright efforts to pursue this investigation. Human rights is an international concern shared by all peoples, and Mr. Andres Aguilar is demonstrating that the international mechanism for the observance of human rights can work.

The United States should continue its efforts to disassociate itself from the Uruguayan regime's repression by appointing a new ambassador who will carry a firm and open commitment to the protection of basic human rights. Because of past U.S. policy in the country, the new U.S. Ambassador's task will not be an easy one: The job will require a

person with both diplomatic skill and a strong concern for human rights.

The sad fact remains that the Uruguayan military dictatorship is still out of control and terrorizing its own people. While only the Uruguayan people themselves can put an end to that madness, the force of international opinion, with the United States taking the lead, can pressure the Uruguayan regime to put limits on the degree of the repression meted out. Nowhere is this more clearly documented than in the story that one Uruguayan has told of his kidnaping, imprisonment, and subsequent release. Although the Uruguayan military has all the guns and uses torture to intimidate the populace, international opinion and outrage hangs over the scene, providing the only protection of human rights now available. What also emerges from this account by Enrique Rodriguez Larreta, as published in LeMonde of April 9, is that the Uruguayan and Argentine military and police are cooperating very closely in their campaign of terror. Because of this "internationalization of terror," it is all the more important that the United States do its fair share in providing political asylum to those South American exiles who are now in Argentina.

I am appending the article from LeMonde so that my colleagues can get a better idea of how the repressive apparatus operates in Uruguay and how important it is to continue to speak out on this issue of human rights. The article follows:

AN EYE-WITNESS ACCOUNT OF REPRESSION: "I WILL KILL YOU WITH MY OWN HANDS * * *"

More than sixty Uruguayan refugees were arrested during 1976 in Argentina. Certain of them, including Zelmar Michelini and Hector Gutierrez, two former parliamentarians, were assassinated. Others disappeared without a trace. Most of them appear to have been returned forcibly to Uruguay.

At the end of November 1976, the security forces announced in Montevideo the discovery of a "subversive movement" and the detention of sixty-two individuals. Fourteen of them, whose names were mentioned, had in fact been detained during the month of July in Buenos Aires. Mr. Enrique Rodriguez Larreta shared their fate. He reveals the underside of an affair which says a great deal about the internationalization of repression in the Southern Zone.

"If you ever talk", said General Amaury Prantl, "I will kill you with my own hands, even if I have to go to the ends of the earth to do it". But Mr. Enrique Rodriguez Larreta, abducted from Buenos Aires on July 14 and released in Montevideo on December 22, is not a man to be intimidated, even by the head of Uruguayan Defense Intelligence (SID). He has talked, and at length, risking possible reprisals against his son and his daughter-in-law, still in prison.

Mr. Rodriguez Larreta's son, a former student leader, disappeared on June 30 in Buenos Aires where he had been living as a refugee; it was while searching for him that Mr. Rodriquez Larreta was caught up in the gears of the repressive machinery. In the days following the disappearance, he made numerous efforts to find his son through the courts, and the political, military, and religious authorities. He even went to the Supreme Court. A judge attempted to deter him from continuing the search: "We have on file six thousand petitions for habeas corpus!" A lawyer was to present yet another on his behalf.

On the night of July 13, several armed men forced open the door and burst into the apartment where he was staying in Buenos Aires with Raquel, his son's wife. With their hands tied and blindfolds over their eyes, they were thrown into a car. A short while later, they found themselves in a large room with around twenty people. Mr. Rodriguez Larreta recognized the voices of his son, of Margarità, the daughter of Senator Michelini (assassinated in May), of Gerardo Gatti and Leon Duarte, two former union organizers. . . All of the Uruguayans that had disappeared during the days preceding were assembled there.

WITH SAINT PETER

Screams emanated from an upper floor. The captors—Argentine police and Uruguayan military personnel—came and went, bringing with them battered bodies. Then it was Rodriguez Larreta's turn: he was suspended by the wrists, his arms bound behind him, several centimeters from the floor. Between one electric shock and the next, the questions flew like sparks: questions about his links with the Party for the Victory of the People, those of his son, and of his daughter-in-law. "We are going to wash all of your heads". The captors hurled threats at the group of prisoners as they set up a large tank in the middle of the room and filled it with water. Mario Roberto Santucho, the guerilla leader, had just been killed during a shoot-out. They forced his sister Manuela, who was among the detainees, to read aloud the official communique; and they threw themselves upon Carlos, the brother of the guerilla. Suspending him over the tank by his feet, they lowered him in—once, twice, ten times. He drowned to death.

On July 26, the Uruguayan prisoners were loaded into trucks. Over their heads, on wooden planks, the captors piled their booty, "captured"—as they said—"on the battlefield"; books, bicycles, typewriters, refrigerators, furniture, even disassembled cars. The trucks drove off, amidst screaming sirens, toward the metropolitan airport of Buenos Aires [Aeroparque] on the shore of the River Plate. A Uruguayan Air Force plane was waiting to shuttle the passengers across the river.

In Montevideo, the treatment improved—at least for Mr. Rodriguez Larreta. For the others, the interrogations and the torture sessions continued—now under the sole supervision of the SID officers. The dance was led by Colonel Guillermo Ramirez, whose presence was noted in Buenos Aires when Senator Michelini was murdered, and by Commanding Officer Gavazzo.

On August 26, the commanding officer suddenly changed his tune: we saved your lives, he told the dumbfounded prisoners; if we hadn't intervened, the Argentines would have "sent you up to play the harp with Saint Peter". That is why you have to help us justify your presence in Uruguay and cooperate in staging an attempted armed invasion. If you agree, the military courts will sentence you to from fifteen to thirty years in prison.

The prisoners refused to play this game. The commanding officer first threatened to send them back to Argentina, where—he assured them—they would be executed. Then he threatened to kill them himself. But they held out, for they had begun to sense that outside pressures were forcing the enemy to negotiate. Finally an agreement was reached.

At Shangrila, a seaside resort near Montevideo, the army rented a furnished bungalow. Five of the prisoners were taken there on the morning of October 23. In the afternoon, troops stormed the house and proceeded, before gaping onlookers, to arrest the "subversive cell". An officer yelled: "We'd better rip off something . . . Otherwise they'll think we're bluffing". At the same time, nine other "subversives" were "arrested" at hotels in downtown Montevideo. In reality, they were intelligence agents who had registered the night before under false names.

Once the show was over, the attitude of the captors changed. The prisoners were allowed to remove their hoods and blindfolds; finally they could see . . . and talk to one another. They were even allowed to walk around in the corridors and the patio of the house. Soon they discovered the address: 1488, Boulevard Artigas. They were at SID headquarters.

A SUBVERSIVE MOVEMENT

On October 28, the security forces began to broadcast a series of communiqués announcing the discovery of a "subversive movement" and the detention of sixty-two individuals. These individuals were reported to have all sorts of evil plans; specifically, they were accused of preparing to assassinate several military officers and political leaders. Yet they were not accused—was this forgetfulness on the part of the authors of the communiqué?—of possessing firearms.

The court proceedings began in December as planned. While his companions in misfortune were sentenced to prison terms—some for "subversive association" and others for "aiding and abetting a subversive association"—Mr. Rodriquez Larreta was set free.

"I accuse the Argentine and the Uruguayan governments", he says, "of forced entry, kidnapping, forcible departation, looting, smuggling, falsifying identity cards and official documents . . ." He stops. For even after the investigation which he carried out on both sides of the River Plate following his release, many questions remain unanswered. Where are Gerardo Gatti and Leon Duarte, who were tortured in Buenos Aires and do not seem to have been taken back to Montevideo? Where are the twenty or so Uruguays—including three infants—who disappeared in Buenos Aires in September and October, and about whom nothing is known? Are they "playing the harp with Saint Peter?"

AMBASSADOR ANDREW YOUNG

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Illinois (Mrs. COLLINS) is recognized for 5 minutes.

Mrs. COLLINS of Illinois. Mr. Speaker, I take this time to give my unequivocable vote of confidence for the judgement and perceptions of the U.S. Ambassador of the United Nations, Andrew Young.

I am not overly surprised by the harsh and sometimes vitriolic criticisms that have been directed at Ambassador Young's positions and statements since his confirmation as a leading Cabinet member. The surprise that I have experienced is mitigated by my seasoned experience as a public servant forged by the wounds of battles fought in the political areas for change. It is clear to me that Ambassador Young is waging a war on a system of tradition and policy that begs for an injection of new thought and approach. Therefore, he is to be lauded and encouraged for his efforts, and I am proud to be one of his proponents.

In addition, I concur with Ambassador Young's statement that—

Because the American people pay taxes and die when we have had bad foreign policy, the American people should be involved in the thinking of that policy.

As servants of the people, the members of the three branches of our Government have a duty to the citizenry of our Nation to report the truth and to be stalwart in their positions of policy and philosophy. The statements and actions of Ambassador Young are proof positive that he is a man of courage and conviction. We need more servants with his virtue of veracity.

FEDERAL DISASTER RELIEF

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. MEEDS) is recognized for 5 minutes.

Mr. MEEDS. Mr. Speaker, I have been actively involved in attempting to revise our Federal laws regarding Federal aid and assistance for victims of natural disasters. I, and especially the victims of natural disasters, would like to see our Federal efforts improved to the point of becoming truly responsive to the needs of these unfortunate victims.

Mr. Speaker, the fact of the matter is, Federal disaster relief in this Nation is a disgrace and a disaster in itself. Disaster relief laws must be overhauled. Victims should not have to be subjected to a second disaster; namely, the bungling efforts of the Federal disaster relief program coming to the victims in a package wrapped in redtape.

In December 1975, large portions of my congressional district in Washington State were struck by a massive flood, leaving a path of devastion and destruction. Several thousand people of the region were left homeless, without food, shelter or clothing. Croplands and dairy herds were completely destroyed. The local economy suffered severely. The response of the Federal relief program was slow, inadequate, and unduly burdensome.

Since these devasting floods in Washington State, other areas have suffered natural disasters, yet virtually nothing has been done to upgrade our disaster relief response.

Mr. Speaker, I should like to insert into the CONGRESSIONAL RECORD excerpts of an article taken from the May 1, 1977, issue of the Washington Post which once again exemplifies the unresponsiveness of the Federal disaster relief program. The article pertains to the Appalachian floods of early April 1977:

FLOOD VICTIMS BITTER OVER DELAYS IN U.S. AID

The flood swept across the Tug Valley and wide sections of Appalachian Virginia, Kentucky and Tennessee on April 4, destroying or damaging 18,000 homes and 1,600 business by Red Cross estimates. A quarter of a million families suffered major property loss.

The Tug Valley was not declared a national disaster area, making it eligible for federal assistance, until three days later. The delay led to widespread feelings that officials in Charleston and Washington underestimated the severity of the flood.

"It all started too slow. People suffered. They had lost their homes and everything they owned. They were without food and clothing," said Robert McCoy Jr., mayor of Matewan, W. Va., a town of 1,200 that lost half of its homes and almost every business.

When disaster assistance centers opened, flood victims found themselves waiting in lines for two full days and getting conflicting advice.

The most persistent criticism of the recovery effort was that there was a lack of policy-making leadership—especially on the federal level—on the scene in the crucial days after the flood.

It has been almost a month now since the waters of the Tug broke over their banks, causing the worst flood in the region's history and driving 2,100 families from their homes on the West Virginia side of the river alone. Yet it looks like the flood happened only days ago.

As late as Thursday, for instance, it had not been visited by a state health officials to determine if water is safe to drink, or if the flood-soaked homes in the area are a health hazard.

HUD was another matter, however. The agency is almost universally condemned in the flood areas. As of Friday, an official spokesman in Washington said it had 1,000 employees under its jurisdiction in the four-state flood area, but had placed only 85 of the 7,093 families still homeless by the flood in emergency housing.

The statistics alone are devastating. As of Friday, 26 days after the flood, only 85 of the 2,100 eligible families in West Virginia had been placed in temporary trailer houses and campers. Only 37 of the 95 applications for small business loans had been approved. Only five of the 3,481 applicants for individual and family assistance had been approved.

"All this dumb red tape stuff you have to go through is incredible," says another resident, Joan Carr, a college art teacher. "People have no transportation (many of their cars were lost in the flood). They have no homes, no clothes, and they have to mess around for weeks getting help."

There is an equally serious fear that many local businesses will have great difficulty bouncing back. Many lacked flood insurance, and fear they will be unable to repay the 6⅝ per cent interest rate now in force on Small Business Administration disaster loans. Other fear another flood.

Already, one factory, West Virginia Armature has pulled out of Williamson, a town of 8,000. The Booknook bookstore has announced it won't reopen, and Ralph Farmer, general manager of Citizens Motors, the local Plymouth-Chrysler agency, says there is "90 per cent chance we'll close."

Mr. Speaker, it is imperative that this suffering and anguish of natural disaster victims not be allowed to continue. Accordingly I commend to my colleagues a legislative package designed to combat the deficiencies in our Federal disaster relief aid and assistance program. These bills include the following:

First. H.R. 2838, to extend insurance coverage to all agricultural commodities.

Second. H.R. 2839, to allow Federal civil defense funds to be used by local civil defense agencies for natural disaster relief.

Third. H.R. 2840, to provide authorization of disaster recovery planning.

Fourth. H.R. 2842, to provide for reduced interest rates on disaster loans.

Fifth. H.R. 2843, to permit the deduction of certain farm losses in disasters.

Sixth. H.R. 2844, to assist farms in disasters.

LET US HELP THE SMALL TOWNS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. HANLEY) is recognized for 5 minutes.

Mr. HANLEY. Mr. Speaker, I rise in order to associate myself with the remarks of the gentleman from Iowa regarding the set-aside within the newly created action grant program of one-fourth the moneys appropriated to be used for the relief of critical problems in the nonmetropolitan areas. We have in this bill a great deal of money which will be going to the relief of major cities and urban counties. The major focus of this legislation is on the urban centers of our national existence. There is no lessening of this fact and this realization by those who support the idea of this amendment which is to give some recognition to small towns and rural areas as having needy situations facing them, too.

While the increased moneys already scheduled for the nonmetropolitan discretionary fund will mean more money for these areas throughout the life of the bill, there is still merit to the inclusion of other than metropolitan areas and counties in this special fund. Surely, there is somewhere in this Nation a small city or township which in its struggle for survival will amply justify this action today. Perhaps in the dollars absorbed or the number of people helped a small town project may appear meaningless against the gage of big city problems. But let me assure you that the local problems of Main Street are every bit as important to the ideals and aspirations of this Nation as are the difficulties faced on Broadway or Knob Hill.

And, who knows, but that in the answers which HUD may develop in its dealings with the small towns there may be found remedies to apply to the big cities. For, after all, the problems of the cities are the problems basically of people who are acting in pursuit of a human nature common with their more rustic brothers. What motivates one to cope with local adversity may encourage another to fight on in hope of eventual success amid the skyscrapers.

At any rate, the small towns need a piece of the action, too. Let us give them a chance.

OSHA—THE BUSINESSMAN'S FRIEND

(Mr. SKUBITZ asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SKUBITZ. Mr. Speaker, I assume all of my colleagues received a copy of OSHA's April 29 letter and enclosures from Ms. Eula Bingham to the House of Representatives regarding what OSHA refers to as their revised regulations for State-administered "onsite consultation programs."

After reading the first line of that letter, I could not put my copy down. That line begins:

In response to the wishes of Congress and because of our desire to assist employers, particularly small businesses . . .

I immediately had visions of OSHA inspectors walking into the offices of small businessmen in my district and greeting those folks with a big smile and a hearty "Hi, I'm from OSHA and I'm here to help you." Knowing what the response of small businesmen in my district would be, I thought had better read on.

Before I finished the first page I learned that OSHA currently has a program that helps State governments finance "little OSHA's" on a 50–50 basis. These little OSHA's run "consultation programs" under contract to big OSHA.

Assistant Secretary Bingham expressed concern in her letter because only 13 States have taken OSHA up on their proverbial "deal you can't refuse." Rather than analyzing their "consultation program" to determine why it has been received with the same enthusiasm generally accorded the plague, OSHA has decided the answer is to kick in more Federal money. The new regulations propose a 90–10 Federal to State split. Sure this new twist will have States beating down the door to get money for their own little OSHA's, Ms. Bingham says in her letter:

Many employers, particularly those owning small business establishments, have pointed out the need for assistance in understanding and implementing OSHA's regulations. This proposal is designed to encourage such assistance by the States.

After reading that passage, my curiosity got the best of me—maybe OSHA really had a change of heart—so I ventured into the 26-page enclosure with baited breath.

Low and behold, what did I find? I found a program providing for a whole Foley of OSHA "consultants" who are supposed to scamper around and visit businessmen providing "advice and technical assistance" in a true spirit of friendship. OSHA even suggests the States promote this service through newspaper ads, magazines, direct mailings, telephone solicitations, and radio and TV announcements.

At this point I could take the suspense no longer so I immediately jumped to the back pages of the enclosed regulations, muttering: I wasn't born yesterday—I know a trap when I see one.

Sure enough—I read section 1908.5(6) titled Mandatory Referrals: "(1) Consultants shall not communicate with OSHA enforcement authorities except . . ."

Except when? Except when a serious violation or worse is observed says the "regs."

Realizing that type of help my constituent businessmen do not need, I read on to section 1908.5(d) and found what I consider to be the most disturbing section of all—it reads as follows:

Inspections. In the event of a subsequent Federal or State OSHA inspection of an employer who had an on-site consultation visit: (1) The opinions, suggestions, advice and interpretation of the consultant shall not be binding on the compliance officer and will not affect the regular conduct of the inspection, or preclude the finding of alleged violations or the proposing of penalties. The compliance officer shall not be bound by the consultant's failure to have identified specific hazards. The fact that the employer took advantage of the on-site consultation service shall not operate as a defense to any enforcement action.

I had always heard that Ms. Eula Bingham was fair, hard-working and conscientious. I sincerely hope she will not let the bureaucratic system at OSHA perpetrate further insults to our intelligence of this type. I cannot really believe OSHA describes this program as "in response to the wishes of Congress"—I would not wish this program on my worst enemy.

INQUIRIES TO COMMITTEE ON STANDARDS OF OFFICIAL CONDUCT AND COMMITTEES RESPONSES

(Mr. FLYNT asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. FLYNT. Mr. Speaker, by direction of the Committee on Standards of Official Conduct, I am placing in the RECORD copies of two letters received by the Committee and the Committees responses thereto.

The letters are as follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., April 29, 1977.

Hon. JOHN J. FLYNT, Jr.
Chairman, Committee on Standards of Official Conduct, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Several months have passed since the appropriation of funds enabling your committee to make an extensive investigation into the alleged activities of the South Korean government with regard to members of Congress.

You certainly are aware of the continuing sentiment of many members that this investigation proceed with much haste and thoroughness.

It is precisely such an attitude that leads those of us who have signed this letter to ask what progress has been made by the committee to date. We would greatly appreciate it if you could provide us with some kind of status report, one that includes a proposed timetable.

We are aware investigations like this often take unpredictable courses making estimates of how long it will be to bring this matter to a conclusion difficult to approximate. Our action in inquiring about this should not be misconstrued to suggest a desire for anything less than a complete inquiry.

We would respectfully request a report in writing by May 30 advising as to progress so far, and including a date when we can expect a report from the committee with further information.

Sincerely,

Tom Harkin, Peter H. Kostmayer, Leon E. Panetta, Richard A. Gephardt, Berkley Bedell, Harold R. Volkmer, Anthony C. Beilenson, ——— ———, Joseph S. Ammerman, Norman D'Amours, Cec Heftel, Dan Glickman, Donald J. Pease, Ned Pattison, J. Burton, Richard Nolan, Jerry M. Patterson, Mark W. Hannaford, Norman Y. Mineta, Toby Moffett, Marty Russo, John J. Cavanaugh, Pete Stark, Tom Harkin, Ted Weiss, Edward J. Markey, John J. LaFalce, Geo. Miller, Allen E. Ertel, Robert J. Cornell, Jim Lloyd, Tom Downey, David L. Cornwell, Jim Mattox, John Selberling, Patricia Schroeder, ——— ———, Mike Blouin, Abner J. Mikva, Andy Maguire, Bruce F. Vento, Dave Bonior, Phil Sharp, Paul Tsongas, Marc Lincoln Marks, Mickey Edwards, Paul Simon, John Krebs, Dale E. Kildee, Robert W. Edgar, Jim Leach.

COMMITTEE ON STANDARDS
OF OFFICIAL CONDUCT,
Washington, D.C., May 6, 1977.

Hon. PETER H. KOSTMAYER,
Longworth House Office Building, Washington, D.C.

DEAR COLLEAGUE: We have your letter of April 29 signed by you and 50 other Members of the House supporting our Committee's efforts to conduct an expeditious and thorough investigation in accordance with House Resolution 252. Your letter seems to suggest, however, that the investigation has not been expeditiously pursued to date, and that assumption is patently erroneous. It may rest on confusion about the relevant facts or about the breadth and depth of the responsibilities conferred upon us by House Resolution 252.

You begin your letter by stating that "several months have passed since the appropriation of funds enabling" our Committee to conduct the investigation. This is not accurate. Although we endeavored to lay the groundwork for an investigation late in the 94th Congress and actually hired special counsel for this purpose, a number of delays beyond our control prevented the full implementation of our investigation until quite recently.

House Resolution 252 was adopted on February 9, 1977, but the funding resolution was not approved by the House until March 9. Although our special counsel was actively involved, prior to that time, in preliminary efforts to organize an investigation and to recruit a special investigative staff, we could not hire our special staff until the House made funds available for this purpose just two months ago. Because we were convinced that this investigation should be conducted by a thoroughly professional special staff, rather than by permanent employees of the House or by inexperienced applicants who might be immediately available, we and our special counsel carefully considered hundreds of possible staff members before selecting the lawyers and investigators who have been hired. All of these skilled professionals were employed in other positions when selected, and naturally they had to give adequate notice before leaving their other commitments to join us. As a result, our staffing was not possible until April.

Moreover, despite repeated requests, orally and in writing, going back to the end of the 94th Congress, it was not until the beginning of April that even temporary space was made available for our investigative staff, and long term space for the balance of the investigation is still not available to us.

In addition, much of the information that we must pursue is in the possession of the intelligence agencies. Before we can obtain access to it, appropriate security clearance procedures must be pursued. Although we initiated these procedures some time ago, they are time-consuming and are not yet completed.

Despite these difficulties the investigation is now in high gear. Many witnesses have already been interviewed and many more will be. Perhaps you do not appreciate the complexity of this investigation. As you know, the Department of Justice began its investigation more than a year ago, with the full resources of the Federal Bureau of Investigation available, yet we understand from published accounts that the Justice Department investigation may continue for up to another year. Our expectation is that our investigation will proceed more promptly.

It has been the Committee's intention to make periodic status reports to the House.

within the limits of propriety, and we plan to make our first report in early June. Be assured that our staff has been instructed to proceed expeditiously, but not to sacrifice thoroughness for haste.

You may feel free to share this letter with the other signatories of your April 29 letter.

Sincerely,

John J. Flynt, Jr., Chairman; Olin E. Teague; Charles E. Bennett; Lee H. Hamilton; Richardson Preyer; Walter Flowers; Floyd D. Spence, Ranking Minority Member; James H. Quillen; Albert H. Quie; Thad Cochran; and Millicent Fenwick.

94TH MEMBERS CAUCUS,
Washington, D.C., April 29, 1977.

Hon. JOHN J. FLYNT, Jr.,
Chairman, Standards of Official Conduct, Rayburn House Office Building

DEAR MR. CHAIRMAN: On behalf of my colleagues in the 94th Caucus, I would like to convey to you and to the committee our concerns about the investigation of improper Korean influence.

We are encouraged by the committee's desire to conduct a thorough and far-reaching investigation, as evidenced by the adoption of operating standards on April 21. There can be no doubt that only through professional and careful investigation will the Committee be able to assess whether disciplinary proceedings are justified.

Our concern lies in the estimate we received from Committee staff that preliminary investigations could take up to twelve months to complete. In our opinion, this is entirely too long. Nearly seven months have passed already since the Committee began to structure an investigation, and we can anticipate additional months in hearings, if warranted by the evidence coming out of the investigation. We have the desire as Members and the responsibility as Representatives to Congress to insure the credibility of the institution. The Committee on Standards of Official Conduct and the House must move swiftly to get the facts and to clear away suspicions that inhibit our effectiveness, both as individuals and as a legislative body.

We urge you most strongly to expedite the investigation and thereby reaffirm the determination of the Congress to maintain the highest standards of conduct for its Members. Please be assured of our support to that end.

Sincerely,

BERKLEY BEDELL,
Chairman, 94th Caucus.

COMMITTEE ON STANDARDS OF
OFFICIAL CONDUCT,
Washington, D.C., May 6, 1977.

Hon. BERKLEY BEDELL,
Chairman, 94th Caucus, Longworth House Office Building, Washington, D.C.

DEAR COLLEAGUE: We are responding to your letter of April 29 sent on behalf of the Members of the 94th Caucus. We are pleased that the Caucus agrees that only a "professional and careful investigation" will serve the legitimate interests of the House and of the public.

Your letter states, however, that you are concerned about an estimate that "preliminary investigations could take up to twelve months to complete." This, you say, "is entirely too long." You further state that "seven months have passed already since the Committee began to structure an investigation."

Let us respond to these statements, with which we emphatically disagree. First, we are not aware of any staff estimate that "preliminary investigations" could take a year to complete, nor is our special counsel aware of any such estimate. On the contrary, it is our expectation that the pre-hearings phase of our investigation will take less time than you suggest.

Second, your expression of your "opinion" that a twelve month investigation would be "entirely too long" ignores the fact that the Department of Justice, which has been pursuing a similar but apparently more limited investigation for more than a year, seems to be of the view that it cannot responsibly complete its investigation for a period ranging anywhere from four to twelve months more—despite the availability to the Department of the ample resources of the Federal Bureau of Investigation.

Third, your reference to the passage of seven months since we began to structure this investigation is somewhat misleading. Despite our efforts, the funding authorization for this investigation was not approved by the House until March of this year, and it was not until that time that we were able to extend firm offers to the candidates for the investigative staff proposed by our special counsel. The special staff we have selected consists entirely of experienced prosecutors and investigators, and in light of their moral obligation to give fair notice before withdrawing from their other commitments, the special investigative staff members could not actually begin work until April of this year. As you know, however, in the interim our special counsel expended considerable efforts to organize the prospective investigation and to prepare the standards and guidelines for the investigation.

Moreover, in spite of repeated requests going back to the fall of 1976, and even temporary space was made available to us for an investigative staff until April. We still have not been able to move our staff into adequate quarters for the duration of its investigation.

In addition, much of the information that we must pursue is in the possession of the intelligence agencies. Before we can obtain access to it, appropriate security clearance procedures must be pursued. Although we initiated these procedures some time ago, they are time-consuming, and are not yet completed.

You may rest assured that the Committee and its special staff will move expeditiously to get the facts, whether or not the facts—as you presume—will "clear away suspicions that inhibit our effectiveness, both as individuals and as a legislative body." Nothing would do a greater disservice to the House and to the public than to conduct a hasty, slipshod investigation that purportedly dissipates "suspicions" only because it fails to pursue all pertinent evidence. A full and complete investigation is the plain directive of House Resolution 252, which as you recall was adopted by the House by a vote of 388 to 0.

You may be interested to know that it is our intention to submit periodic status reports to the House describing the general progress of our investigation. The first status report will be made in approximately one month.

Please feel free to share this letter with the other members of the 94th Caucus.

Sincerely,

John J. Flynt, Jr., Chairman; Olin E. Teague; Charles E. Bennett; Lee H. Hamilton, Floyd D. Spence, Ranking Minority Member; James H. Quillen; Albert H. Quie; Thad Cochran; and Millicent Fenwick.

CONFERENCE REPORT ON SENATE CONCURRENT RESOLUTION 19

Mr. GIAIMO submitted the following conference report and statement on the concurrent resolution (S. Con. Res. 19) setting forth the congressional budget for the U.S. Government for the fiscal year 1978 (and revising the congressional budget for fiscal year 1977):

CONFERENCE REPORT (H. REPT. No. 95-291)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the concurrent resolution (S. Con. Res. 19) setting forth the congressional budget for the United States Government for the fiscal year 1978 (and revising the congressional budget for fiscal year 1977), having met, after full and free conference, have been unable to agree.

R. N. GIAIMO,

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the concurrent resolution (S. Con. Res. 19) setting forth the congressional budget for the United States Government for the fiscal year 1978 (and revising the congressional budget for fiscal 1977), report that the conferees have been unable to agree. This is a technical disagreement, necessitated by the fact that the revised deficit and public debt amounts for fiscal year 1977 are lower than the corresponding House and Senate provisions and the revenue figure in the substitute is greater than either the House or Senate provision.

It is the intention of the conferees that the managers on the part of the Senate will offer a motion in the Senate to recede and concur in the House amendment to the Senate-passed resolution with an amendment (in the nature of a substitute) consisting of the language agreed to in conference. Upon the adoption of such amendment in the Senate, the managers on the part of the House will offer a motion in the House to concur therein.

The managers on the part of the House and the Senate submit the following joint statement in explanation of the action agreed upon by the managers:

The substitute language which is to be offered as described above (and which should be considered the language of the concurrent resolution as recommended in the conference report for purposes of section 302(a) of the Congressional Budget Act of 1974)—hereinafter in this statement referred to as the "conference substitute"—is as follows:

That the Congress hereby determines and declares, pursuant to section 301(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1977—

(1) the recommended level of Federal revenues is $396,300,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $17,600,000,000;

(2) the appropriate level of total new budget authority is $503,450,000,000;

(3) the appropriate level of total budget outlays is $460,950,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $64,650,000,000; and

(5) the appropriate level of the public debt is $784,900,000,000, and the amount by which the statutory limit on such debt should accordingly be increased is $83,600,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 301(a)(2) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1977, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):
(A) New budget authority, $118,500,000,000;
(B) Outlays, $111,000,000,000.
(2) International Affairs (150):
(A) New budget authority, $9,300,000,000;

(B) Outlays, —$16,300,000,000.

SEC. 3. In the Third Budget Resolution for fiscal year 1977, the Congress provided for revenue and spending proposals designed to stimulate the Nation's economy in order to reduce unemployment. These proposals, together with recent indications of more vigorous economic growth in the private sector, provide evidence that the Nation's economy may be returning to the levels needed to provide jobs to millions of our unemployed.

The Congress recognizes, however, that unusual uncertainties surround the current economic outlook for 1977 and 1978—primarily, the economic impact of the stimulus proposals and the likelihood of continued economic growth in the private sector—and that additional time and information are needed to make final determinations with respect to fiscal policy for fiscal year 1978; and declares that, if economic recovery does not proceed satisfactorily during the months immediately following adoption of the First Budget Resolution for Fiscal Year 1978, it will be necessary to provide additional stimulus to the economy in appropriate amounts to be determined in the Second Budget Resolution for Fiscal Year 1978. On the other hand, if the recovery continues to show signs of long-term renewed growth, it may be desirable to reduce some of the economic stimulus provided for fiscal year 1978 in order to make more rapid progress toward a balanced budget.

SEC. 4. (a) Pursuant to section 304 of the Congressional Budget Act of 1974, the appropriate aggregate amounts for the fiscal year 1977 set forth in the first section of S. Con. Res. 10 are revised as follows:

(1) the recommended level of Federal revenues is $356,600,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $2,600,000,000;

(2) the appropriate level of total new budget authority is $470,200,000,000;

(3) the appropriate level of total budget outlays is $409,200,000,000;

(4) the amount of the deficit in the budget which is appropriate in light of economic conditions and all other relevant factors is $52,600,000,000; and

(5) the appropriate level of the public debt is $701,300,000,000, and the amount by which the statutory limit on such debt should accordingly be increased is $1,300,000,000.

(b) Pursuant to section 304 of the Congressional Budget Act of 1974, the allocations for the fiscal year 1977 made in section 2 of S. Con. Res. 10 are revised so that the appropriate levels of new budget authority and the estimated budget outlays for the various functional categories are as follows:

(1) National Defense (050):
(A) New budget authority, $108,800,000,000;
(B) Outlays, $98,900,000,000.
(2) International Affairs (150):
(A) New budget authority, $7,900,000,000;
(B) Outlays, $6,500,000,000.
(3) General Science, Space, and Technology (250);
(A) New budget authority, $4,500,000,000;
(B) Outlays, $4,600,000,000.
(4) Natural Resources, Environment, and Energy (300):
(A) New budget authority, $18,700,000,000;
(B) Outlays, $16,100,000,000.
(5) Agriculture (350):
(A) New budget authority, $2,300,000,000;
(B) Outlays, $4,500,000,000.
(6) Commerce and Transportation (400):
(A) New budget authority, $17,300,000,000;
(B) Outlays, $14,900,000,000.
(7) Community and Regional Development (450):
(A) New budget authority, $14,800,000,000;
(B) Outlays, $10,100,000,000.
(8) Education, Training, Employment, and Social Services (500);
(A) New budget authority, $30,400,000,000;
(B) Outlays, $20,900,000,000.
(9) Health (550):
(A) New budget authority, $40,600,000,000;
(B) Outlays, $39,000,000,000.
(10) Income Security (600):
(A) New budget authority, $167,700,000,000;
(B) Outlays, $137,100,000,000.
(11) Veterans Benefits and Services (700):
(A) New budget authority, $18,900,000,000;
(B) Outlays, $18,100,000,000.
(12) Law Enforcement and Justice (750):
(A) New budget authority, $3,500,000,000;
(B) Outlays, $3,600,000,000.
(13) General Government (800):
(A) New budget authority, $3,500,000,000;
(B) Outlays, $3,600,000,000.
(14) Revenue Sharing and General Purpose Fiscal Assistance (850):
(A) New budget authority, $7,600,000,000;
(B) Outlays, $7,700,000,000.
(15) Interest (900):
(A) New budget authority, $38,000,000,000;
(B) Outlays, $38,000,000,000.
(16) Allowances:
(A) New budget authority, $800,000,000;
(B) Outlays, $700,000,000.
(17) Undistributed Offsetting Receipts (950):
(A) New budget authority, —$15,100,000,000;
(B) Outlays, —$15,100,000,000.

BUDGET AGGREGATES

The budget aggregates for fiscal year 1978 would be as follows:

Revenues.—The Senate resolution provided for revenues of $395.7 billion. The House resolution provided for revenues of $398.094 billion. The conference substitute provides for revenues of $396.3 billion and, to achieve that level, provides that revenues should be decreased by $17.6 billion.

The conference substitute (1) assumes the level of fiscal stimulus in fiscal year 1978 provided in the Tax Reduction and Simplification Act as recently agreed to by House and Senate conferees; (2) accepts the House position of a $65 million allowance for miscellaneous tax and tariff legislation; and (3) accepts the Senate position for this First Budget Resolution that the entire cost of the earned income credit be reflected as a reduction of revenue. The conferees agree that the treatment of tax credits in excess of recipients' tax liabilities shall be considered *de novo* during the development of the Second Budget Resolution later this year.

Budget Authority.—The Senate resolution provided for total new budget authority of $504.6 billion. The House resolution provided for budget authority of $502.267 billion. The conference substitute provides for budget authority of $503.45 billion.

Outlays.—The Senate resolution provided for outlays of $459.2 billion. The House resolution provided outlays of $464.477 billion. The conference substitute provides for outlays of $460.95 billion.

Deficit.—The Senate resolution provided for a deficit of $63.5 billion. The House resolution provided for a deficit of $66.383 billion. The conference substitute provides for a deficit of $64.65 billion.

Public Debt.—The Senate resolution provided for a public debt level of $789.9 billion. The House resolution provided a public debt level of $792.714 billion. The conference substitute provides a public debt level of $784.9 billion.

ECONOMIC OBJECTIVES AND ASSUMPTIONS

The fiscal policy contained in the conference substitute is designed to maintain a sustained economic recovery. Enactment of the legislation assumed in the totals, in con-

junction with a supportive monetary policy, will provide the balanced expansion necessary to move the nation steadily towards full employment and a lower rate of inflation. The economic assumptions underlying the revenue and spending ceilings contained in the conference report are as follows:

[*Calendar year; dollars in billions*]

Item	*1978*
Gross National Product:	
Current dollars	2088
Constant (1972) dollars	1393
Incomes:	
Personal income	1690
Wages and salaries	1117
Corporate profits	188
Unemployment rate (percent):	
Calendar year average	6.5
Fourth quarter	6.3
Consumer price index (percent change, year over year)	5.4
Interest rate, 3-month Treasury bills (monthy average)	5.2

Functional Categories

NATIONAL DEFENSE (050)

The Senate resolution provided budget authority of $120.3 billion and outlays of $111.6 billion. The House resolution provided budget authority of $117.136 billion and outlays of $109.947 billion.

The conference substitute provides budget authority of $118.5 billion and outlays of $111.0 billion. This substitute assumes that financial adjustments can be made to the Administration's budget request in order to remain within these targets. Such adjustments may include a possible slowdown in projected foreign military sales, the utilization of prior-year unobligated funds to finance a portion of the FY 1978 program, a lower inflation rate from that now assumed in the Administration's budget, and a partial absorption of the October pay raise.

INTERNATIONAL AFFAIRS (150)

The Sente resolution provided budget authority of $9.3 billion and outlays of $7.3 billion. The House resolution provided budget authority of $9.543 billion and outlays of $7.397 billion. The conference substitute provides budget authority of $9.3 billion and outays of $7.3 billion. The conference substitute reflects a lower estimate of the activities of the Export-Import Bank than assumed in the House resolution.

GENERAL SCIENCE, SPACE AND TECHNOLOGY (250)

The Senate resolution provided budget authority of $4.9 billion and outlays of $4.7 billion. The House resolution provided budget authority of $4.930 billion and outlays of $4.737 billion. The conference substitute provides budget authority of $4.9 billion and outlays of $4.7 billion.

NATURAL RESOURCES ENVIRONMENT, AND ENERGY (300)

The Senate resolution provided budget authority of $20.5 billion and outlays of $19.9 billion. The House resolution provided budget authority of $20.950 billion and outlays of $20.677 billion. The conference substitute provides budget authority of $20.7 billion and outlays of $20.0 billion. The decrease in outlays from the House resolution is due primarily to aceptance of a recent lower estimate for outlays from prior-year budget authority in the EPA construction grant program.

AGRICULTURE (350)

The Senate resolution provided budget authority of $2.2 billion and outlays of $3.7 billion. The House resolution provided budget authority of $2.153 billion and outlays of $4.395 billion. The conference substitute provides budget authority of $2.2 billion and outlays of $4.35 billion. The increase over the Senate outlay level is provided for reestimates by the Administration of agriculture price support programs.

COMMERCE AND TRANSPORTATION (400)

The Senate resolution provided budget authority of $19.4 billion and outlays of $19.1 billion. The House resolution provided budget authority of $20.569 billion and outlays of $20.277 billion.

The conference substitute provides budget authority of $20.0 billion and outlays of $19.4 billion. The conference substitute permits increases in funding above current policy for transportation programs and for Small Business Administration credit assistance programs. Estimated outlays of the Highway Trust Fund are reduced from those included in the House resolution to reflect a lagging rate of obligations in fiscal year 1977.

COMMUNITY AND REGIONAL DEVELOPMENT (450)

The Senate resolution provided budget authority of $8.1 billion and outlays of $10.7 billion. The House resolution provided budget authority of $8.237 billion and outlays of $10.926 billion. The conference substitute provides budget authority of $8.2 billion and outlays of $10.8 billion.

EDUCATION, TRAINING, EMPLOYMENT, AND SOCIAL SERVICES (500)

The Senate resolution provided budget authority of $27.1 billion and outlays of $27.0 billion. The House resolution provided budget authority of $22.739 billion and outlays of $27.756 billion. The conference substitute provides budget authority of $26.8 billion and outlays of $27.2 billion. The conference substitute assumes $3.8 billion in forward funding for the public service jobs program.

HEALTH (550)

The Senate resolution provided budget authority of $48.0 billion and outlays of $44.4 billion. The House resolution provided budget authority of $47.685 billion and outlays of $44.238 billion.

The conference substitute provides budget authority of $47.9 billion and outlays of $44.3 billion. The conference substitute assumes budget authority of $28.4 billion and outlays of $25.2 billion for the medicare program and budget authority and outlays of $11.5 billion for the medicaid program. The medicare and medicaid figures reflect the net effect of cost control savings and possible legislative improvements in medicaid. The conference substitute assumes budget authority of $8.0 billion and outlays of $7.6 billion for the remaining programs in the health function.

INCOME SECURITY (600)

The Senate resolution provided budget authority of $179.9 billion and outlays of $145.9 billion. The House resolution provided budget authority of $182.688 billion and outlays of $148.309 billion. The conference substitute provides budget authority of $179.9 billion and outlays of $146.7 billion.

VETERANS BENEFITS AND SERVICES (700)

The Senate resolution provided budget authority of $20.3 billion and outlays of $20.2 billion. The House resolution provided budget authority of $20.235 billion and outlays of $20.203 billion. The conference substitute provides budget authority of $20.25 billion and outlays of $20.2 billion.

LAW ENFORCEMENT AND JUSTICE (750)

The Senate resolution provided budget authority of $3.8 billion and outlays of $3.9 billion. The House resolution provided budget authority of $3.620 billion and outlays of $3.820 billion. The conference substitute provides budget authority of $3.7 billion and outlays of $3.85 billion.

GENERAL GOVERNMENT (800)

The Senate resolution provided budget authority of $3.8 billion and outlays of $3.8 billion. The House resolution provided budget authority of $3.891 billion and outlays of $3.991 billion. The conference substitute provides budget authority of $3.8 billion and outlays of $3.85 billion.

REVENUE SHARING AND GENERAL PURPOSE FISCAL ASSISTANCE (850)

The Senate resolution provided budget authority of $9.8 billion and outlays of $9.7 billion. The House resolution provided budget authority of $9.822 billion and outlays of $9.783 billion. The conference substitute provides budget authority of $0.8 billion and outlays of $9.7 billion.

INTEREST (900)

The Senate resolution provided budget authority of $43.0 billion and outlays of $43.0 billion. The House resolution provided budget authority of $1.069 billion and outlays of $43.000 billion. The conference substitute provides budget authority of $43.0 billion and outlays of $43.0 billion.

ALLOWANCES (920)

The Senate resolution provided budget authority of $0.8 billion and outlays of $0.9 billion. The House resolution provided budget authority of $1.069 billion and outlays of $1.021 billion. The conference substitute provides budget authority of $0.8 billion and outlays of $0.9 billion.

UNDISTRIBUTED OFFSETTING RECEIPTS (950)

The Senate resolution provided budget authority of —$16.6 billion and outlays of —$16.6 billion. The House resolution provided budget authority of —$16.000 billion and outlays of —$16.000 billion. The conference substitute provides budget authority of —$16.3 billion and outlays of —$16.3 billion.

REVISED CONGRESSIONAL BUDGET FOR FISCAL YEAR 1977

The Senate resolution revised the Congressional budget for fiscal year 1977 to reflect the current budget situation. The revised budget aggregates and functional spending totals reflected adjustments in revenues of a technical nature; the latest estimates of budget authority and outlays, including the effects of shortfalls in outlay projections; and withdrawal of the President's proposal for rebates to taxpayers in excess of tax liability and special payments to non-taxpayers.

The House resolution revised the Congressional budget for fiscal year 1977 to reflect the withdrawal of the rebate for taxpayers and special payments to non-taxpayers.

The conference substitute provides revenues of $356.6 billion, budget authority of $470.2 billion, outlays of $409.2 billion, a deficit of $52.6 billion, and a public debt of $701.3 billion.

Reductions in the Fiscal Year 1977 Deficit

The effect of the above revisions is to reduce the fiscal year 1977 deficit by $17.15 billion to $52.6 billion.

BUDGET AGGREGATES AND FUNCTIONAL CATEGORIES, FISCAL YEAR 1977

[In billions of dollars]

	3d budget resolution	Conference agreement

ADJOURNMENT

Mr. RAHALL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock p.m.), the House adjourned until tomorrow, Thursday, May 12, 1977, at 11 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1462. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of May 1, 1977, pursuant to section 1014(e) of Public Law 93-344 (H. Doc. No. 95-153); to the Committee on Appropriations and ordered to be printed.

1463. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a report on the value of property, supplies, and commodities provided by the Berlin Magistrate, and under the German Offset Agreement, during the quarter ended March 31, 1977, pursuant to section 719 of Public Law 94-419; to the Committee on Appropriations.

1464. A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to amend section 6015 of title 10, United States Code, to permit the Secretary of the Navy to prescribe the kind of military duty to which women members of the naval service may be assigned; to the Committee on Armed Services.

1465. A letter from the Acting Administrator, National Aeronautics and Space Administration, transmitting a report on negotiated contracts for experimental, developmental, test or research work, or for industrial mobilization in the interest of the national defense, covering the period July 1 through December 31, 1976, pursuant to 10 U.S.C. 2304 (e); to the Committee on Armed Services.

1466. A letter from the Deputy Administrator of General Services, transmitting a draft of proposed legislation to amend the Defense Production Act of 1950, as amended; to the Committee on Banking, Finance and Urban Affairs.

1467. A letter from the Acting Director, Federal Mediation and Conciliation Service, transmitting the 29th Annual Report of the Service, covering fiscal year 1976 and the transition quarter, pursuant to section 202 (c) of the Labor Management Relations Act, 1947; to the Committee on Education and Labor.

1468. A letter from the Administrator, Federal Energy Administration, transmitting a summary report on the agency's activities under the Freedom of Information Act during calendar year 1976, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

1469. A letter from the Comptroller General of the United States, transmitting a report on Government Printing Office production and management controls (LCD-77-410, May 4, 1977); to the Committee on Government Operations.

1470. A letter from the Assistant Secretary of the Interior, transmitting a copy of a proposed contract with Longyear Co., Minneapolis, Minn., for a research project entitled "Retractable Bit System," pursuant to section 1(d) of Public Law 89-672; to the Committee on Interior and Insular Affairs.

1471. A letter from the Assistant Secretary of the Interior, transmitting a copy of a proposed contract with Fluor Utah, Inc., San Mateo, Calif., for a research project entitled "Optimal Dragline Operating Techniques," pursuant to section 1(d) of Public Law 89-672; to the Committee on Interior and Insular Affairs.

1472. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports on political contributions made by Ambassadors-designate Robert H. Miller, Donald Clayton Bergus, Arthur A. Hartman, and Ulric St. Clair Haynes, Jr., and their families pursuant to section 6 of Public Law 93-126; to the Committee on International Relations.

1473. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports on political contributions made by Ambassador-designate James G. Lowenstein, Harry W. Shlaudeman, and Lawrence S. Eagleburger, and their families, pursuant to section 6 of Public Law 93-126; to the Committee on International Relations.

1474. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense equipment and services to Spain (Transmittal No. 77-38), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

1475. A letter from the Chairman, Foreign Claims Settlement Commission of the United States, transmitting the Commission's annual report for calendar year 1976, together with the final report of the Micronesian Claims Commission; to the Committee on International Relations.

1476. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a Corps of Engineers report on the East River and Steinway Creek, New York, in response to a resolution of the Senate Committee on Public Works, adopted June 27, 1960, and two resolutions of the House Committee on Public Works, adopted April 11, 1974; to the Committee on Public Works and Transportation.

1477. A letter from the Deputy Administrator of General Services, transmitting an amendment to the prospectus proposing extension of GSA's lease agreement covering space in the Hill Building, Anchorage, Alaska, pursuant to section 7(a) of the Public Buildings Act of 1949; to the Committee on Public Works and Transportation.

1478. A letter from the Comptroller General of the United States, transmitting a report that controls over vocational rehabilitation training services need improvement (HRD-76-167, May 5, 1977); jointly, to the Committees on Government Operations, and Education and Labor.

1479. A letter from the Comptroller General of the United States, transmitting a report on administrative weaknesses causing delays in developing standards to protect workers from cancer-causing and other dangerous substances (HRD-77-71, May 10, 1977); jointly, to the Committees on Government Operations, and Education and Labor.

1480. A letter from the Comptroller General of the United States, transmitting a report on domestic resettlement of Indochinese refugees (HRD-77-35, May 10, 1977); jointly, to the Committees on Government Operations, and the Judiciary.

1481. A letter from the Comptroller General of the United States, transmitting a report on NASA's proposed development of the Space Telescope project (PSAD-77-98, May 4, 1977); jointly, to the Committees on Government Operations, and Science and Technology.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committee were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DODD: Committee on Rules. House Resolution 560. Resolution providing for the consideration of H.R. 6810. A bill to amend and extend title II of Public Law 94-369, to establish a new title to the State and Local Fiscal Assistance Act of 1972, and for other purposes. (Rept. No. 95-285). Referred to the House Calendar.

Mr. MURPHY of New York: Committee on Merchant Marine and Fisheries. H.R. 4301. A bill to authorize appropriations for the National Sea Grant Program Act during fiscal year 1978, with amendment (Rept. No. 95-287). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 3722. A bill to amend the Securities Exchange Act of 1934 to authorize specified amounts to be appropriated for the Securities and Exchange Commission for fiscal years 1978-1980, with amendment (Rept. No. 95-288). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 3455. A bill to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes; with amendment (Rept. No. 95-289). Referred to the Committee of the Whole House on the State of the Union.

Mr. NEDZI: Committee on Armed Services. H.R. 6990. A bill to authorize certain construction at military installations, and for other purposes. (Rept. No. 95-290). Referred to the Committee of the Whole House on the State of the Union.

Mr. GIAIMO: Committee of Conference. Conference report on Senate Concurrent Resolution 19. (Rept. No. 95-291). Ordered to be printed.

REPORTED BILLS · SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. TEAGUE: Committee on Science and Technology.

H.R. 6683. A bill to reduce the hazards of earthquakes, and for other purposes (Rept. No. 95-286, pt. I). Referred to the Committee on Interior and Insular Affairs for a period ending not later than June 10, 1977, for consideration of such portions of the bill as fall within that committee's jurisdiction under rule X, clause 1(j). And ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mrs. BOGGS (for herself, Mr. CEDERBERG, Mr. DAVIS, Mr. HARRIS, Mr. JONES of North Carolina, Mr. MARLENEE, Mr. PATTERSON of California, Mr. SARASIN, Mr. STANTON, Mr. STUMP, and Mr. WEISS):

H.R. 7084. A bill to provide recognition to the Women's Air Forces Service Pilots for

their service to their country during World War II by deeming such service to have been active duty in the Armed Forces of the United States for purposes of laws administered by the Veterans' Administration; to the Committee on Veterans' Affairs.

By Mr. CRANE:

H.R. 7085. A bill to prohibit the sale, alienation, or commitment of gold by the Secretary of the Treasury without prior approval by act of Congress; to the Committee on Banking, Finance and Urban Affairs.

By Mr. DERWINSKI:

H.R. 7086. A bill to provide assistance in improving zoos and aquariums by creating a National Zoological and Aquarium Corporation, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. DRINAN (for himself and Mr. EDWARDS of California):

H.R. 7087. A bill to abolish the death penalty under all laws of the United States, and for other purposes; to the Committee on the Judiciary.

By Mr. EILBERG:

H.R. 7088. A bill to provide that an electronically recorded summary of daily chamber action in the Senate and the House of Representatives shall be made available by the Congress through the use of a toll-free telephone listing; to the Committee on House Administration.

By Mr. FARY:

H.R. 7089. A bill to amend title XVI of the Social Security Act to provide that supplemental security income benefits shall be payable to a resident alien only if he has continuously resided in the United States for at least 6 years; to the Committee on Ways and Means.

By Mr. HYDE:

H.R. 7090. A bill to exclude from gross income the first $1,000 of interest received from savings account deposits in home lending institutions; to the Committee on Ways and Means.

By Mr. KELLY:

H.R. 7091. A bill to revoke the recent increase in rates of pay for Members of Congress under the Federal Salary Act of 1967; to the Committee on Post Office and Civil Service.

H.R. 7092. A bill to repeal the provisions of law permitting automatic cost-of-living pay adjustments for Members of Congress; to the Committee on Post Office and Civil Service.

By Mr. KILDEE (for himself and Mr. MURPHY of New York):

H.R. 7093. A bill to amend the Child Abuse Prevention and Treatment Act to prohibit the sexual exploitation of children and the transportation and dissemination of photographs or films depicting such exploitation; to the Committee on Education and Labor.

By Mr. McFALL (for himself, Mr. DON H. CLAUSEN, Mr. EDWARDS of California, Mr. SEIBERLING, Mr. CORNELL, Mr. BROWN of California, Mr. MOAKLEY, Mrs. PETTIS, Mr. BOWEN, Mr. STARK, Mr. THONE, Mr. VAN DEERLIN, Mr. PATTERSON of California, Mr. BUTLER, and Mr. SISK):

H.R. 7094. A bill to amend the Federal Power Act to provide for the reform of electric utility regulation by the Federal Power Commission; to the Committee on Interstate and Foreign Commerce.

By Mr. MICHEL:

H.R. 7095. A bill to amend title XVIII of the Social Security Act to authorize payment to chiropractors for diagnosis by X-ray of vertebral subluxation; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. MILLER of Ohio:

H.R. 7096. A bill to improve education by increasing the freedom of the Nation's teachers to change employment across State lines without substantial loss of retirement benefits through establishment of a Federal-State program; to the Committee on Education and Labor.

By Mr. MILLER of Ohio (for himself and Mr. CHAPPELL):

H.R. 7097. A bill to amend the Clean Air Act to permit the granting of variances to certain powerplants which emit sulfur dioxide and which are located in areas where unemployment is high, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. OBERSTAR:

H.R. 7098. A bill to amend the Internal Revenue Code of 1954 to provide that certain income from a nonmember telephone company is not taken into account in determining whether any mutual or cooperative telephone company is exempt from income tax; to the Committee on Ways and Means.

H.R. 7099. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for certain amounts paid for food and lodging while away from home for purposes of receiving medical care; to the Committee on Ways and Means.

By Mr. PEASE:

H.R. 7100. A bill to amend title XVI of the Social Security Act to provide that certain aliens may not qualify for supplemental security income benefits unless they not only are permanent residents of the United States but have also continuously resided in the United States for a period of 5 years, and to provide that an alien may not be admitted to the United States unless a citizen of the United States agrees to provide support to such alien for a period of 5 years after admission, and for other purposes; jointly, to the Committees on Ways and Means, and the Judiciary.

By Mrs. PETTIS:

H.R. 7101. A bill to amend certain provisions of law relating to land claims by the United States in Riverside County, Calif., based upon the accretion or avulsion, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ROSTENKOWSKI (for himself, Mr. MOORHEAD of Pennsylvania, and Mr. CONABLE):

H.R. 7102. A bill to declare a national policy on investment in the private sector of the U.S. economy; to the Committee on Banking, Finance and Urban Affairs.

By Mr. CHARLES WILSON of Texas:

H.R. 7103. A bill to amend the Health Professions Educational Assistance Act of 1976 to afford preferential status to alien physicians and surgeons in admission to the United States; to the Committee on Interstate and Foreign Commerce.

By Mr. ASHBROOK (for himself and Mr. SHUSTER):

H.R. 7104. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to grant additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. BROYHILL:

H.R. 7105. A bill to amend title 38 of the United States Code to provide that progressive muscular atrophy developing a 10 percent or more degree of disability within 7 years after separation from active service during a period of war shall be presumed to be service connected; to the Committee on Veterans' Affairs.

By Mr. COLLINS of Texas:

H.R. 7106. A bill to make a communication or negotiation by the President, the Vice President, Members of Congress, Cabinet and certain sub-Cabinet level officials, Justices of the Supreme Court, or certain Foreign Service officers to or with a person engaged in certain crimes a cause for removal from office; jointly, to the Committtees on the Judiciary, and Standards of Official Conduct.

By Mr. DODD:

By Mr. CHARLES WILSON of Texas:

H.R. 7122. A bill to authorize a demonstration program for the purpose of eliminating rail-highway crossings in the city of Orange, Tex.; to the Committee on Public Works and Transportation.

By Mr. ASHBROOK:

H.J. Res. 455. Joint resolution proposing an amendment to the Constitution of the United States to provide a new procedure for the election of the President and Vice President; to the Committee on the Judiciary.

By Mr. MOTTL (for himself and Mr. BLANCHARD):

H.J. Res. 456. Joint resolution proposing an amendment to the Constitution of the United States to prohibit compelling attendance in schools other than the one nearest the residence and to insure equal educational opportunities for all students wherever located; to the Committee on the Judiciary.

By Mr. PREYER:

H.J. Res. 457. Joint resolution to designate October of each year as National Learning Disabilities Month; to the Committee on Post Office and Civil Service.

By Mr. EDWARDS of Oklahoma (for himself, Mr. YOUNG of Missouri, Mr. DEVINE, Mr. MURPHY of Pennsylvania, Mr. KINDNESS, Mr. PURSELL, Mr. BADHAM, and Mr. ERTEL):

H. Con. Res. 218. Concurrent resolution expressing the sense of Congress that the ban on saccharin be withdrawn; to the Committee on Interstate and Foreign Commerce.

By Mr. GILMAN:

H. Con. Res. 219. Concurrent resolution expressing the sense of the Congress that the United States should deny diplomatic recognition to the Socialist Republic of Vietnam, and oppose its membership in the United Nations, until such country makes a full accounting of Americans unaccounted for and missing in action in areas under its control; to the Committee on International Relations.

By Mr. HAMMERSCHMIDT:

H. Res. 561. Resolution to examine the Nations telecommunications policy; to the Committee on Interstate and Foreign Commerce.

By Mr. KASTEN:

H. Res. 562. Resolution to establish an ad hoc Committee on Welfare Reform for the purpose of studying the problems which arise in the interaction of programs dealing with welfare benefits and of formulating new legislation to restructure the present welfare system in light of such problems, and for other purposes; to the Committee on Rules.

By Mr. ROE:

H. Res. 563. Resolution offering a congressional salute to four New Jersey aviation pioneers upon their induction into the Teterboro Aviation Hall of Fame, New Jersey's only aviation museum: Samuel C. Barnitt, Louis G. Ranley, Ben B. Brock, and posthumously to the late Charles "Slim" West; to the Committee on Post Office and Civil Service.

By Mr. ROSTENKOWSKI (for himself, Mr. MICHEL, and Mr. RAILSBACK):

H. Res. 564. Resolution relating to the future telecommunications policy of the Nation; to the Committee on Interstate and Foreign Commerce.

By Mr. WALKER (for himself, Mr. PURSELL, Mr. MARRIOTT, Mr. CORCORAN of Illinois, Mr. STEERS, Mr. STANGELAND, Mr. DORNAN, Mr. EVANS of Delaware, Mr. HOLLENBECK, Mr. BADHAM, Mr. STOCKMAN, Mr. COLEMAN, Mr. LEACH, Mr. QUAYLE, Mr. EDWARDS of Oklahoma, Mr. SAWYER, Mr. MARKS, Mr. RUDD, Mr. TRIBLE, and Mr. MARLENEE):

H. Res. 565. Resolution to authorize the Committee on Standards of Official Conduct to conduct an investigation to determine whether Members of the House of Representatives, their immediate families or their associates accepted anything of value, directly or indirectly from the Government of the Republic of Korea or representatives thereof; to the Committee on Rules.

By Mr. WEISS (for himself, Mr. BAUCUS, Mr. BEILENSON, Mr. BOLAND, Mr. CAPUTO, Mr. CAVANAUGH, Mr. CLEVELAND, Mr. CORCORAN of Illinois, Mr. DAN DANIEL, Mr. EDWARDS of Oklahoma, Mr. FRENZEL, Mr. KELLY, Mr. KEMP, Mr. KOSTMAYER, Mr. LENT, Mr. MCHUGH, Ms. MIKULSKI, Mr. NOLAN, Mr. OTTINGER, Mr. SOLARZ, and Mr. VENTO):

H. Res. 566. Resolution to amend the Rules of the House of Representatives to require that all bills and resolutions have titles which accurately reflect their contents and all subject matters contained therein; to the Committee on Rules.

By Mr. ZABLOCKI:

H. Res. 567. Resolution concerning committee hearings on the future telecommunications policy of the Nation; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FARY:

H.R. 7123. A bill to permit the vessel *Manatra II* to be inspected, licensed, and operated as a passenger-carrying vessel, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. RHODES:

H.R. 7124. A bill for the relief of Mr. and Mrs. James Blair McLeod; to the Committee on the Judiciary.

By Mr. TRIBLE:

H.R. 7125. A bill for the relief of Charles R. Petty; to the Committee on the Judiciary.

H.R. 7126. A bill for the relief of Commander Joseph A. Siebel; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 6714

By Mr. YOUNG of Missouri:

Page 22, immediately after line 16, insert the following new section:

PROHIBITION ON USE OF FUNDS FOR STERILIZATIONS

SEC. 128. Section 114 of the Foreign Assistance Act of 1961 is amended—

(1) by striking out "ABORTIONS.—" and inserting in lieu thereof "ABORTIONS OR STERILIZATIONS.—(a)"; and

(2) by adding at the end thereof the following new subsection:

"(b) None of the funds made available to carry out this part shall be used to pay for the performance of sterilizations as a method of family planning or to motivate or coerce any person to practice sterilizations.".

H.R. 6810

By Mr. CORRADA:

Page 26, line 12, strike the comma and insert in lieu thereof a period.

Page 26, strike line 13 through line 19.

Page 26, line 24, strike the semi-colon and insert in lieu thereof a period.

Page 26, strike line 25.

Page 27, strike lines 1 and 2.

Page 27, line 8, strike the semi-colon at the end of the line and insert in lieu thereof a period.

Page 27, strike lines 9 through 18.

At the end of bill, add a new section:

SEC. 8. The Public Works Employment Act of 1976 (42 U.S.C. 6735) is amended by adding at the end thereof the following new section:

"AUTHORIZATION OF APPROPRIATIONS FOR PUERTO RICO, GUAM AND THE VIRGIN ISLANDS

"SEC. 216. (a) IN GENERAL. There is hereby authorized to be appropriated for each of the five succeeding calendar quarters (beginning with the calendar quarter which begins on July 1, 1977) for the purpose of making payments under this title to Puerto Rico, Guam, American Samoa, and the Virgin Islands, an amount equal to 1 percent of the amount authorized for each such quarter under Section 202(b).

"(b) ALLOCATIONS.—

"(1) The Secretary shall allocate from the amount authorized under subsection (a) an amount for the purpose of making payments to such governments equal to the total authorized for the calendar quarter multiplied by the applicable territorial percentage.

"(2) For the purposes of this subsection, the applicable territorial percentage is equal to the quotient resulting from the division of the territorial population by the sum of the territorial population for all territories.

"(3) For purposes of this section—

"(A) the term 'territory' means Puerto Rico, Guam, American Samoa and the Virgin Islands.

"(B) the term 'territorial population' means the most recent population for each territory as determined by the Bureau of Census.

"(b) the provisions of sections 203(c)(4), 204, 205, 206, 207, 208, 209, 210, 211, 212 and 213 shall apply to the funds authorized under this section.

"(c) PAYMENTS TO LOCAL GOVERNMENTS.—The governments of the territories are authorized to make payments to local governments within their jurisdiction from sums received under this section as they deem appropriate."

EXTENSIONS OF REMARKS

A TRIBUTE TO ARTHUR F. HANLEY, OF RHODE ISLAND

HON. FERNAND J. ST GERMAIN

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. ST GERMAIN. Mr. Speaker, it gives me pleasure today to offer tribute to one of my home State's most respected community leaders as he concludes a brilliant career of 38 years as a public servant in the private sector. His name is Arthur F. Hanley and for the last 15 years, he has served as the chief executive officer of Blue Cross and Blue Shield of Rhode Island. Mr. Hanley was only the third employee hired by the then fledgling Blue Cross when it was begun in 1939. He took his responsibilities as sales director very seriously, pursuing new memberships with an almost messianic zeal. Then came World War II, when Mr. Hanley enlisted in the U.S. Army, serving 5 years as an Air Corps communications officer in the European theater and rising to the rank of lieutenant colonel.

Upon his return to Rhode Island, he redoubled the Blue Cross Plan's membership effort, taking astute advantage of the post-war wage freeze to encourage employee groups to furnish workers and their dependents with prepaid health benefits. Mr. Hanley also worked diligently to promote the development of a prepaid health benefits program for medical-surgical care and was instrumental in nurturing the growth of the Blue Shield Plan, then called Physicians Service, in 1949. He continued to demonstrate a flair for innovation in sales and administrative leadership and rose to the office of assistant director of the plans and, ultimately, in 1962, achieving on merit the primary executive responsibility for the health benefits of more than 80 percent of the State's eligible population.

During his stewardship, the Rhode Island plans have earned a national reputation for administrative excellence, benefit development, cost containment and subscriber service. They deservedly won the privilege of acting as the intermediary for the Federal Government under the medicare program when it was enacted in 1965, a role they have fulfilled with distinction ever since. Mr. Hanley has served as a member of the Board of Governors of the Blue Cross Association, national coordinating body for the Nation's 71 Blue Cross Plans, and on the Board of Directors of the National Association of Blue Shield Plans. He also served the Federal Government directly with service on a high-level advisory panel task force studying medicaid and related health financing programs. He has also served as a member of the American Hospital Association Council on Planning and the Hospital Association of Rhode Island.

In 1963, his achievements in health financing brought him the distinction of being awarded an honorary doctorate in business administration from his alma mater, the University of Rhode Island. His accomplishments and community service commitment include the Rhode Island Board of Trustees of State Colleges, past president of the University of Rhode Island Alumni Association, the Governor's Commission To Study the Needs of Higher Education, the Higher Education Assistance Corporation, the Rhode Island Rehabilitation Council, the Boy Scouts of America, the voluntary Health Planning Council, Rhode Island Health Services Research, Inc., the Governor's Committee on Employment of the Physically Handicapped, the Rotary and the United Way. He is widely recognized as an enlightened and energetic leader and as a compassionate human being. For his personal achievements and for his example of selfless dedication to a principle, voluntarism in health financing, I offer my sincere congratulations and best wishes for a fulfilling retirement to Arthur F. Hanley and to his lovely wife, Frances.

A. MARION AKERS—DISTINGUISHED EDUCATOR AND PUBLIC SERVANT

HON. HAROLD T. JOHNSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. JOHNSON of California. Mr. Speaker, Arthur Marion Akers, a distinguished educator and public servant, has announced his plans to retire from the staff of Sierra College in Rocklin, Calif., following 30 years of service to this outstanding institution of higher learning. I take this opportunity to congratulate him and wish him every success for the future.

In 1947 Marion Akers joined the staff of what was then known as Placer College as a drama, speech, and English instructor. Over the following 30 years he rose to positions of increasing responsibility and is currently serving as assistant superintendent of instruction at what is now known as Sierra College. The list of his accomplishments and contributions to this fine school is indeed long. He has been a mainstay of the college and he will be sorely missed by his fellow administrators, the faculty, and the students he has served over the years so well.

Following his appointment as an instructor in 1954, Akers was appointed director of counseling and guidance, a capacity in which he served for 2 years. Subsequently, in 1956 he was named dean of instruction and vice president of the college. Since that date, although his title has changed to assistant superintendent of instruction, he has remained the No. 2 executive of the college throughout these many years. In addition he has briefly served as acting college president, following the death of William Winstead in 1975.

There have been many changes on the Sierra College campus since Marion Akers first arrived. In fact, the campus itself has moved from Auburn to Rocklin. He has witnessed a phenomenal student population growth and has played an important part in the school's emergence as one of the most respected community colleges in the State of California.

While Akers' primary interest has been in the college, he and his lovely wife Gina have contributed greatly to their community. It has been my privilege to work with Marion over the years on many projects at the college and in the community of Rocklin. Together they have done much to increase the cultural, as well as the academic, development of the entire college community creating an atmosphere of sophistication previously unknown there. Marion is a man of extreme dedication, with an open and understanding mind, and a determination to see that excellence prevails whether it is an individual student, a faculty member, the college as a

whole, or his community. He is always working for the development of any latent potential to assure that the best is accomplished.

Akers has always been able to see the views of others. During the turmoil of the 1960's when the colleges across the country were experiencing student unrest, he helped steer a course of understanding on the Sierra College campus. He has always truly appreciated the concerns of all sectors of the college community.

His interest in his community is demonstrated by his active service in the Rotary Club, the Auburn Community Concert Association, the Auburn Community Theatre, and the Boy Scouts of America.

He, his wife Gina, and his three children Stephen, Susan, and Katherine, are well known throughout the community for their participation and leadership in various community, school, and church activities.

Although he is only 59, Marion and Gina are looking forward to a more relaxing retirement. Both are avid travelers and have already made plans for trips to the east coast and to Europe. In fact, they may also spend part of their time working in the travel promotion field. One of Marion's most successful hobbies is photography. He hopes to combine this skill with his renowned skill as a cabinetmaker to construct a complete photo darkroom in his home. I am sure he is looking forward to spending more of his time in these labors of love.

Marion Akers has never been one to sit back and take life easy, however, and I have no reason to believe that he will now. He, himself, has said he is just entering a new lifestyle away from the normal pressures of a regular career.

I know that Marion will continue his fine leadership in the community and will certainly maintain his strong interest in the development of Sierra College. Those of us who count ourselves as his friends will certainly miss him in an official capacity at the college, but know that we can continue to count on his wealth of experience and excellent counsel for many years to come as he shifts into his new capacity.

It is my pleasure to share with my colleagues here in the Congress the outstanding accomplishments of this distinguished man. My wife Albra and I join his many friends and family in extending our very best wishes for the years to come.

ALIEN RIDDLE: ANOTHER STUMPER

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. LAGOMARSINO. Mr. Speaker, the Ventura County Star Free Press recently published an editorial on the growing problem of illegal aliens and the administration's approach to this problem. In light of the President's forthcoming proposals, I would like to bring these penetrating comments to the attention of my colleagues:

ALIEN RIDDLE: ANOTHER STUMPER

As if trying to solve the energy riddle weren't challenging enough, President Carter is also trying to figure out what to do about illegal aliens. It's another stumper, as agricultural areas—like Ventura County—are painfully aware.

The Carter plan on aliens is due to be unfurled in the next couple of weeks, but even then, it's not likely to take the spotlight away from the national debate over energy, so may get less attention than it deserves. There's no more agreement on what to do about illegal aliens than there is on what to do about gasoline taxes—and not even any apparent concensus within the several factions involved: Employers, workers, unions, citizens, aliens, Anglos, Chicanos . . .

"The Chicano community" doesn't exist in a monolithic sense any more than "the Anglo community" does, and no issue makes that more evident than illegal aliens. If the illegals take jobs away from American citizens—as they obviously do—and help keep factory and farm wages artificially low—as they obviously do—the primary victims are unemployed and low-paid factory and farm workers—who, in Southern California, tend to be Chicano—or Mexican-American, whichever term you prefer.

So a crackdown on illegal aliens, including deportations, would seem in the self-interest of these American citizens. Yet there's been no clamor from U.S. Chicanos for such a crackdown—in fact, that approach seems to be tacitly opposed.

Many illegal aliens are relatives and friends of American citizens, who aren't eager to see them rounded up and sent back to Mexico, and there's some apprehension about a mass roundup of people who "look Mexican." That would be a *carte blanche* for hassling thousands of innocent people—including not only aliens who are in this country legally, but also U.S. citizens.

That's also the main reason there's no apparent widespread Chicano support for making employers responsible for not hiring illegal aliens: That might serve as an excuse in hiring to discriminate against any applicant who "looks Mexican."

But without putting some responsibility on employers, the demand for illegal alien labor will not diminish, and as long as the demand is there, the supply will continue to push across the border. The best system proposed so far is a "counterfeitproof" identity card as proof of citizenship. And if it were the Social Security card, that might help establish (if Congress would act accordingly) that illegal aliens are not entitled to unemployment, medical and other welfare benefits.

The stickiest part of the Carter plan is likely to be a provision for "amnesty" for those illegal aliens who have been in this country for a specified period of time, and have become law-abiding "citizens" in all but name. The hardest part about such amnesty is setting a cutoff date, but there's another problem we haven't seen addressed yet.

Amnesty is going to *encourage* the illegal migration across the border, which is already virtually a daily parade. Once the principle is set that illegal aliens can establish squatter's rights—with regards to citizenship—the urge to head for the border will be even greater than it is now.

The illegal alien riddle might not affect as many Americans personally as Mr. Carter's energy plans, but in any terms—personal, national, moral, political—it's another stumper.

NUCLEAR POWER

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for May 11, 1977, into the CONGRESSIONAL RECORD:

NUCLEAR POWER

The future of nuclear power is not as certain as it once was. The controversy over the safety and the cost of nuclear power is in a stage of charge and countercharge, and it is not easy to sort out the debate.

The central question about nuclear power, which now accounts for about 8% of total electrical capacity in the country, is whether the benefits outweigh the potential risks involved. Nuclear power can never pose zero risk, so at issue is the frequency and severity of that risk.

Critics attack nuclear power as a dangerous source of energy. They question its economic benefits by pointing to high cost of construction and operation, poor performance and large government subsidies. They emphasize the possibility of grave accidents, the threat posed by long-lasting nuclear wastes, the inevitable proliferation of nuclear weapons, and the danger of terrorist sabotage or blackmail. They also see inadequate safeguards against mechanical failure.

Proponents of nuclear power see it as safe, clean and indispensible. Indeed, they regard it as the only hope for the survival of energy-intensive economies. Without nuclear power, they envision ever-increasing imports of oil, dwindling petroleum supplies, eventual power black-outs and massive unemployment. They contend that nuclear power is less costly and less dangerous to the environment and to human health than are the fossil fuels. They point to the excellent safety record of nuclear reactors and express confidence that the nuclear waste problems can be met. They argue that nuclear weapons proliferation is a hazard that exists independent of American nuclear power and that the United States cannot simply turn potential markets over to foreign competitors. They believe that future energy needs can only be met by a major effort to develop the nuclear option.

Although the critics argue for a moratorium on further construction of nuclear plants, the debate in this country is not whether to permit the establishment of a large nuclear industry. Rather, the debate centers on the question of risk. The issue is not whether to develop nuclear power as one important substitute for dwindling sources of oil and gas, but how this is to be done. In my judgment nuclear power is one of the options that the country will pursue in a broad and sustained attack on its energy problem, but there is time to assess carefully its risks, as well as its benefits, and to avoid hasty and uncritical decisions.

According to a recent and highly regarded report sponsored by the Ford Foundation, the safety and cost of nuclear power can be summarized as follows: Nuclear power will probably cost somewhat less than coal power and substantially less than solar, geothermal and fusion energy for a period extending well into the next century. The risks of nuclear power to human health are genuine and need to be balanced against risks of coal, which is the principal energy alternative for electric power in this country. In normal operations nuclear power probably has fewer adverse effects on health than does coal, and even when accidents are taken into account

it compares favorably to coal. Nuclear wastes present special problems, but they can be disposed of permanently in a safe manner. Coal has a disruptive effect on land, results in acid run-off that pollutes waterways and acid rain that endangers land and crops. Even some environmentalists have come around to the view that the alternatives to nuclear power are unsatisfactory. Change in climate on a global scale is another potentially serious consequence of power generation. The effect of the carbon dioxide produced when coal is burned could be of overriding significance in a comparison of coal and nuclear power.

Probably the most serious risk associated with nuclear power is the increase in the number of countries that have the capability to produce nuclear weapons. Proliferation of these weapons can be extremely dangerous to the security and peace of the world. This proliferation could extend to terrorist groups. There is no simple solution to the problem of proliferation. Additional measures must be taken to increase security at nuclear plants, to reduce the possibility of terrorists acts and to implement a nonproliferation strategy which includes international efforts to limit the weapons. It is in the common interest of all nations to contain nuclear proliferation.

In considering the role of nuclear power, perhaps the real question is whether we should have no risk at all and also insufficient electric power, or whether it is better to take a small, calculated risk to insure a continued supply of the electrical power that is needed.

My judgment is that the building of nuclear power plants in some areas of the country will go ahead, but with increasingly strict controls on safety, environmental impact and safeguards against sabotage or theft. There is a growing movement toward international control of trade in nuclear technology. Efforts to develop other energy sources will increase. The policy will recognize that we must have nuclear energy. However, it will demand that we do everything we can to reduce its risks.

"WIND-CATCHERS," AMERICAN WINDMILLS OF YESTERDAY AND TOMORROW

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. FAUNTROY. Mr. Speaker, in light of the major, new energy push which the President has launched and the Congress is rallying behind, I wish to bring to the attention of my colleagues an excellent book by a resident of the District of Columbia.

"Wind-Catchers," American Windmills of Yesterday and Tomorrow by Volta Torrey. Mr. Torrey's book provides a history of the windmill and makes some interesting observations about the utility of this machine. As we look to alternative sources of energy, let us not overlook previously tapped sources.

Mr. Torrey's book has been recommended by the Book-of-the-Month Club. That club's statement about "Wind-Catchers" follows:

"WIND-CATCHERS"

About a century ago, says Volta Torrey in an excellent little history called *Wind-Catchers* ($12.95), there were 70-odd farm-windmill manufacturers in the United States and thousands upon thousands of farm windmills pumping water. Then electric power and electric pumps became available. The pumps cost less, worked better, made fewer groaning noises—and the curtain went down on the farm-windmill business. Except that today we are looking for new sources of electric power. Can windmills generate power? Yes and no. Thus far, it seems, none can be relied on to produce more than a few kilowatts; furthermore, nobody has solved the problem of how to store, at a reasonable cost, wind-generated power to be used when the wind isn't blowing. But promising experiments are under way and have involved everybody from Grumman Aircraft to Buckminster Fuller to NASA to the American Wind Energy Association in Detroit. Readers interested in the results—or in windmills in general, from Don Quixote's to that now-rusted Eclipse out behind great-grandpa's barn—should turn to Mr. Torrey.

DIMENSIONS OF THE ENERGY CRISIS

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. DELLUMS. Mr. Speaker, the first step in response to any crisis is to be clear about what we want to do and why. The "energy crisis" has three different dimensions that require different kinds of responses, and it is a source of confusion to lump them all together. The first dimension is the challenge of adjusting to the end of the era of cheap fuels. The question here is not ending the "waste" of energy for "inessential" purposes: it is whose purposes shall be called inessential. It is not a matter of deciding to pay higher prices in order to conserve: someone will have to pay these higher prices, and the only question is who. But precisely because the question of efficient adjustment to new relations of scarcity is so political, I believe the Government should restrict itself to firm general policy and not go too deeply into particular administrative and economic decisions. We should remember the favoritism, uncertainty, and faddishness that usually accompanies the political process in this country and be on the alert for the elitist abuse we have seen before. We see already the growth of regional bitterness and an intensified clash of special interests. The result of this bargaining will certainly not call forth a spirit of sacrifice.

The second dimension consists of foreign policy and national power considerations. These are very important, but the question of our dependence on imported oil is still quite different from the overall problem of reliance on nonrenewable resources. I believe President Carter would be well-advised to separate clearly which measures were aimed at which goal, so that costs can be weighed against probable benefits. In particular, if it is determined that for foreign policy reasons we can no longer tolerate widespread use of gas guzzlers, I see no reason to bribe people to buy smaller cars, as Carter proposes, when more direct administrative measures would be more effective.

The third dimension consists of social problems that are greatly affected by the high price of energy, but existed before the present crisis and will still be with us afterwards. In this category are environmental concerns, nuclear safety, mass transportation, and the problems of the city, and the need for a more equal distribution of wealth. I think it is important that the energy crisis does not become an excuse for retreat on these issues. Here the Government must set firm policies and stick to it.

It is in this spirit that we should judge the proposals made by the President in his energy message.

AGENCY FOR CONSUMER ADVOCACY A/K/A CONSUMER PROTECTION AGENCY

HON. JAMES R. MANN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. MANN. Mr. Speaker, in our garden of perrennial issues we have a species that is about to bloom again. When this perennial first surfaced in 1971, it was known as the Consumer Protection Agency. Although its identity has since been changed to the Agency for Consumer Advocacy, its objective remains the same—to create a new and expensive bureaucratic fiefdom for those who purport to represent the interests of over 200 million American consumers.

Have the American consumers asked for this representation? No. To the contrary, when consulted by the Opinion Research Corp. in 1975, 75 percent of those polled said they would prefer making "* * * the agencies we now have more effective." Similar results were obtained through a Gallup Poll.

It seems downright ludicrous to me that the Congress—a Congress which has been elected to represent the American people in their citizen, taxpayer, and consumer capacities—is again on the verge of considering a proposal which has provoked such overwhelming opposition from the public sector.

The Spartanburg Herald recently orchestrated that opposition in an editorial which I am pleased to commend to your attention at this point in my remarks:

IT'S A DECEPTION OF REAL CONSUMERS

Congress is engaged in one of its most dangerous exercises of deception on the American people.

The skids seem amply greased for approval of the "Agency for Consumer Advocacy." It would be a bureaucratic monster incapable of performing as its title suggests.

This creation presumably would represent consumer interests in proceedings before other government agencies. The typical description is that it would "give consumers their own voice in government."

It actually would be a powerful weapon in the hands of those who appoint themselves to speak for consumers. They certainly won't have a mandate from the mass of people who buy in the market place.

Two years ago, when the same legislation was being considered, a Gallup poll had a measurement of 75 per cent opposition. Half

of the 13 per cent who said they favored the bill promptly switched when told that it calls for the government to spend at least $60 million over the first three years to get the agency under way.

There is no single "consumer voice" which can be represented by this organization. It would decide what is in the consumer interest, but there is no basis on which it could determine accurately what consumer interests are.

Inevitably, the plays would be called by pressure groups and special interests, with little thought for the real consumer. These self-appointed "advocates" already have too much influence in our national legislature.

The "Agency for Consumer Advocacy" should be placed promptly in the deep sleep.

ALASKAN NATURAL GAS

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. MURTHA. Mr. Speaker, I want to submit for the RECORD two extremely important articles that have great bearing on the decision by Congress later this year concerning development of Alaskan natural gas resources:

NEWS WATCH—HOW SECURE IS A PIPELINE THROUGH CANADA?

(By Walter H. Annenberg)

Apparently the Federal Power Commission is not aware of Canada's burgeoning nationalism, a nationalism that started as a commendable effort to encourage distinctive Canadian culture and resulted in economic war against American business.

Publications based in the United States have been all but banned in Canada by laws specifically designed to make it impossible for them to operate there. American broadcasters are harassed by regulations and practices that can be described only as acts of an unfriendly nation.

Yet when the Federal Power Commission (FPC) had to decide whether to bring Alaskan gas to the 48 lower states via a pipeline across Canada or in tankers, it opted for the Canadian pipeline. Reportedly, the decision was influenced by the assertion that the pipeline would be less environmentally damaging than the sea route.

Such a parochial approach is unworthy of the FPC's responsibility to the citizens of this country. It is, in view of the Canadian government's determination to separate itself from the United States, at very least shortsighted. We are placing one of our energy lifelines under direct control of a less-than-friendly government. Should the trend of Canadian nationalism continue in its present direction, the FPC would be helping place in the hands of an unfriendly power a gun to hold against the heads of American citizens.

How unfriendly is the Canadian government? I speak from personal experience, which is why I am taking the rather unusual step of speaking out in this space on a subject that only peripherally concerns television. It is an experience I shared with other American publishers when the Canadian Parliament passed an act making it illegal for Canadian advertisers to deduct advertising in American-owned magazines as a legitimate business expense. This act effectively cut off Canadian advertising to American publications directed to the Canadian audience. TV Guide was fortunate to find a distinguished young French-Canadian executive who organized a group to buy our eight Canadian editions. Time magazine simply discontinued its Canadian edition. Reader's Digest has had to develop a device, including substantial Canadian ownership to continue publishing there.

American television has felt similar blows. Although Canadians have clearly shown their preference for American programs, Canadian regulations provide that 60 per cent of the programs carried by the government-controlled Canadian Broadcasting Corporation (CBC) and by the other two networks must be Canadian. Most of Canada's population live close to the American border and can receive American stations as well as Canadian ones, thus they can watch an American network show from a station in, say, Buffalo, or from a station in Toronto that carries the same show via CBC.

CBC, however, insists in many cases that the network show be made available to its audience several days before the show is broadcast by the American network. This unfair advantage prompts Canadians to watch the Toronto station rather than Buffalo's.

Cable systems are quite important in Canada, one reason being the Canadians are so fond of American programming. This bothers the government in Ottawa, which doesn't like the idea of its citizens being exposed to so much American television culture—and so many American commercials. It therefore encouraged cable systems there to drop some commercials from the American programs and substitute Canadian promotions. Most cable systems are doing this (a few used to drop in Canadian commercials occasionally), but the furor from American broadcasters was so great that the new cable system don't have to delete American commercials.

In limiting tax-deductible expenses, American law restricts the number of conventions an American company may hold, and the number of convention trips an individual may take, outside the U.S. This has reduced Canadian income from conventions and the Canadians want the restrictions lifted. American broadcasters suggested that such a change be contingent upon a Canadian promise to stop harassing them, but neither the Canadians nor Congress would go along.

How much Canadian harboring of draft dodgers and deserters during the Vietnam War period has contributed toward the anti-American attitude there is not measurable. But the anti-Americanism is evident, especially in government action and government-sanctioned actions. It should be possible to encourage Canadian contributions to the arts and a unique Canadian culture without using the United States as a scapegoat.

It is obviously to be hoped that the current Canadian attitude toward the United States, at least the attitude of the Canadian government, will give way to the friendly cooperation and interchange that once existed between our two nations. At this point, however, that is only a hope and we cannot dismiss the possibility—however remote—that matters will get worse instead of better.

That is the possibility that makes it imperative to act with extreme caution in the matter of planning to bring vital natural gas from Alaskan fields to the lower states. President Carter is to make the final decision by Dec. 1 concerning the means to make available Alaska's Prudhoe Bay reserve of some 20 trillion cubic feet of gas, enough to provide 5 per cent of our consumption for 25 years. Two pipeline routes now favored by the FPC would each cost about $6.7 billion.

A third route involves a pipeline from Prudhoe Bay south to the Alaskan coast and then having the gas—by then liquified—transported by tanker to West Coast ports. The all-pipeline routes, environmentalists and the FPC say, are more reliable and less environmentally damaging.

The FPC and the environmentalists may have studied the matter carefully, but it is evident from the naive conclusion they reached that they gave little if any deliberation to the serious and immediate problem of the political situation in Canada and that nation's growing antagonism—well-displayed antagonism—toward the United States.

Unless there is a clear and immediate danger to the environment, or there is some recent development that makes tankers carrying liquified gas—as they have done safely for many years—suddenly less reliable than they always have been, we believe the FPC recommendation to the President should be reconsidered.

We already have an oil pipeline crossing Alaska to ports where the oil is to be shipped south. Why not a gas transportation system parelleling that?

Whatever Canada's real—or imagined—differences with the United States, every effort must be made to regain our former friendly, easy relationship. Until that goal is reached, however, the United States cannot permit itself to be vulnerable to the whims of a government that has acted less than responsibly toward us.

Our safest course would seem to be the prudent one, and that is the course that avoids placing 5 per cent of our natural gas supply under what amounts to foreign control.

CANADA WOULD BAR GAS PIPELINE FROM ALASKA ACROSS NORTH YUKON

(By Robert Trumbull)

OTTAWA, May 9.—[A report commissioned by the Canadian Government recommended today a ban on any pipeline from Alaska across the northern Yukon and urged that no natural gas pipeline be built through the MacKenzie Valley of the Northwest Territories for at least 10 years.]

The 240-page report was prepared by Justice Thomas R. Berger of the British Columbia Supreme Court after 21 months of hearings. [It found an alternative proposal to bring the Alaskan gas through Canada by way of the southern Yukon more acceptable, but Judge Berger refused to endorse the undertaking without similar exhaustive investigation.]

Judge Berger conceded that a pipeline to the Canadian gas reserves in the Arctic, with an eventual companion pipeline for oil, is "inevitable." He insisted however, that these projects should be delayed until the native Indian, Eskimo and Metis (mixed blood) people in the area become better equipped to cope with the massive social and environmental changes that would follow the projects.

To lessen the impact of the pipelines on the indigenous people, Judge Berger proposed new wildlife reserves and systematic fostering of native enterprise through modernizing the still primitive methods of hunting, fishing and trapping, and principal occupations.

* * * indicating the importance attached to the report by Canadians, the entire first printing of 16,000 profusely illustrated bound copies available to the public for $5, has already been sold out in bookstores across the country, making the volume an instant best-seller by Canadian standards. The work, and a second volume on legal and technical factors to be completed in the summer, is sure to be the basic document for a concerted popular drive in opposition to the pipelines by environmentalists, nationalists and the native peoples of the North.

The route given qualified support by Judge Berger, known as the Alcan Project, is one of two favored by the United States Federal Power Commission in a report to President Carter last week. The other was the northern Yukon crossing, an $8.5 billion project

of the Alaskan Pipeline Company, that has been condemned by the Berger report.

The F.P.C. recommended that a third route backed by the El Paso Natural Gas Company, for a line entirely within Alaska to Valdez, where the gas would be liquefied for shipment by tanker, be adopted if the preferred routes through Canada fall through.

Prime Minister Trudeau has promised a decision on a route by Sept. 1, the date set by Congress for a choice of pipelines by President Carter. The next step toward a decision in Ottawa will be the recommendation due in July from the National Energy Board, the Canadian counterpart of the P.F.C.

Then the issue will go to the Canadian Cabinet, which is known to be predominantly in favor of the Yukon Mackenzie Valley route rejected by Judge Berger.

ALTERNATE ROUTE FAVORED

Judge Berger contended that the Alcan route, which follows the Alaska Highway through the southern Yukon, poses the minimum threat to the delicate Northern environment. The all-Canadian Mackenzie Valley route, also known as the Maple Leaf Project, which Judge Berger wants postponed for 10 years, would bring gas from the Mackenzie Delta through the Mackenzie Valley to Alberta, where it would connect with existing pipelines.

The Alcan program, like the more controversial Yukon-Mackenzie Valley line, was planned by a consortium of American and Canadian companies that have already invested nearly $100 million in the preliminary surveys. The other proposed Mackenzie Valley line, for Canadian gas only, involves a Canadan group headed by Foothills Pipe Lines Ltd.

Publication of the Berger report, which was submitted to Parliament today, will force onerous new political pressures upon the Trudeau Government, already beset by the strains imposed by the Quebec separatist movement and the concomitant dissonance between Ottawa and the Western provinces.

Besides some 30,000 Indians and Eskimos in the North, who fear that their traditional hunting, fishing and trapping way of life will be destroyed by pipeline construction in their territory on the enormous scale envisaged, opponents of the pipeline program include vocal church groups, an aroused intellectual community and other socially conscious Canadians with some political clout.

Also opposed are Canadian nationalists, who contend the proposed pipelines are primarily for the benefit of the United States, which has urgent need of new energy sources, rather than Canada, which can comfortably wait a few more years for the gas from the Mackenzie Delta that would have shared the Mackenzie Valley facility.

"The risk is in Canada," Judge Berger declared in his report, adding: "The urgency is in the United States." The result, he stated, might be pressure by Americans to complete the pipeline "without due regard for the social and environmental concerns in Canada."

HOMES FOR FERAL BURROS AND WILD HORSES

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. WHITEHURST. Mr. Speaker, today I am introducing legislation to permit the private, noncommercial ownership of wild, free-roaming horses and burros. Under the present law, the Secretary may transfer only custody of these animals, not title, and it is difficult for the agencies involved to find sufficient people willing to offer only custodial care.

I have clearly stated that such ownership is to be only for noncommercial purposes, and I have not removed the requirements for humane care of these animals, and I hope that my brief bill will make it possible for more of them to be given new homes instead of being destroyed as is the case now. It seems to me that this is an approach worth trying, and I commend it to my colleagues for their consideration.

Thank you, Mr. Speaker.

CANADA RESTRICTS JOINT FISHING VENTURES IN 1977

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. AuCOIN. Mr. Speaker—

Canada Restricts Joint Fishing Ventures in 1977.

This was the lead sentence of an announcement issued recently by the National Marine Fisheries Service. According to NMFS, this decision "reflects the Canadian Government's determination to plan and control fisheries programs in the newly established 200-mile fishing zone" and to "insure that the interests of the Canadian fishing industry are protected."

Mr. Speaker, I regret to say that the Government of the United States has shown no similar interest in protecting its law or its fishermen.

Several times in the past few weeks I have inserted news items in this RECORD which show conclusively that foreign interests are quietly circumventing our own 200-mile law by placing heavy investments in our fisheries industry.

In so doing these foreigners are able to take their place alongside American fishermen who enjoy priority rights to U.S. fish resources, instead of lining up for the leftovers as was clearly intended by Congress when it passed the 200-mile law.

As I believe my colleagues will find it of interest, I would like to insert in the RECORD the full text of this announcement regarding Canadian restrictions on foreign investment. At the same time I commend to my colleagues the legislation which I and 39 others have introduced to force this country to take similar steps to insure that the 200-mile law does what it was enacted to do:

CANADA RESTRICTS JOINT FISHING VENTURES IN 1977

Romeo LeBlanc, Minister of Environment, discussed recently Canada's basically restrictive policies toward joint ventures in the fishing industry for 1977. The new policy would, however, continue to permit experimental projects lasting no more than one year provided that the terms are strict and they work to the benefit of Canadian fishermen.

This delegation reflects the Canadian Government's determination to plan and control fisheries programs in the newly established 200-mile fishing zone. One specific goal will be to introduce tight conservation measures for cod fishing in the waters off northeastern Newfoundland and Labrador. In order to assure the recovery of depleted stocks, Canada is reducing the total allowable catch (TAC) from 300,000 metric tons(t) in 1976 to 160,000 t in 1977. For the northern cod stock, the allocations to foreign nations have declined dramatically from 550,000 t in 1973 to 226,000 t in 1976 and 92,250 t in 1977. The clear purpose of these restrictions is to maintain or increase Canadian catches and at the same time to protect certain stocks by reducing significantly foreign catches.

The Government is also prepared to require the submission of detailed plans by Canadian fishermen taking part in the short-term experimental projects in order to monitor all joint ventures and ensure that the interests of the Canadian fishing industry are protected.

LeBlanc expressed concern that even the present small-scale joint ventures were causing tensions between different elements of the industry and among different regions. Finally, he emphasized that in the future, joint ventures in the fishing industry would be tolerated only if they fit into the goals of overall fisheries planning and if they serve primarily as data gathering tools.

THE ANSONIA HIGH SCHOOL CHARGERETTES

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. SARASIN. Mr. Speaker, perfection is the goal to which humanity has aspired since the beginning of time, whether physically, intellectually, or spiritually. While absolute perfection is ever elusive, there are times in our lives when it can be briefly captured.

For the Ansonia High School Chargerettes, that moment came this year. The all-girl basketball team just completed a perfect 23–0 record for the season, an outstanding record for any athletic team but especially so for one that is just 3 years old.

Hard work and perseverance certainly led to laudable achievements. With 22 young women working together, under the guidance of Capt. Lisa Douglas, an all-State basketball player, the team not only won the Naugatuck Valley league title but also the coveted class L State championship. For a time, though, it appeared that the latter honor was not to be theirs. With only 2 minutes and 27 seconds left in the game, the Chargerettes were trailing by a seemingly insurmountable 8 points. Training, team spirit, and determination surpassed the obstacle, and the gap was narrowed. A successful last-second foul shot by Carol Sovinski gave the team the needed 1 point lead and clinched the championship for the Chargerettes.

I wish to offer my sincere congratulations to the Chargerettes, to their coach, Margratha Chambers, and to their assistant coach, Stanley Biga, for a superb season, and extend my very best wishes for every future success.

LET AIRLINES COMPETE IN THE MARKETPLACE

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. CRANE. Mr. Speaker, in the past few months, the call for airline deregulation has increased tremendously. Legislation has been introduced and the possibility of this legislation passing has become almost inevitable.

In recent hearings held before the Senate Subcommittee on Aviation, feelings expressed by those testifying have been mixed, some presenting material against deregulation, others fully recommending the passage of airline deregulation legislation.

One of the groups in favor of less regulation is United Airlines. United supports a new Federal aviation law to increase competition gradually and reduce Government regulation of the air transport industry.

In the May 10th issue of the Washington Post, Richard J. Ferris, respected president of United Airlines, incisively explains in his letter to the editor why deregulation is desirable.

The article follows:

LET AIRLINES COMPETE IN THE MATKETPLACE

Your April 9 editorial "Airlines and Free Enterprise" twits the U.S. airline industry for opposing regulatory reform proposals now pending in Congress. You express surprise that airlines haven't leaped at the opportunity to attain less regulation and you say "airlines are merely seeking to stay with the crowd."

United Airlines is one carrier (and there are some others) that hasn't stayed with the crowd, that has been outspoken in support of less regulation, and that has called for market-oriented management risk-taking to meet the desires of our boss—the customer.

United Airlines supports a new federal aviation law to increase competition gradually and reduce government regulation of the air-transport industry. A new law that gradually increases market influence and reduces government influence will benefit both passengers and the air-transport system.

For the passenger, regulatory change would mean continuation of a sound air-transport system and the benefits of innovation and efficiency that the marketplace demands of sellers. It would mean service even more closely tailored to market demand—better tailored regarding price, frequency of flights, and variety and quality of service.

For airlines, regulatory change would permit better matching of prices and costs for a reasonable profit. Under the current regulatory framework, the airline industry's 3.6 per cent return on total capital over a 5-year period put it last among 30 industries—including the railroads—in Forbes magazine's latest survey. Unless that return improves, airlines will not attract enough private capital to replace obsolescent aircraft and accommodate growth. In that case, either the air-transport system will deteriorate or government capital will be required.

Gradual transition to a market system would avoid the possibility of wholesale disruption of the air-transport system. A gradual change would help ensure continued stable employment in the industry.

What we recommend is simply this: Let airlines use their resources, management skills and marketing acumen to compete more broadly in the marketplace. Let airline management make its choices based on dollar-votes at the ticket counter. As we've been saying—the customer is the boss.

RICHARD J. FERRIS,
President, United Airlines.

CHICAGO.

FAULTY LOGIC BEHIND CONSUMER AGENCY

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. GRADISON. Mr. Speaker, among the proposals which seem to continually reappear before Congress, is the idea of a Federal "Agency for Consumer Protection"—ACP. Once again we are faced with a proposal, H.R. 6805, which would establish such an agency. The premise for creating a Consumer Protection Agency is based on faulty logic, and this proposal would cause numerous problems.

Everyone agrees that existing departments and agencies are not doing an adequate job of protecting consumers. This is not, however, due to a disregard for the needs and views of consumers. Rather, this is a consequence of inefficient decisionmaking processes which have produced unforeseen and sometimes catastrophic results.

The question then becomes how to most effectively remedy this situation. It seems illogical to me, to attempt to remedy the inefficiency of existing agencies by creating a new agency. Such an agency will not only be afflicted with the problems of the existing agencies, but in addition will cause increased confusion, delay, and consequent dissatisfaction.

Proponents of this legislation feel that this agency would advocate the interests and views of consumers to other agencies and departments, to balance the lobbying influence of groups representing special interests. Such a view fails to acknowledge that the basic purpose of every Federal agency or department is to decide what is best for the citizens of our country, the consumers.

The sensible solution to this problem is to reform the existing agencies, rather than adding a new one. If the problem is a lack of consumer represenation, reforms should be made with each agency to insure that consumers' interests are given primary consideration. If there are other problems, these also should be solved by altering an agency's structure.

Some have argued that while regulatory reform of this nature is desirable, it simply has not come about. However, it is a lack of consumer representation, recurred. Congress is responsible for overseeing agencies and assuring their effectiveness, but has been remiss in carrying out this duty. I feel that we should begin to exercise our proper responsibilities instead of passing off this function to a new agency.

The creation of an Agency for Consumer Protection assumes that consumers have some type of consensus of their objectives, needs, and preferences. In reality, such agreement hardly ever exists. To ascertain what is best for consumers, the ACP would often have to reconcile the competing preferences of various groups of consumers. The ACP would thus utilize a decisionmaking process similar to that of existing agencies, rather than advocating an obvious consumer viewpoint as many of this agency's proponents expect.

The cost of an Agency for Consumer Protection should not be ignored. The estimated price of such an agency fails to take account of increases in both the paperwork burden of businesses and the additional costs of regulation caused by such bureaucratic infighting. All of these costs are eventually paid by the consumer in the form of higher prices and taxes.

Instead of establishing this new agency, Congress should face up to the problem squarely and bring agencies which have gotten out of hand back under control. Passage of legislation establishing the ACP would constitute an admission to the American people that Congress can no longer control the agencies it has created.

THE JOHN P. SAYLOR PARK

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. MURTHA. Mr. Speaker, it was my pleasure early this month to join in the dedication of the John P. Saylor Park in Black Lick, Pa.

I know many of my colleagues remember the late John Saylor. Many of you also recall his former aide, Harry Fox, who is now chairman of the county commissioners in Armstrong County. Harry was another of the principal speakers at the program.

The park is a 96-acre site. Land for the park was donated by the Rochester & Pittsburgh Coal Co. Money for the project also came from the Bureau of Outdoor Recreation.

During the 200-year history of the U.S. Congress, no individual has done more for sportsmen and conservationists than John P. Saylor. He sponsored numerous legislation which has left its mark on the environmental progress of the Nation. He was the first Member of Congress to receive the National Park Association Award. He was named Conservationist of the Year by the National Wildlife Federation and the Pennsylvania Outdoor Writers Association. He also won the Gold Medal of the Pennsylvania State Fish and Game Commission.

There is no more fitting mark to his memory than this park which can help the Black Lick area residents to enjoy and appreciate the outdoors.

I would like to include for the RECORD some of the comments from the newspaper story which appeared in the May 2 Indiana Evening Gazette concerning the dedication:

THE JOHN P. SAYLOR PARK

(By Nick Dutko)

BLACK LICK.—"I am sure if he were here this would have been as much an honor to my father as any of the others he had received on the national scene."

These were Attorney John Phillips Saylor's remarks about his father, the late U.S. Congressman John P. Saylor, at the groundbreaking ceremonies conducted yesterday afternoon at the site of John P. Saylor Park in Burrell Township.

The attorney, son of the District 12 Congressman who spent a quarter century among U.S. House members, spoke in behalf of his mother, Mrs. J. P. Saylor, who was unable to attend the ceremony.

Approximately 500 community residents, political figures and members of the Saylor family and friends took part in the groundbreaking and to hear Attorney Saylor extend appreciation to the people for dedicating the park to his father and ". . . to honor his memory."

"This is what kept him going."

Harry M. Fox, chairman of the Armstrong County Board of Commissioners, right-hand man of the late representative, cited the Congressman.

"One of the finest men I ever knew," Fox stated, "John P. Saylor would have considered this as one of the greater moments of his life. He enriched the lives of others throughout his career and was not too far removed from his constituency.

"While he admired the strong, his obligation remained to aid the weak to make them strong. Witty and humorous, his views always had a personal impact on others.

"Mr. Saylor felt his best service could be in the U.S. House of Representatives and not in any other political area, consequently he did not aspire for the governorship of Pennsylvania, nor the U.S. Senate.

"Recognizing the artistry of nature from the beginning of his 25-year career in the House, Rep. Saylor's principal aim centered around protecting that artistry from the ravages of man. But at the same time," Fox said, "he (Saylor) also believed in economic progress that at times makes it necessary to alter the natural scene.

"He had not one single blemish to mar his record in Congress," Fox continued, adding, "John P. Saylor wanted to live respected and die regretted. This park in his name more than symbolizes that wish."

Rep. John P. Murtha, successor to the District 12 Congressional seat, termed Mr. Saylor as a man who dedicated his life to the nation and to conservation of the natural resources throughout America.

"He did more in the conservation area than any other man in the 200-year history of the United States," the current District 12 representative said.

His accomplishments in Congress were rewarded time and again by various awards, including the Bernard Baruch Conservation Award, National Parks Association Award, Gold Medal Award from his own state and many others.

Rep. Murtha presented the plaque that hung in Mr. Saylor's Congressional office which will be kept in the John P. Saylor Park building.

GLORIA STEINEM DISCUSSES FALLACY OF CONGRESSIONAL ETHICS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. BIAGGI. Mr. Speaker, I am pleased to bring to the attention of my colleagues a recent statement made by Gloria Steinem on the new congressional ethics code. She discusses in particular the outside earning limitation. She presents a very strong and highly persuasive argument against this provision of the code which restricts outside income for those who earn their income. I fought against this provision on the House floor for precisely the same reasons stated in the Steinem article.

The type of congressional ethics we have is selective, discriminatory, and in reality a sham in the eyes of the public. The ethics code translated into real terms allows the rich in the body to remain so while keeping the poor in their place.

While a Member of the House, I have fought discrimination in many areas. Now I regret to say that discrimination has hit home, and I will have no part of it. I call on my colleagues to give this article their most serious attention:

DISCUSSES FALLACY OF CONGRESSIONAL ETHICS

I'm Gloria Steinem.

Ever since Congress passed its new ethics code, I've been trying to figure out what was ethical about it. I have in mind that most controversial part of the code that restricts senators and congresspeople to outside earnings that are no more than 15 percent of their official salaries.

At first blush, it sounded like a good idea. After all, if the rest of us live on our salaries, why shouldn't they? Furthermore, there were a lot of heavy-hitter moralists—Common Cause and others—who were lobbying for this restriction; and some of their arguments made sense. Speaking or lawyers' fees paid to legislators are sometimes a disguised political contribution, for instance, or they may be a tribute more to an influential position than they are to speaking or legal skills.

But the problem is that this new limitation deals only with earned income. There is no attempt to touch the substantial unearned income that many members of Congress get from stocks, bonds, dividends, interest, rentals, farm subsidy programs and many other sources. Does that make sense? After all, members of Congress might be tempted to refrain from making laws that adversely impact the businesses and land holdings from which they profit without lifting a finger—and that's at least as dangerous as law-making influenced by a $2,000 speaking fee.

I'm afraid this much-touted ethics code has done little but penalize the working stiff, the senator or congressperson who is dependent on earnings, and has no unearned wealth. To his credit, Senator Muskie of Maine pointed out this hypocrisy, but most observers agreed that there wasn't a chance in a thousand of limiting unearned wealth. So Muskie, who has been earning about $30,000 each year in speaking fees, will have to cut back to $8,600, or 15 percent of his official salary. By contrast, Senator Heinz of Pennsylvania, who gets about $100,000 a year from family holdings, won't have to give up a penny. Does that sound ethical to you?

We already have a lot of millionaires in Congress and the Senate. In fact, we already have too many. Thanks to this so-called ethical restriction on outside earned income, wage-earners may be less encouraged or able to run. And that means that more of the field will be left to names like Rockefeller, Heinz and Kennedy.

I'm Gloria Steinem for Spectrum.

JUSTICE DEPARTMENT HAD CAUSE TO HIDE INTERNAL MEMO ON FRAUD AND THE UNIVERSAL VOTER REGISTRATION ACT: IT IS SLOPPY WORK

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. BONKER. Mr. Speaker, publication of a Justice Department internal memorandum attacking the Universal Voter Registration Act as containing a "tremendous potential for fraud," has created more of a flap than deserved.

Beyond the fact that it is purely a working paper from one staffer within the Department, its dissection of the bill does not cut very deep.

Fraud is always a potential problem in any system of counting ballots. However, the Justice Department internal memo recognizes neither the improvements made in the bill by the House Administration Committee nor some crucial facts about which fraud is committed under present methods of registering voters.

My own support for the Universal Voter Registration Act has been tempered by a belief that we should do more to emphasize preelection registration and avoid administrative problems. The legitimate search for proper safeguards against voting fraud should neither distract from these issues nor turn into a war of words over whether the American people are going to go out and undermine the democracy of cheating by the polls.

I have written to Attorney General Bell raising some questions about the adequacy of the Department's internal memo. My colleagues may find it helpful in judging whether that memorandum deserves the notoriety it has received. A copy of my letter to the Attorney General follows:

WASHINGTON, D.C.,
May 9, 1977.

Hon. GRIFFIN B. BELL,
Attorney General of the United States,
Washington, D.C.

DEAR MR. ATTORNEY GENERAL: Having reviewed the publicly-released internal memorandum from your Criminal Division purporting to discuss the shortcomings in the Universal Voter Registration Act relating to fraud, I would appreciate your speedy reply to the following questions and comments on the issues raised in the memo. I want to be clear at the outset that I, too, have reservations about some of the provisions in the bill, but question the allegations raised in the memo about fraud.

I am aware that the memorandum was an internal document and does not reflect the position of the Department. Still, its appearance has caused considerable comment and clouded the main issues raised by the Universal Voter Registration Act. Central to these issues is the administrative feasibility of the act. Although I can cite nothing other than my eight years as a local election official, my guess is that more votes have been incorrectly counted and more people disenfranchised through administrative error than through fraud.

Our election system assumes that citizens are honest, just as does the income tax collection system. Safeguards have been built in to prevent patterns of fraud which are

so egregious as to cast doubt upon whether the will of the majority has been truly recorded. And those safeguards correctly focus on the role of election officials in fraud, for history demonstrates that fraud of such scale as to debase representative government requires the collusion of election officials.

But the Justice Department internal memo assumes just the opposite, that prior registration effectively operates to restrain a dishonest electorate bent on fraud. And it assumes that it is honest election officials who are the front line of defense against the electorate.

In fact, most citizens are honest. In fact, registration now primarily serves as an administrative convenience for planning elections. In fact, while the vast majority of election officials are honest and capable, major fraud nearly always involves election officials. In fact, the possibility of fraud exists with almost any system of casting ballots, but the Universal Voter Registration Act contains at least the same level of safeguards, and possibly more.

The memo develops parallel arguments that present safeguards against election fraud are ineffective, and that the bill would make them even less effective. In other words, the present system is bad, and the bill would make it even worse.

The specific problems I have with this position follow, and I would appreciate your comment on each:

1. The memo repeatedly cites Illinois, specifically Chicago, and Louisiana, as locations for known patterns of vote fraud. Yet it makes no mention at all of the two states with experience at the polls similar to that provided in the bill, namely Wisconsin and Minnesota. What is the record in those two states on fraud resulting from same-day registration at the polls (Some may say that Minnesota and Wisconsin are atypical But this merely supports another point, namely that fraud is a recurring problem in relatively few jurisdictions.)

2. If fraud is largely a problem in relatively few jurisdictions, as the memo certainly implies, does not the Justice Department under existing law, and under the proposed provision of the UVRA, have ample tools for dealing with recurring patterns of fraud? If not, how might this specific problem be best addressed?

3. The memo both implies and states explicitly that major election fraud involves the collusion of election officials. It further refers to "those bent on corrupting the system," and "the type of person who is most apt to commit election fraud." Who are "those bent" and "these types"? Are they ordinary citizens, or are they more predominantly election officials? If "these types" are not election officials, do they not, for the most part, require the collusion of election officials to commit fraud on such scale as to be a true threat to the integrity of the system?

4. Is it the position of the Justice Department that the type of fraud which is significant is organized and involves collusion of election officials, or is it the isolated instance of a voter trying to get away with voting twice on his own initiative?

5. If fraud largely does involve election officials in some way, is it not, in fact, easier under the present system to perpetrate organized vote fraud? That is, is it not very easy for an election official to falsely register voters or register fictitious persons through his centralized control of registration procedures, times and locations?

6. The memo cites the time intervening between registration and election day as a period in which residence and other qualifications are verified. This may be true in theory, but in practice very, very few jurisdictions make such checks. Does the Justice Department conclude that in fact such verifications of residence and qualifications are made by most jurisdictions? Does it conclude that such verifications are specifically made by those jurisdictions cited in the memo as recurring sources of fraud?

7. Is the Justice Department aware that registration activity peaks very sharply at the close of registration, and that those registrations taken very close to an election are the least likely to be independently verified?

8. The memo states that, "The vast majority of the states usually require that a prospective voter present himself at the appropriate registration office . . ." Is the Justice Department aware that 18 states plus the District of Columbia encompassing more than half of eligible voters, now allow registration by mail? In the majority of cases in which registration by mail has been adopted by state legislatures, a primary argument against such procedure has been that it opens new avenues for fraud. Has not the record in those jurisdictions which have adopted registration by mail dispelled the expressed fear of fraud?

9. Is the Justice Department aware that most jurisdictions require no identification for pre-election registration, and that the requirement for presentation of identification in the bill adds a safeguard not presently used, notwithstanding the argument that identification can be falsified?

10. In view of the fact that no identification is now required and that very few verifications of residence or qualifications are made, is not the statement in the memo that "those bent on corrupting the system * * * would be willing to lie on whatever affidavits they are asked to sign," equally applicable to the present system?

11. Has not the bill approved by the House Committee on Administration tightened the protections against fraud by reducing the incentive for adoption of same-day registration at local and municipal elections where fraud is probably a greater problem than in Federal elections, and by other amendments?

12. The memo argues that availability at the poll of a "control" signature allows poll workers to insure that it is the same person voting who previously registered. Under a same-day polling place registration system it is hard to fathom how it might arise that the person registering is not the person voting.

13. The other argument made for having a "control signature" available is to aid in prosecutions of fraud. While this is undoubtedly true, it also curiously indicts the present system by citing that it is election officials who have found a way to use pre-election day registration to fraudulent advantage (comparing lists of registrants with those who appeared at the poll in order to "sign-in" and cast ballots for the no-shows). Thus, not only does pre-registration, in some ways, facilitate fraud, but the use of the signature comparisons is appropriate to criminal prosecution for this specific type of fraud. But there are other ways of committing fraud (e.g. falsely registering a person not otherwise eligible to vote) for which signature comparison is not so helpful. Again, the main point seems to be that it is election officials who are the main culprits, and our attention should be focused on their part in fraud cases.

14. The memo discusses the effect of "abolition of pre-election registration," yet the bill clearly anticipates polling-place registration as complementing, not supplanting, pre-election registration I believe the bill could be strengthened in this regard, but it is still inaccurate to say the bill will "repeal . . . pre-registration laws."

15. The memo states that it will be easy for a person to wander from polling place to polling place casting ballots. Again, the present system certainly is no better defense against "those bent on corrupting the system" in this way. A person can now register in as many different places as he wishes, under as many names and addresses as he wishes, without much threat of detection.

In view of impending floor action on this legislation, your earliest response will be most helpful.

Sincerely,

DON BONKER,
Member of Congress.

SST UNKNOWN TO CONGRESS

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. WEISS. Mr. Speaker, in a debate on the House floor on March 17, members of the House Science and Technology Committee revealed for the first time that at least $15 million under H.R. 4088—the NASA authorization for fiscal year 1978—would be available to NASA for the purpose of preparing an overall plan for the development, planning, analysis, and research for a new SST or so-called AST—advanced supersonic transport.

In light of the fact that in 1971 Congress terminated the SST program after 10 years of controversy and an expenditure of over $4 billion, I introduced an amendment on that day to preclude any funding of such an overall plan without an act of Congress specifically authorizing such an expenditure—see pages 7859–7885 of the March 17 CONGRESSIONAL RECORD. Unfortunately this amendment itself was amended out of existence before final approval of the House authorization.

Until March 17, hardly any Member of the House, not to mention the general public, was aware that $15 million was included in H.R. 4088 for the purposes I have described above. I therefore wrote Dr. James Fletcher, until recently NASA administrator requesting that he provide a complete accounting of NASA's expenditures relating to the SST or so-called AST including those expenditures which may have been incurred in the past or which are expected to be incurred in the future.

The April 29 reply which I received from Dr. Fletcher and which is reprinted below shows that since 1973, NASA has received nearly $55 million for AST-related work—again for the most part unknown to the Members of Congress or the public at large:

NATIONAL AERONAUTICS
AND SPACE ADMINISTRATION,
Washington, D.C., April 28, 1977.

Hon. TED WEISS,
House of Representatives,
Washington, D.C.

DEAR MR. WEISS: This responds further to your March 31, 1977, letter regarding an advanced supersonic transport airplane. Specifically, you expressed concern about the request by the House Committee on Science and Technology to NASA to prepare an overall program plan for achieving technology readiness for an advanced supersonic transport in the early 1980's. This request was included in the Committee Report 95–67, to accompany H.R. 4088, to authorize appropriations to the National Aeronautics and Space Administration.

NASA's understanding of the Committee request is that the Agency is being asked to provide the Congress with a plan—no more than that. It is not NASA's view that the preparation of a plan for technology is in any way a mandate to build an advanced supersonic transport (AST) by the early 1980's. The current best estimate of the minimum time required to develop the technology necessary for even a decision on whether the U.S. should build an AST is four to five years. Following this, an eight- to ten-year period would be required before the first AST could become operational.

The $15 million in H.R. 4088 for Aeronautical Research and Technology (R&T) is simply the FY 1978 continuation of a seven-year ongoing advanced technology effort for future civil and military supersonic cruise applications. These funds (7% of NASA's total Aeronautical R&T budget request) are not tied to the requested study. They are not in the bill for that purpose. They do represent a $4 million increase over the Congressional-approved FY 1977 level of $11 million, as shown in the encicsed chart, which also lists R&D funding levels for supersonic cruise technology over the past several years.

NASA does not have sufficient information to provide a meaningful response to your question concerning the funding needed over the next three to seven years to prepare for building an advanced supersonic transport. It is extremely doubtful that a technology readiness date would ever be achieved at the present (FY 1978) funding levels. Beyond that, the funding level required would be closely tied to the technology readiness date selected for the target. As NASA understands the House Report, the question of funding level is a major one, to be addressed by the requested plan.

We will be pleased to provide additional information, if you so desire.

Sincerely,

JAMES C. FLETCHER,
Administrator.

G. H. WEYERHAEUSER PROVIDES AN INDUSTRY'S VIEW ON WATER QUALITY MEASURES

HON. JOHN J. McFALL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. McFALL. Mr. Speaker, American industry has made remarkable progress in meeting the national goal of clean rivers, lakes, and streams in the 5 years since passage of the Clean Water Act of 1972. With the first major deadline of the program arriving on July 1 this year, the National Commission on Water Quality says that about 90 percent of industrial dischargers will be in compliance with the standards set by the act.

One company which has made excellent progress and which operates a plant in my district is the Weyerhaeuser Co.

In a recent speech to the Association of Metropolitan Sewerage Agencies in Anaheim, Calif., company president George Weyerhaeuser recounted the progress and made recommendations as to how he believes we should proceed beyond 1977. I am placing that speech in the RECORD for the Members' consideration:

SPEECH OF G. H. WEYERHAEUSER

Thank you.

The municipalities represented by your association, and American industry, which I represent here today, are joint participants in a major effort to clean up our country's waterways.

Our task is of importance to society. I am sure there is no one in this room who is not fully committed to the goal of improving the quality of America's waters. It is a goal shared by all Americans. The problem is that those of us who have to do the job, not just support its objectives, have found that it isn't simple, easy or cheap.

Congress, in the 1972 water quality amendments provided that by 1977 industrial and municipal discharges should meet certain technological requirements. In the case of municipalities this requirement was called secondary treatment—for industry, "best practicable treatment currently available."

There is no doubt that in 1972 Congress reacted to strong public feeling that the pace of environmental cleanup needed to be greatly accelerated. The public commitment to improved water quality has in no way abated—nor should it.

It needs to be shouted from the rooftops that the progress made in the past few years has been remarkable. By this summer's deadline, 90% of American industry will be in compliance with the 1977 standards, according to the report of the National Water Quality Commission, which was created by that same 1977 law. Our problem has been somewhat different than yours, perhaps easier. Your ability to comply with the 1977 deadline is dependent upon a complex mix of Congressional appropriations and construction industry capability to meet rigid and stringent deadlines.

Thus, hundreds of cities and counties throughout the nation will be in violation of federal law, and in theory subject to severe penalties, after July 1—through no fault of their own. A few industries will be in a similar position. I think it is apparent that the Congress must act, and I am certainly hopeful that it will, to extend the July 1, 1977 deadline, where circumstances dictate.

In addition, administrative flexibility for E.P.A. would be particularly appropriate in such cases as that of the Metro system of Seattle and its suburbs, where the present statutory requirement would cause no noticeable improvement in the receiving waters of Puget Sound. Far more environmental benefit could be achieved by diverting funds to the installation of critically needed storm and sanitary sewage separation.

And, finally, we fully recognize the need for reasonable and consistent funding levels for the municipalities and we will support you in the effort to obtain them.

Let me make it clear that I support the 1977 standards. I believe they should remain in force. Extensions and exemptions should be allowed—but only upon proof that they cannot be achieved by a particular plant or municipality on time. How the Congress sorts out the issues of good faith, or conditional extensions of the 1977 deadlines, is beyond the limits of my wisdom.

The 1983 standards, however, are within my area of immediate concern. They are a second-stage carryover of the crash program begun in 1972. In 1972, the Congress obviously felt that the nation, in both its public and private sectors, had not performed as it should, in relation to its waterways. It mandated that we eventually install all the technology that becomes economically available—in other words, all that we can.

It is the question of "can" versus "should" that both the National Commission on Water Quality last March and the General Accounting Office more recently have asked the Congress to review.

The 1972 Act now calls for "best available technology," by 1983.

The National Water Quality Commission put it simply in its report to the Congress: "Wise use of total national resources would support the imposition of only those levels of control or treatment that actually produce the intended result." In the total concept of the report, it is obvious that the intended result is water quality and not technological achievement.

It coupled this recommendation with a reminder that "best available technology" and energy conservation may be incompatible, and that the linkage beween air and water quality and solid waste disposal must be kept in mind. In other words, as Barry Commoner reminds us, "everything is connected to everything else."

Thus, in effect, the Commission brought us full circle—it suggests that, in proceeding toward water clean-up goals, it is the condition of the water, rather than technological virtuosity, that must be the criterion upon which we should make our judgments and set our standards from hereon out.

From the standpoint of the public interest, this may seem self-evident. From the viewpoint of many in the Congress, it is not.

Their position is not as illogical as it may appear on the surface. It is a position based in part upon a desire for administrative ease, but it is also a position born of their experience.

Prior to 1972, we must remember, it was water quality in specific environments that was the criteria for standards and for permits. And, in the opinion of many, that system did not work.

The reason it did not work, is that the states were the standard setters, and the sole enforcers. Prior to the late 1960s the states simply were unable to launch a national cash program. Throughout the 1960s, the social problems of the cities took priority over their sanitary problems; citizen priorities were not yet focused on water quality.

In the industrial sector, achievement varied greatly by state and region; the threat of older mills and factories, approaching the end of their economic lives, to close and re-

build in states with more tolerant standards or less rigid enforcement, was one that could not be ignored in many parts of the nation.

None of those situations prevail today; the strengthened federal governmental role in partnership with the states and municipalities, and the 1977 standards themselves, have changed all that. We now have a firm national base from which to proceed to assess and improve the quality of specific local and regional waters.

The administrative problem should not be passed by lightly. There is no doubt that standards based upon the specific needs of water in specific environments is more complicated to administer than standards dependent upon the uniform application of technology. But, I am confident that a water quality system that works is something that this society is perfectly capable of constructing and administering. I am further confident that it is in the public interest to now substitute a system based upon water quality needs for the one of imposed technological possibility.

Those water-quality needs vary dramatically, as Weyerhaeuser Company can attest from its own experience. My company's experience with water quality measurement and effluent treatment began some 40 years ago, shortly after we began producing wood pulp. Today, our firm operates pulping or paperboard facilities at ten locations, as well as major wood products facilities, where either the volume of effluent discharges and/or the content of the wastes, pose a potential water quality problem.

As in the case of the municipal sector, the rivers and estuaries into which these effluents are discharged differ markedly from location to location.

The impact, or lack of impact, of these organic discharges on the quality of the receiving water and upon the life chains within them depends in large part upon the assimilative capacity of those waters. The characteristics of those waters range from rapidly reaerating stream waters, to waters with tremendously high dilution potential, to waters with high background quality, to waters which have for many years been "dead" as a result of industrial and municipal concentration, and, at one location, to waters with assimilative capacity limited by natural eutrophication.

Each of these waterways has different needs; each should require different levels of treatment to meet national water quality goals.

For instance, in 1973 we acquired a sulphite pulp mill on the Wisconsin river—one of 20 mills that discharge into it. The wastes from most of these mills have only recently begun to be treated. Agency and industry water quality surveys on the Wisconsin downstream from our mill show that summer dissolved oxygen levels often are below levels lethal to fish. This is the result not only of the current effluent of our mill and the many others, but also results from the build-up of fibers on the river bottom, which has occurred during many decades of the river's industrial history. There are color and foaming problems, reduced fish and invertebrate life, and, as a result, there is very little current recreational potential.

After our acquisition of the mill, we installed primary treatment. We are now constructing a secondary treatment system. When primary and secondary treatment are constructed by all of the mills along the river, dissolved oxygen levels should improve markedly. Discharge of fibers will essentially end. However, the sludge build-ups of the past will not immediately be flushed out.

It may be that not much, other than the passage of time, will need to be done to eventually restore the Wisconsin to its recreation potential. Perhaps further action will be required by the mills

We won't know until secondary treatment has been completed along the course of the river. There is no question at all in my mind that the mandated secondary treatment expenditures will be beneficial, and that they are fully justified, from the standpoint of public interest in water quality. And, there remains the possibility that further application of technology will be required in the future.

The Wisconsin is something of an extreme example, insofar as our own mill locations go.

At the other extreme is Longview, Washington. It is the place where we entered the pulp and paper industry, building a sulphite mill in 1931, a kraft pulp mill in 1948, and a paperboard mill in 1954. A third pulp mill, using a semichemical process, began operations at the site in the 1960s. These mills, together, discharge effluents which until recently created 180,000 pounds of biological oxygen demand per day—into a class A stream, suitable for all uses including domestic water supply. That stream, however, is the Columbia River, and the waste water dilution at point of discharge, at average stream flow, is 1,800 to 1. Because of the river's reaeration capability, the impact of these mills upon downstream water quality, with primary treatment clarification, virtually escaped measurement, and the river remained fully oxygen-saturated.

In 1971, because of a strike, there was opportunity to measure downstream water quality at the low stream-flow period, with the mills operating, and then with the mills closed. There was no discernible difference in dissolved oxygen. By coincidence, there actually was a minor decrease in turbidity downstream when the mills were operating, and a slight increase in suspended solids which still was well within the parameters set by the state for water quality there.

Nevertheless, we are installing secondary treatment at Longview which will lower B.O.D. loading to 29,000 pounds. There will be no detectable change in the quality of the receiving waters as a result of this $49.3 million expenditure. We did not expect one. We did not install secondary treatment with water quality as a goal. We installed it solely to meet the requirement of the 1977 standards. At tremendous cost, we are proceeding to aerate effluent waters that will receive natural oxygen in abundant quantities immediately after release. In other words, here we are engaged in treatment for treatment's sake.

In Longview's case, we are spending nearly fifty million dollars with no impact on water quality, in order to comply with the 1977 technology standard. We do not believe that it makes any sense to follow with an equally large expenditure of dollars, and with a requirement to substantially increase our use of electric power, in order to meet a 1983 "best available technology" goal which would, again, do nothing measurable to improve water quality in the Columbia.

Finally—on the matter of color. Under BAT, as presently defined by E.P.A., by 1983, color must be removed. Again, I would submit, that need depends upon the needs of the waterway, and of the conditions that exist in it. In some clear waters with good aesthetics, color is a problem, but, for instance, we have a mill in North Carolina where the Roanoake River joins Albermarle Sound. It is a marshland area. The natural color of water in this environment ranges from brown to black. William W. Hassler, professor of zoology at North Carolina State University, has determined that this natural coloration of the water serves a positive biological function, and the species which have evolved there have adapted to it. In such a situation, color removal from effluent discharges seems, at best, a very questionable priority.

I have used these examples simply to show the widely different needs of receiving waters in connection with just the operations of our own company. The differences as they involve municipal sewage treatment plants may cover an even broader spectrum. The federal regulatory system, if it is to truly serve the public interest, must be adapted to the needs of varying waterways and must not force the expenditure of scarce public and private capital on unneeded technology.

Estimates of the total cost to society, if we remain on our present course, range up to half a trillion dollars—most of it in the municipal sector. With all of the needs facing society, we simply cannot afford to make such expenditures without questioning the needs. We should insist on additional treatment in those cases where water quality requires it. Where water quality problems already have been solved, we should let well enough alone.

I recognize there are arguments about equity. If BAT is abandoned, and water quality itself becomes the test, many would argue, those industrial plants and those municipalities which by chance of history, geography, or nature are situated on waterways with low assimilative capacity will be at a competitive disadvantage. However, it needs to be recognized that some older communities and some older mills—and thus entire regions of the nation—may be disproportionately impacted by uniform technology standards, under the present system. Neither system can be completely equitable—regulation, like life, never is. But, water cleanup was not launched with a view to maintaining equity in industrial or municipal costs. It was launched to clean up the nation's waterways. And, since that is a valid societal objective, we should do the job in ways that are the most effective, the most efficient, and which impinge the least on other valid national social objectives. At any rate, each plant and each community starts with unique climatic, transportation, resource and labor bases, any of which may be far more compelling competitively than pollution control.

Now, to conclude. First, I commend your Association on the sense of its resolutions of last October, particularly as they call for mid-course correction. They are compatible with the effort that responsible industry is making. We support the 1977 standards, while recognizing that some extension of the July deadline may be necessary for some industries or plants, and for many municipalities.

Second, we need your help in convincing Congress that to proceed further on a course dictated solely by technological considerations is unwise. We need your help in urging the Congress that expenditures beyond the 1977 deadline should not be based simply upon what level of treatment-technology we can theoretically achieve, as the law now requires, but rather upon what level of treatment is needed to insure the beneficial uses of our diverse waterways.

Finally—what is important to the nation's waters is not what we can do, but what we ought to do. What is important to the public interest is not whether a regulation is "tough" or "weak," but whether it is wise.

I believe American industry supports a regulatory system that will be clear and fair. We want an enforcement process that will work. We pledge our best efforts to work openly with the new Administration, the Congress, and all municipalities to achieve these goals for our nation. I am confident that, with your support and participation in a joint effort, we can bring about these changes, and proceed more effectively in the

monumental task of cleaning the nation's waters.

Thank you.

OFFICIALS EXPRESS PRIDE IN RESEARCH ACHIEVEMENT

HON. ELFORD A. CEDERBERG

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. CEDERBERG. Mr. Speaker, recently, on a trip to Houghton Lake, Mich., I participated in the presentation of several awards for a new wastewater treatment system. The ceremony woud never have occurred without the Federal support and financial assistance to establish the feasibility of a unique and radical approach to wastewater treatment. The result: a $700,000 savings for the community and a new alternative to wastewater treatment using the natural processes of the nearby marsh wetlands.

Houghton Lake, located in central Michigan, is the State's largest inland lake. Not only is it a popular resort community, but it is also rapidly becoming a mecca for senior citizens and retirees from Michigan's industrial cities.

Early in the 1960's, the community realized that it would need additional wastewater treatment facilities to adequately provide for the demands of the future. Unfortunately, like many of todays' communities, it did not have the financial resources to deal with this situation. Only after advertising for bids on treatment facilities did the Houghton Lake Community strike upon a possible solution.

It was proposed that, instead of the conventional wastewater treatment approach, the natural processes of the nearby marshlands be used as part of a total system of wastewater treatment. The concept, radical, untried, and unproved, received the go-ahead only after an extensive study, supported and financed with Federal funds, established its feasibility.

I would like to share with my colleagues the account of the national award presentation as recorded in the local newspaper, the Houghton Lake Resorter:

[From the Houghton Lake Resorter, Apr. 28, 1977]

OFFICIALS EXPRESS PRIDE IN RESEARCH ACHIEVEMENT

Federal, state and local officials spoke appreciatively last week of a wastewater treatment technique the benefits of which have won recognition from state and national engineering societies.

Originators of the concept was William & Works, the Grand Rapids engineering firm that designed the Houghton Lake Sewer System.

Forum for the speakers was a gathering of county and township officials and guests April 22 at the King's Table in Prudenville. The reception and lunch was sponsored by the Houghton Lake Sewer Authority as a means of giving recognition to the community for its part in the accomplishment.

Speakers included U.S. Rep. Elford Cederberg, 10th Michigan District; Michigan Rep. Ralph Ostling, 103rd District; Dr. Howard Tanner, director, Michigan Department of Natural Resources; Dr. Robert H. Kadlec, University of Michigan research chemist; Robert W. Smith, who as Denton Township supervisor gave leadership in 1968 in developing the first sewer trunk line; Zane Miller, Williams & Works representative who gave technical expertise to local sewer development.

Robert Gandolfi, chairman of the Sewer Authority, presided.

Cederberg said, "I'm here to congratulate you and tell you we're aware of the research value (of the Houghton Lake system). Rep. Ostling reviewed the several awards which followed the Mort Neff Clean Waters Award, the first recognition given the development. Ostling also read a citation of accomplishment from the Michigan General assembly. Dr. Tanner mentioned the Houghton Lake project as one of three the department endorses in the biological chain of food, fiber and fuel. Using natural gas to process sludge will become more distasteful and fuel grows more scarce, he pointed out. The treatment method conceived and tested at Houghton Lake provides an alternative, he said.

Dr. Kadlec drew laughter when he observed that although the wetland irrigation of clean but highly nutrient effluent will save the taxpayers an estimated $700,000 over the next 20 years, the cost in research to verify safety of the method cost $773,000 in federal money.

The three-year research involved the work of 76 persons of whom 60 were college students. The U of M chemist related that nitrogen and phosphorus ingredients in the previously aerated waste water effluent is taken up in the peat bottom of the pond approximately 100 feet from the discharge point. The nutrients then are yielded up to food plants for waterfowl and wildlife.

But Dr. Kadlec cautioned that close watch must be maintained on the marsh to assure that adverse conditions do not develop. He mentioned that the technique has failed at some other places in the Midwest and, therefore, there are some unanswered questions.

Recently T. C. Williams and E. S. Thompson of Williams and Works were honored guests in Washington D.C. where the American Consulting Engineers Council presented an award to the engineering firm. Dr. Robert Kadlec and Dr. Ed Bryan, the latter representing the National Science Foundation under which the research grant was made, shared in the honors.

Prior to the latest recognition, Williams and Works' concept was awarded by Consulting Engineers Council of Michigan.

ELECTION DAY REGISTRATION

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. GRADISON. Mr. Speaker, the Ohio Legislature is in the process of considering far-reaching changes in voter registration procedures. The proposals before the legislature encompass many of the same changes which have been or are currently being considered by Congress.

The secretary of state, Ted W. Brown, is the individual responsible for administration of the election and voting laws in Ohio. Recently, Mr. Brown polled members of county boards of elections throughout Ohio to determine their opinion on registration procedures.

I would like to include in the RECORD at this point the results of this survey. These results indicate the professional opinion of those officials charged with the actual administration of voting laws. What is particularly significant about these survey results is that the answers are not along party lines. Both Republicans and Democrats overwhelmingly oppose election day registration.

The local officials who responded to this survey are in the best position to judge the practical effects of same day registration. I would urge my colleagues to give these opinions careful consideration as we consider the President's recommendations for election day registration.

The survey results follow:

1. Statewide registration of voters.

Favor, 200; oppose, 23; and number of officials responding, 223; 115 Republicans and 85 Democrats favor, 17 Republicans and 6 Democrats oppose.

2. Permanent registration. (Registration is never cancelled under this provision for non-voting.)

Favor, 9; oppose, 208; and number of officials responding, 217; 2 Republicans and 7 Democrats favor, 128 Republicans and 80 Democrats oppose.

a. Would you favor or oppose cancelling registration for non-voting after four years as a substitute for the provision for permanent registration?

Favor, 209; oppose, 9; and number of officials responding, 218; 125 Republicans and 84 Democrats favor, 6 Republicans and 3 Democrats oppose.

3. Election day registration at the polling place. (Such registrants are permitted to vote if they can provide identification such as a driver's license or can be vouched for by an elector within their precinct.)

Favor, 8; oppose, 213; and number of officials responding, 221; 1 Republican and 7 Democrats favor, 131 Republicans and 82 Democrats oppose.

4. Registration by mail. (The deadline for the close of such registration is thirty days prior to the election.)

Favor, 114; oppose, 105; and number of officials responding, 219; 53 Republicans and 61 Democrats favor, 77 Republicans and 28 Democrats oppose.

Total number of counties responding: 84.

SENSE AND NONSENSE ABOUT VOTING FRAUD

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. BONKER. Mr. Speaker, the least good reason for opposing the Universal Voter Registration Act is fear of fraud. The bill has been substantially improved in committee to reduce administrative problems, and I believe even more could be done to emphasize pre-election voter enrollment. For many reasons, these concerns deserve at least as much attention as the possibility of fraud.

There are those who will use any argument—including fraud—to oppose this bill because they oppose increased voter turnout. Their use of the fraud argument is intellectually fraudulent. For those truly concerned about the potential for fraud, some rational discussion of how

fraud is perpetrated at the polls may be helpful in focusing on what I consider to be the more significant issues raised by the Universal Voter Registration Act.

The historic record establishes that it is not any particular election procedure which leads to fraud, but the political culture in a very few jurisdictions which leads corrupt candidates and election officials acting in collusion to manipulate whatever vote counting system exists. In the vast majority of jurisdictions, citizens will vote honestly and officials will count honestly regardless of the system.

Our election system, in fact, is based upon an assumption of honesty among the electorate. The type of fraud we are concerned with is not the isolated instance of a voter trying to get away with something titillating by voting twice, but the organized efforts of candidates in collusion with election officials and pollworkers to cheat on a scale large enough to overturn the honest outcome of elections. It is also abundantly clear that administrative error is responsible for a far greater number of miscounted ballots and contested elections than is fraud. Of 20 contested gubernatorial and Federal elections since 1972, probably no more than three involved fraud. The others involved substantial administrative errors. And in those three, fraud required the active collaboration of certain election officials and pollworkers.

It is startling that the availability of lists of preregistered citizens has abetted fraud in these cases. The dominant method for committing fraud is falsely signing-in and voting for citizens who are or were honestly registered but do not appear at the polls.

Nearly all the improvements in the election system have been accompanied by a hue and cry over fraud potential. Yet the record is just the contrary. For example, adoption of computerized vote tallying raised the specter of fraud to such a degree that the GAO conducted a massive study of computerized vote counting. It concluded that instances of fraud were minor, but that administrative errors were a serious problem in early years; even at that, these errors could easily be overcome through careful planning.

The battle to adopt registration by mail in those 17 States and the District of Columbia which now have it, was accompanied by charges that it would lead to massive vote fraud. But, with more than half the voting age population of the United States now able to register by mail, the fear of fraud has evaporated and former opponents have enthusiastically endorsed post card registration.

As an historical footnote, the International Association of Clerks, Recorders, Election Officials and Treasurers went on record in May 1975 opposing mail registration on grounds that:

> It is the unanimous consensus of our members involved in election responsibilities and recordkeeping that such registration would be prone to confusion and fraud . . .

Hopefully, that association is now somewhat embarrassed by its statement.

In the days of paper ballots, stuffing the ballot box or simply miscounting ballots was the prevalent form of fraud; it involved the collusion of election officials. With the advent of vote tallying devices, those bent on corrupting the system changed their modus operandi to illegally casting ballots for those who are duly registered but fail to appear at the polls; again, significant fraud involves election workers.

If a limited same-day registration system is adopted, corrupt candidates and officials will again find a way to commit fraud, but the vast majority of citizens and officials will continue to vote honestly and count the ballots honestly.

What we must be concerned with is insuring that in the vast majority of jurisdictions the integrity of the system, the electors, and the officials is not compromised by administrative problems which lead to inadvertent miscounts. This means focusing our attention on the details of the system, it means adequate lead-time to adopt the system, it means adequate resources, it means exempting elections at which the system would be inappropriate. And it means building in adequate safeguards against fraud which are based on the realities of how fraud is committed, not on the totally false assumption that the American electorate is basically deceitful and just waiting for the ranks of election officials to be broken so that they can rush into the polling places and steal the democracy.

The bill has been amended in committee to accomplish these things. Local and municipal elections have been excluded, and it is at these elections—with their smaller electorate bases—that the possibility of either fraud or administrative error, changing an outcome, is greatest.

If the bill needs to be further amended, fine. But let us not condemn this or any other legislation for dishonest reasons.

THE CASE AGAINST PORNOGRAPHY

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. BIAGGI. Mr. Speaker, the conscience of the Nation has been shocked over the continued proliferation of pornography. The expanded use of children in pornography represents an especially horrifying phenomenon.

Congress is actively involved in developing legislation to stop the spread of pornography. I was proud to have sponsored an amendment to the Child Abuse Act extension which adds the term "sexual exploitation" to the definition of child abuse. This will allow victims of sexual exploitation, including pornography, to receive treatment funds from programs funded under the act.

Other legislation such as my bill H.R. 5522 would slap stiff penalties against those who procure children for pornography. I am cognizant of first amendment objections which will be raised during the consideration of this legislation. I fully recognize a fundamental right of free speech and expression. Yet freedom of speech does not merely involve the "rights of the speaker." We must also consider the purpose and effect of the speech of expression. The community certainly has a right to be free from the effects of pornography which in reality represent a concentrated attack on the moral fiber of this Nation.

In anticipation of early congressional discussions on this volatile subject, I would like to insert in the RECORD an outstanding article which appeared in the May 16 edition of the National Observer. The article "A Parent's Case Against Porn" was written by Mr. William A. Stanmeyer who in addition to being a parent is a constitutional law professor at the Indiana University School of Law. He eloquently makes the case against pornography. It is important reading:

A PARENT'S CASE AGAINST PORN

(By William A. Stanmeyer)

Pornography exploits. Pornography is exploitation. Yet we have otherwise serious lawyers and writers urging that society have no laws to protect its citizens from the harm that a vast majority of citizens correctly perceive will flow from the pornographic flood. Presumably this defense of moral pollution stems from misunderstanding what pornography is, or blindness to the harm it does, or mistake as to the impact control will have on freedom of speech, or confusion as to law's legitimate role in protecting public morality.

The public wants the law to restrain pornography. Most "intellectuals" do not. The purpose of this article is to remind the intellectuals why the public is right.

In a Feb. 26 article about children in pornographic films. The Observer quoted a description of such a movie:

> *"The film shows the first communion of five girls. A motorcycle gang comes in and crucifies the priest . . . in a very bloody way, [and then] they rape the five girls."*

This summary scarcely captures the film's savagery or suggests its emotive impact. It does not give the blood and gore up close. It omits the fright and shame of the children, the leer of the attackers, the details of violence against a tortured man and the defiled little girls. Indeed, a detailed account of the film would doubtless be obscene; readers would be outraged, saying, "He didn't *have* to say all that to make his point." Exactly. Neither did the film producer.

In defining obscenity, the Supreme Court has said that the basic guidelines are "(a) whether the average person, applying contemporary community standards, would find that the work, taken as a whole, appeals to the prurient interest; (b) whether the work depicts or describes, in a patently offensive way, sexual conduct specifically defined by the applicable state law; and (c) whether the work, taken as a whole, lacks serious literary, artistic, political, or scientific value." This *is* a definition, a working one, as precise as such phrases as "due process," "the public interest," or "reasonable man"—standards the law uses daily.

Some writers insist such a definition will bring repression of Shakespeare or the Bible. This view suggests there is no difference between art and trash—and it says a good deal about their critical faculties and disdain for the public's common sense, not to mention their unfamilfarity with Shakespeare and the Bible.

A DEGRADING PICTURE

Pornography debases sex. It reduces the protagonist to a chemical urge and his foil to a function or an organ. She becomes a chattel, a robot, a toy for a moment's fun.

As D. H. Lawrence wrote in *Sex, Literature, and Censorship:* "Pornography is the attempt to insult sex, to do dirt on it. . . .

The insult to the human body, the insult to a vital human relationship! Ugly and cheap they make the human nudity, ugly and degraded they make the sexual act, trivial and cheap and nasty."

Contrary to what its purveyors say, pornography is *not* "telling the truth about sex." Just the opposite. It says: About sex there is nothing private, noble, or personal. It robs man of his dignity. Its message is: *Man is garbage.*

Obscenity presents a graphic, degrading picture of human life and invites the viewer to wallow in it. It plunges him into imaginative preoccupation with autoerotic fantasies wherein he entertains himself by violently and/or sexually feeding, vicariously, on the helplessness or willing vulnerability of a no-longer-human animal.

"Civil libertarians" would have us believe the only "real" harm the law can guard against is direct, immediate, and physical. This unconscious positivism blinds them to other real harms—psychological attitudinal, moral—that cannot be calibrated but do deeply affect individual lives and, collectively, can debase the citizenry's spiritual environment.

To say that a book, magazine, or play never corrupted anyone is to say that reading or watching a play never improved anyone. Irving Kristol has pointed out what a curious position this is for college professors: Denying that education can improve anyone, they deny the reason for their own professional lives.

Pornography educates. It teaches: Human beings are mere animals . . . the highest value is immediate pleasure . . . other people may be used and then discarded.

When mingled with violence, pornography depicts the protagonist harming for the sake of harming . . . and *enjoying* it. Why would anyone want to watch a violent sacrilege such as the crucifixion of a priest and the rape of children? For entertainment. Why want to watch someone else performing sexual intercourse, save to plagarize his pleasure through one's own autoerotic fantasy? A person, especially a minor, frequenting such self-debasing "entertainments" will learn that this is what life is all about, that life is not about anything of value.

Civilized society cannot afford to be neutral toward such a perception of life. For education to civility is an effort to make of man something more than a creature of elemental passions and sensations. To civilize is to help people internalize respect for others, sharpen their sense of reality, grasp the difference between the decent and the indecent, desire the noble and eschew the ignoble, control their passions, do what is right even when it costs, stand in awe and wonder at such ultimate mysteries as the utter uniqueness of every other person, love, sex, suffering, and death.

AN ATTACK ON CIVILIZATION

Because obscenity rejects each of these educational goals, it is an attack on civilization. By capitulating to obscenity, civilized society denies there is any difference between civilization and barbarism. It is reasonable to assume that a depraved moral outlook can translate into depraved conduct—i.e., more crime. Concern over excessive television violence is well-founded.

The Founding Fathers were not absolutists. They upheld legal sanctions against libel, indecent speech and conduct, profanity, and other abuses of free speech. They knew the difference between liberty and license. They knew freedom can be abused. They did not deem free speech to be solely a question of "rights" of the speaker. They also considered the purpose of speech, which was to foster the politically and morally Good Society.

It is not always easy to decide what conduct is "reasonable," what process is "due," what material is pornographic. But we must try. What must be balanced is not merely a publisher's asserted "rights" against a prosecutor's zeal, but also the harm to society from a few unwarranted obscenity convictions against the harm to society if every newsstand, TV screen, and even schoolbook panders a thousand pictures of perversion.

The absolutists say we cannot draw any line anywhere. This is patent nonsense. In a democracy, why should the minority who cannot distinguish between art and trash dictate the education—through magazines, television, and schoolbooks—of the children of the majority, who *can* tell the difference?

To say the law has no business promoting morality is to exhibit amazing ignorance of Anglo-American history. Nearly every branch of law assumes the existence of a standard of moral good and evil. Besides physical crimes such as murder and theft, the law proscribes "sharp" business practices, "unfair" political campaigning, racial discrimination. Civil-law notions of "fault" in tort and "fiduciary" obligations draw their substance from moral concepts.

The objection drawn from the Prohibition Era is not apt. The law should promote temperance, not abstinence; decency, not sanctity. The law should not—and certainly our laws against pornography do not—try to "make" people be virtuous, but only make it harder to be utterly vicious.

Society is more than an aggregate of individuals. Besides the pornographer's private "right," there is the public right to a decent social environment. As a parent of four little children, I have a Constitutional right—recognized by the Supreme Court since 1925—to train my children to their higher obligations. To rear decent children requires that public entertainments—magazines, movies, TV, etc.—not be utterly indecent. The pornographer arrogates the "right" to *teach* my children to be indecent. Why should a few pornographers dictate the sociomoral environment of the children of millions of parents?

The law guides future generations as they grow into its precursive patterns. The law expresses to the young their elders' experienced judgment about right and wrong, a distillation of the mature community's experience and history. To remove all legal control of pornography is to teach the young that their elders do not know right from wrong; that we do not care how our young entertain—that is, educate—themselves; that civilization and barbarism are the same.

It is captious to object that "some people will do it anyway," so that in moral matters, having failed to obtain 100 per cent compliance, the law should abdicate. This is also true of laws against shoplifting and speeding. The law expresses a standard that most people respect. Without law, the marginal person would be adrift. The fact that some people break the Ten Commandments is not a theological argument for their repeal. Nor is the fact that some people break laws that promote a basic moral standard a legal argument for *their* repeal.

To the absurd assertion that laws proscribing the raunchiest of sex magazines will lead to censorship of Time and bonfires of National Geographic, I answer: This didn't happen in the past, when there was more censorship. The Supreme Court would not permit it. The alternative of "anything goes" is far more likely to lead to school-gate bookstores glutted with picture books of homosexual rape and child torture.

Some say, "The best way to deal with pornography is to let it run its course; once sated, people will get bored with it." This is somewhat like saying the best way to deal with the filth in Lake Erie is to let Lake Erie fill up till it can't take any more. Why should parents have to let their children's moral environment get so corrupt that by comparison Sodom and Gomorrah resemble a Trappist monastery?

The salient issue is, May we draw a legal line *somewhere?* Or must we draw no lines? Must we tolerate *everything*, no matter how depraved or how sick? The public's answer is, We will draw a line, because we have the right to rear decent children in a decent society; and children or not, decent adults have a right to a decent society. And the public is right.

CHAIN STORE NEWS—A PUBLISHER'S EXPLANATION

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. UDALL. Mr. Speaker, a little over a month ago I made a speech at the National Press Club in which I described and expressed my concern about the rapid absorption of independent, locally owned newspapers by a few large, aggressive, national chain operations.

That same day, Representative KASTENMEIER and I introduced H.R. 6098, the Competition Review Act of 1977, to establish a 3-year study of the state of competition in basic industries and an analysis of Federal laws, regulations, and policies that may impede vigorous competition.

The members of the fourth estate have chosen not to wait for passage of that bill. I am told that my remarks sparked considerable discussion at recent editors' and publishers' conventions, and I have received a large volume of mail from publishers, their employees, and their readers commenting on the blessings and the drawbacks of "chain store news." One of them, from an Iowa publisher, appeared in the RECORD of April 28 on page 12685.

One of the most thoughtful and incisive of these letters came from Philip N. Bladine, publisher of the triweekly News Register in McMinnville, Oreg. Mr. Bladine sets forth in detail some of the major problems independent, family-owned papers face in passing control from one generation to the next; in addition, he comments on the problems Federal regulatory activities pose for small-scale operations.

I urge my colleagues to consider this publisher's point of view as the 95th Congress proceeds:

NEWS-REGISTER,
McMinnville, Oreg., April 27, 1977.

Hon. MORRIS K. UDALL,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. CONGRESSMAN: I have read with great interest your speech of April 5 to members of the National Press Club. I hope that comments I have to make will be pertinent to your consideration of the problem of increasing concentration of ownership of America's newspapers.

First, let me identify myself. I am the second generation of an old newspaper family. My father started in the newspaper business at 13 as an immigrant boy from Sweden. The family settled in Iowa in the early 1890's. He purchased this Oregon weekly in 1928 and sent my brother and new wife to run it. Next year the publication will have been in our family for a half century. My

son is now editor and my deceased brother's son is a desk editor on the Bakersfield Californian.

In 1976 I ran for the Oregon First District Congressional seat as the GOP nominee against Les AuCoin. During the campaign I frequently discussed the situation you talked about in the newspaper field as a real national problem.

We are now a tri-weekly newspaper, one of the larger non-daily publications in Oregon. Also, we are one of the few major newspapers not under chain ownership. Some of the medium size newspapers are involved with Oregon groups but most of the major media, primarily the big dailies, are in the Gannett, Newhouse, Lee or other big chains.

There are a number of reasons, I'm sure, but the biggest offender has to be government—the factor which should be most interested in independent ownership.

Our newspaper is a closely held corporation. The stock is owned by my sister-in-law and her children and my wife and myself and our two children. It is a 50–50 ownership. Like most independent publishers, we are extremely concerned over impact of death and inheritance taxes on the future ownership of The News-Register.

The growth of chain acquisition has created a vicious circle. Newspapers are fewer in number, as you pointed out. This has made them more valuable. The chains have bid up the price, in turn making the estate consequences increasingly serious. Just as with farmers, we have found ourselves in a business worth more than its earning capacity. For example, I think I would have to double or treble our company earnings to warrant my purchase of my sister-in-law's holdings without crippling my income picture for many years to come.

My brother was 15 years older than me and his widow only a year or two younger than he. Since I am approaching 59, you can see that we are having to face the issue.

A good friend, the publisher of the daily Gazette-Times in Corvallis, pointed out he sold to the Lee newspapers because he wanted to know who would be running that long-time family-held newspaper after his death. He felt this was a fine firm, interested in community.

Our family operation, from my father's early days, has been such as you talked about. We have been named the nation's best weekly, its second best and have won top national and state community service honors. The National Mental Health Assn. established a special non-daily category for the Bell Award in 1967 so that we could be recognized for a series which changed the handling of youth in Oregon's mental health institutions.

Earning money has been secondary throughout my newspaper background, inherited from my father and brother. That is changing. To meet the problems of the future, as well as dealing with the tremendous burdens government keeps adding, our thinking is changing. We must make money to maintain our independence. I don't have to tell you it's getting tougher and tougher

Certainly, one thing is certain. I could sell our newspaper, invest the receipts at reasonable interest rates and substantially enhance my income. I don't because I'm steeped in a tradition of independent newspapering as a service to community and state.

Most publishers I know don't want to bring chain ownership into their communities. Most have the same philosophy of service and love of independent newspapering I'm talking about. Unfortunately, however, they also don't have the interest or the know-how for real money making. As a consequence, many of the important people who make good newspapers possible are not paid as well as equally or less competent people in other professions. Ownership benefits are less than under the highly organized group organizations. As you pointed out, they're keyed to profits.

I, too, don't believe the groups are producing bad papers or evidencing little community concern. I do feel, however, that the loss of independent management takes something away from the great traditions of American journalism.

I have talked at some length about inheritance taxes. I cannot close without also mentioning the burden we hold, along with all small business, from the requirements of a mushrooming bureaucracy. We are being overwhelmed, in demands on time as well as resources, by government. The cancerous osmosis of spreading government is inexorably eating away the freedoms we treasure and the rights of initiative and action in the business community to which we must look for support.

Because there are fewer media units we have experienced substantial growth. This has been healthy because it has given us resources to do a better job and pay our people more. At the same time, it has placed demands on us for capital to finance new equipment, expanding personnel, etc. The cost of government, at local, state and federal level, is seriously impacting our ability to meet growth obligations.

As an independent publisher I have been able to support myself in a three decade involvement in our community and state in water resources development, economic growth programs, land use activities, statewide business and educational groups, printing and publishing associations and innumerable community activities. I have observed that those who work for chains, particularly the national organizations, have considerably less freedom. Frankly, this freedom to contribute to our community and state means much more to me than financial rewards.

I want to be able to continue my life in the pattern set by my family, one I hope and expect will be followed by my children. That may not be possible the way things are going. The course you have set is, in my opinion, aimed in the right direction but we all must recognize that runaway government at every level is the first dragon we must fight.

Sincerely yours,

PHILIP N. BLADINE,
Publisher.

PRIORITIES FOR RAIL SERVICE CONTINUATION.

HON. BOB TRAXLER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. TRAXLER. Mr. Speaker, over the last 3 years the Congress had become increasingly involved in legislation which seeks to revitalize our railroads, and attempts to guarantee the continuation of rail service in those areas where it is needed. I supported those efforts, and have been very pleased with the results of the first year of ConRail and the first year of rail service continuation subsidies available to those lines of railroad not transferred to ConRail or a solvent carrier, and certain lines of railroad approved for abandonment by the Interstate Commerce Commission.

However, as we operate any program we begin to learn of its problems and its shortcomings. We learn about those items we forgot about when we originally passed the legislation. This has been the case with rail subsidy legislation. Under current law, we have established a philosophy whereby the Interstate Commerce Commission can rule in an abandonment case that the public convenience and necessity do not dictate the need for continuing rail service, and then a rail line becomes eligible for financial assistance. While this program is needed by our many small rural communities, I fear that it also forces us to lose sight of what is the public convenience and necessity, and that it makes railroad abandonments too easy of a proposition.

Under current law, the Interstate Commerce Commission does not have to truly worry about what the public needs, since the Commission knows that as soon as the line is approved for abandonment, the States using primarily Federal funds can pay to have the line remain in operation. At that point, if the line is shut down, it is the State governments that are made to look like the villains. I know from a personal experience earlier this year that every single witness that testified at an abandonment hearing discussed the subsidy issue in one fashion or another. Despite our statements that the issue of subsidy will not become a factor in an abandomnent case, I cannot see how any administrative law judge can ignore all of the testimony that may spell out the future of this rail line.

We need a program that will make the issue of subsidy in an abandonment case a moot point, and a program which will allow the ICC to get back to determining the public convenience and necessity in an abandonment proceeding. In order to achieve such a program, last week I introduced H.R. 6871, a bill to provide financial assistance to common carriers by railroad who are required to continue the operation of a rail line following a decision in an abandonment proceeding.

The philosophy behind this bill is very simple. If the Government is going to order a rail company to keep a certain line in operation because the Government believes the public needs it, then the Government should help in defraying the expenses of operating that line. Under the provisions of my bill, if in an abandonment proceeding the Commission denies an abandonment petition, finding that the public need dictates the continuation of the rail service, and that the line in question is in fact losing money, then that line of railroad shall automatically become eligible for a continuation subsidy which will last for a period of 5 years on that particular line. Let me emphasize that this subsidy program is different from the current subsidy program in two ways. First, it applies only to those lines of railroad which have been denied abandonment. Secondly, the subsidy lasts for 5 years on the individual line, not 5 years for the entire program. Under current law, any line of railroad abandoned this year will be eligible for only a 4-year subsidy. If the line is abandoned next year, it is eligible for only a 3-year subsidy. As the program continues to wind down, so does the usefulness of the subsidy.

Anyone in the rail industry will agree on one certain fact. Railroads simply do not have the money that is needed to maintain and rehabilitate those rail lines

that are located in rural areas that are totally dependent on rail service for shipment, but do not have the volume of traffic that is found in many industrial areas. As long as railroads cannot justify putting money into rehabilitating rail lines in these areas, we will see them deteriorate and become persistent candidates for abandonment. Further, if after the abandonment the rail line is not improved, the likelihood of it returning to a viable stage is virtually nonexistent.

In order to deal with this problem, a primary feature of my bill is to allow for realistic track rehabilitation within the framework of the subsidy program. The rehabilitation program is designed to bring lines to realistic operating speeds, but to limit such speeds to a relatively moderate standard. For that reason rehabilitation can be done to upgrade a line to either a standard of 30 miles per hour, or that speed which may be continuously maintained over the longest single segment of such line. I am not trying to "gold plate" rail lines, but we must provide for reasonable operating conditions. The current subsidy standard of 10 miles per hour forces operations at speeds so low that labor costs eat up the efficiency of operating the rail line. Further, if a rail line equal to 60 miles in length has an operating standard of 40 miles per hour over a continuous 35 miles of its length, then the line should be upgraded to that full 40-mile level over the remaining portion of the line. Slowdowns and speedups of trains are what very frequently can cause many train accidents, and weakened rails which have not been rehabilitated are often the reason for train derailments. Our rehabilitation programs must work to avoid such problems. But at the same time, I do not want to allow rail companies to upgrade beyond reasonable needs. If on this same segment the trains can operate at 60 miles per hour over 5 miles of track, they will not be allowed to upgrade the entire line to 60 miles per hour using Government money. Simply, the standard will be a minimum of 30 miles per hour operating speed, and a maximum equal to the speed over the longest continuous segment.

My proposal would be in effect for 15 years, and would have an authorization of $20 million annually for each of 15 years. This is in keeping with allowing for a full 5-year subsidy on each line while it is in a weakened condition.

Many critics of assistance to our Nation's railroads may say that this proposal is nothing more than a handout to the railroads. This is definitely not true. I expect the railroads to do their part in improving demand for rail service. That is the reason why the subsidy program will start out with 100 percent of the funding coming from the Federal Government, and that share will decrease by 10 percent each year for each year of the subsidy on each particular line. In years 2 through 5, the remainder of the loss will have to be absorbed by the railroad. It would certainly be expected that the railroads would do all that they could to encourage additional shipment along the line so that there would be no loss. And as the loss is reduced, so is the need for the Federal subsidy. It is distinctly possible that the subsidy will not be needed for a full 5 years on each line, but this will very depending upon each individual line.

This bill creates a measure of assistance for the various levels of Government, the shippers and the railroads. It helps local and State governments by allowing businesses to remain in place, adding to their tax revenues. It also does not require their financial participation, saving their tax revenues. It helps shippers by providing the upgraded roadbed they need, and we all know that as a line improves, rail companies can offer more attractive shipping rates, most notably unit car rates. The benefits to the railroads are obvious. They have an opportunity to reduce their losses, and avoid the necessary cross-subsidization that is needed to keep the line in operation. With its own resources partially held away from the subject line, it is free to work on others which may be in a weakened condition so that they will not become subjects of abandonment cases.

I firmly believe that this type of legislation is urgently needed. I hope my colleagues will offer their support for my efforts, and join with me in obtaining passage of H.R. 6871.

THE PAUL-GAMMAGE CASE

HON. JOSEPH S. AMMERMAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. AMMERMAN. Mr. Speaker, as you know, in January the distinguished chairman of the Committee on House Administration (Mr. THOMPSON) appointed me chairman of a special panel to hear the contest filed by Ron Paul, Republican of Texas, against Representative BOB GAMMAGE, Democrat of Texas, in the 22d District of Texas. On Monday, May 9, this House voted 260 to 126 to dismiss Mr. Paul's challenge, as recommended by the panel.

There has been some criticism in some quarters of our action. But I am absolutely convinced that we did the right thing—that we gave Mr. Paul his "day in court" and that we rendered a decision appropriate to the merits of the case.

I have outlined some of my thoughts on the matter in a column which I have sent to the newspapers in my congressional district and which I would now like to share with the House:

Apparently as a result of a letter he sent them, many of my constituents have written me in support of former Rep. Ron Paul (R. Tex.) who is contesting his election defeat last November in the 22nd District of Texas by Rep. Bob Gammage (D. Tex.).

I have, in addition, received a large number of cards and letters supporting Mr. Paul from persons across the nation. Other members of the House have been sent similar messages, also apparently the result of Mr. Paul's letter.

I was the chairman of the special elections panel of the House Administration Committee that heard the Paul v. Gammage case. After public hearings in February and March, the panel voted 2–1 March 9 to recommend that Mr. Paul's challenge be dismissed. This decision was affirmed by the full committee April 28, by a vote of 16–6.

And on May 9, just this past week, the House voted 260–126 for dismissal.

The communications I received from my constituents in support of Mr. Paul raised several questions about the fairness of the procedures under which his complaint was heard. Similar questions were raised by some of Mr. Paul's defenders in the House.

I want to respond to those questions in some detail because I believe that Mr Paul was treated fairly and equitably by the House of Representatives, and I resent any implication otherwise.

First, the basic facts of the case: The longtime Democratic incumbent in the 2nd District resigned early in 1976 and Mr. Paul defeated Mr. Gammage in a special election that April. However, in November the outcome was reversed and Mr. Gammage emerged as the winner with a 236-vote margin. Mr. Paul asked for, and received, a complete recount which showed Mr. Gammage the winner by 268 votes.

Mr. Gammage thereupon was issued a certificate of election by the state of Texas and was duly seated as a member of the 95th Congress in January.

Mr. Paul, in the meantime, filed contests to the election in the Texas courts and with the U.S. Congress.

The following issues have been raised in connection with the case by Mr. Paul's supporters:

(1) It was argued that Congress should have waited until the state courts ruled before deciding the case.

Article I, Section 5 of the U.S. Constitution specifically states that "each house [of Congress] shall be the judge of the elections, returns and qualifications of its own members." The Supreme Court of Texas dismissed Mr. Paul's challenge in the state courts on the grounds that Texas had no constitutional authority to hear the case.

However, even though the House was under no constitutional obligation to wait for the Texas courts to rule, we did so. The court handed down its decision March 2 and the elections panel held its final hearing and voted to dismiss on March 9, a full week later.

(2) Mr. Paul alleges he was not given an opportunity to make his case.

The Federal Contested Elections Act, to quote from the panel's report, "places a weighty burden upon a contestant."

It is not a sufficient basis for a challenge that an election was close or even that there were voting irregularities. For the House to hear his case, a contestant must produce evidence which, if verified, would prove that he would have won.

This heavy burden of proof exists because Congress cannot seek to overturn the apparent will of the voters unless we are absolutely certain that official state returns do not reflect their will. Nor can we permit a contestant to conduct a fishing expedition in the hopes of somehow, somewhere, sometime finding evidence to prove his case, all the while casting a shadow on the declared winner and forcing him to bear the legal expenses necessary to defend his interests.

Mr. Paul simply did not produce any evidence that would have been admissible in any court. The voters in the 22nd District of Texas will have a chance to review the case themselves in 1978.

(3) It is charged that the proceedings were partisan.

Mr. Paul's defenders, notably Rep. Charles E. Wiggins (R-Cal.), made a reasoned challenge to the procedural theories of the Contested Elections Act. I take him at his word that his position reflects his legal philosophy, not his party affiliation.

The fact remains, however, that of the four challenges (including Paul v. Gammage) dis-

missed by the House May 9, there was broad bipartisan support only in those two cases where the challenge had been made against Republicans. While House Democrats voted to dismiss all four challenges, House Republicans only voted to dismiss the challenges against their fellow Republicans.

So on the partisanship question, I believe the record speaks for itself.

"HANG IN THERE"

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. RANGEL. Mr. Speaker, on May 5, 1977, I attended the New York Urban League's 12th Annual Frederick Douglass Awards Dinner in New York City. During the course of the evening much time was devoted to the problems that face New York City and its urban league. The most responsive answer to the question "what do we do" was "we must survive." For as long as the city and league survive there is hope for change. A change that will continue to develop our goal to make New York a greater urban community.

The evening was highlighted by a speech from Horace W. Morris, executive director of the New York Urban League. The substance of the speech dealt with the thesis that we must "Hang in There to Survive."

I felt my colleagues would be interested in this informative message.

A taxt of the speech follows:

REMARKS BY HORACE W. MORRIS

Joey Adams, Reverend Clergy, our 1977 Douglass honorees, Dais guests and to each one of you it is a very real pleasure to greet you as you join us in the twelfth commemoration of the life and work of Frederick Douglass.

It never ceases to amaze each one of us how quickly time passes.

On this evening 2 years ago I spoke to you as the new executive director of the New York Urban League. At that time I expressed my appreciation for the outstanding and the extremely competent efforts of those New York Urban League board and staff persons responsible for attending to the many details that cause this event to be a wonderful experience: Veronica Neufville, Louise Black, Mary Jankok, Carol Stroy and Muriel Kellogg.

This year, for some extremely unusual reasons, the mettle of our staff was severely tested. But here we are enjoying ourselves and everything is just fine. Tonight's affair is certainly a credit to their diligent efforts. I would be quite remiss in not recognizing the fact that Ann Kheel's complete and untiring devotion to the dinner serves as an inspiration to us all.

Tonight I wish to share with you some thoughts about one of the most important aspects of life. In these times, as we continue to experience exceedingly rapid changes in our personal and organizational lives the effort to "hang in there", to cope, becomes more intense every day and in ways too numerous to mention the pressures of life and living constantly threaten to overwhelm us all. These observations cause me to realize that in many ways life's major effort is just to make it, to cope, to survive. Tonight, with your indulgence, I wish to share with you some thoughts about this important facet of our lives—surviving.

On the night two years ago, I also spoke to you of an organization experiencing some very serious problems—the New York Urban League. Many of you openly expressed very real concern as to the league's ability to reestablish its effectiveness and capacity as an organization dedicated to the elimination of the many barriers to improving life's chances for New York City's black and poor.

Last year my major concern was directed toward our great city's continuing viability and its ability to sustain the reputation of caring, of opportunity, of fairness that had long been recognized by the entire world.

Tonight it is with a great deal of pride and pleasure that I say to you that both the New York Urban League and New York City are very clear and evident examples of what I have termed one of life's most important aspects—surviving.

Both these institutions have made the hard decisions, selected the difficult choices and we have survived it all. With continued perseverance and typical New York determination and confidence our efforts will certainly continue to realize positive results. This year we shall be determining who will be the next mayor of New York City. The person to be entrusted with the mantle of leadership in the city's continuing survival efforts. We must encourage all our friends to participate in these efforts by first registering and by then casting a vote for the candidate of their choice, come this fall.

Tonight each of you has received a copy of our 1976 annual report. Each of you has received materials from Paul Gibson, Jr. asking you to become a member of the New York Urban League. As you will note, our membership campaign will extend through the month of May.

May having been designated by the Governor as Urban League Month throughout the State.

Many of us find it difficult to remember the last time the New York Urban League mounted a city-wide membership effort. I submit these activities as specific examples of the fact that the New York Affiliate of the National Urban League survives and is surviving quite well. By the way, for the benefit of our union friends you will note the bug is missing on our annual report. This was strictly an overnight. The report was printed by Glenwood Press, Local #1 of the Amalgamated Lithographers of America, Bug #410.

This year one of our most serious survival concerns directly relates to the very grave conditions confronting minority youth. For a few brief minutes I would like to direct your attention to the crisis conditions existing among black and hispanic youth in our city and for that matter, across the nation.

In 1968 the person that I speak of was 16 years of age, today 25; probably never finished high school; may be married or is quite likely a parent; the fact that New York City has lost 650,000 jobs during this time period practically insures that the person of our concern has never been employed; the anger of the 1960's generated by the constant realization that life could and should be better has been replaced by apathy—resignation and in many cases crime and addiction. Some of you will recall a February 7th article that I wrote, which appeared on the op-ed page of the New York Times, depicting this important segment of our society as a "lost generation." This seems so true when he realize that without the complete dedication of both the public and private sectors of our entire economy, close to 70% of today's minority youth between 16 and 25 will never be productive, contributing citizens. What I term the "pass along concept" will never be realized. That being that one generation will not be able to pass along the most important human concepts of pride, self-worth and accomplishment to those that follow. Survival in this instance is in jeopardy. We must not forget nor neglect to direct our energies and efforts toward the resolution of a crisis that threatens us all.

A close personal friend of mine offers what I think is a sad and tragic commentary on the plight of today's minority youth by saying, "Horace, you save yours and I'll save mine, because the rest may be lost."

But that is not what the New York Urban League is all about. With your help—and I ask for your help now—let us dedicate ourselves to helping them survive.

I ask that we leave tonight resolved to save as many as we possibly can. Let us help them be survivors.

Thank you.

REV. THEODORE M. HESBURGH, C.S.C.

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. MAZZOLI. Mr. Speaker, Father Theodore M. Hesburgh, C.S.C., became president of Notre Dame when I was in my sophomore year. He has completed his 25th year as head of what I believe to be one of America's great universities. He is the dean of all the presidents of major American colleges and universities. In short, he is a most accomplished and talented man.

As a proud alumnus of the university, two events—occurring last month—have been signal experiences for me. Both will provide warm and cherished memories for me for all the years of my life.

On April 19 the Notre Dame Club of Kentucky honored me with its Award of the Year.

And, on April 27, I was honored to have been present when Father Hesburgh delivered eloquent remarks to the Notre Dame Club of the Washington, D.C. area to celebrate Universal Notre Dame Night, 1977.

Father Hesburgh's rich and productive years as a religious leader, as an eminent American educator, as a fighter for human and civil rights across the globe, and as the recipient of honors beyond count have not eroded the humility and the genuineness and the decency of this man.

Mr. Speaker, I wish to share with my colleagues an article from the May 2, 1977 issue of Time which details the remarkable accomplishments of Father Hesburgh:

PRINCE OF PRIESTS, WITHOUT A NICKEL

(NOTE.—In 1952 Father Theodore Hesburgh, then only 35, was appointed president of the University of Notre Dame. Over the following quarter-century—a longer term than that of any other major university president—he has changed the school profoundly and become one of the most influential figures in the country. As Notre Dame prepared for its 95th graduation of the Hesburgh era Time Correspondent Robert Ajemian talked with the priest and wrote this report:)

The familiar Roman collar had been pulled off and hung up with the black jacket. It was well past midnight and Father Hesburgh

was still working through the piles of mail in his old, high-ceilinged office. He routinely stays up until 3 or 4 o'clock in the morning.

Traces of his fame are all around him. On the walls and tables of the big room are autographed photos of a younger Ted Hesburgh standing comfortably besides Popes and Presidents. His hair is less black now and his heavy jaw fuller, but he still has the handsome black-Irish looks of his mother. There is an inscribed silver plate from Jackie Kennedy and an emerald-studded ring from Pope Paul. He has become a virtual prince among priests. The sound of a Beethoven recording, a gift from the president of RCA, plays softly in the background.

MONASTIC LIFE

On the other hand, Hesburgh for all his years at Notre Dame has continued to sleep on the same iron cot in his tiny room at nearby Corby Hall. The shelves of his outer office are stacked with cans of orange juice and Campbell soup, a sharp reminder of his monastic life. His rickety hot plate sits on the counter. It is the mark of an asceticism that Ted Hesburgh seems to impose on himself—almost as though he felt a need to reassure himself that he still is a priest. "After all these years, I haven't got a nickel in the world," he says, "and I like that."

Hesburgh's batch of mail touched on the widely contrasting aspects of his life—appealing to the simple pastor as well as to the clerical entrepreneur. There was a letter from Cardinal Franz Koenig of Vienna congratulating Hesburgh on his recent elevation to the chairmanship of the Rockefeller Foundation. A woman friend in terrible emotional trouble begged for help. Teddy Kollek, the mayor of Jerusalem, wanted Hesburgh to fly over and help stop the rapid development of high-rise buildings. There was a hopeful note from the freshman class asking if Hesburgh would attend their formal dance. Another letter told him that the Chinese Communists, who genrally view priests as only slightly more admirable than locusts, were interested in inviting him to China.

Hesburgh searched for one letter in particular, a reply from Alexander Solzhenitsyn, who had been offered a Notre Dame degree this year. He finally found it: a polite no. Hesburgh was disappointed—but he already landed his friend Jimmy Carter as the commencement speaker. The graduation ceremony will be a deliberate show of support for Carter on human rights, one of Hesburgh's passions. Hesburgh will award degrees to Bishop Donal Lamont, who was ousted from Rhodesia; Stephen Cardinal Kim, who has fought against government repression in South Korea; and Paul Cardinal Arnes who has spoken out against human rights' violations in Brazil.

When Hesburgh took over the university in 1952, Notre Dame was best known for football and dedicated to the production of believing Catholics. In those days students had to attend Mass three times a week or face disciplinary reprisals. Notre Dame boys were even advised to pray before dates with girls at nearby St. Mary's. Outside lectures were picked for orthodoxy more than for probing intellect.

Hesburgh, who had been a prison priest as well as a chaplain for the armed forces—and was no great lover of football—soon began changing all that. He steered Notre Dame away from the control of the church and into the hands of a lay board of trustees. It was a painful and uncommon achievement, which freed the school from a burdensome authority and historically redefined Catholic higher education in the U.S. At the same time, Hesburgh struggled to retain the moral quality of his school. "We stress values here," he says. "American universities have become obsessed with objectivity. They turn out highly competent but morally neutral people." Hesburgh upgraded the quality of faculty and curriculum, and in 1972 instituted his second dramatic reform: Notre Dame became co-ed.

Almost from the beginning, the priest made a remarkable impression on the Establishment. He began getting invitations to join more and more of America's powerful private foundations and Government commissions. At times he was considered simply "the necessary Catholic," but Hesburgh eagerly accepted the chance to make himself heard. Eisenhower named him to the Civil Rights Commission in 1957. He became a member of the Carnegie Commission on higher education, later accepted a place on the board of David Rockefeller's Chase Manhattan Bank. The Vatican appointed him representative to the International Atomic Energy Agency.

He did not always accept. When Lyndon Johnson asked him to take over the space program in 1964, Hesburgh declined. "I couldn't see a Catholic priest handing out $6 billion in contracts." He similarly turned down Richard Nixon's offer in 1969 to head the poverty program. His priesthood always had to be reckoned with. Says he: "I didn't want to become some sort of Cardinal Richelieu."

OVER THE ANDES

Nonetheless, the clergyman became irresistibly more and more involved in power and politics. He was soon criscrossing the globe, logging as many as 150,000 miles a year. His messages often included lines like "I am writing this from over the Andes." Back home, his spectacular travels were at first greeted with pride and then, as the years passed, a certain amount of sniping. A campus statue of Moses, with hand pointed skyward, inspired the gag: "There goes Hesburgh."

No matter that he was a place dropper, Hesburgh had the ear of the elite. He remembers waiting for Lyndon Johnson outside the Oval Office late one evening with his civil rights team until Johnson, looking limp, ushered them in. Johnson was so exhausted he lay down on a couch, gathered the group around him like visitors to a sickbed and kept his eyes fastened on the ceiling as Hesburgh outlined the difficult goals. Johnson accepted all of them.

Hesburgh's advice was often blunt. He once told Richard Nixon, with whom he developed a special closeness, that young people were scornful of the President. He urged Nixon to end the draft and allow 18-year-olds to vote. When Hesburgh's civil rights commission sharply criticized Nixon, the President's patience ran out. A White House secretary soon called Hesburgh and demanded that he resign by 6 o'clock the same day.

Carter offered Hesburgh a job working in the State Department for Cyrus Vance, but Hesburgh again held back. Of all the political leaders he has encountered, Hesburgh says that he finds Carter by far the most forthright. When Carter told him during the election that he was worried about Catholic support, Hesburgh reassured him. Then he offered a typically direct piece of advice: "I don't think people like to hear a man yakking about religion all the time."

Hesburgh is a fascinating, if exhausting, conversationalist, with strong opinions and an enormous range of subjects. Racism is the world's biggest problem, in Hesburgh's mind, although he is hopeful because he finds young people round the world much less prejudiced than their parents. It shows up, he says, in their confessions. "They feel worse about their sins of omission than they used to." Today's theologians, on the other hand bother Hesburgh. "They have no faith," he says. "They teach theology like a science. They're not believers themselves. At least the scientists do believe in a chemistry table or the speed of light." Hesburgh worries about educators too. "We've got a bunch of faint fellows who don't want to make educational waves. The '60s took a terrific toll. We lost a whole generation of university presidents. Only King Brewster [of Yale] and I survived."

BIG MISTAKE

On some of the moral issues that confront his students, Hesburgh is fairly traditional. He is opposed to young people living together before they marry. "I think the girls get shortchanged," he says. "Some of these young people get so jaded they can't ever settle down with anybody." He is proud of some statistics indicating that 93% of the marriages of Notre Dame alumni told together. Although he is against abortion, he believes that the Vatican encyclical forbidding artificial contraceptives was a big mistake. He supports more work on a reliable method of determining the ovulation cycle. He ends up sounding ambivalent on celibacy. "I don't recommend it for everybody," he says with a shrug. "It's not easy, but it's right for me. For some priest on the Amazon, it might not be. After all, priests in the Middle Ages lived with women, and all the Apostles were married."

Hesburgh sounds more confident on the subject of happiness. "It can only come," he says, "from giving at least a corner of yourself to others. People today are so egocentric. God help the person who goes through life doing nothing for someone else. He's doomed." He finds that young people today are less ambitious than a generation ago, duller than in the '60's but more eager to find some meaning in their lives. Hesburgh keeps a close rein on his own ambitions, even as he enjoys the trappings of success, smoking a Cuban cigar and sipping a Grand Marnier. Ambition among churchmen, says Hesburgh, is corrosive: "I've seen it ruin so many."

Hesburgh the outer man seems unfailingly optimistic. Close friends say they never find him in a bad mood. But his is a calling where true feelings are often submerged. For all his heartiness, the inner Hesburgh seldom surfaces. "I think he's probably a lonely man who makes up for it by work and talk," says a colleague. Hesburgh laughs at this. He says his religion protects him from loneliness. While he says Mass every day, whether in a Moscow hotel room or at the South Pole, he seldom quotes the Bible in conversation. He is not a scholar or even especially profound. "Ted is a doer," says one close friend, "not a tormented intellectual seeking some kind of truth."

Though he is popularly viewed as a kind of Catholic Mr. Chips, Hesburgh is now held in such awe by Notre Dame students that they seldom deal personally with him. Student Body President Mike Gassman says he would not dare interrupt the president with ordinary school problems because "he's too important now." Another students says, "Father Ted is usually too busy playing world savior." Both of them are swift to add, however, they think Hesburgh is the main force behind Notre Dame's stress on values.

Even as Hesburgh buries himself in his work, no one really understands what drives him. Is it his need for prestige or power, or is it his need to keep building for the greater glory of his God? His answer is just to keep working. He turns 60 this month and has no plans to retire. Instead, he announced a week ago that Notre Dame is undertaking the largest fund-raising drive in its history: $130 million. "Show me the top ten endowments," says Hesburgh, "and I'll show you the top ten schools in the country." Notre Dame's campaign will lift it close to the top ten, but everybody knows in the long run that will not be good enough for Ted Hesburgh.

A DIM FUTURE FOR THIS AREA?

HON. HELEN S. MEYNER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mrs. MEYNER. Mr. Speaker, ever since President Carter announced his proposals for energy conservation and development to the Nation, each one of us has received more mail, editorial comments, news articles and observations than we care to mention. There are a few of these, however, that deserve special mention because of their insight and perspicacity. One such is a May 1, 1977, column by Mr. Vic Berardelli in the Newton, N.J., New Jersey Herald.

Vic Berardelli very concisely articulates the concerns of the people in northwestern New Jersey over the proposal for a standby gasoline tax that could add another 50 cents to the cost of a gallon of this now-precious fuel.

I believe that if my colleagues take the time to review the following excerpts of Mr. Berardelli's column, they will well understand why millions of Americans—and their representatives in Congress—cannot support the proposed gasoline tax in President Carter's energy program:

A DIM FUTURE FOR THIS AREA?

President Carter's energy proposals may have inadvertently supplied a campaign issue for New Jersey that could overshadow the income tax. But the proposals could have far reaching consequences for Sussex and Warren counties.

If the President is successful in getting his heavy gasoline tax proposals through Congress, state and county officials here will be forced to tap their imaginations for a plan that might forever alter Garden State society. Conservation of diminishing resources, such as petroleum, is necessary, but such products are not luxury items locally. While the automobile may be a form of personal indulgence in the cities, in northwest Jersey it is the element that makes the difference between a stable economy and hardship.

Sussex and Warren counties are not entirely rural to be sure. They are hybrids in that they are also bedroom communities. Such suburbs are peculiar to the New York megalopolis and parts of California, where it is not uncommon for people to commute as much as 70 miles to a job. Most American cities are merely ringed with periphery suburbs linked to the downtown urban core. Here the job market is scattered around several cities and developed suburbs in a tri-state area.

Public transportation is virtually nonexistent in the Sussex-Warren area. A local commuter could use a park-ride facility for a direct bus ride to Manhattan or drive 20 miles to a train station for a rail commute to Newark. But most breadwinners in these parts are commuters who don't head for the cities. They work at office campuses or industrial parks in suburban places like Paramus, Parsippany, Wayne or Morris Plains.

Direct public transportation is highly impractical and uneconomic without a common destination. This means dependence on the automobile for long daily commutes that consume gasoline. With such scattered destinations, even car pools are often impossible or impractical.

The local economy is already a mess. Nearby job opportunities are few. Planning boards, business organizations and similar bodies constantly grapple with the challenge of providing a broad-based economy that creates jobs and tax ratables. Without a solution to that problem, the new economics of energy might create a local situation where a diminishing number of income producers will be forced to subsidize an increasing number who consume public sector services.

Without job opportunities in or close to the community, where will the low-income breadwinner turn? Most prefer to work if work can be found. But they must GET to work and, the job market being the way it is, that means long-haul travel from home. With non-existent public transit (for logical economic reasons), the car is needed for survival. If higher taxes increase gasoline prices, the cost of driving a car to work will make almost all but the highest paying commute jobs uneconomical.

A high- or upper-level income could easily absorb the added transit costs. The lower income worker will have to make sacrifices. Some may move closer to the urban concentration of jobs, but not enough will to make a significant difference.

The prognostication? Severe economic depression for the Sussex-Warren area no matter how the economy acts nationwide.

The only bright spot for some might be a slowdown of excessive growth as fewer families find they can afford to move here so far from employment. This too would add to the local depression when the construction trades, which fill the bulk of local blue collar jobs, suffer. (Planners have a peculiar way of measuring growth and economic health that uses housing starts as a factor.

It is too late to turn back the clock to a Sussex County that once basked in splendid isolation. The open spaces around many towns and boroughs have long been paved over to construct tract developments as the automobile provided the mobility for urbanites escaping to one-third, half- or one-acre plots in the country. Suburbia is here. Families have placed their roots in this community and now their plight belongs to everybody.

AN ODE TO THE BOSSES

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. TEAGUE. Mr. Speaker, I would like to commend to my colleagues a poem written and recited by Miss Juanita "Willie" Christian, president of Top-Side Aviation Club on the occasion of the club's "bosses night" here in Washington recently. The Top-Side Aviation Club was formed in 1954 by a group of women in top-level aviation, aerospace and related interests who were well known to each through telephone coordination of their business activities but not acquainted socially. It was felt that a better working relationship would naturally develop through personal association on a social basis and such has, indeed, been the case. Once a year the club has a "bosses night" and a "boss" is selected as honored guest.

I have had the honor and pleasure of being selected in the past, and on this occasion, Mr. T. V. Jones, chairman of the board and executive officer of Northrup Corp., was the honored guest. Since all of my colleagues are "bosses" I believe they will find some familiar lines in the amusing poem following:

ODE TO THE BOSSES

Tonight is the night we honor you—
Not to mention all the year through.
We work for you, both night and day
And complain very little about our pay.
We know we could do better some other place
But then we would miss your cheerful face,
'Cause you wear no scowls, just a great big smile
Which makes working with you really worthwhile.
Now, among the things we like best about you
Are your endearing charm, the many things you do
To make a working girl's life truly a pleasure.
Why, we'd rather be your Girl Friday than a lady of leisure.
You never ask for something you can do for yourself;
You make your own coffee—even clean up the mess,
While your overworked secretary whiles away the hours
Polishing our nails and watering our flowers;
Checking the clock just to see
How much longer we must be
On the alert—awaiting your call
Always ready to give our all.
You are always so proud when visitors come—
You acknowledge immediately that we run the firm—
That we are the boss, let there be no doubt
Until we change a rule, then comes the shout
With anger and venom in a voice so cross
With time worn words—"You think you're the boss?"
We never get angry when we get our check
But when yours comes in, we scream like heck;
'Cause you say we're the boss, that we run the show
And if that is the case, and you do say it's so
Why don't you get our salary, and we get your dough?
One of our pet peeves, out of all
Is your refusal to return phone calls.
We get on our knees—we beg—we plead—
Return your calls, please, please, please.
And when your day starts with you up tight,
Everything is wrong—nothing is right.
We quickly pass the word, "He's in a bad mood today,
"The best thing you can do is keep out of his way."
And "Yes, sir—"No, sir",—"Whatever you say"—
Are immediately tagged 'words for the day'.
We have to come to work early, and we have to stay late
But when you get to be top-gal, that's your fate.
We belong to the office, our master, no other,
We're your maid and cook, office wife and mother.
Sometimes our patience wears rather thin—
What with get me this, get me that—you keep us in a spin,
But we grin and bear it, constantly counting the days
Until we retire and put it all away
And bid farewell forever and ever
Knowing we can't be replaced
No, never, never.
But we love you, boss, in spite of your faults
Which you didn't know you had any of
Relax and enjoy it and don't get mad
Because it's all being done with love.
We could look the world over, and we know 'Tis true
We would never, never, never, find another like you.
So do believe us when we say, we'd rather work for you any day
Than start life anew with another
No, we'd never exchange you for some other.
And now for the purpose of the show
I present to you a man you should know
The Honorable Melvin Laird, a past honoree
Who is also acting as our MC,

And will introduce our guest of honor, you see.
So with that said and done, I will say no more
Except, Mr. Laird, you have the floor.
Juanita "Willi" Christiansen,
President, 1977.

COAL TRANSPORTATION: SLURRY AGAINST RAIL

HON. MAX BAUCUS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. BAUCUS. Mr. Speaker, during the last session of Congress, I made a statement applauding the decision of the House Interior Committee to table H.R. 1863, the coal slurry pipeline bill. That bill, if enacted, would have bestowed private developers with the power to condemn private lands for the purpose of building a coal slurry pipeline more than 1,000 miles long.

Today, we are facing the issue again with the pending legislation, H.R. 1609, the Coal Pipeline Act of 1977. Recently, it has come to my attention that the Federal Energy Administration may soon endorse the legislation with additional amendments designed to protect agricultural water rights on the Northern Great Plains.

I have expressed my opposition of the bill to Federal Energy Administrator O'Leary. It is my fear that if the Carter administration supports the legislation, the major provisions of the bill would be enacted but the environmental amendments would be lost in the shuffle.

The diversion of vast quantities of water from an arid, and this year drought-ridden region, is ludicrous. The Northern Great Plains is already beginning to experience wide-scale environmental impact as a result of coal development. Enactment of the Coal Pipeline Act would add insult to injury.

I would like to identify today, for the benefit of my colleagues, several important points regarding the slurry controversy and to bring to their attention to some of the implications of the bill.

BACKGROUND

U.S. coal production totaled 665 million tons in 1976, an increase of 2.6 percent over 1975. However, the National Coal Association estimates a smaller increase for coal production in 1977. Between 665–672 million tons of coal is expected to be mined. The smaller increase is due to the recent cold weather, flooding, and a possible strike later this year by the United Mineworkers.

Of the coal produced in 1975, railroads transported about 64.5 percent from the mine, barges carried 10.7 percent, trucks moved 12.2 percent, and 11.3 percent was moved by conveyor belt or truck to mine-mouthed generating plants. These figures compare with 67.1 percent, 11.6 percent, 9.7 percent, and 10.9 percent respectively in 1973.

The railroad tariff in 1974 accounted for about 23 percent of the delivered cost of coal shipped—mine value of coal shipped by rail was 6.0 billion in 1974.

Projections by the National Coal Association in studies made for the FEA and DOT indicate that coal production could double to between 1.2 and 1.5 billion tons by 1985. This dramatic increase will have serious implications for the transportation industry as the various transportation modes compete for a share of the market. The Nation's beleaguered railroad network sees coal as her future salvation in light of generally declining railroad traffic and other commodities. This hope has been somewhat dimmed by the prospect of a new competitor in the coal transportation market—the coal slurry pipeline.

Mr. Speaker, I would now like to focus on the advent of the slurry pipeline, compare its economic and environmental impacts with rail transportation and to make my recommendations on this important issue.

THE ISSUE

The most recent evidence of the slurry railroad struggle over coal shipment is still the proposal by Energy Transportation Systems, Inc.—ETSI—to build a 1,030-mile coal slurry pipeline from Gillette, Wyo., to Pine Bluff, Ark. Both the Nation's largest construction engineering firms, and Lehman Brothers, one of Wall Street's largest investment houses, own a 40-percent share of ETSI. The remaining 20 percent is owned by Kansas Nebraska Natural Gas Co. of Phillipsburg, Kans.

The proposed pipeline would have a 38-inch diameter with a capacity of approximately 25 million tons of coal per year. Arkansas Power & Light Co., a subsidiary of Middle South Utilities, Inc., is a principal plan purchaser of the coal.

Unfortunately for ETSI, the proposed pipeline right-of-way crosses beneath the tracks of 9 railroads at 48 points. Of these nine railroads, only Missouri Pacific has granted the necessary permits. The remaining railroads have refused permits to prevent the slurry competition.

To overcome this opposition, ETSI is seeking governmental help. H.R. 1609, sponsored by Congressman ECKHARDT of Texas, amends the Mineral Leasing Act of 1920, to authorize the Secretary of Interior to grant rights-of-way over Federal lands to operators of coal slurry pipelines. It authorizes any carrier of coal by pipeline to acquire necessary rights-of-way by exercising the power of eminent domain if acquisition cannot be made through negotiation.

Power of eminent domain may be exercised only by a carrier holding a certificate of public convenience and necessity—C.P.C. & M.—issued by the Department of the Interior. The granting of eminent domain would enable ETSI to get the necessary right-of-way over the private lands held by the railroads and individuals.

It surprises me that this bill would receive serious consideration by Congress when the Congressional Office of Technology Assessment—OTA—is currently in the process of completing an objective study of the coal slurry pipeline transportation. That study will be completed by January 1978. I think it is important for Congress to consider the recommendations of that study before making a decision on this issue.

There are other important aspects of this issue that I would like to bring to the attention of my colleagues.

UNFAIR COMPETITION

Congress almost certainly has the power to grant the right of eminent domain to slurry pipelines. Natural gas pipelines were granted eminent domain in the 1947 amendment of the Natural Gas Act; oil pipelines received the right during World War II under the war powers of the Cole Act; and hydroelectric projects are licensed to use the power by the FPC.

The railroads, which have the right of eminent domain, are required by law to be common carriers. This means that they must make their services available to anyone willing to pay their tariff. The ETSI pipeline will have no such obligations. The proposed slurry pipeline is contracted to carry 25 million tons of coal a year for 30 years to Middle South Utilities. The pipeline will have no excess capacity to accommodate additional customers. Thus the pipeline is essentially servicing the needs of a single coal company and a single utility company.

The granting to ETSI of a public power such as eminent domain for a private good is a bad legislative precedent. It also unfairly discriminates against the railroads which must service all customers regardless of profitability while freeing slurry pipelines to handle the large volume, lucrative routes. Railroads are thus placed at a competitive disadvantage in that they must charge higher tariffs on all their lines to compensate for marginal common carrier operations.

To insure fair competition among competing transportation modes and to justify the granting of a public privilege, slurry pipelines should be required to have access capacity to accommodate additional customers. Yet the transfer of the flow of slurry to another destination would force an idling of the Middle South plant and thus drastically alter the economics of the project.

ECONOMIC COMPARISON

There have been three major studies comparing the relative economics of shipping coal by slurry pipeline and railroad—Bechtel's "The Energy Supply Planning Model; The Coal Future" developed at the Center for Advanced Computation—CAC—at the University of Illinois; and "The Research Analysis of Factors Affecting the Transportation of Coal by Rail and Slurry Pipelines" by the Hudson Institute. The first two studies both financed by NSF grants, reached conflicting conclusions as to the cost of railroad transportation. The last study, financed by Burlington Northern, concluded that pipelines cannot consistently transport coal more cheaply than unit trains.

The Bechtel study was based on a computer model which projected that the proposed Wyoming-Arkansas pipeline could transport coal more cheaply than can railroads. The validity of this study is being questioned in light of Bechtel's 40 percent ownership of ETSI. A Senate Interior Subcommittee, chaired by

Senator ABOUREZK, is investigating the possible conflict of interest.

Professor Rieber, who headed the CAC study, suggests that the Bechtel model may produce inaccurate predictions due to the use of tariff—prices charged—instead of actual economic costs in determining the cost of unit train coal transportation. Rieber also challenges the accuracy of the Black Mesa pipeline data upon which slurry pipeline costs were derived:

"Although we all use Black Mesa based estimates, can it be argued that these are understated with the mine or facility covering part of the tab?"

Until the accuracy of the Bechtel cost assumptions have been validated by an impartial research group, the conclusions reached are, at best, suspect in any economic analysis.

The CAC study appears more credible than Bechtel's. Its three authors, Michael Rieber, Shao Lee Soo, and James Stukel, have had extensive experience with pipeline technology. Significantly, two of the three authors admitted before the study that they believed it would be more economical to transfer coal by pipeline than by rail.

I hope that my colleagues will consider these points as the debate regarding the Coal Slurry Act continues in the weeks ahead.

I am including for the RECORD two letters I sent today on this issue to the Director of the Federal Energy Administration and the Secretary of Interior:

MAY 10, 1977.

Mr. JOHN F. O'LEARY,
Administrator, Federal Energy Administration, Washington, D.C.

DEAR MR. O'LEARY: It has come to my attention that the Federal Energy Administration will soon endorse the Coal Pipeline Act of 1977 with amendments designed to protect agricultural water rights on the Northern Great Plains.

I strongly urge you to proceed with extreme caution in endorsing the Coal Pipeline Act. It is my fear that the major provisions of the legislation will be enacted and the environmental amendments will be lost in the shuffle. It is estimated that the Energy Transport Systems, Inc. pipeline from Gillette, Wyoming, to Pine Bluff, Arkansas, a distance of over 1,000 miles, would require 15,000 to 20,000 acre feet of water per year.

With all due respect, Mr. Administrator, the diversion of this amount of water from an arid, and this year drought ridden region, is ludicrous. The Northern Great Plains will suffer enormous, wide-scale environmental impact as a result of coal development. The enactment of the Coal Pipeline Act would add its insult to injury. Water resources in the West are extremely limited. Plans to divert vast quantities of water from this region are akin to attempting to divert blood from a turnip.

The Office of Technology Assessment is proceeding with its study of coal slurry pipelines. That study is now in progress and will be completed by January. In my opinion, it is extremely unwise to endorse the development of coal slurry pipelines until the unbiased OTA study is completed and its recommendations brought before the Congress for consideration.

With every best wish, I am,
Sincerely,

MAX BAUCUS.

HOUSE OF REPRESENTATIVES,
Washington, D.C., May 11, 1977.

Mr. CECIL ANDRUS,
The Secretary, Department of the Interior, Washington, D.C.

DEAR CECIL: It has come to my attention that the Carter Administration will soon endorse the Coal Pipeline Act of 1977 with amendments designed to protect agricultural water rights on the Northern Great Plains.

It seems ironic to me that the same Administration which would strongly endorse the banning of strip mining on sensitive alluvial valley floors would endorse a proposal which would divert thousands of acre-feet of water annually from the arid and drought ridden Northern Great Plains.

It is my understanding that the Federal Energy Administration will shortly endorse the coal slurry legislation now pending before Congress. As you well know, the Northern Great Plains will suffer enormous, wide-scale environmental impact as a result of coal development. The enactment of the Coal Pipeline Act would add insult to injury.

The Congressional Office of Technology Assessment is proceeding with a study of coal slurry pipelines. That study is now progressing and will be completed by early January. In my opinion, it is extremely unwise for the Administration to endorse the development of coal slurry pipelines until the OTA study is completed and its recommendations brought before the Congress for consideration.

Any assistance that you could provide regarding this matter is greatly appreciated.

With best personal wishes, I am,
Sincerely,

MAX BAUCUS.

ADDRESS BY REPRESENTATIVE GEORGE BROWN OF CALIFORNIA BEFORE THE HELIOSCIENCE INSTITUTE

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. HARKIN. Mr. Speaker, the discussion of energy issues which is going on throughout the country is one of the most important national debates we have had. Many facets of the energy debate have been explored in depth by this body, by President Carter, and by the press. One of the least discussed issues has been the consideration of alternatives to fossil and nuclear fuels.

I have had the opportunity to serve on the Committee on Science and Technology which has taken the leading role in supporting alternative energy sources. During my service on this committee, I have worked closely with our colleague from California, GEORGE BROWN, in developing proposals to encourage alternative energy sources. I have worked similarly with Mr. BROWN on the Agriculture Committee in encouraging alternative energy sources for agricultural uses.

Mr. BROWN recently served as chairman for a solar energy and alternative energy conference, and presented the keynote address to this conference. This address clearly shows an understanding and grasp of this complex issue by GEORGE BROWN. He has taken the lead in this area. I would like to insert this address into the CONGRESSIONAL RECORD at this time and recommend it to my colleagues.

The address follows:

[Keynote Address—The Heliocience Institute: An International Solar/Energy Conference and Exhibit]

TOWARD INCORPORATION OF ALTERNATIVE ENERGY SOURCES INTO THE NATIONAL ENERGY POLICY

(May 2, 1977—Palm Springs, Calif.)

It gives me a great deal of pleasure to give the keynote address to this conference, and to have served as the National Chairman for the Advisory Board for the Helioscience Institute. The program before you covers a great number of important subjects, and the White Paper which will result should be an extremely valuable document to those who cannot attend this meeting.

The timing of this conference is, of course, fortuitious, because it enables us to react to the significant initiative which was taken by President Carter on April 20. The entire world is interested in energy policy questions, and the tough choices which must be made by many nations in order to secure energy for now and the future. The United States will play a central role in the world wide energy debate, chiefly because we use 30% of the world's energy supply. We also have unique decisionmaking methods—relatively decentralized and participatory institutions as well as the technological resources to explore a variety of solutions. Our own effort to develop alternative sources of energy should be considered from the perspective of the needs of the entire world, and not just the needs of the United States alone. The U.S. role in the world energy problem will be enhanced if, when we consider the fossil and nuclear options, we keep in mind that most nations do not have these choices available to them.

The first and most important aspect of any energy policy, and the underlying assumption about the development of alternative energy technologies, must be immediate steps toward energy conservation and energy efficiency. Once we have this philosophy adopted, and the policy for implementing energy conservation in place, we can proceed with alternative technologies. I feel fortunate to be addressing a group that already accepts this statement, because the key issue being debated in Washington today is energy conservation, and the means President Carter has suggested to implement his energy conservation policy.

The role for alternatives to the fossil and nuclear fuel cycle should be quite large in the future. For the bulk of the world, solar energy is the only dependable energy supply. This energy supply comes in many forms, ranging from wood and fiber production to hydro power and windmills. In most cases, the technology being used is outdated and inefficient. In some cases, cheap fossil fuels are being used and have displaced the original solar technologies, much as our own past Federal efforts to produce and distribute cheap electricity have virtually eliminated windmills in this country. As we all know, cheap fossil fuels are now a thing of the past, and solar technologies are the wave of the future. The challenge to the United States, and the world, is to treat the remaining supply of oil and natural gas as a scarce capital resource to be invested in developing a new economy based upon energy efficiency and reliable energy supplies. Anyone involved with economic investment knows that it can be a risky business. When we consider the consequences of failure to our society and future generations, we realize that we should invest our energy capital in

safe and diversified options, even though their return may be less. In terms of technologies, I believe this means we should move as much as possible toward small-scale renewable energy applications, and away from large capital intensive technologies such as nuclear energy. My basic thesis, which I will elaborate on, is that the energy technologies one chooses should be consistent with broader societal goals, and choosing the wrong technology can work against those broader societal goals.

It is all too easy to see how alternative energy sources, such as solar electric, geothermal power plants, and wind generators, could be produced on a large scale, and used by society in the same centralized way we use nuclear power. But unlike nuclear power plants, it is also easy to see decentralized, small alternative energy sources that would serve smaller communities and be more self-contained than power systems that stretch across several states. The societal goals that conflict here are the desires for self-sufficiency and the ability to control ones own destiny, versus the reality of our interdependent economic system and the pressures for economies of scale and specialization. It is these pressures which have reduced the ability of individuals and communities to solve their own problems. The ultimate success of technologies such as solar energy will probably depend more on the societal desires for self-sufficiency, community self-control, environmental quality, and decentralized growth patterns than it will on economics. If economics is the overriding criteria, the application of alternative technologies is likely to be quite limited.

The question of economics depends greatly upon the assumptions and policies one uses in calculating the costs of each technology, and the benefits of each technology. President Carter recognized this in his energy message, and he has made several suggestions which will affect the relative economics of many of our energy choices. And where President Carter has not made suggestions, Members of Congress have.

The most important steps the Federal government could take to encourage solar energy are to eliminate subsidies, both direct and indirect, which are encouraging the use of other forms of energy. The policies which work against solar energy are:

Depletion allowances for oil and coal;

Price ceilings on oil;

Price ceilings on natural gas;

Other tax benefits for fossil resources.

Subsidies for nuclear power, including federal insurance, low-cost uranium enrichment, low-cost fuel reprocessing, low-cost waste storage, and failure to include decommissioning costs;

Low-cost federal power from TVA, Bonneville, REA and other federally aided electric power systems; and

Tax exemption for bonds that finance public utility systems.

The Federal Government is unlikely to eliminate all of these subsidies, which means that to compete fairly, solar energy will need some of the same incentives, or subsidies, that other technologies have been afforded in the past, and continue today.

These new, pro-solar policies should include:

Income tax credits, property and sales tax exemptions, and other fiscal devices;

Life cycle costing requirements;

Low-interest loans and Federally guaranteed loans for solar investments; and

Expanded research, development and demonstration and education of solar energy technologies in all sectors on the economy.

Some of these initiatives are in President Carter's program. Others are the subject of legislation introduced by a coalition of Congressmen, including myself. For example, last Wednesday the House Agriculture Committee approved, as an amendment to the Farm Act, an agriculture solar energy research, development and demonstration program which I authored. This was not part of President Carter's energy program, nor was it part of the Department of Agriculture's program.

Many agreed with me, however, that it should be. Similar initiatives are needed at the level of State and local government, in cooperation with the farmers, banks, and businessmen of this country, with or without Federal support.

This country still has a choice about its energy future. The choice between centralization and decentralization is one of the key issues to be resolved as we develop our national energy policy. While the question of economics will play an extremely large role in deciding these issues, and Federal policies can drastically affect the relative economics of energy systems, there are other forces at work as well. The recent population flow out of the big cities and into small, rural towns is a reversal of 30 years of American migration. The success of modern telecommunications eliminates a major reason for having cities, and urbanized settlement patterns. And the unemployment and general dissatisfaction of people with urban life has made us realize that the decline of rural populations, and the growth of the cities may be as transitory as cheap energy.

If there is a genuine move toward smaller, more self-sufficient communities, with all of the values of community awareness and cooperation that we traditionally consider, our choice of energy technologies becomes quite important. We can, of course, have the large, multinational corporations mass-produce solar units, or subsidize large, central-receiver solar electric power stations. But we could also have a program dominated by small businessmen, and have the solar energy systems become an integral part of the economy of the region. Similarly with geothermal facilities, we can have it be simply an electric power source, or we can incorporate geothermal plants into the economy of the community and thereby use, much more efficiently, the geothermal resource for community heating and cooling, crop drying and other purposes.

The path we take in the future will obviously depend a great deal upon the attitude and policies of various levels of government. However, governments do represent the wishes of the people, at least some of the time, and the direction that governments take will depend a great deal upon views of people about energy policy. Those views need to be expressed in an articulate and directed fashion if they are to be of value. The need for citizen involvement in community planning and development cannot be overstressed. Unless a community can organize and present a reasonable proposal it will be unlikely to control its own energy policy, which will quite likely determine its development policy.

The City of Riverside, through several of its active citizens and organizations and its City Council, convinced Battelle Memorial Lab in Ohio to solicit an Energy Research and Development Administration grant for an integrated energy assessment. This program will survey the city for energy conservation and alternative energy sources which would help in both improving the air quality and improving the local energy future. The proposal is now funded, and the citizens of Riverside will have a unique opportunity to attempt to shape their own energy future. It is this type of initiative that is needed to come to grips with our national energy problems.

As your conference continues over the next several days, I hope you keep these thoughts in mind. I would like to see the entire Southwest United States develop a diverse range of solar and geothermal energy sources while at the same time improving community awareness, employment, the local economy and our quality of life. Palm Springs is in the midst of some of the richest solar and geothermal resources on Earth, yet coal and nuclear power plants too often seem to be the assumed future power source. We do have alternative choices, and the implications of those choices to our society as a whole are quite significant. This conference can help illiminate these alternatives and the policies which are needed to encourage them. In the context of broader societal goals, I see no better choices than the wide range of solar technologies and geothermal energy, accompanied by comprehensive energy conservation policies. Your help in making this energy future happen will be vital.

ENERGY POLICY QUESTIONNAIRE

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. WOLFF. Mr. Speaker, since coming to the Congress it has been my policy to keep my constituency informed as to my activities as well as those of the Congress. In this regard I often solicit the views of my constituents on important questions of policy. My most recent newsletter deals with perhaps the most significant and far reaching question of domestic policy—energy. I now submit for RECORD the text of this newsletter and I will submit for the RECORD, at a later date, the results of this questionnaire:

WHAT'S YOUR OPINION?

President Carter has asked Congress to enact a broad range of legislative measures to deal with our nation's energy needs and future resources. As your Representative, I seek your opinion on these proposals in order that I may be apprised of all views in advance of the decision-making days ahead. I would appreciate your returning this questionnaire to my District Office by June 1. Provision has been made for more than one member of a family to respond.

Do you approve or disapprove of the following energy proposals?

1. Place a standby tax on gasoline (with annual increases unless federal targets are met) to encourage conservation. Yes___ No___.

2. Impose excise taxes on the purchase of new "gas guzzling" automobiles and provide tax rebates to purchasers of more efficient small cars. Yes___ No___.

3. Provide tax credits to homeowners and businessmen who insulate (weatherize) their premises. Yes___ No___.

4. Provide tax credits for the installation of solar heating equipment. Yes___ No___.

5. Impose higher federal taxes on factories and utilities that do not shift to clean coal as their primary source of energy. Yes___ No___.

6. Phase out utility pricing policies that afford discounts to big users of electric power. Yes___ No___.

7. Reform present licensing requirements of nuclear plants, without letup in standards, to reduce delays in construction. Yes___ No___.

8. Raise the price of domestic crude oil, now being pumped (old wells) by imposing

higher federal taxes to be rebated to the public. Yes___. No___.

9. Equalize the price of natural gas sold in regulated interstate markets and unregulated intrastate markets to balance nationwide costs and distribution. Yes___. No___.

10. Are you generally in support of the President's energy package? Yes___. No___.

COMMUNITY DEVELOPMENT PROGRAMS

HON. JAMES M. HANLEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. HANLEY. Mr. Speaker, first may I join in the thanks and congratulations which are being given to the gentleman from Ohio who has brought to the floor this most meaningful and beneficial legislation. Chairman LUD ASHLEY has done a most remarkable job in modifying and updating the legislation which covers the community development program and important elements in the housing programs.

His task and that of the Subcommittee on Housing and Community Development has not been simple. It has been as diverse and complex as the needs and desires of 435 different constituencies from 50 separate States could make it. The balancing of interests and opportunities within a context of overall equity has produced a bill which each participant can be proud in supporting. It is a bill which each Member of this House can support as the mediated vehicle of mutual advantage.

During the deliberations of the subcommittee and the full committee there were many helpful and meritorious amendments which added to the construction of a bill which would meet the primary goals and benchmarks of this House in providing decent housing and meaningful economic development and community renewal in a practical, efficient way.

The result is a bill which allows the maximum opportunity for each locality to chart its own course within the Federal programs so that its housing and renewal objectives can be met. There is no presumption that Washington officials know all the answers or have a crystal ball with which to predict the future. But there is the optimism that, with such financial aid as this bill provides to any community meeting the criteria, big cities and small towns will be able to plan their futures and accomplish projects with timely dispatch.

The tension of the moment rose at times to disrupt the comity of national perspective with expressions of regional complaint. However, the cohesion of this body, acting not only as the representative of separate constituencies but as the people's House, prevailed.

Insofar as the deliberations of the subcommittee and full committee were concerned, the merits of various interest and pressure groups had to be addressed, redressed, and assuaged as much as possible to achieve the harmony of purpose which this final bill represents. It was not easy.

The single most agonized over issue concerned the mechanism which allocates the limited amount of money among the localities needing it. The old formula was inadequate insofar as it disproportionately allocated moneys to localities qualified under it but not necessarily as needy as other units of Government in relative terms. This disbalance is redressed through the creation of a new dual formula which allows each entitlement community to choose either to continue the old calculation based on population, poverty, and overcrowding or adopt the new calculation based on poverty, age of housing stock, and growth lag. This bill would allow every community to select that formula which awards it the more money.

The biggest advantage of this new arrangement is that it provides more balance and assurance that the areas of greatest need will actually get the moneys needed to meet their critical housing and development goals. The money is put where the need is greatest.

Naturally, those who benefit from this new formula are gratified; but those who are not helped as much are not hurt either. Plus, all have the satisfaction that the overall national interest is better served when funds are put to the most efficient and effective use. Tax dollars are not squandered and real human needs are met in fulfillment of the national priorities and local initiatives.

We must keep in mind that this bill is not a general revenue sharing bill nor a countercyclical bill nor an economic development bill per se, but a bill amending the community development and housing acts. It is meant from the outset as a vehicle to address the critical problems faced by urban communities victimized by blight, decay, and abandonment of neighborhood businesses and housing. The focus, therefore, is mainly large urban and middle-sized cities.

However, the difficulties of the inner city are not unknown to the smaller cities and communities outside the urban center. Many towns with populations under 50,000 are experiencing declining central business cores and deteriorating neighborhoods. Many mayors and aldermen see populations moving to larger towns in search of jobs or watch development of industrial areas in the adjacent farmlands, just beyond their taxing jurisdiction.

That is why the bill now before the House includes program features designed to aid smaller but equally distressed towns and counties.

The biggest fear is that there will be a lack of clear understanding on the part of HUD that there are serious problems to be addressed in the smaller urban and nonurban areas. Every indication has been that HUD Secretary, Patricia Harris, has the sensitivity to appreciate the critical impact which social and economic dislocations can have on smaller communities and can offer substantive help where there is a partnership of effort by the localities and the Federal agency.

The confidence which this House has in this expectation is marked by the clear force of an expanded discretionary program placed in the hands of the Secretary to mete out to those communities most in need and most willing to demonstrate cooperation with program objectives. There will be more money available in the discretionary balance account for application by eligible communities regardless of prior program participation. This feature will gradually include the phased out hold harmless communities with populations under 50,000 and will regard each town and small city equally thereafter.

Of course, for towns which can not sustain their claims for multiyear funding with beneficial programs and meaningful development of housing and economic projects there will be no money available. But for those towns which can point to prior experience and performance and can justify a recurrent need for one shot or multiyear funding this new discretionary fund position will allow the potential for more money than was possible under the old hold harmless formula. In sum, need will be the criteria, not automatic allocation based on past program funding levels.

Now, I am one of the Members of this House who had great reluctance to any idea that the hold harmless be done away with for small or large towns. The ravages of inflation and recession were most critically felt in the metropolitan areas where jobs disappeared quickly and where the attempts to turn around depressed downtowns and declining neighborhoods could not fight back the onslaughts of general economic decline. Barely begun projects were undermined when the hoped-for private sector investment did not appear. Hard-pressed businessmen and private capital were holding off any long range commitments to local investments until economic conditions became more settled and certain. This delay retarded the good effects of many community development projects and put all forward movement in neutral.

For this reason I joined with Banking, Finance, and Urban Affairs Chairman, HENRY REUSS, in cosponsorship of H.R. 1522 which would have extended the hold harmless allocation for smaller cities which would be deprived of their certainty of funding under the newly proposed allocation system. However, during the hearings in the subcommittee and during the ensuing weeks and months of consultation with professionals in the field and with the leaders of the communities in the 32nd district, there was persuasive argument that the proposed dual formula, coupled with hold harmless phaseout and increased funding for discretionary funds and the new action grant program, would be in the overall interest of the Nation, the program, and the participants.

Fortunately, central New York officials and leaders have been among the first to embrace the concepts of community development. Thus, they have earned an advantageous position in the rankings of nonentitlement communities which will have preference for the dis-

cretionary funds available in the new bill.

With confidence in the indications from HUD that past performance will be a major determinant in such discretionary fund disbursements, I was persuaded that the equitable and advantageous course was to allow hold harmless to phaseout as scheduled under the 1974 act and to make a strong case for each of the localities in our area for the increased discretionary funding.

The growth of the urban county in the community development matrix is of particular benefit to the people of Onondaga County. As an urban county, it will be included in the new action grant program eligibility class and thus will be entitled to special consideration for grants tailored to developing jobs and industry in our area. Imaginative and creative proposals can do much to excite not only Federal participation in this effort but can attract the kind of private development activity which can insure ultimate success of the plans.

Several of the other titles of this bill deal with housing, FHA insurance limit increases, mobile home benefit expansion, flood insurance amendments, and other matters. These features only add to the luster already evident in this bill.

In conclusion, Mr. Chairman, let me assure this House that it is the firm and resolute position of the subcommittee and the full committee that the House should watch with great care as well as expectation the performance of this new team at HUD. They should be given every chance to demonstrate that the "old days" of impoundment, foot-dragging, obstruction, dismantlement, and aloofness are at an end.

The candid and frank testimony of Secretary Harris and Assistant Secretaries Robert Embry for community development and Lawrence Simons for housing give us faith that the confidence we have entrusted to them is not misplaced.

However, surely this House will be fully and readily informed of such developments as indicate less-than-adequate administration of the provisions enacted by the Congress. Indeed, each Member of the House will be the eyes and ears by which any such failure will become known.

For the present and, hopefully, for the foreseeable future the spirit of mutual goodwill will endure and the business of housing our people and aiding our communities will be pursued with vigor and success.

"CHALLENGE TO CONGRESS"

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. YOUNG of Florida. Mr. Speaker, I would like to take this opportunity to comment on President Carter's recent "Challenge to Congress." He has played a very important role in emphasizing the seriousness of the energy problem, and I sincerely hope that Congress will at last accept the fact that it is a very serious problem. The President's message is timely, and whether in the long run we agree or disagree with all or only some of his recommendations, we have been challenged to approach the matter with an open mind, an open heart, and a willingness to make the tough decisions that will be necessary. I hope that each of us will make those decisions based on what is really best for our country, rather than making political decisions based on whether we are "for the President" or "against the President."

For the benefit of my colleagues, I would like to quote from an energy message to Congress:

> . . . We cannot take our energy supply for granted any longer. A sufficient supply of clean energy is essential if we are to sustain healthy economic growth and improve the quality of our national life. . . . We must get back on the road of increasing efficiency, both at the point of production and the point of consumption. . . . I am therefore announcing today a broad range of activities to insure an adequate supply of clean energy for years ahead.

These quotes are not from the Presidential message we, as a Nation, heard on April 20. They are from the first Presidential energy message that I heard in this Chamber on June 4, 1971. In that 1971 proposal, the President of the United States suggested an acceleration of oil and gas leases on the Outer Continental Shelf; a program to develop shale oil resources; an expanded program to convert coal into a clean gaseous fuel to serve as a practical substitute for our diminishing petroleum fuel supply; a program to accelerate the development of solar energy; a program to revise standards for insulation in new federally insured homes; and a Government reorganization program to provide for a single body to serve as an energy administration agency.

It is safe for us to assume that if Congress had acted effectively on these proposals when they were first presented, it would not have been necessary for President Carter's recent energy message to call for such an urgent response to these very same points.

In 1975, in another series of energy messages to Congress and the American people, another President included a request for new efficiency standards for all new appliances and motor vehicles; a proposal for the development of devises on automobiles that would save fuel and maintain clean air standards; a program to provide a tax credit for individuals who made energy conservation improvements in their homes, provided for a tax credit for purchasing and installing insulation in existing residences, and authorized assistance for low income families in need of help to make their homes more energy efficient.

Again I suggest that if Congress had faced up to the responsibility then and moved to effect these provisions, or even to reject them on the basis of careful study and research, it would not be necessary to be considering them today as part of a "crisis" program being offered by the present administration.

Since the first Presidential energy proposal was made in 1971, our country has been confronted with the problems of short supplies of all types of fuel and consistent increases in the cost of our major energy supplies. We have all experienced long lines at the gasoline stations and mandatory cutbacks in energy consumption in many parts of our Nation. The winter we have just lived through was a kind of "nightmare" for some Americans that none of us want to see happen again. While President Carter's energy proposal is not essentially different from messages we have heard before, he has added a few things and he has also left out a few things. Its most startling effect, however, is that it seems to have prompted a kind of "commitment" from the administration, from Congress, and from the American people to meet this problem head on. I want to commend the President on his compelling directive to all of us to "get on with it." Hopefully, we will heed his words with the same degree of intensity we seem to have ignored the equally alarming messages of his predecessors.

The House of Representatives has already responded by creating an Ad Hoc Committee on Energy to coordinate the project and shape the necessary legislation. The move toward a solution has begun. We must be careful not to allow ourselves to lose momentum and get bogged down with rhetoric or political controversy. Hopefully, the Congress, guided by this committee, will effect a careful but direct examination of the President's proposals, the implications of which will be far reaching and will not be fully understood until each aspect receives a comprehensive review. While there are certain portions of the President's program with which I do not agree, I intend to approach his proposals with an open mind, and I sincerely hope my colleagues will as well.

Throughout the history of our Nation, may leaders have fallen into the trap of recommending increased taxes to solve just about any problem. Unfortunately, one of the President's major proposals to discourage use of energy and gasoline is to increase the per gallon tax on gasoline and to tax oil and natural gas at the wellhead. I submit that we cannot tax away our energy crisis. Those who believe that an increase in the cost of gasoline will conserve this already expensive fuel are overlooking the fact that an increased cost will have a differing effect on each and every one of us. Most of the people who currently use large quantities of gasoline for travel and leisure can and will pay for it. An increase of 5 cents a gallon per year, at least until the increases accumulate considerably, will not curtail their usage. It will, however, have a costly effect on the small businessman and supplier who runs a fleet of vehicles, as well as salesmen and commuters and farmers; and it is a well known fact that when their costs go up, the price of their goods and services goes up. This increase in the tax on gasoline will have a serious effect on the elderly and low income workers, who can hardly afford the cost of fuel today, and who can only afford to use their automobiles for such necessities as visits to the doctor, drug store, and the grocer. Any increase in the cost of their

gasoline or utilities will place an unfair burden on their already limited resources.

Furthermore, under the President's proposal, the revenue from this additional tax will be returned to certain segments of our society in the form of rebates, rather than being invested in programs to locate new sources or expand current sources. Thus one of our essential goals toward eliminating our long range energy deficit is neglected by the increased tax proposal. The Federal Government has for too long taken money away from the taxpayer only to return it later through rebates et cetera. The American people are not children, to be punished and/or rewarded by their Federal Government. If the tax is to be collected, only to be returned later, then it should be left in the pocket of the taxpayer to begin with.

While the President's program recognizes the great need for conservation, it does little to provide incentive for the production of new quantities and sources of energy. While strict conservation will postpone the day of reckoning, conservation by itself will not solve the problem. In order to meet our increasing energy demands, we must place much more emphasis on increased exploration, as well as development of existing, untapped energy supplies. The growing supply crisis in domestically produced oil and natural gas has been caused by a lack of such exploration and development of new resources. A carefully considered program to encourage gas and petroleum producers to reinvest in production and exploration is essential.

I endorse the concept of expanding our use of coal, but I am concerned about other proposals which could make the extraction and conversion of that coal extremely expensive. I also endorse the program to provide incentives for the innovative conversion to solar energy, and hope that my State of Florida will be a leader in developing this energy source.

Mr. Speaker, while I find some initial fault with some of the President's recommendations, I support others, and I agree most adamantly with his determination to face this problem immediately and to move to solve it.

I pledge my every effort in contributing to a workable, but fair, energy program.

As an afterthought, I want to emphasize my hope that Congress will, after hearing it from the third President, finally acknowledge that there is a problem; and in cooperation with the American people, and our industries, do what is necessary to—as we have proved so many times we can—solve the problem.

CONGRESS MUST TAKE THE INITIATIVE ON WELFARE REFORM

HON. ROBERT W. KASTEN, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. KASTEN. Mr. Speaker, millions of taxpayers and needy Americans will be disappointed to learn that, once again, action on welfare reform has been postponed for another year.

President Carter failed to send Congress a detailed reform plan by May 1, as he promised. Instead, he outlined general goals for reform, and promised to deliver his plan by next fall. He conceded that his program, if enacted by Congress next year, would take another 3 or 4 years to implement.

Mr. Speaker, Congress must not delay action on welfare reform until the Carter plan is delivered to Capitol Hill in August or September.

Congress must take the initiative.

The American people—those who are truly needy and those who are paying the bills for our inefficient, fraudulent welfare system—want action now, not 3 or 4 years from now.

To avoid further delay in Congress, I propose that we create an ad hoc committee to begin working immediately on reform of our welfare system.

President Carter has proposed that we consolidate the present system into a single cash grant or guaranteed income. While I believe this would be a costly mistake, Congress should begin now to examine the present system and determine if we want to improve it or scrap it. Creation of an ad hoc committee, composed of members from the six separate committees that deal with various parts of our welfare system would be the most effective, efficient way to do this.

A recent editorial in the Christian Science Monitor urges Congress to move ahead of the President on this urgent matter. As the editorial suggests, "The public should insist on vigorous congressional response to all Presidential initiatives—and vigorous filling of the vacuum when those initiatives fail to come."

The editorial follows:

DON'T DELAY WELFARE

If President Carter delays welfare reform as long as his statement this week suggests, Congress ought to move ahead of him on this urgent matter. No one could fault Mr. Carter's generalized goals of efficiency, fairness, family stability and encouragement to the self-help for those who can help themselves which is central to individual morale and national vitality. But, after the experience of several previous administrations and the elaborate publicized study by this one, it is too easy to say, as Mr. Carter did, that "it is worse than we thought"—and put off necessary action.

And what of the argument that Congress has so much to do on energy and other matters that it cannot be expected to get on with reforms affecting the millions of the needy and the taxpayers who want to see their money used wisely? With each member of Congress now costing the public an estimated million dollars a term in direct funds and subsidized services, a lag in welfare reform becomes especially ironic. The public should insist on vigorous congressional response to all presidential initiatives—and vigorous filling of the vacuum when those initiatives fail to come.

If the Democrats take a cue from the President's apparent willingness to let the implementation of a yet undetailed welfare program wait until 1981, here is made-to-order opportunity for the Republicans both to show they are still alive and to dispel their self-acknowledged problem of seeming not to care about people as much as the Democrats do.

Mr. Carter's sketchy outline of his welfare reform intentions leaves a number of unanswered questions. Their answers could increase political problems and reduce the likelihood of keeping the initial cost of his "totally new system" no higher than the cost of the present system. Just what will be the amount of his proposed 'simple cash payment' in order to meet needs now handled through various means? Just who will be expected to take the jobs provided? Will those who get the payments and/or get the jobs receive medicaid also?

In fact, though Mr. Carter said it was the administration's "unanimous conclusion" that present programs should be "scrapped," there is a respectable body of opinion among welfare specialists which favors improvements in the present system as a less costly, more effective, and more politically possible means of reform. Much could be achieved, for example, through setting national eligibility standards, combining family programs, requiring all states to allow unemployed fathers to stay in homes receiving aid to families with dependent children.

One who favors change within the present system is Richard P. Nathan, senior fellow at the Brookings Institution who was a shaper of proposed far-reaching welfare reform in the Nixon administration's family assistance plan when he was an HEW official. From that experience he saw the political difficulties involving public attitudes and perceptions when sweeping change is contemplated. He feels that welfare programs which began as a hodgepodge "fit together much better than most people realize."

This is not to foreclose Mr. Carter's position of trying to do a whole new thing. But it makes it incumbent on him to devise a package so clearly superior to improvements in the present system—or, in effect, incorporating such improvements so well—that it will be politically acceptable and economically sound. The first thing is not to accept the idea of unreasonable delay.

AMENDMENT TO H.R. 6810

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. ASPIN. Mr. Speaker, Mr. BLOUIN of Iowa, Mr. CORCORAN of Illinois, and myself will introduce an amendment to H.R. 6810. This amendment will change the allocation formula now in the bill so that the "tax effort" of State and local governments are taken into account.

The distribution formula now in the bill allots funds among States and municipalities on the basis of unemployment rates. But unemployment rates below the national level are notoriously inaccurate. The Bureau of Labor Statistics testified before the Intergovernmental Relations Subcommittee that the rates for cities of 50,000 or fewer are little better than random numbers.

The distribution formula in the amendment we are offering is based on tax effort—a measure of the level at which communities tax themselves. The higher the tax effort, the more money a community will receive under this formula. And tax effort statistics are very good.

The rationale for the tax effort for-

mula is the same as the rationale for countercyclical funds. Countercyclical funds are provided in this bill because the tax and spending policies of State and local governments retard our recovery from recessions.

In a recession municipalities face increasing demands for services and decreasing revenues to meet those demands. In a recession municipalities typically reduce services and/or raise taxes. That drives the country deeper into recession.

Those communities with a high tax effort and consequently a high level of services are most likely to reduce services and/or raise taxes when recession hits. A distribution formula based on tax effort sends the money where it will be spent to fight the recession most effectively—to communities which have a developed structure of services to serve as an outlet for the funds.

Will not the funds be spent just as readily under the current formula based on unemployment figures? A recent GAO survey discovered that many communities were not spending large amounts of the funds allotted to them. They lacked a service structure through which to spend the money.

With the tax effort formula, the funds are sent where they will be spent.

As the Senate Government Operations Committee said in its report—

> The purpose of Countercyclical Assistance is neither to correct the problem of structural unemployment in certain areas of the country nor to redistribute tax dollars from affluent to poor jurisdictions.

The purpose is to fight recessions and stimulate the economy.

Tax effort is not a new or untried concept. We use it right now to distribute funds under general revenue sharing.

And this tax effort formula is the one recommended by the Intergovernmental Relations Subcommittee. The issue of what formula was the fairest and best was debated and analyzed at length. The tax effort formula was adopted with only one dissenting vote. The full committee concentrated its attention on another issue—how long to fund the program. In the shuffle of amendment and substitutes dealing with this issue, the subcommittee's distribution formula was lost.

The amendment will bring the bill back to the subcommittee's considered position on allocation of funds.

We want to clarify a couple of points which ought to be clarified with respect to this formula.

First, the amendment does not cut out localities, rather, it cuts them in. The rates of increase have been changed but as you know, because the pot has been enlarged, everyone will get more funds. The point is that some communities will not make quite as much as they expected.

Second, in terms of the major cities of this country, 24 of the 31 largest cities in the United States will be benefiting. See chart 1. So those who argue need, should look at Detroit, Chicago, Los Angeles, New York City, Atlanta, and the other elder cities of this country.

Third, there are those who claim that the dislocations caused by the formula are unbearable. But this is just a straw man. Take the case of New York State. New York State, we are told, has budgeted $71 million of expected countercyclical funds. Under our amendment New York State would receive $89 million. Is an $18 million margin unbearable? We note also that New York would get 17 percent of all of the countercyclical funds. That is more than anyone else is getting. Without our amendment, they would receive almost one-quarter—22 percent—of all of the funds.

This House is a good cross section of all of our Nation, in characteristics, and in needs. Our amendment would improve the situation for the majority of the Members, and hence the country while it does not negelect the others.

We hope that communities like ours, who along with cities like New York, have been picking up their responsibility by contributing ever increasing amounts into the Federal Treasury, are not forgotten by those who have been receiving the benefits.

One final point. Scurrilous arguments are being made by those who have become institutions unto themselves. Arguments which say that this House should not "rock the boat" and should simply go along with what is. The Subcommittee on Intergovernmental Relations of the House Government Operations Committee has worked long and hard to come up with progressive concepts as the one being proposed here. Now we are being told that it does not count because what counts is what is, the status quo.

We urge the major cities of this country to take a closer look at how their interests are portrayed, and expected a better argument from our institutionalized lobby than "do not rock the boat."

CHART I.—*How the cities do under the Aspin amendment*

	Per capita grant	
	Bill as it stands	Bill with Aspin amendment
Oakland	1.77	1.00
Los Angeles	0.88	1.11
San Francisco	2.18	4.55
Denver	0.73	1.93
Miami	1.55	1.21
Atlanta	0.96	1.03
Chicago	1.25	1.74
Indianapolis	0.36	1.25
Louisville City	0.57	1.97

Dallas	----	1.27
Houston	0.15	0.68
Seattle	0.88	1.52
Milwaukee	0.82	1.73

Main point: Of the major cities in the country, only seven would receive lower allocations under the alternative formula: Oakland, Miami, New Orleans, Baltimore, Newark, Buffalo, and Pittsburgh.

AMENDMENT TO H.R. 6810

Page 26, strike out line 1, and everything that follows through page 28, line 10, and insert in lieu thereof the following:

SEC. 3. (a) Section 203 of the Public Works Employment Act of 1976 is amended to read as follows:

"ALLOCATION

"SEC. 203. (a) IN GENERAL.—There shall be allocated for each State for each calendar quarter out of amounts appropriated out of section 202(b) for that quarter, an amount which bears the same ratio to the amount appropriated under that section for that period as the amount allocable to the State under subsection (b) bears to the sum allocable to all States under such subsection.

"(b) DETERMINATION OF ALLOCABLE AMOUNT.—

"(1) IN GENERAL.—For the purposes of subsection (a) the amount allocable to a State under this subsection for any calendar quarter is the amount which bears the same ratio to the amount appropriated as—

"(A) the aggregate taxes of that State, multiplied by the relative tax effort factor of that State, bears to—

"(B) the sums of the products determined under subparagraph (A) for all States, except that—

"(i) the product determined under subparagraph (A) for the State described in subsection (e)(1)(B) shall be deemed to be equal to two-thirds of the product of the aggregate taxes on that State, multiplied by the relative tax effort factor of that State; and

"(ii) the product determined under subparagraph (A) for each State described in subsection (e)(1)(C) shall be deemed to be equal to the population of such State multiplied by the lowest per capita product (as determined under paragraph (6)) of any of the States described in subsection (e)(1)(A).

"(2) AGGREGATE TAXES OF A STATE.—For purposes of paragraph (1) the aggregate taxes of a State is the total taxes taken into account under paragraph (2) of section 109(c) of the State and Local Fiscal Assistance Act of 1972 for the most recent reporting year.

"(3) RELATIVE TAX EFFORT FACTOR.—For purposes of paragraph (1) the relative tax effort factor of a State is a percentage equal to the quotient of the general tax effort factor of that State divided by the average tax effort factor for all the States described in subsection (e)(1)(A) and (B).

"(4) GENERAL TAX EFFORT FACTOR.—The general tax effort factor of any State is the general tax effort factor determined under section 109(c)(1)(A) of the State and Local Fiscal Assistance Act of 1972 for the most recent entitlement period.

"(5) AVERAGE TAX EFFORT FACTOR.—The average tax effort factor for all the States is equal to the sum of the general tax effort factors of all the States described in subsection (e)(1)(A) and (B) divided by the number of States described in subsection (e)(1)(A) and (B).

"(6) Lowest per capita product.—The lowest per capita product for any State described in subsection (e)(1)(A) is the smallest quotient resulting from the division of—

"(A) each product determined under paragraph (1)(A) for each such State, by

"(B) the population of such State.

"(c) DIVISION BETWEEN STATE AND UNITS OF LOCAL GOVERNMENT.—Division between State governments and units of local government.—The State government shall be entitled to receive one-third of the amount allocated to that State under subsection (a) for each calendar quarter. Except as provided in subsection (f) the remaining portion of

each State's allocation shall be distributed among the units of local government of that State as provided in subsection (d).

"(d) LOCAL ALLOCATION.—

"(1) Indian tribes and Alaskan native villages.—If within a State there is an Indian tribe or Alaskan village which has a recognized governing body which performs substantial governmental functions, then there shall be allocated to such tribe or village a portion of the amount allocated to the units of local government of such State for the calendar quarter which bears the same ratio to such amount as the population of that tribe or village within that State bears to the population of that State.

"(2) ALLOCATION TO UNITS OF LOCAL GOVERNMENT.—The amount remaining for allocation within a State after the application of paragraph (1) shall be allocated among the units of local government located in that State so that each unit of local government will receive an amount which bears the same ratio to the total amount to be allocated to all units in such State as—

"(A) the aggregate adjusted taxes of that local unit of government, multiplied by the relative tax effort factor of that local unit of government,

bears to—

"(B) the sum of the products determined under subparagraph (A) for all units of local government located in that State.

"(3) AGGREGATE ADJUSTED TAXES OF A UNIT OF LOCAL GOVERNMENT.—For purposes of paragraph (2) the aggregate taxes of a unit of local government is the total nonschool taxes taken into account under paragraph (2) of section 109(c) of the State and Local Fiscal Assistance Act of 1972 for the most recent reporting year.

"(4) RELATIVE TAX EFFORT FACTOR.—For purposes of paragraph (2) the relative tax effort factor of a unit of local government is a percentage equal to the quotient of the general tax effort factor of that unit of local government divided by the average tax effort factor of all units of local government within that State.

"(5) GENERAL TAX EFFORT FACTOR.—The general tax effort of any unit of local government is the general tax effort factor determined under section 109(e)(1) of the State and Local Fiscal Assistance Act of 1972 for the most recent entitlement period.

"(6) AVERAGE TAX EFFORT FACTOR.—The average tax effort factor for all the units of local government within a State is equal to the sum of the general tax effort factors of all units of local government within the State divided by the number of units of local government within the State.

"(e) GOVERNMENTAL DEFINITIONS AND RELATED RULES.—For purposes of this title—

"(1) STATE.—The term 'State' means—

"(A) each of the fifty States;

"(B) the District of Columbia; and

"(C) each of the following: Puerto Rico, Guam, the Virgin Islands, and American Samoa.

"(2) UNITS OF LOCAL GOVERNMENT.—The term 'unit of local government' means the government of a county, municipality, township, or other unit of government below the State which is a unit of general government (determined on the basis of the same prin-'towns'), and shall be determined on the Census for general statistical purposes).

"(3) TOWNSHIPS.—The term 'township' includes equivalent subdivisions of government having different designations (such as "towns"), and shall be determined on the basis of the same principles as are used by the Bureau of the Census for general statistical purposes.

"(4) UNITS OF LOCAL GOVERNMENT LOCATED IN LARGER ENTITY.—A unit of local government shall be treated as located in a larger entity if part or all of its geographic area is located in the larger entity.

"(5) ONLY PART OF UNIT LOCATED IN LARGER ENTITY.—If only part of a unit of local government is located in a larger entity, such part shall be treated for allocation purposes as a separate unit of local government, and all computations shall, except as otherwise provided in regulations, be made on the basis of the ratio which the estimated population of such part bears to the population of the entirety of such unit.

"(6) BOUNDARY CHANGES, GOVERNMENTAL REORGANIZATION, ETC.—If, by reason of boundary line changes, by reason of State statutory or constitutional changes, by reason of annexations or other governmental reorganizations, or by reason of other circumstances, the application of any provision of this section to units of local government does not carry out the purposes of this subtitle, the application of such provision shall be made, under regulations prescribed by the Secretary, in a manner which is consistent with such purposes.

"(f) Limitation as to Territorial Governments.—The amount available under subsection (c) for allocation to the local governments of each of the States as defined in subsection (e)(1)(C) shall be held by the Secretary in trust until such time as the government of such State submits an allocation plan which has been approved by the legislature of such State, which meets the requirements set forth in section 206(a), and which is approved by the Secretary under the provisions of section 206(b). The Secretary may provide by regulation for the development of an alternative definition of local government for each such State and take such other measures as may be necessary to assist each such State in developing such an allocation plan.".

(b) Section 206(a)(2) of the Public Works Employment Act of 1976 (42 U.S.C. 6726(a)(2)) is amended by striking out "unemployment rate data" and inserting in lieu thereof "aggregate adjusted tax rate data".

Redesignate sections 5, 6, and 7 as sections 4, 5, and 6, respectively.

MARYLAND-NATIONAL CAPITAL PARK AND PLANNING COMMISSION

HON. GLADYS NOON SPELLMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mrs. SPELLMAN. Mr. Speaker, 50 years ago, when Washington was a sleepy Southern town and Prince Georges County a rolling rural enclave of horse farms and tobacco barns, the Maryland-National Capital Park and Planning Commission was established by the Maryland General Assembly.

Its founders probably would not recognize the landscape they sought to protect. Washington has become the bustling capital city of the Western World and the farmlands of Prince Georges County have given way to busy suburban communities whose population mushroomed by 69 percent during the 1960's.

No greater tribute to the park and planning commission could be offered than the fact that, in spite of such phenomenal growth, Prince Georges County has some of the finest park and recreation land in the Nation. Picnics, boating, tennis, concerts, children's sports, swimming, hiking—these and many other activities thrive in the 13,000 acres of Prince Georges parkland.

Extensive planning, wise acquisition, and conservation of resources, and effective management were essential to the establishment of our county's park system and its related recreation programs. Jurisdiction over the latter has rested with the commission since 1970, again by action of the Maryland General Assembly.

The commission has always encouraged—and been encouraged by—volunteer assistance from individuals and organizations. The efforts of citizen advisory committees, the Federation of Park and Recreation Councils, and government leaders at every jurisdictional level have been a key factor in the commission's continuing success at meeting the changing needs of Prince Georges County citizens.

Another facet of the commission's accomplishments has been the construction of hundreds of recreation facilities—swimming pools, community centers, golf courses, archery ranges, equestrian paths, cultural arts centers, and even a trap and skeet range.

In recognition of this outstanding achievement, the commission was awarded the prestigious National Gold Medal Award for excellence in park and recreation management. That was in 1973. Most Prince Georgians and residents of Montgomery County, too, I feel sure, would agree that M-NCPPC deserves a gold medal every year.

Of course, citizens of the bicounty area are aware that since 1927, when it was created by the Maryland General Assembly to prepare and administer a general plan for the physical development of the area, it has been involved in planning, in innovating, in persuading, in educating, and in leading the people and their elected officials toward proper respect for land use and the need for orderly development.

This Saturday evening, May 14, the commission will celebrate its 50th anniversary. But more important than the completion of its first half-century is the fact that it begins its second with a remarkable record of distinguished accomplishment. The challenges which lie ahead are very different from those encountered by the commission in its early years, but the recreational services which it provides are even more essential in this technological age.

I am sure my colleagues will join me in extending to the Maryland-National Capital Park and Planning Commission our warmest congratulations and deepest appreciation for a job well done. And with them, our best wishes for a second half-century of continuing contribution toward an even better way of life for citizens of the Washington metropolitan area.

REMARKS BY SOL M. LINOWITZ AT ANNUAL DINNER OF RELIGION IN AMERICAN LIFE

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. BRADEMAS. Mr. Speaker, few Americans have so effectively and tire-

lessly served our country in so many ways as Sol M. Linowitz.

An outstanding attorney and business leader, he has also been U.S. Ambassador to the Organization of American States, chairman of the State Department Advisory Committee on International Organizations, chairman of the National Urban Coalition and a contributor of numerous articles to professional journals. Mr. Linowitz is today continuing his long tradition of public service by serving as conegotiator and special representative of the President, with the personal rank of ambassador, in the effort to resolve the question of the Panama Canal.

A few weeks ago, Mr. Speaker, on March 8, 1977, Mr. Linowitz was honored with the award presented at the Annual Dinner of Religion in American Life.

His remarks on that occasion are, I believe, a perceptive and moving reminder of our responsibilities as Americans and as human beings in the world today.

Mr. Speaker, I ask unanimous consent to insert at this point in the RECORD the text of Mr. Linowitz' remarks on this occasion, delivered on March 8, 1977, in New York:

ANNUAL DINNER OF RELIGION IN AMERICAN LIFE—NEW YORK, N.Y.

As I look around this room and see so many who have done so much over the years for so many, I must admit that I have a sense of kinship with William Howard Taft's great-granddaughter who in her third grade autobiography wrote: "My Great-Grandfather was President of the United States, my Grandfather was a United States Senator, my Father is an Ambassador and I am a Brownie".

I want you to know that in your presence, I am a Brownie.

I am truly grateful to you for the Award this evening, for the spirit in which you have tendered it, and for the auspices under which you have presented it. Let me express my special appreciation to the General Electric Company for the generous contribution which they have made on my behalf in the name of that distinguished American, Charles E. Wilson.

With your permission I would like to take a few minutes just to say a few things which are on my mind and my heart.

We are met at a moment in history which is uncertain, fearful and indeed, dangerous. While it is true as Professor Whitehead once said that "it is the business of the future to be dangerous", nonetheless there is reason for concern as we look about us.

We are at a time that has been called both the Age of Anxiety and the Age of Science and Technology. Both are accurate, for indeed one feeds upon the other. As our scientific and technological competence has increased, so have our fear and anxiety.

In a real sense we are at a time of paradox—a time when we have learned to achieve most and to fear most. It is a time when we seem to know much more about how to make war than how to make peace, more about killing than we do about living. It is a time of unprecedented need and unparalleled plenty, a time when great advances in medicine and science and technology are overshadowed by incredible achievements in instruments of destruction. It is a time when the world fears not the primitive or the ignorant man, but the educated, the technically competent man, who has it in his power to destroy civilization.

It is a time when malaise hangs heavy, when we can send men up to the moon yet hauntingly recall Santayana's words that people have come to power who "having no stomach for the ultimate, burrow themselves downward toward the primitive".

No one needs to remind us that this moment may be the most fateful in all the long history of mankind. And that the outcome will depend on whether the human intellect which has invented such total instruments of destruction, can now develop ways of peace that will keep any man, no matter what his ideology, his race or his nation, from pushing the fatal button.

GLOBAL INTERDEPENDENCE

In the past men have warred over frontiers, they have come into conflict over ideologies. And they have fought over ideologies. And they have fought to better their daily lives. But today each crisis seems to overlap the other and we are engaged in a vast human upheaval that touches upon every phase of our existence—national and international, religious and racial.

Part of that upheaval is as old as hunger. Part is as new as a walk in lunar space. The overriding fact is that today we are all part of a global society in which there no longer is any such thing as a separate or isolated concern, in which peace is truly indivisible.

And the fact is that whether we like it or not, either we will all survive together or none of us will. Either we will all share the world's bounty, or none of us will.

We must, therefore, ask what chance we have of accepting our shrinking world with its fewer and fewer natural frontiers, or of transcending our ideological struggles unless we are prepared finally to get to the roots of the problem—the roots that are dug so deep in injustice and resentment in a worldwide contrast between wealth and misery. And the answers are vital not only to a sound foreign policy, but to a compassionate domestic policy. Indeed, both are interrelated in an interdependent world. For there is no escape any longer from what I believe is surely the central fact of our time: That whether it be Africa or Asia or Latin America or New York or Detroit or Washington—human beings can no longer be condemned to hunger and disease and to the indignity of a life without hope.

Who are these human beings that make up this world in which we live—the millions upon millions no longer thousands of miles away, but now just down the runway? Here they are in microcosm: During the next 60 seconds, 200 human beings will be born on this earth. About 160 of them will be black, brown, yellow or red. Of these 200 youngsters now being born, about half will be dead before they are a year old. Of those that survive, another half will be dead before they are 16. The 50 of the 200 who live past their 16th birthday, multiplied by thousands and millions, represent the people of this earth.

They, like their fathers and forefathers before them will till the soil working for landlords, living in tents or mud huts. Most of them will never learn to read or write. Most of them will be poor and tired and hungry most of their lives. Most of them—like their fathers and their forefathers—will lie under the open skies of Asia, Africa and Latin America watching, waiting, hoping. These are our brothers and sisters, our fellow human beings on this earth.

What kind of a tomorrow does the world offer these, the people of this earth? Two diametrically opposed philosophies are being presented. One we call Communism—the other Democracy. Each asks acceptance of a basic idea; each offers a larger slice of bread.

DEMOCRACY AND THE INDIVIDUAL

Make common cause with us, say the Communists, and accept three basic premises: First, *dialectical materialism*—all that matters is matter itself, Second, *godlessness*—accept the notion that there is no spiritual being who determines your destiny. Third, accept the idea that the *State is supreme* and determines the will of the individual. Believe these things and accept them, say the Communists, and we promise you more food in your stomachs, more clothes on your backs, a firmer roof over your heads.

And what about Democracy? Because Democracy rejects absolutes, it tends also to resist precise definition. But when you and I think of Democracy, we think of a system dedicated to the preservation of the *integrity, dignity* and *decency* of the individual person.

We talk of all men being created equal but what we really mean is that all men are created with an equal right to become unequal—to achieve the glorious inequality of their individual talent, their individual capacity, their individual genius. We don't talk of the common man because what we believe in is not man as common, but with a common right to become uncommon—to think uncommon thoughts, to believe uncommon beliefs, to be an uncommon man.

We like to say that in a Democracy every person hs a right to life, a right to a decent life, which comes not from government, not from his fellow citizens, but from God. We say that in a Democracy it is the individual who matters; and because we count by ones and not by masses or by mobs, we believe that in a Democracy each human being regardless of his race, his creed, his color, has the right—the God-given right—to stand erect with dignity as a child of God.

I submit to you that that is the essence of what we really mean when we talk about the impact of religion on American life—our deep faith in *every man's* right to stand erect and with dignity as a child of God. That is the basic principle to which we are committed as a nation and as a people; that is the foundation on which our system rests; and that is what distinguishes us in the eyes of the world—in the eyes of those millions who are searching for hope of a better *future*.

From the beginning there has been an expectation about us as a nation. From the beginning the world has looked to us to live up to certain standards of integrity, decency, dignity and humanity—to involve ourselves deeply in moving humankind toward a more humane world of freedom and justice.

Archibald MacLeish once wrote: "America is promises". America is, indeed, promises. We started with a promise over two hundred years ago. At the time when we were but a loose group of weak and scattered colonies of 3 million people, we lit up the western sky with a promise based on faith and hope—the promise of a free and compassionate society committed to the preservation of fundamental human values.

From the beginning we have always treasured the human and the humane and we have always cared about what happened to other human beings. The promise we held out to the world—saying we did so "out of a decent respect to the opinions of mankind"—is still the promise of America to the millions on this earth.

And today as never before in our history we have the opportunity to redeem that promise. Today we have the science and the technology, the skills and the resources to make it happen, to put an end to the hunger and disease and privation that have for so long been the scourge of mankind.

The question is whether we have the will, whether we are prepared to do what we

should and must if we are to be the kind of nation we have said we are.

We have a great responsibility to ourselves, to our heritage and to our children. We are not going to discharge that responsibility by building larger missiles or making more powerful warheads. We will not do it by issuing new and eloquent statements. We will only do it by remembering who we are and what we are—by tapping the very deepest within us as a people—by dedicating ourselves to the fulfillment of our mission as a beacon of hope for ourselves and for the other people of this world, not only as Americans but also as Christians and Jews, drawing upon the richest within our faiths.

As I indicated earlier, this is a time of uncertainty, of deep concern. But there is a moment in our history which I think suggests the temper in which we must approach whatever challenge is before us. On May 19, 1780 the Connecticut State Legislature was in session. For days there had been prophecies that it was to be the day of doom. Then suddenly in mid-morning the sky turned from blue to grey to black. Men fell on their knees in fear and in prayer and there were many shouts for adjournment. Then a State Senator, Abraham Davenport, came forward to the podium, banged the gavel and said, "Gentlemen, either the day of judgment is approaching or it is not. If it is not, then there is no need to adjourn, and if it is, I choose to be found doing my duty. I therefore ask, let candles be brought".

I suggest this is a time for all of us to make that commitment. Let us also determine that no matter what lies ahead we will be found doing our duty to God and our country. Let us together ask that candles be brought.

Mr. Speaker, at this point in the RECORD I insert the text of a telegram sent on this occasion by President and Mrs. Carter:

Hon. SOL M. LINOWITZ,
Chairman, 28th Anniversary Dinner, Religion in American Life, Waldorf-Astoria Hotel, New York, N.Y.

Rosalynn and I send you our warmest congratulations as distinguished spiritual and business leaders of religion in American life honor the integrity you have brought to government and business and the lasting credit you have bestowed on your family, your community and your religious faith.

Our Nation has thrived on the deeply rooted tradition of religious liberty. A strong belief in God has given millions of our citizens resilience to overcome adversity and courage and direction to build lives of greater meaning and self-fulfillment.

Your own experience is a most heartwarming expression of the positive influence of religion in American life.

Rosalynn and I are delighted to share in the sentiments of those who recognize the outstanding example you set. We hope that this will be a memorable and happy evening for you and your family and all who attend.

JIMMY CARTER.

MEDICARE REFORM IN RURAL AMERICA

HON. CHARLES ROSE III

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. ROSE. Mr. Speaker, it has become obvious to me that many of America's rural residents are not receiving the full benefit of the medicare premiums they pay. I say this because under the present law, medicare reimbursement is limited to physicians and to clinics where physicians are present. This restriction ignores the growing importance of the family nurse practitioner, and the significance of FNP's for rural clinics and the health needs of rural America.

Chairman DAN ROSTENKOWSKI of the Ways and Means Subcommittee on Health has introduced legislation to correct this shortsightedness in medicare coverage, and on February 28, Chairman ROSTENKOWSKI held hearings on this bill: H.R. 2504. Subcommittee markup of this legislation is expected in the near future.

The following articles by Mr. Leslie Gruber of the Wilmington Morning Star, give a vivid description of the very real need for this legislation. I want to compliment Mr. Gruber for his fine commentary, and also Gov. Jim Hunt of North Carolina for his concern and interest in appearing before the Ways and Means Committee in support of H.R. 2504. Further, I commend the attached articles to my colleagues attention and urge that they support Chairman ROSTENKOWSKI in his efforts to bring affordable and quality health care to rural Americans.

The articles follow:

NEW RURAL CLINICS FILL MEDICAL NEED OF PHYSICIAN-LESS AREAS

(By Leslie Gruber)

The relatively new concept of delivery of medical care to rural areas, the North Caroline-developed rural medical center, appears to be successfully achieving its goal of improved service to rural dwellers.

However, the program finds itself in financial difficulty from a man-made, or rather, Congress-made problem. Because the centers operate with family nurse practitioners (FNPs) as the principal extenders of health care to the patients under supervision of back-up physicians from other localities, the Medicare program for the elderly will not reimburse the centers unless the back-up physician happens to be physically present at the time of the patient's visit.

Officials of two such centers in southeastern North Carolina said last week their centers could become self-supporting within the three-year pilot period in which they are aided financially by the state if the Medicare payment barrier were removed.

Health care facilities came to 30 North Carolina communities in the last three years through this concept of establishing clinics in physicianless rural communities with specially trained nurses as the primary care providers, backed up by physicians.

Now operating in the region are the Bladenboro clinic, the Black River Clinic at Atkinson, the Harrells Clinic and the Newton Grove Clinic.

Two others are being constructed, the Pensiow Clinic at Holly Ridge and the Carolina Beach Center.

Officials of the operating centers say they are being well received in the communities involved, and that case loads are increasing steadily and would increase even more if they could obtain additional FNPs.

The FNPs are registered nurses with experience plus an additional year of special training divided between the University of North Carolina at Chapel Hill and practicing physicians' offices.

Back-up physicians say the clinics are doing a good job.

The nurses can call the back-up physicians any time they feel the need in handling patients. They can give physical examinations and shots, take blood pressures, treat for some troubles and refer patients to physicians for more serious disorders. They can give emergency treatment in accidental injury cases, preparing patients for transfer to hospitals for full treatment.

The clinics came into being through a combination of local and state effort. The Black River Clinic is typical. A community board of directors was formed and a fund drive raised $12,000 locally. The state office of rural health services added $65,000 for establishment of the center and its start-up expenses.

Dr. Harold Peedin and Dr. John Dees of Burgaw are its back-up physicians.

"I think the center has worked well and I think the idea will work," Dr. Peedin said. "I think the care given here (at the Black River Center) is excellent. Complications are met easily by sending patients to the hospital at Burgaw or by the back-up doctors. I have seen no real complications or problems.

"In peak periods, like with the flu, 19 or 20 patients are seen in a day. They would have had to crowd into doctor's offices without the clinic. The doctor's work loads in the area are as heavy as we can take.

"There's no need for jealousy between local doctors and the clinics. Any time you get a new facility or doctor it doesn't hurt other doctors, it just allows more patients to come in for treatment."

Dr. Peedin said he believes the Black River Clinic will be self-supporting within a year if Medicare reimbursement can be received.

Mrs. Jane Butler, member of the board of directors and treasurer of the Black River Center, said about 10 per cent of the patients are eligible for Medicare and the center has to treat many of them without payment as they can't afford to pay, yet they have paid their Medicare premiums. Within a mile radius of Atkinson she estimated there are about 50 Medicare patients.

The Center serves eastern Bladen, southern Sampson, western Pender and a bit of eastern Columbus counties. Mrs. Butler estimated about 15,000 persons live in the area.

The Center opened in 1975 and has had 1,500 patients register.

It operates on a budget of about $60,000 per year.

The patient load is about the maximum the Center can take with the present staff. Officials are discussing a possibility of adding another nurse practitioner.

The present staff includes Mrs. Betty Croom, FNP, who is now on leave, with Mrs. Ginga Carden, scheduled to be the FNP at the Carolina Beach Center, acting in her place; Mrs. Louise Woodcock, receptionist and record keeper, and Mrs. Peggy Woodcock, laboratory technician.

The Bladenboro clinic, which began under a federal program but came under the state program and opened in its present quarters last year, faces the same financial problem regarding Medicare as Black River, according to William Butler, chairman of the board of directors.

Persons eligible for Medicare account for 15 to 20 per cent of the load at Bladenboro, Butler said.

Butler surmised reimbursement from Social Security for Medicare patients "might make us self-supporting but we might have to increase our rate by a dollar to $8 per visit for all patients in the near future to break even."

Butler said he believes the clinic will be on a self-supporting basis within a year, if Medicare reimbursement becomes available. The clinic will receive needed state financial aid for another year.

"We have to take in $36 per hour to break even," Butler said. "We are a non-profit organization and break even is all we need to do."

In January the clinic averaged 25 patients per day and that was lower than usual, Butler said, because it had to substitute two physicians' assistants for the regular FNP,

Mrs. Caroline Allen, who was taking maternity leave.

The clinic's budget for the fiscal year ending June 30 is $38,338, of which it has a balance of $26,550, Butler said. Costs for January were $4,400, he said.

He pointed out $17,163 of the accounts receivable would have come from patients eligible for Medicare if it would have approved reimbursement.

Butler, along with officials of the Black River Center, pointed out insurance companies including Blue Cross and Blue Shield reimburse the clinic for insured patients and so does Medicaid, the federal medical care program.

The Bladenboro Clinic has registered 3,537 patients in its nearly three years of operation and although the rate of increase has slowed down, 78 new patients registered in January, Butler pointed out. Earlier, he said, the clinic registered as many as 300 new patients in a month.

Butler estimated the Bladenboro primary trade area contains about 8,000 persons.

"We have a ready-made set-up for a doctor to come here," Butler said optimistically. However, the town has been without a permanent doctor since Dr. Dewey Bridger died.

The clinic was originally established in a downtown building under a federal program. The community raised $6,000 to equip the clinic. It raised another $14,000 and the state put up $60,000 for the present clinic. Dr. Bruce Phillips of Elizabethtown is the back-up physician for the Bladenboro Clinic. He comes to the clinic on Friday afternoons regularly.

The back-up doctors for the Black River clinic take turns coming in on Wednesday afternoons.

Both clinics' officials said they had received virtually no complaints from patients.

Butler said he had received only one complaint and that was from a patient who said he had to wait too long.

Butler, Dr. Peedin and Mrs. Butler of the Black River clinic all said patients could receive care much more quickly by going to clinics in their communities than the traveling much longer distances to even more crowded physicians' offices.

DENIED MEDICARE PAYMENTS ESSENTIAL NOW

(By Leslie Gruber)

That the government gives with one hand and takes away with the other could describe the situation of Medicare eligibles when it comes to paying their premiums on one side, and receiving the benefits of paid visits to rural health clinics on the other.

Despite the fact the government has assisted in developing rural health care programs and helped financially in training personnel, its Social Security arm, which handles Medicare along with other social security payments and benefits, refuses to pay the charges for patient's visits to these medical centers unless a physician happens to be present.

With from 10 to 20 per cent of the clinics' patient calls involving persons eligible to receive Medicare benefits, and persons who pay the Medicare premiums, this amounts to the difference between breaking even and operating in the red, according to William Butler, chairman of the board of directors of the Bladenboro clinic, and Mrs. Jane Butler, member of the board of directors and treasurer of the Black River Clinic at Atkinson.

Senators and congressmen have taken up the cause and several bills are pending to correct the problem.

North Carolina Gov. James B. Hunt Jr., a product of a farm community near Wilson, made a strong presentation for Medicare reimbursement to the centers for payment of clients' bills.

Leaders of the centers contend they treat the Medicare patients, often without charge, because these elderly persons are the one least likely to be able to afford extra charges. Mrs. Butler emphasized, "They have already paid for their treatment through the premiums they have paid Medicare."

Welfare recipients who come under the Medicaid program can come to the clinics and the clinics can be reimbursed.

Butler noted the state puts up part of the Medicaid funding and thus has some control over how the money is spent.

Dr. Harold Peedin of Burgaw, one of two back-up physicians for the Black River Center, explained the contradictory situation arose through conditions of 1972 when the acts were passed.

He noted the concept of the family nurse practitioner, especially trained for the work and acting as medical care extender at these clinics, hadn't developed at that time. These FNPs, he noted, are capable persons in their own right, but that they work very closely with the back-up physicians and refer any questionable situations to them by telephone and send the patients to the hospitals where the physicians work.

He pointed out the limitation of reimbursement in the Medicare act of Congress to physicians and to clinics where physicians are present came about to prevent possible unauthorized medical practices in physicians' offices or clinics without the physicians being present or available.

Dr. Peedin said he is enthusiastic about the success of the rural medical clinics.

Gov. Hunt, appearing before the subcommittee on health of the House Ways and Means Committee in Washington last week, testified to the lack of physicians and medical care in rural areas.

He noted 42 per cent of the physicians in North Carolina are located in only six counties containing only about 20 per cent of the state's population.

He pointed out the state has developed the rural clinic idea with registered nurses with an extra year of specialized training to provide primary care practice in rural clinics.

By the end of this year the 30 rural clinics in 23 counties of the state will have seen 80,000 patients in more than 250,000 visits, the governor said.

He noted the state medical, nursing and pharmacy boards have voluntarily established rules relating to delegation of medical responsibilities to the physician extenders. He also noted several federal programs that have been helpful in the developing program.

The governor also emphasized the long-term financial responsibility for the program belongs to the communities and counties involved.

Pleading for Medicare reimbursement for patients in the clinics who are paying into Medicare, the governor said this is one reason why eligible North Carolinians receive less than half the benefits paid to beneficiaries in some urban states. The average payment to a North Carolina beneficiary for medical services is $154, compared with $439 in Washington, D.C.

He also observed all major third-party insurers except Medicare now reimburse the clinics.

Jim Bernstein, chief of the North Carolina Office of Rural Health Services, said about 10 per cent of the people in areas served by the rural clinics, and probably 15 to 20 per cent of their business, should come from persons eligible for Medicare benefits.

Bernstein said now several other largely rural states are facing the same problem.

He noted North Carolina was the first state in the nation to come up with a state program and plan for rural health care centers.

"By the end of next year my guess is the 30 clinics in the state will be having 250,000 visits a year from patients," he said.

"Right now," he said, "I am impressed with what some of these places have done, such as Black River, with so little resources available and yet they have come together to do an excellent job."

He noted the Bladenboro, Black River and Harrels centers all "have very strong, very able boards of directors."

A. K. Everett Sr., chairman of the board of the Penslow Health Clinic, now being established at Holly Ridge, wrote in a letter to the Washington Post, "without legislation to correct outmoded Medicare regulations this clinic, along with many others serving remote areas will falter and be forced to close."

He noted the Penslow clinic will serve about 10,000 persons. The nearest doctor is 30 minutes to one hour away from most of the residents of Onslow and Pender counties who are served by the clinic.

FORT GREENE

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. RICHMOND. Mr. Speaker, I would like to bring to your attention an article which should be enlightening to millions of Americans who live in our cities. The following story from the May 8, 1977, New York Times is evidence that depressed social and economic conditions in our cities can be corrected.

Fort Greene, an area of Brooklyn which has gone through many transitions, was noted for its "elegant architecture" in the late 1800's. During the early 1900's the area entered another architectural phase, but continued to be noted for its palatial mansions. The 1950's and 1960's brought with them the breakup of many of the beautiful homes into rooming houses. This reversal in the physical makeup of Fort Greene was accompanied by many of the social ills which traditionally go along with urban decay. Now many of these problems are being resolved by the hard-working residents of Fort Greene, and the area is once again becoming an attractive place to live.

The Fort Greene story is a prime example of a growing desire among urbanites to improve their neighborhoods. Urban residents throughout the United States are finding this "pioneering spirit" and are taking action to refurbish and redevelop their neighborhoods to make them the thriving communities they once were.

I believe the article is encouraging, and I commend it to my colleagues:

FOR THE FORT GREENE MERCHANTS WHO STAYED: VINDICATION

(By Barbara Campbell)

Millie Mandy's little Italian ices store has the green, red and white colors of Italy in its striped awning and festive strings of little colored flags flapping overhead.

Geraniums in flats are for sale on the sidewalk. Neighborhood people sitting on well-used kitchen chairs keep Millie—as she prefers to be known—company while she scoops up fruity ices for a steady stream of customers.

The store is at 185 DeKalb Avenue in the Fort Greene section of Brooklyn, across the street from Millie's birthplace, where she still lives. When she opened the store more than 20 years ago, the neighborhood was mainly Italian.

But in the 1950's, as poor blacks and Puerto Ricans began to move into rundown townhouses used as rooming houses, many merchants moved.

Millie has stayed to witness still another transition. Brownstoners are arriving in Fort Greene now, and she and other storekeepers say their loyalty to the neighborhood is being vindicated. The trickles of 10 years ago has on some streets become an influx.

Fort Greene is a 50-square-block area bounded on the north by Park Avenue, the south by Hanson Place and Greene Avenue, the east by Vanderbilt Avenue and the west by Ashland Place. Its eastern boundaries are directly adjacent to Downtown Brooklyn and less than 10 blocks from its retail center.

Fort Greene, noted for its elegant architecture, has gone through many transitions. In the 1830's it was second in fashion only to the patrician Brooklyn Heights. It boasted both suburban mansions and frame cottages.

Twenty years later, row upon row of Italianate brownstones replaced the mansions but, built for wealthy merchants, they were equally palatial.

After World War I, many well-to-do families left the brownstones, now too costly to maintain, and during World War II most of the large homes were converted to rooming houses for Navy officers at the nearby Brooklyn Navy Yard.

From that point the neighborhood declined precipitously, going through its most ruinous period in the 1950's and early 1960's.

Along with the blight came other ills—addiction, muggings, break-ins, robberies. The casual, almost country ambiance disappeared, replaced by caution and wariness among its residents—a mixture, now, of those who remained from better days, the working poor, the elderly and the welfare recipients.

But Millie Mandy, the cobbler next door to her, the butcher farther down DeKalb Avenue, the grocer across the street and a few other merchants also stayed. And today they are proudly witnessing the community's rebirth.

"I love it here," said Millie. "It's my home. All right, so we need a little cleaning up of the addicts—I call them poor souls. I have never been scared here even when the neighborhood went down. I keep my door open and make the sign of the cross and keep on going."

Across the street at Perry's, the grocery, Frank Perry folded his hands across his white apron and said, "Things are getting better. With all the new people coming in, it's affecting everybody. A lot more people are having pride about Fort Greene."

Mr. Perry, who has added imported cheeses and other delicacies to his stock to please the brownstoners, said that many people panicked when Rothschild Junior High School was built across the street.

"A lot of stores went out, specialty shops, boutiques," he said, but during the height of the riots of the 1960's nobody touched his store. "I had confidence in the neighborhood," he said. "I haven't been wrong; it's come up again."

Along such streets as South Portland Avenue brownstoners have almost completely taken over. Though a few rooming houses still remain, the once littered streets and sidewalks are swept clean and kept that way by civic watchfulness.

Also, merchants are beginning to establish new businesses in Fort Greene. A year ago a young businessman, Mark A. Hollis, moved to 235 DeKalb Avenue and opened a book store called Sisyphus. Recently he expanded into space next door. Like Michael Moscarella, the cobbler who has had a store next to Millie's for 44 years, he has found that the poor as well as the middle class will patronize his store.

Mr. Hollis gets trade from students at nearby Pratt Institute and Long Island University.

On the corner of DeKalb and Adelphi, a coffee shop called the Corner Post opened recently. There is sawdust on the floors, there are chess sets on some of the tables, and there are health food sandwiches for sale. At night there is live jazz.

Marvin Graves, one of the proprietors, had hoped to attract the teachers from the junior high school next door and the brownstoners. But some of his most eager customers have turned out to be black youngsters with a taste for his pita bread stuffed with vegetables and meat or curried tuna and apple for a dollar.

Then there is Yvette Mayl, the proprietor of a restaurant called Two Steps Down, across the street from the Sisyphus book store. She opened five years ago to give the neighborhood a "quality restaurant."

Business has been so good that she is planning to expand to the second floor. The flea market that she runs there now will be moved a few stores away.

Some merchants say the brownstoners consistently ignore their stores, especially along Myrtle Avenue near a massive brick housing project.

"Brownstoners just won't come to Myrtle Avenue," said one owner of a recently opened boutique. "It's just too close to the projects." The store depends on trade from people of all economic conditions, she said, and she tries to stock accordingly.

Harold Arnow, the proprietor of the Family Tree, a children's store on Myrtle Avenue, almost next door to the projects, said he "upgraded" his stock when the brownstoners moved in but found that the poor as well as the middle class people wanted to buy well-made clothes.

Mr. Arnow, whose shop is at 365 Myrtle Avenue, said most of his customers still come from the projects. Brownstoners sometimes shop there on weekends.

One brownstoner suggested that perhaps they have been so used to the "pioneering spirit" that it is hard to change habits long established during years of renovating their homes.

"In theory and in practice as far as fixing up our homes and the neighborhoods is concerned, we are a community, but I still just automatically stop on my way home from work to pick up what I need before I come to Fort Greene," she said.

That doesn't worry Millie Mandy. She is planning to open a flower shop.

SOME FISCAL CONSERVATIVE

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. HAGEDORN. Mr. Speaker, increasingly President Carter has been coming in for criticism from those who believe him to be excessively concerned about budget balancing, deficit spending, and inflation, as well as other sins against Keynesianism. This, despite the fact that: First, his proposed budget revisions have added nearly $20 billion to what was already the largest budget in our Nation's history, and $10 billion to what was already its third largest deficit; second, the fact that he has suggested at least a half dozen new taxes to slap on individuals and business; and third, the fact that his tax and energy proposals have been distinguished more by their redistributionist character than by their likelihood of solving either tax or energy problems. To assuage those of my colleagues who are concerned that he is still allowing individuals control over too great a percentage of their own income, I am inserting the following editorial from the Wall Street Journal:

SOME FISCAL CONSERVATIVE

The liberal wing of the Democratic Party is in full cry against Jimmy Carter's rebirth as a "fiscal conservative." If it will make the liberals feel better, we can quite assure them that he is not our kind of fiscal conservative. Next to proclaiming a devotion to a balanced budget, his favorite pastime seems to be increasing taxes.

Three weeks ago Mr. Carter proposed a new tax on gasoline, a new tax on domestic crude oil, a new tax on industrial use of oil and natural gas and a new tax on autos that burn lots of fuel. Turning his attention to Social Security, he now proposes a new tax on employers, making them pay on salaries above the current $16,500 cutoff; a new tax on employes making more than this amount, lifting the wage base by $2,400 more than previously planned; and a new tax on everyone, boosting the rate by one percentage point starting in 1990. These proposals add up to eventual yearly tax collections of something upwards of five percent of today's gross national product. A tidy sum, we should think, to collect, and spend, in three weeks worth of proposals.

Yet Senator George McGovern thinks the President is a piker. The Senator complained in a speech to the Americans for Democratic Action of "business appeasement at full tide," and of an alleged attempt to "balance the federal budget on the backs of the poor, the hungry and the jobless." Democratic cloakrooms on Capitol Hill are said to be abuzz with similar talk, and we now even have a newspaper column reporting that Vice President Mondale feels the same way.

Mr. Carter apparently stirred up the natives by unleashing some rhetoric about a balanced budget by 1981 before a congressional breakfast. A calculating, cynical explanation might be that he wanted a storm over "fiscal conservatism" to distract attention from what he wants to do to the taxpayer's wallet. A simpler explanation is that he thinks talk about balancing the budget is soothing to conservatives and good for "business confidence," and Perhaps it is, "since there are many conservatives and businessmen who still focus on deficit numbers, instead of the true governmental bottom line, which is government spending as a percentage of GNP.

Historically, of course, deficits have been inflationary because the government borrowing pushes up interest rates, including the Federal Reserve to try to push them back down by creating a lot of money. But within a given monetary policy, implied by the Fed's new growth targets for money aggregates, we can't get very excited about the decision between covering spending with higher deficits or higher taxes. Higher deficits complete for available savings, retarding investment and growth. Higher taxes reduce incentives and also retard growth. Either way, the true key is how much the government takes either by taxing or borrowing, and how much it leaves to the private sector.

Mr. Carter's answer to the mounting crisis in Social Security is to take more money out of the private sector. True, he did propose to end the inadvertent double indexing that has added so much to the fund's actuarial deficit, but even in doing this he has chosen the most generous formula. If nothing else is done to reduce now-promised further benefits, his new taxes will prove to be only the beginning. Yet they are in the magnitude of one to two percent of GNP.

Mr. Carter's energy program, meanwhile, is nothing but a massive tax increase. Huge amounts of money would be gathered in taxes and rebated, if you choose to believe Senator McGovern won't get his hands on it first. The government seems to be working

with a number of $75 billion, which conveniently leaves out the gas-guzzler tax. We hear private estimates reaching $125 billion. The amount is impossible to calculate exactly, because no one knows the effect of the intended disincentives. And of course, the taxes don't all come at once, so consumers can hope their incomes will grow in order to pay them. But to provide a basis of comparison, total federal government receipts are today about $350 billion, and total corporate after-tax profits are about $90 billion, or $50 billion after depreciation and inventory adjustments. A tax of $75 billion would amount to more than four percent of GNP.

Given Mr. Carter's willingness to throw around sums of this magnitude, we are anything but soothed when we hear him talk of a balanced budget. In fact, we tremble. One way to balance the budget is to allow the government to dispose of more and more of whatever is produced in the nation, and to raise taxes accordingly. That kind of balanced budget, and that kind of fiscal conservatism, is nothing we need.

THE RISK OF TECHNOLOGICAL EXPORTATION

HON. RICHARD H. ICHORD

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. ICHORD. Mr. Speaker, in weeks past we have debated on this floor our state of military preparedness vis-a-vis the Soviets. Not only is Soviet quantitative superiority a concern but also the technological gains they have made in recent years. Now despite a widening quantitative advantage on the side of the Soviets and a narrowing technological lead on our side, we are apparently intent on giving up the lead in one of the few areas where we are still ahead, computer technology.

This is a matter of grave concern deserving of the attention of all Members. In that regard, I wish to share with you two thought-provoking articles, one an editorial from the Post Tribune, of Jefferson City, Mo., titled "Dangerous Exports," and the other from the News World, titled "Computers: Ropes to Hang By?" written by Miles Costick, long a student of the merits and pitfalls of technological exportation. I would request that these articles be placed in the RECORD at this point:

DANGEROUS EXPORTS

The United States government is soon expected to approve the latest in a long series of western technological aid to Russia by exporting to the U.S.S.R. one of the largest and most advanced computer systems in the world.

The Cyber-76 is a "super-computer" developed by the Control Data Corporation of Minneapolis, Minn. It is a scientific marvel, estimated to be anywhere from 10 to 20 years ahead of any computer system in the Soviet Union and its satellite nations.

The Cyber-76 serves as the "brain center" of the Pentagon in Washington, of the super-secret National Security Agency, of the North American Air Defense Command in Colorado, and of the National Aeronautics and Space Administration. What, then, can officials of the United States government be thinking about when granting permission for its export to a nation openly attempting to achieve military and technological superiority—and eventual control—over the U.S.?

Those in favor of the deal insist that the Cyber-76 will be used by the Soviets only to process weather forecasting data. They do concede, however that the computer has a definite military capacity as well.

Proponents of the export deal also argue that there will be a system of controls designed to make sure that Russia doesn't divert Cyber-76 to military purposes. One such control would be the on-site monitoring by one or more American technicians.

Many technological experts have expressed skepticism, however. Miles Costick, a prominent research analyst, says "controls are worthless. The guy sitting by the computer cannot always be sure what is being fed into it. The Soviet technicians could easily send through the trajectory for an intercontinental ballistic missile without the American monitor ever knowing it."

Last fall, then Secretary of State Kissinger intervened' to approve the export to Russia of Control Data's Cyber-73 system. Cyber 73—only slightly less sophisticated than Cyber-76—was to be used to assist the Russians in "earthquake forecasting." These same Cyber-73 models are used in the United States for nuclear weapons testing and military radar development.

If Cyber-76 is approved for export, Russia will have taken a giant step toward closing the "computer gap" and reaching the Soviet goal of eventual technological superiority over the United States.

COMPUTERS, ROPES TO HANG BY?

(By Miles Costick)

Jimmy Carter's national security advisor Zbigniew Brzezinski, has said that detente must be reciprocal in order to be enduring, but what remains to be seen is whether the Carter administration will also reassess the Kissinger policy of transferring to the Soviets sophisticated technology with critical, strategic implications.

A test of this would be whether Control Data Corp. is permitted to deliver to the Soviet Union the world's largest strategic computer system, the Cyber 76. Control Data has closed a tentative deal with Moscow, and the application for an export license is pending before the Commerce Department. But Commerce won't give the go-ahead unless the National Security Council—where Brzezinski, as Carter's personal aide, playing a key role—gives a nod of approval.

There are several other applications for sale of military computers to the Communist governments by Control Data, IBM, UNIVAC and Honeywell. None of the computers involved, however, can match the strategic potential of CDC's Cyber 76 system.

Cyber is a sensitive topic. It is a very high speed, large volume, advanced strategic computer which processes a phenomenal 100 million instructions per second, and has a memory storage capacity at least 15 years ahead of anything that a communist computer maker is able to construct. Typical installations: the Pentagon, U.S. Air Force, the Atomic Energy Commission, NASA, and the top secret National Security Agency.

Last year President Ford vetoed the extension of the Export Administration Act leaving the country without effective controls over export of strategic items to the Communists. This meant that all restrictions on Soviet bloc purchases in the U.S. have lapsed. Mr. Ford, however, had issued an executive order reimposing controls on exports under authority vested in him the War Powers Act. The executive order placed the National Security Council in a position of authority to permit or decline strategic exports to the Communists.

The select informed few knew what most had missed: For the executive order to become an effective barrier to export of strategic goods, the President would have to designate the recipient country as an "enemy country." Obviously, under Henry Kissinger's détente, the President could hardly declare the Soviet Union or Red China an enemy.

NUMEROUS APPLICATIONS

In the order tube, ready to pop out when the cap was removed on Oct. 1, 1976, were numerous applications for export of strategic items of critical military significance. The most important were the applications for export of military computer systems.

On Sept. 30, 1976 President Ford and his National Security Council under Kissinger appointee Lt. Gen. Brent Scowcroft, in strict discretion, approved the sale of the Control Data's Cyber 73 computer system to the U.S.S.R. The value of the transaction to CDC was about $6 million and to the Soviets about a 12-year leap in computer technology plus a new acquired strategic capability.

On Oct. 12, the National Security Council approved the sale of two CDC Cyber 172 computer systems to Red China. The announced value of the transaction was $6 million. Through acquisition of Cyber 172 computers the Chinese communists gained capabilities which they have lacked before, since their computer technology is about 20 years behind that of the United States.

The stated purpose of computer sale to Red China was oil exploration and earthquake detection. An inquiry revealed that the stated purpose of computer sale to the Soviet Union was oil exploration.

However, the Pentagon and the Energy Research and Development Administration (ERDA) objected to the sale of computers on the grounds that both systems—the Cyber 73 and Cyber 172—were suitable for nuclear weapons calculations, for anti-submarine warfare, for large phased-array radar to track enemy ICBM's and for other military applications.

OBJECTIONS OVERRULED

A number of U.S. officials confirmed that Dr. Kissinger and his assistant at the State Department, Winston Lord, prevailed over the opposition of the Pentagon and ERDA. One Commerce Department official commented, "If there were no potential military applications there would have been no reason to take a full year to review the sale . . . of equipment."

Today, the U.S. Defense Department deploys about 9,000 of the so-called general propose computers for military purposes. The same type of computers could be used in a wide variety of civil applications from research and development in science and industry, to crime control and psychiatry.

Obviously the national security implications of this trade are enormous. Concern in the United States had led the Defense Department's Science Board task force under J. Fred Bucy of Texas Instruments to recommend restrictions on the transfer of strategic technology to the communist superpowers and their satellites.

Six high-technology trade associations, however, through their spokesman, have warned Congress against permitting the Defense Department to control transfer of strategic technology. "In a civilian government such as ours, the control and administration must reside apart from the military," recently demanded Peter F. McCloskey, president of the Computer and Business Equipment Manufacturers' Association.

Control Data's William Norris puts it more bluntly: "Our biggest problem isn't the Soviets, it's the damn Defense Department!"

Big business should remember Lenin's words that when it was time to hang the world's capitalists, they would trip over each other in their eagerness to sell the Communists the necessary ropes.

TO SUPPORT NEW LEGISLATION

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. KOSTMAYER. Mr. Speaker, I rise today to ask my colleagues to support new legislation, H.R. 6403, which would add 114 miles of the Delaware River between New York, Pennsylvania, and New Jersey to the Wild and Scenic Rivers System.

I have sent the following letter to my colleagues describing my bill and asking for support and cosponsorship:

DEAR COLLEAGUE: Recently I introduced H.R. 6403 to add an approximately 114-mile section of the Delaware River to the Wild and Scenic Rivers System.

Part of the Delaware affected by this legislation, a 75-mile segment between Hancock, New York and Matamoras, Pennsylvania has already been the subject of an intensive federal-state study commissioned by the Bureau of Outdoor Recreation. The study concluded this stretch of the Delaware qualified as scenic and recreational, should be included in the Wild and Scenic Rivers System, and could be protected and managed with minimum public investment and little disruption of the area.

The five-year cost estimate including land acquisition and development of facilities is a modest $3.8 million.

The lower 39 miles of the Delaware covered in this bill run from Port Jervis, New York to the Delaware Water Gap. Almost all of this portion of the river lies within the boundaries of the Delaware Water Gap National Recreation Area. As you may know, this section of the river would become a lake if the Delaware were to be impounded by the proposed Tocks Island Dam.

By adding this portion of the Delaware to the Wild and Scenic system, Congress would foreclose the possibility of the Tocks Island Dam while ensuring the public's enjoyment of a free-flowing river within the National Recreation Area.

Environmental studies of the area indicate that the Tocks Island project would result in the loss of more than 20,000 acres of wildlife habitat, hundreds of historic and archaeological sites, and the rural character of the entire region. A free-flowing river is essential to the preservation of the quality of life in this area and I invite your co-sponsorship of H.R. 6403.

Sincerely,

Mr. Speaker, I feel the issue of the Delaware's future is particularly important at this time because Saturday, May 14 is the date of a canoe trip sponsored by the Save the Delaware Coalition on that part of the river which is threatened by the Tocks Island Dam, but which would remain free-flowing under my bill. The coalition, consisting of 61 civic and environmental organizations, opposes the Tocks Island Dam, but supports preservation and enhancement of the historic, scenic, and recreational values of the Delaware Valley.

I share with my colleagues the following facts as compiled by the Save the Delaware Coalition:

THE DELAWARE RIVER: A MATTER OF LIFE—OR DEATH

A MATTER OF LIFE

The free flowing Delaware is alive today. From the Catskill Mountains in New York to tidewater, some 265 miles downstream, the river and its valley, the fertile Minisink, is alive with fish, wildlife, history, archaeology and boundless recreational opportunities. But tomorrow, it may be dead.

A MATTER OF DEATH

A threat has loomed over the Delaware since 1962 when Congress authorized the Corps of Engineers to build a 160 foot high earthen dam at Tocks Island, five miles above the legendary Delaware Water Gap. The dam would create a 37 mile long slack water impoundment subject to siltation, terminal pollution and—the ultimate death of the Delaware.

AN OPPORTUNITY

After completion of a Congressionally mandated study, the Delaware River Basin Commission (consisting of the governors of N.Y., Pa., N.J. and Delaware and the federal Secretary of the Interior) voted against construction of the dam on July 31, 1975. The Council on Environmental Quality, the Environmental Protection Agency and even the Corps of Engineers then recommended that Congress deauthorize the project. Congresswoman Millicent Fenwick (N.J.), Congresswoman Helen Meyner (N.J.), and Senator Clifford P. Case (N.J.) have now introduced bills to deauthorize the Tocks Dam.

Deauthorization would create the opportunity to develop a master land use plan to realize the area's recreational potential while preserving its natural character.

Meaningful planning for the entire region is deterred so long as the Tocks Dam remains on the Congressional books. It is time, therefore, to deauthorize the dam and get on with the necessary planning. Until this is done, the Tocks Island region can experience only continued chaos, confusion and controversy.

WHY THE TOCKS DAM?

Impetus for the dam came from the freak flooding of the Delaware in 1955, when hurricanes Connie and Diane struck in rapid succession. The dam was also intended to provide water supply and hydroelectric power. Recreation was added in 1965 with authorization for the Delaware Water Gap National Recreation Area (DWGNRA) covering 72,000 acres in New Jersey and Pennsylvania.

WHAT WOULD BE DESTROYED?

Irreplaceable losses which could be saved without Tocks include: the free flowing Delaware, more than 20,565 acres of wildlife habitat and flooded recreational and historic areas, numerous species of wildlife, an excellent game fishery and shad run, hundreds of historic sites and structures, more than 100 known archaeological sites, including evidence of Paleo-Indian culture as early as 10,000 B.C., a rich variety of vegetation and, finally, the quiet rustic character of the entire region, which would be drastically changed by the influx of 10.6 million annual visitors and resulting degradation.

Why the Tocks Dam is unnecessary?

FLOOD CONTROL

The key to flood control is flood plain management. Less than 22% of the 1955 flood damages occurred in areas which Tocks would protect. The dam would protect against 60% of the potential damage but flood plain management 78% or 18% more. Tocks flood control costs would be $74 million but flood plain management only $17 million or $57 million less. Moreover, flood plain management is environmentally sound.

WATER SUPPLY

Water supply needs can be feasibly met by high flow skimming using New Jersey's Round Valley Reservoir, alternative sources in N.J. and N.Y., and recycling and conservation measures. The need for low flow augmentation to protect the Philadelphia and Camden water supplies from salt intrusion is "substantially discounted" by a recent study for the Corps of Engineers. In any event, the study concludes that the Philadelphia intake can be moved upstream and Camden has alternative supplies.

ELECTRIC POWER

Hydroelectric power with a firm capacity of only 38 MW would be minimal. Although not an authorized purpose of the Tocks Project, a related pumped storage facility to provide peaking power is planned on Kittatinny Ridge which would destroy sections of the Appalachian Trail, Worthington State Park and threaten Sunfish Pond, a pristine glacial lake and registered National Natural Landmark. Requiring 3 KW of power to generate only 2, pumped storage would be the main cause of daily water level fluctuations, turbidity, situation, and temperature changes. Combined cycle combustion turbines and peak load pricing are feasible alternatives.

RECREATION

The splendid recreational potential can be realized in greater variety and quality without Tocks. Construction of the dam would seriously threaten recreational quality, particularly swimming, boating and fishing because the reservoir would become polluted due to excess eutrophication. Water level changes would leave debris littered mudflats instead of the clear water expected. The irreplaceable losses previously listed would further limit the potential quality and variety of recreation. Adverse impacts of 10.6 million annual visitors could be devastating. Annual visits per gross acre at Tocks would be 169 times Yellowstone, which is 31 times larger than Tocks, and 47 times Yosemite, which is 11 times larger than Tocks.

EUTROPHICATION

Numerous studies have confirmed that the Tocks Reservoir would become rapidly polluted through excess eutrophication. Drainage of agricultural effluent from the upper Delaware estimated as the equivalent of sewage from a city of 400,000 cannot be identified, collected and treated like municipal sewage because it is not discharged through pipes but drains over and through the soil itself. Not a serious problem now because the river is free flowing, these effluents would become concentrated in the relatively stagnant reservoir which acts as a sink. Rapid growth of algae, loss of game fish and serious degradation of the recreational potential is expected to follow.

ECONOMICS

Justification on economic grounds is still questionable. Initial cost estimates of $90 million have escalated to $400 million. Former CEQ Chairman, Russell Peterson and others estimated cost at $1 billion. As required by Federal law, benefits must equal costs. At an unrealistic interest rate of 3⅛%, the Army Engineers' latest benefit cost ratio is 1.6 which more recent studies calculate between minus 0.66 and 2.48. The shifting benefit cost ratio and application of questionable factors indicate that costs may well exceed benefits. Claims that the Tocks Project will stimulate economic development and employment are also tenuous as disclosed by recent studies of similar projects showing that more employment could be provided by applying the same funds to more productive purposes.

Mr. Speaker, I think it should also be noted that when a majority of the Governors comprising the Delaware River Basin Commission voted in 1975 against construction of the dam, they did so after an exhaustive study of the dam and its alternatives had been completed. The President's Council on Environmental Quality and the Environmental Protection Agency both submitted their views to the Governors

based on this study and I submit letters advocating their positions:

EXECUTIVE OFFICE OF THE PRESIDENT, COUNCIL ON ENVIRONMENTAL QUALITY, 722 JACKSON PLACE, N.W.

Washington, D.C., July 29, 1975.

DEAR GOVERNOR BYRNE: As you know, the Council on Environmental Quality has had a continuing interest in the proposed Tocks Island Lake Project. We have been concerned in particular that water quality and land use aspects of the project be carefully evaluated, and that alternatives be adequately considered.

We have reviewed the Comprehensive Study of the Tocks Island Lake Project and Alternatives and find it to be, in general, an objective and useful analysis. The study reveals that adverse environmental impacts associated with the Tocks Island Project will be significant and persistent. These include:

Potentially severe effects on water quality and, consequently, on proposed recreational uses that would result from the impoundment.

Adverse effects on fish and wildlife habitat and other natural and cultural features.

Adverse secondary impacts induced by the project, including strip commercial development, loss of open space, increased demands on local communities for public services, and increased pressure for development of downstream flood plain lands.

The study also shows that a range of feasible alternatives exists which, if pursued in appropriate combinations, could meet some or all of the legitimate needs of the region for power production, flood control, water supply, and recreation.

The Council on Environmental Quality believes that the Tocks Island Lake Project should be deauthorized. In its place, we encourage the development of an appropriate combination of alternative measures which would fulfill the needs of the citizens of the four Delaware River Basin states, while also maintaining and enhancing the existing amenities of the Delaware River Valley.

Sincerely,

RUSSELL W. PETERSON,
Chairman.

U.S. ENVIRONMENTAL PROTECTION AGENCY,

Washington, D.C., July 1975.

HON. SHERMAN W. TRIBBITT,
Governor of Delaware,
Dover, Del.

DEAR GOVERNOR TRIBBITT: I am writing to provide you with the views of the Environmental Protection Agency on the Tocks Island Lake Project which we understand will be the subject of discussion at the July 31, 1975, meeting of the Delaware River Basin Commission. As you know, EPA has in the past expressed severe environmental reservations with this project through our comments on the draft and final environmental impact statements prepared by the Corps of Engineers. We have also reviewed and commented on the draft of the Tocks Island Lake Project Review Study and have recently completed our review of the consultants' final report. While there are a number of shortcomings in the final report, it does provide an improved basis for decisionmaking on the project. From our perspective, the environmental problems which are described in this most recent report on the project would support a decision to deauthorize the Tocks Island Lake Project and to develop alternative programs to meet the needs of the residents of the Delaware River Basin and surrounding areas.

Our major concern with the project continues to be the substantial risk of eutrophication of the proposed reservoir and its attendant adverse effect on the recreational benefits attributable to the project. This concern is reflected in the final report (page IX-98) where it is stated that "Eutrophication, to the extent predicted for Tocks Island Lake, will have a detrimental effect upon the use of the lake for recreational purposes." The adverse effects of eutrophication and drawdown on recreational uses on the project have not been factored into the benefit-cost analyses.

In addition, we have expressed concerns over the secondary effects of the project. The final report provides an excellent discussion of the land use aspects of the project. However, no assurance is given that predicted adverse environmental impacts of the project will be eliminated or reduced through design and post-project operational practices if the project is implemented.

We believe that the study report did a commendable job of identifying a wide range of alternatives to each of the project functions; however, we do not agree with the analyses of needs. In our view, the report overemphasizes the needs which could be satisfied with the benefits from the project, while at the same time it underestimates the ability of available alternatives to satisfy these needs. A summary of our views on the proposed project as presented in the consultants' final report is as follows:

The flood control benefits are overstated since another flood of the magnitude of the 1955 flood would cause significantly less damage because of improvements already made.

The recreation benefits are overstated because they fail to reflect reservoir drawdown and the projected eutrophication of the impoundment.

The water supply benefits, while real, can be satisfied by a number of alternatives with less severe impacts than the Tocks Island Project.

The electric power function can be replaced by 1300 MW of combined cycle capacity.

It is our view that the needs analysis for the project fails to include some major factors which are critical to the purposes of this project, such as reduced flood risks and the availability of alternative means to satisfy the needs of the area. In addition, the benefits from the project are projected optimistically in the face of predicted adverse environmental effects. Alternatives are available to satisfy the area needs which would result in less environmental damage. Finally, the economic calculations for the project as presented in this study, particularly those related to recreation and power generation, cause us to doubt that the project will indeed result in a benefit-cost ratio greater than one.

EPA recognizes that the residents of the Delaware River Basin and surrounding areas have needs which can be served by the prudent utilization of the water resource of the area. It is our view, however, in light of the environmental and economic problems surrounding the proposed Tocks Island Lake Project, that these needs should be satisfied by less environmentally disruptive alternatives. I hope that these comments will be useful to you in deciding the future of the Tocks Island Lake Project.

Sincerely yours,

RUSSELL E. TRAIN,
Administrator.

Finally, Mr. Speaker, the Corps of Engineers itself recommended to Congressman EVINS, chairman of the Appropriations Subcommittee on Public Works that the project should be abandoned and alternatives developed:

SEPTEMBER 24, 1975.

HON. JOE L. EVINS,
Chairman, Subcommittee on Public Works, Committee on Appropriations, House of Representatives, Washington, D.C.

DEAR MR. EVINS: I submit for your consideration my recommendations together with the attached reports of the Division Engineer and the consultants on a comprehensive restudy of the *Tocks Island Lake Project* and alternatives as required by the House Committee Report on the fiscal year 1975 Public Works Appropriations Act. That act provided $1,500,000 for the restudy.

The Tocks Island Lake project was authorized by Public Law 87-874, approved October 23, 1962, as part of the project for the comprehensive development of the Delaware River Basin. Preconstruction planning and design work was initially funded in fiscal year 1964 and has continued since. Funds for land acquisition were first appropriated in fiscal year 1968 and appropriations for this purpose continued through fiscal year 1974. Funds appropriated in fiscal year 1975 were earmarked by Congress for an impartial comprehensive analysis, including alternatives, and review of the project under the direction of the Corps of Engineers in cooperation with the Delaware River Basin Commission. Congress directed that the restudy be completed and a final and definitive recommendation be submitted to the Appropriations Committee within 12 months. This report is in response to that directive of Congress.

The report of the Division Engineer presents the results of an exhaustive, coordinated restudy of the Tocks Island Lake project, the water related needed of the region and the alternative plans to meet the needs. The restudy addresses in detail the significant environmental, social and institutional concerns expressed over the years since project authorization in 1962. In summary, the Division Engineer finds that there are pressing water-related needs to be met for flood control, water supply, water-landed recreation and power. Because these needs are serious and are increasing with the passage of time, he further finds that the decision on means to meet these requirements should not be delayed. He finds that the Tocks Island Lake Project or alternative plans can meet a substantial part of the needs. Because of the efficiency of a multiple-purpose project, he finds that the Tocks Island Lake Project is the most economic solution and that it is engineeringly sound. He concluded that the project should be constructed provided this action was supported by the Governors of the affected States.

The Delaware River Basin Commission, composed of the Governors of New York, New Jersey, Pennsylvania, and Delaware, and a Federal member, met on July 31, 1975 to consider the Tocks Islands Lake project. Members of the Commission voted to reject a motion recommending that the Congress appropriate funds to commence construction of the project, but voted to approve a motion recommending that the Congress appropriate funds to complete land acquisition in the project area. The question of whether to recommend continuing authorization or deauthorization of the Tocks Island dam and reservoir was discussed but no vote was taken.

In view of the lack of State support for construction, the Division Engineer concludes that the Tocks Island Lake project should be deauthorized so that alternative plans to meet the needs of the region will be developed. He recommends that construction of the project not proceed and that the project be deauthorized.

Subsequent to action by the Commission, the Governor of Pennsylvania expressed his views on the Tocks Island Lake project in a letter to me dated August 20, 1975. A copy of that letter is enclosed. The Governor reaffirmed the Commonwealth of Pennsylvania's longstanding position favoring immediate construction of the Tocks Island Lake project, and urged that I recommend such action to the appropriate congressional committees.

I concur in the views and recommendations of the Division Engineer. With regard to a recommendation for deauthorization of the Tocks Island Lake project, however, I foresee certain problems relating to disposal

and management of lands already acquired by the Corps of Engineers for the project. In keeping with the desires of the States, certain of the acquired tracts could be logically incorporated as part of the Delaware Water Gap National Recreation Area, subject to such modification of the authority establishing the Park as is appropriate concurrent with deauthorization of the Tocks Island Lake project and Delaware River Basin Commission's modification to its comprehensive plan for the Delaware Basin.

Mr. Speaker, by designating the Delaware from Hancock, N.Y. to the Water Gap a Wild and Scenic River the Congress can terminate this wasteful water project, provide the impetus for development of flood control and water supply alternatives, and most importantly ensure for future generations the enjoyment of the free-flowing Delaware.

METRIC WEEK

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. TEAGUE. Mr. Speaker, although both Thomas Jefferson and John Quincy Adams advocated adoption of the metric system early in our history, it was not until December 1975, that Congress declared its formal support of U.S. conversion to metrics.

Unlike other nations, we have not imposed the use of metric weights and measures by law but have strongly suggested voluntary conversion.

In celebration of "Metric Week" I consider it appropriate to submit the text of the following article from Flying Colors magazine which gives a concise explanation of the metric system and how this country stands to benefit by conversion to it:

EVERYTHING YOU ALWAYS WANTED TO KNOW ABOUT METRIC—BUT DIDN'T KNOW WHAT TO ASK

(By David Martindale)

Despite all the important changes which occur in this country every year, it's unusual to find one event that affects everyone. Yet the changeover to metric will do just that. For there's no longer any doubt about it: we're giving up our feet, pounds, and gallons and adopting the metric.

So here's a metric primer designed to familiarize you with a system that will soon be a part of our lives.

What is metric?

The term "metric" refers to an internationally recognized system of weights and measures officially known as the International System of Units.

Is metric something new?

Hardly. The idea of a decimal-based system of weights and measures has been around for nearly 400 years. Yet it wasn't until the Paris Academy of Sciences first presented its report to the French National Assembly in 1791 that the essential features of metric were first outlined. Four years later, France adopted metric, but for many years the system remained exclusively a French endeavor. Here in the United States, Thomas Jefferson proposed the United States adopt a decimal-based system of weights and measures. In 1821, a similar suggestion was made by John Quincy Adams, who recommended adoption of metric in a report to Congress. But Jefferson and Adams were never heeded. And although metric had spread to most European countries by the end of the nineteenth century, the United States failed to follow suit.

Today, we stand virtually alone—an island in a metric sea.

What other countries have yet to switch to metric?

Such "giants" as Liberia, Brunei, Yemen, and Burma. Everyone else either has already adopted metric or is actively converting to the metric system.

What is so important about adopting metric?

Metric is quite simply the single standard of measurement in the world today. That's why economic considerations alone require a conversion to metric. For despite the preponderance of American influence and know-how, many of our products are no longer competitive in the world marketplace. It's only logical that metric countries favor metrically designed products. In fact, the U.S. Department of Commerce estimates that we stand to lose $600 million a year in foreign trade until we convert to metric.

So then we're going to switch, right?

Yes, we are. In December, 1975, Congress went on record supporting the conversion to metric. Yet, unlike the British and Australians who legislated metric into existence, the American conversion will be purely voluntary. Agencies of the United States government will be required to adopt metric, but no private firm will ever be forced to do so.

How long will conversion take?

Most experts agree that ten years is a minimum. But it could very well be the year 2000 before a near-total conversion is achieved.

Has conversion started already?

Yes, it has. Such large American firms as IBM, General Motors, Rockwell International, Caterpillar Tractor, and Honeywell have all started to "go metric". Considering the lucrative appeal of foreign markets, others are bound to follow. Many items in the supermarket are now marked in both standard and metric measurements. Schools have begun to teach metric, and more and more references to metric terms appear on television and in the press.

All right, granted a switch to metric will benefit the economy. But is there really anything wrong with the way we measure things now?

The system we use today is haphazard, cumbersome, and downright illogical. Known as the U.S. "Customary" system of weights and measurements, it is, for the most part, derived from a system originally developed in England. But like a clipper ship in the jet age, our Customary system is antiquated and no longer practical. The whole thing developed in an arbitrary fashion.

How so?

For example, Henry I of England was said to have decreed that a yard was the distance from his nose to the tip of his thumb. Henry III fixed the weight of a sterling as that of "32 wheatcorns in the midst of an ear." And an acre was once considered the amount of land a farmer could plow in a day. True, our present system has been refined considerably from those early days. Even so, its hardly a very scientific set of standards upon which to base the commerce of a nation.

But metric's not like that?

Not at all. Metric was developed by scientists. And because it's a planned system, it's really very simple to understand and very simple to use. Scientists don't like to hassle with complicated weights and measurements anymore than anyone else does.

Why is metric so simple?

For two reasons. First of all, metric is a decimal system. Everything is based on tens. And that makes any arithmetic—even multiplication and division—remarkably simple. Secondly, metric uses far less terms that the U.S. Customary system. The three most important units are the metre (the unit of length), the gram (the unit of weight), and the litre (the unit of liquid capacity).

Is that all?

Not quite. Prefixes are used to indicate quantities larger or smaller than their basic units. For example, the prefix DEKA means 10 times (therefore, a DEKAmetre equals 10 metres). Similarly, HECTO means 100 times (1 HECTOmetre=100 metres). And KILO means 1000 times (1 KILOmetre=1000 metres).

Three more prefixes are used to indicate quantities less than the basic unit. The first is DECI which means 1/10 (1 DECImetre=.1 metre). Then there's CENTI which means 1/100 (1 CENTImetre=.01 metre). And finally, MILLI means 1/1000 (1 MILLImetre=.001 metre).

Of course, these same prefixes are also used with grams and litres (for example, kilograms and millilitres).

That sounds like a lot to remember.

Don't worry. Only KILO and MILLI are considered "everyday" prefixes. You'll seldom use DEKA, HECTO, or DECI, and the only time you'll use CENTI is when your measuring distances.

How do you measure length in metric?

The meter (symbol: m) is the basic unit for measuring length. The metre (also spelled meter) is about 39 inches, just a little bit more than a yard. Three other units are commonly used along with the metre. The first is the kilometre (km) used in place of miles for long distances. A kilometre is about 5/8 of a mile and 1000 m=1 km. The second unit is the centimetre (cm) which is 1/100 metre. The centimetre is approximately the width of a paper clip and replaces the inch and the foot in our present system. And finally, there's the millimetre (mm); there are 25.4 millimetres in an inch.

Square and cubic measurements—such as square kilometres and cubic centimetres—define area and volume just as square miles and cubic inches do in our present system.

What about weight?

Although the gram is often called the unit of weight, technically the kilogram (kg, 1000 grams) is the base unit (the official standard of weight). The kilogram weighs about 2.2 pounds and replaces pounds in our present system. The metric ton is used to weigh very heavy objects. One metric ton is equal to 1000 kilograms or about 200 pounds more than our present ton. A gram (g) is a small unit of weight. For example, a nickel weighs about 5 grams. For extremely small weights, such as the kind used by pharmacists, metric uses the milligram (mg. 1/1000 of a gram).

And liquid measurement?

All you need to remember are two terms. The first is the litre (also spelled liter; symbol: l) which is a little more than a quart. And the second unit is the millilitre (ml, 1/1000 l) which is a very small unit of measurement. A teaspoon contains about 5 millilitres of liquid.

Is converting any easier from one unit to the other any easier with metric?

Considerably. The present U.S. Customary system isn't based on any one standard. For example, to find out how many feet are in 48 inches, you have to divide by 12. To convert 24 quarts to gallons, you divide by 4. To change 32 ounces to pounds, you divide by 16. But converting with metric is effortless, because metric is a decimal system. Multiplication and division are as easy as moving a decimal point to the left or right, like

converting $1.00 to 10 dimes or 100 cents. For example, 1.459 metres=145.9 centimeters=1459 millimetres. As long as you remember the relationships of the various prefixes (CENTI, MILLI, etc.) to the original unit, conversion is simple.

How greatly will the changeover to metric affect our lives?

Metric is going to affect everyone, but the changeover probably won't be as difficult as many people imagine. In fact, many metric terms are already part of our everyday vocabulary: 35 millimetre film, 100 millimetre cigarettes, 40 litre gas tanks, 500 milligram tablets of vitamins, and 100 metre track events. As the conversion to metric accelerates, more and more of our products will be supplied in metric quantities. Housewives will rely on metric recipes, craftsmen will use metric tools, students will solve metric problems. Gradually we will start to "think" metric the same way many people start to "think" in another language.

Will the changeover to metric be total?

No. The U.S. government has gone on record as support only logical change. In areas where tradition is concerned, no attempt will be made to convert to metric. For this reason, football fields are unlikely to change dimensions. No matter what the weather, fans will still watch the teams huddled on the fifty yard line, even when the temperature dips to a nippy 3 degrees Celsius.

CELSIUS? WHAT'S THAT?

The Celsius scale (formerly called centigrade) is the metric standard for measuring temperature. Zero degrees on the Celsius scale is the freezing point of water (32° F). One hundred degrees on the Celsius scale is the point at which water boils (212° F).

According to the Encyclopedia Britannica, "Celsius" is named for Anders Celsius, a Swedish astronomer who died in 1744 and who invented a thermometer scale based on zero degrees for the freezing point of water and 100 for the boiling point. The Celsius thermometer is used in the metric system of measurement, and what has happened, of course, is that the U.S. government is preparing us to convert to the metric system. Most of the rest of the world has been using it for years.

The Fahrenheit scale, as Britannica 3 notes is named for Gabriel Daniel Fahrenheit, a German physicist who died in 1736 and who invented a thermometer scale of 32 degrees for the freezing point of water. The Celsius scale, however, is based on the decimal system—as are all metric measurements—and is considered easier to use.

The United States is the only major industrial power that has not adopted the International System of Units, popularly known as the metric system. As Britannica notes, the metric system was created by the French in the 1790's and even the British, in 1965, finally got around to endorsing it. It is considered easier to use than our apples-and-oranges system of inches, yards, miles, pints, etc., and it would allow the U.S. to trade more easily with foreign countries.

So if the next time you buy a thermometer and it says "Celsius," just remember Mr. Fahrenheit. But don't feel sorry. He had a good long run. And, if your old Fahrenheit and new Celsius thermometers read the same, bundle up. Because when Mr. Fahrenheit and Mr. Celsius do meet, it's 40 below zero.

So how does this affect the way we record temperatures?

It means we're going to have to start thinking in terms of degrees Celsius rather than degrees Fahrenheit. Admittedly, that will take a little getting used to. For example, 25° C (77° F) is a warm summer day; 15° C (59° F) calls for a light jacket; 5° C (41° F) is a bit chilly; and −10° C (14° F) is downright cold.

It will probably take years before we become thoroughly accustomed to using the Celsius scale. But eventually we'll do it.

Why?

Because the plain truth of the matter is we have to. Metric is something we can no longer ignore. Our future is upon us; and our future, quite literally, is a metric one.

A COMPELLING CASE FOR USING U.S. TANKERS TO BRING OIL TO AMERICAN MARKET

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. EILBERG. Mr. Speaker, in the May 11, 1977 editions of the Washington Post, there appeared a full-page advertisement which makes a compelling case for using U.S. tankers to bring imported oil to America.

At a time when this Nation faces a severe drain on its energy resources, and at a time when the American economy is foundering and millions of American workers are without jobs, I think it is imperative that we take every possible step to prevent this disastrous situation from growing any more critical.

This advertisement, Mr. Speaker, was placed by a coalition of ship operators, shipbuilders and industries which support our U.S. merchant marine. I commend to my colleagues' attention this very important message:

FOREIGN OIL TANKERS THREATEN OUR ENVIRONMENT, WEAKEN OUR NATIONAL DEFENSE, AND TAKE AWAY U.S. JOBS

The United States imports 8.4 million barrels of oil a day—far more than any other country in the world. Yet only 4% of the amount is carried on ships flying the United States flag. We depend on foreign flag ships to bring in 96% of our oil! 44.2% of that is transported on ships registered in Liberia.

This alarming imbalance is largely perpetuated by American-owned multi-national concerns who operate under a system called "flags of convenience."

Through this system the tiny West African country of Liberia—a country with no natural harbor—has amassed the largest merchant marine fleet in the world. Over 1,000 tankers are registered there, yet almost none ever enter the country.

The Liberian fleet has little to do with Liberia or Liberians. It is a phantom maritime operation created in 1948 by a handful of Americans who drew up the Liberian Maritime Law, cleverly allowing a hidden identity clause to the people operating Liberian vessels. The Liberian fleet is administered and controlled, not from Liberia, but from offices on Park Avenue, New York City.

There, under shrouds of secrecy, multinational companies and others register foreign-built and manned ships with the Liberian government, "conveniently" freed of national restrictions.

It's time to turn the tide on the flags of convenience system, and give United States flag ships a larger share in the shipment of our oil.

CONTROLS PLACED ON U.S. FLAG TANKERS HELP PROTECT OUR ENVIRONMENT

Disasters such as the break-up of the Liberian *Argo Merchant* tanker in December, bring home all too clearly the fact that unsafe foreign tankers are used to transport much of our oil.

When the *Argo Merchant* went down, it created an oil slick that stretched for 120 miles. That was only one accident. Last year a record 19 tankers were lost—11 of them were Liberian.

Most accidents are caused by two factors: human error and the age of the ship.

Because our ports are too shallow for the huge new super tankers built abroad, oil is shipped to the U.S. in aging, smaller tankers. Many have long histories of accidents and faulty equipment.

There's no way to measure their hazard to our environment. And there's no way to enforce safety standards. The older ships flying foreign flags aren't subject to regular Coast Guard inspection.

In recent years, the flags of convenience fleets' average share of world casualties has been twice as high as their average share of world tonnage.

Can we afford *not* to transport our oil on U.S. ships—built with high standards, manned by trained and regulated personnel and inspected for safety?

U.S. FLAG TANKERS STRENGTHEN OUR NATIONAL DEFENSE

The United States is the number one land power yet our merchant marine ranks 10th in the world. In times of war, our fleet transported 95% of our military supplies.

The multi-national companies say that their foreign registered ships are under the "effective control" of the U.S.

Yet under the accepted principle of international law, only the state of registry has the right to requisition and control vessels flying its own flag, and *not* the nation of the vessel's owner.

Virtually every defense expert agrees that flag of convenience vessels are of questionable reliability during an emergency. Whether or not they respond to a U.S. emergency depends on where they are registered, the nationality of the crew, the nature and type of emergency, and their location at the time.

During the Yom Kippur War in 1973, Liberia prohibited any vessels flying its flag from participating in the U.S. resupply of Israel. What's to stop Liberia—or any other country—from issuing such an order again? An effective U.S. control fleet should not be considered a substitute for U.S. flag shipping. For a strong national defense, we need American-owned and -operated ships!

U.S. FLAG TANKERS HELP PUT AMERICANS BACK TO WORK AND BOOST OUR ECONOMY

There's something wrong when U.S. companies go overseas for cheap labor while so many Americans, unable to get work, must rely on unemployment benefits to survive.

If more of the oil imports were carried on U.S. ships, we could create thousands of job opportunities in shipbuilding, operating, and service industries. Jobs that would be generated in areas of chronic unemployment—without using tax dollars or deficit spending programs.

What about other Americans whose present jobs are threatened by oil spills and tanker accidents? If the oil spilled from the *Argo Merchant* had reached our shores, it would have ruined prime fishing grounds and affected the income of 10¼ million Americans. And the multi-nationals tell us we can't afford safe American shipping!

They also argue that the costs of constructing and manning U.S. ships are too high, and would be too great a burden on the U.S. consumer.

They don't tell you that the cost savings supposedly derived from the use of cheap flag of convenience vessels are not passed on to consumers. They don't tell you that their shipping costs are kept secret in their accounting departments.

We pay $33 billion a year for oil imports. We pay an additional $1 billion for foreign tankers to bring it here. Yet only an insignificant amount of the dollars we pay to the foreign tankers stays in our economy. By contrast, U.S. flag ships return 71 cents of every transportation dollar they receive to our economy.

If U.S. flag ships carried more of our oil imports we could help reverse the worst trade deficit in our history.

If you agree that it's time to turn the tide in favor of the U.S., mail in the above coupon today. The U.S. Maritime Committee to Turn the Tide will forward your message to Congress.

Go on record for supporting U.S. Flag Tankers.

IT IS ABUNDANTLY CLEAR THAT WE NEED A SAFE AND SECURE OIL TRANSPORTATION SYSTEM

Foreign oil tankers move a great deal of U.S. capital overseas. U.S. flag ships return 71 cents from every dollar they receive to our economy.

Liberian oil tankers comprise 30.2 percent of the world's tanker tonnage, but 69 percent of all tanker tonnage lost last year was Liberian. U.S. flag oil tankers are built to rigid safety specifications and are subject to regular U.S. Coast Guard inspections. Safety standards are strictly enforced for manning and operating U.S. ships.

Foreign "flags of convenience" are of questionable reliability in a national emergency. Could we count on a vessel owned by a Bahamian corporation, flying a Liberian flag, sail in the Persian Gulf, with a Chinese crew and Indian officers?

U.S. flag ships can be mobilized, in time of need, to serve as supply links to our armed services.

Foreign flag oil tankers are often used to shelter earnings from petroleum production, refining and distribution.

U.S.-built and-operated flag ships will generate substantial U.S. tax revenue.

WOMEN IN METEOROLOGY

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. STEERS. Mr. Speaker, June Bacon-Bercy, a constituent of mine, recently won $64,000 on a TV quiz show because of her great knowledge of the great American composer, John Phillip Sousa. Ms. Bacon-Bercy, who works at the National Weather Service as a meteorologist, does not plan to keep most of the money. Rather, she plans to put it into a scholarship fund for young women interested in meteorology.

I am especially heatened by these actions for two reasons. First, I served as a meteorologist for the U.S. Army Air Force in World War II, so I know meteorology to be an exciting field to which women can and will make significant contributions. I also have been involved for years in the implementation of the equal rights amendment while I served as a Maryland State senator, and it is always gratifying to see career opportunities for women expanded.

Ms. Bacon-Bercy has taken it upon herself to promote women's rights and women's opportunities, instead of just complaining about inequities. Her unselfish gift will bring more women into the professional world. I am submitting into the RECORD, the article concerning Ms. Bacon-Bercy which appeared in the Montgomery County Journal:

LOCAL WOMAN WINS $64,000 ON TV SHOW

(By Joan Sorensen)

A Silver Spring woman has won $64,000 on a TV quiz show—but she's going to give it away.

June Bacon-Bercy, a meteorologist with the National Weather Service, won $64,000 recently because of her knowledge of John Phillip Sousa, America's "March King."

But these days $64,000 isn't the big pot it was back in the 1950's when the quiz scandals rocked the industry. The show is now called "The $128,000 Question" (on WTTG–Channel 5 at 8 p.m. on Mondays) and Ms. Bacon-Bercy gets her shot at the big money later this spring.

Most of her prize money, she has announced, will go toward establishing a scholarship for young women interested in meteorology—a specialty which now has only about 100 women working in the field.

For her, the revival of TV's most famous quiz show is fun, a chance to blend two of her strongest interests—Sousa and professional opportunity for young meteorologists, especially women.

Calling the show, "a chance to let others know how great Sousa was," she's enthusiastic about the show and cool about the tensions involved.

She considers the isolation booth a place designed for thought, a "protective place," but is amused with the precautions being taken to protect the show from the taint of past scandals.

"I understand they had some trouble with the original show years ago," she said during a Journal interview. "Now they are super careful, nuts in fact. They can't even communicate with each other and the contestants can't talk to each other about much of anything. At one point there were three of us, myself, a preacher who was an expert on sex and a young meteorologist . . . we couldn't talk about sex, the weather or God. That didn't leave much."

"Now people have to write letters to the station to get on the show," she said, "but when it was just getting started again they invited contestants and I was invited."

No stranger to the media, the glamorous scientist has been on TV before as chief meteorologist with WGR–TV in Buffalo, N.Y., and done TV reporting.

When it comes to the topic of Sousa she's also on familiar ground, having almost total recall on everything having to do with the famous American bandmaster.

Her knowledge of Sousa has been building for years. "It all got started," she says, "back in the days when my husband was a medical student and I was working in Washington. I found myself putting the same 45 record on everytime I needed a lift—"God Bless America" by Connie Francis. I don't smoke or drink and I found music pepped me up. My husband got tired of it and said, "if you like the martial beat so much get some of the 'March King's' music. I did and here I am.

"The more I heard the more I liked. The more I learned about him the more he interested me. People just don't know how much he did, how much he knew, the kind of patriot he was," she said.

"Why, he was in the Marines at 13, a boy apprentice in the trombone section of the Marine Band and he joined the Navy in 1917 at the age of 62 for $1 a month. In between he led the Marine Band and built one of the nation's finest private bands, a band with some of the greatest bandsmen in American history. Meredith Willson was in his band; he and Victor Herbert managed to get copyright and royalty protection for musicians.

His 136 marches, who married him and who turned him down, his wide-ranging musical ability, his organizational talent, his enormous strength . . . the facts roll by as she talks.

Knowing that Sousa was turned down by Emma Whitfield Swallow's stepfather "because he couldn't support her" won Ms. Bacon-Bercy her $64,000 check. "And he ended up a millionaire, married to a Philadelphia girl," she adds.

"Why, during the heyday of American band music Sousa earned $300,000 in one year just from the sheet music of 'Stars and Stripes Forever', one of his favorite songs.

"But he not only made money, he was a people's musician and ran a bandsman's band.

"He drew devotion from his audiences and from his men. Once in his band they had a job for life but it was a rough life. Two concerts a day, in full uniform, (without air-conditioning) all over the country for months on end."

But as fascinated as she is with Sousa and his music it is only a part of Ms. Bacon-Bercy's life. Married to a doctor on the west coast, with two teen-age daughters (one in school on the east coast and one in school on the west coast), she keeps a family home in California and an apartment in Montgomery County because she is a meteorologist with the National Weather Service here.

As a professional meteorologist she has worked as an oceanographer, a weather analyst for the National Meteorological Center, a radar meteorologist, an engineer and a consultant in addition to her stint on TV.

Right now she is working with the weather service, which she says, "manages all the weather information and policies for the public and private aviation industry."

In addition to her professional work she is on the board of the American Meteorological Society. As a member of the board she has encouraged young scientists, particularly women and minorities. One of her ideas was to get the AMS to start judging exhibits in high school science fairs, and now she travels all over the country as a judge of meteorology exhibits as well as lecturing on the topic of meteorology.

In the meantime she watches the weather on the east coast, keeps umbrellas stashed at home and at work and gets set for the $128,000 question.

U.S. DISTRICT COURT STIPULATION AND ORDER

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 11, 1977

Mr. FRASER. Mr. Speaker, we have just been informed about an important development in the case of the National Audubon Society, Inc. against Cecil B. Andrus before the U.S. District Court, District of Columbia. The National Audubon Society filed a complaint 1 year ago charging violation of the National Environmental Policy Act, the Fish and Wildlife Coordination Act, and the Migratory Bird Treaty and Act by continued construction of the Garrison Diversion project in North Dakota.

Action came this morning when the National Audubon Society and the Secretary of the Interior signed a stipulation which was approved by an order of Judge Charles Richey agreeing to halt all further construction and land acquisition for the project except for comple-

tion of the McClusky Canal. The agreement states that in order to continue the project, a comprehensive environmental impact statement describing all reasonable alternatives must be completed and the Department of Interior must come to Congress next year with that impact statement and proposals to reauthorize the project, to authorize President Carter's recommended alternative or another alternative. No construction beyond the McCluskey Canal will continue until Congress acts on that proposal.

I commend the Interior Department and Audubon Society for working out a settlement. Hopefully, this will give Congress the information we need to consider the merits of the Garrison Diversion project. Under this agreement, Congress should be given a complete range of fully developed alternatives to review. The Department of Interior must prepare a complete EIS covering the whole project so Congress can get the total picture of possible adverse environmental impacts. Under this order, Judge Charles Richey will retain jurisdiction in the case.

I believe this decision is a big step toward getting answers to questions my home State of Minnesota has raised about violations of its water quality standards, plans for wildlife mitigation in North Dakota, and about the project's actual costs and benefits.

I hope my colleagues have time to read the agreement. The stipulation and order follow:

[U.S. District Court, District of Columbia]

STIPULATION AND ORDER

National Audubon Society, Inc., Plaintiff, v. Cecil D. Andrus, et al., Defendants. Civil No. 76-0943.

National Audubon Society filed its complaint in May 1976, raising issues relative to the environmental assessment of the Garrison Diversion Unit (the project) presented in a final environmental statement (FES 74-3, as supplemented by FES 74-21) issued in January 1974 by the federal defendants, the Secretary of the Interior and the Commissioner of the Bureau of Reclamation, as well as issues relative to alleged violations of the Fish and Wildlife Coordination Act and the Migratory Bird Treaty and Act. Pending before the court are cross-motions for summary judgment and plaintiff's motion for preliminary injunction, plus ancillary matters. The parties to this agreement recognize that the issues raised in the complaint are difficult and complex, and that their resolution in judicial proceedings is uncertain. A judgment entered in this case at this time may be a less than satisfactory conclusion for the parties, or any of them, due to the range of relief available to the court. In light of the difficulties associated with the litigation noted above and the uncertainties raised by the President's recommendation that the Garrison Diversion Unit be substantially modified, as well as the issues pending in regard to the Boundary Waters Treaty of 1909 between Canada and the United States, the parties deem a stay of this judicial proceeding to be warranted.

The parties recognize that the issues raised by plaintiff may become altered as a result of the actions of the federal defendants under this agreement and subsequent congressional action.

Accordingly, to conserve judicial resources and afford the Secretary of Interior and the Commissioner of the Bureau of Reclamation an opportunity to undertake the commitments made herein, the parties agree to a stay of all proceedings in this action, in accordance with the following terms and conditions:

A. With the exception of the actions described in paragraph B, no further construction will be c rried out; no further contracts will be entered into; no advertisement for bids on contracts will be published; no further land will be purchased, or otherwise acquired, or negotiated for; no survey will be made and no detailed engineering plans leading to the preparation of construction specifications shall be developed until the conditions set forth in paragraph D have been complied with.

B. Plaintiff agrees that:

(1) McClusky Canal may be completed, provided that: the headgates located at the west end of the McClusky Canal shall remain as presently sealed and the canal plugs located at Stations 3135+00 (between Hoffer Lake and Skunk Lake), 3173+00 (Skunk Lake), at the end of Reach 2 at the Chain-of-Lakes, and coffer dams implaced for repair of the large slide shall remain in place until Missouri River water is required for orderly development of irrigation service areas outside of the Missouri River Basin; but in any event, these barriers shall not be removed until the conditions described in paragraph D are met. It is not the intent of this agreement to prevent work related to McClusky Canal for the following and similar activities: slide repair, erosion control, road and utilities relocation, completion of the existing fish screen complex contracts, landscaping and parking areas, and operations and maintenance buildings.

(2) This agreement is not intended to prevent work related to or execution of contracts for research, operation and maintenance equipment, and office supplies, preparation of an environmental statement and preparation of studies supporting authorizing legislation.

(3) Further, acquisition of land relating to the Lonetree Reservoir from a maximum of eight landowners may be completed, provided that this land may only be acquired if the contracts for this acquisition have already been executed prior to the date of this agreement, the Department of the Interior notifies each landowner that he or she need not sell his or her land, and the landowners continue to desire to sell their land. Plaintiff will be notified of the names and addresses of each landowner, including, if more than one person has an interest in a particular piece of land, each such person. Plaintiff will have the right to discuss with each landowner whether he or she desires to sell the land. The Department of the Interior shall not acquire any such land until at least 14 days from the date of the above notification to plaintiff.

C. The federal defendants agree to complete a comprehensive supplementary environmental statement in compliance with NEPA that describes all reasonable alternatives for the project, including but not limited to the project as currently authorized by Congress, the project as proposed by President Carter (including modification of that proposal by elimination of the East Oakes Service Area and Taayer Reservoir), utilizing a sand filter for water entering the Red River Basin from the McClusky Canal (designated primarily for municipal and industrial use and perhaps other uses), use of a pipeline to connect the McClusky Canal to a point on the James River, use of the McClusky Canal without further significant construction, and no project. The Bureau of Reclamation, within its reasonable discretion, will consult with plaintiff and others concerning the scope and content of the environmental statement before and during its preparation. The draft environmental statement shall be completed on or about January 1, 1978, filed with the Council on Environmental Quality and accompany proposed legislation by the Secretary of Interior to Congress requesting authorization of an option for project development described in the environmental statement, or reauthorization or deauthorization of the project. Defendants will endeavor to complete and transmit to Congress the final environmental statment within 90 days after filing of the draft with the Council on Environmental Quality. A fish and wildlife mitigation plan will be submitted with the proposed legislation to Congress. The plan will include a discussion of compensation for losses resulting from wetland drainage, stream channelization, cultivation of native prairie, creation of hazardous nesting cover, adverse impacts on national wildlife refuges, introduction of rough fish, increased flows, and alteration of water temperatures.

D. No action prohibited by paragraph A will be undertaken until the actions taken pursuant to paragraph C have been completed and Congress has thereafter reauthorized the project or authorized an option for project development, and an additional 60 days have elapsed.

E. The Secretary of Interior will notify Congress of this stipulation and order by transmitting a copy thereof to the appropriate committees of Congress. In the letters of transmittal, the Secretary will indicate that it is the belief of the parties that consideration of authorizing legislation relative to the Garrison Diversion Unit should await submittal and consideration by Congress of the proposed legislation and environmental statement described herein.

F. Nothing in this stipulation and order shall be construed as precluding any party from taking any position relative to the project or its alternatives it deems appropriate, or as conceding any of the legal issues or defenses thereto raised by the pleadings. The parties agree not to take any action to attempt to nullify this agreement.

G. All pending motions and responses thereto are hereby withdrawn without prejudice by the parties upon approval of this stipulation and entry of this order by the court. The pleadings shall remain filed.

H. This agreement is non-severable. If any portion of the agreement becomes unenforceable, is violated, or is nullified, the other party to this agreement may abrogate the entire agreement or any portion of it. This agreement shall be enforced by the United States District Court for the District of Columbia as part of the pending litigation.

Dated May 11, 1977.

CHARLES K. DAYTON,
BRUCE J. TERRIS,
Attorneys for Plaintiff.

Approved:

CHARLES H. CALLISON,
Executive Vice President, National Audubon Society.

ANDREW F. WALCH,
TIM E. SLEETH,
Attorneys for Federal Defendants.

Approved:

CECIL D. ANDRUS,
Secretary of Interior.

So ordered:

CHARLES R. RICHEY.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when

scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, May 12, 1977, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MAY 13

9:00 a.m.
Human Resources
To hold hearings on the nominations of Peter G. Bourne, of the District of Columbia, to be Director, and Lee I. Dogoloff, of Maryland, to be Deputy Director, both of the Office of Drug Abuse Policy.
Until noon 4232 Dirksen Building

9:30 a.m.
*Governmental Affairs
Federal Spending Practices and Open Government Subcommittee
To receive testimony on alleged mismanagement in the Small Business Administration's minority business activities.
1114 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
Consumer Affairs Subcommittee
To resume hearings on H.R. 5294, S. 656, S. 918 and S. 1130, to amend the Consumer Protection Act so as to prohibit abusive practices by independent debt collectors.
5302 Dirksen Building
Energy and Natural Resources
To resume hearings on the President's energy program.
3110 Dirksen Building
Governmental Affairs
Energy, Nuclear Proliferation, and Federal Services Subcommittee
To continue hearings on S. 897, to strengthen U.S. policies on nuclear nonproliferation, and to reorganize certain nuclear export functions.
3302 Dirksen Building

12:00 noon
Human Resources
Aging Subcommittee
To hold hearings on S. 519 and S. 1283, to authorize funds for programs to provide home-delivered meals for the elderly.
4232 Dirksen Building

MAY 16

9:30 a.m.
Finance
Taxation and Debt Management Subcommittee
To receive testimony on proposals designed to encourage economic growth and employment.
2221 Dirksen Building

10:00 a.m.
Agriculture, Nutrition, and Forestry
Environment, Soil Conservation, and Forestry Subcommittee
To hold hearings on S. 1360, to establish an Advisory Committee on Timber Sales Procedure.
324 Russell Building
Banking, Housing, and Urban Affairs
To hold oversight hearings on federally guaranteed loans to New York City.
5302 Dirksen Building
Energy and Natural Resources
To hold hearings on the nomination of Adrian P. Winkel, of Maryland, to be High Commissioner of the Trust Territory of the Pacific Islands.
3110 Dirksen Building
Select Indian Affairs
To resume hearings on S. 1377, extending the time for Indian tribes to bring actions before the Indian Claims Commission.
Room to be announced
Special Aging
To hold hearings concerning development of alternatives to institutional health care for older Americans.
6226 Dirksen Building

MAY 17

9:30 a.m.
Environment and Public Works
Regional and Community Development Subcommittee
To hold oversight hearings on the implementation of the Public Works Employment Act of 1977.
4200 Dirksen Building
Finance
Taxation and Debt Management Subcommittee
To receive testimony on proposals designed to encourage economic growth and employment.
2221 Dirksen Building

10:00 a.m.
Appropriations
Transportation Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1978 for DOT, to hear Secretary of Transportation Adams.
1224 Dirksen Building
Banking, Housing, and Urban Affairs
To continue oversight hearings on federally guaranteed loans to New York City.
5302 Dirksen Building
Energy and Natural Resources
To consider pending committee business.
3110 Dirksen Building
Special Aging
To continue hearings concerning development of alternatives to institutional health care for older Americans.
6226 Dirksen Building

MAY 18

9:00 a.m.
Government Affairs
Subcommittee on Reports, Accounting, and Management
To resume hearings to review the processes by which accounting and auditing practices and procedures, promulgated or approved by the Federal Government are established.
6202 Dirksen Building

9:30 a.m.
Energy and Natural Resources
Public Lands and Resources Subcommittee
To hold hearings on S. 1360, to establish an Advisory Committee on Timber Sales Procedure.
3110 Dirksen Building
Human Resources
Alcoholism and Drug Abuse Subcommittee
To hold hearings on S. 1107, the Occupational Alcoholism Prevention and Treatment Act of 1977.
Until 12:30 p.m. 4332 Dirksen Building
Rules and Administration
To resume hearings to receive testimony in behalf of requested funds for activities of Senate committees and subcommittees.
301 Russell Building

10:00 a.m.
Appropriations
Transportation Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for DOT.
1224 Dirksen Building
Banking, Housing, and Urban Affairs
To continue oversight hearings on federally guaranteed loans to New York City.
5302 Dirksen Building
Commerce, Science, and Transportation
To hold hearings on the nomination of John McGrath Sullivan, of Pennsylvania, to be Administrator of the Federal Railroad Administration.
5110 Dirksen Building
Judiciary
Criminal Laws and Procedures Subcommittee
To hold hearings on S. 1382, to establish rational criteria for the imposition of the death penalty.
2228 Dirksen Building
Select Indian Affairs
To hold hearings on S. 103, 667, and 785, to convey certain Federal land to the Ely Indian Colony, Paiute, and Shoshone Tribes.
Room to be announced
Special Aging
To continue hearings concerning development of alternatives to institutional health care for older Americans.
6226 Dirksen Building

2:00 p.m.
Rules and Administration
To continue hearings to receive testimony in behalf of requested funds for activities of Senate committees and subcommittees.
301 Russell Building

MAY 19

9:30 a.m.
Human Resources
Alcoholism and Drug Abuse Subcommittee
To continue hearings on S. 1107, the Occupational Alcoholism Prevention and Treatment Act of 1977.
Until 12:30 p.m., 1202 Dirksen Building
Rules and Administration
To continue hearings to receive testimony in behalf of requested funds for activities of Senate committees and subcommittees.
301 Russell Building

9:45 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on S. 695, to impose on former Federal procurement personnel an extended time period during which they may not work for defense contractors.
5302 Dirksen Building

10:00 a.m.
Human Resources
Health and Scientific Research Subcommittee
To hold hearings on S. 1391, the Hospital Cost Containment Act of 1977.
4232 Dirksen Building
Judiciary
Criminal Laws and Procedures Subcommittee
To continue hearings on S. 1382, to establish rational criteria for the imposition of the death penalty.
1318 Dirksen Building

MAY 20

10:00 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 695, to impose on former Federal procurement personnel an extended time period during which they may not work for defense contractors.
5302 Dirksen Building
Human Resources
Health and Scientific Research Subcommittee
To continue hearings on S. 1391, the Hospital Cost Containment Act of 1977.
4232 Dirksen Building

*Joint Economic
To receive testimony on the economic impact of the President's energy proposals.
6202 Dirksen Building

MAY 23

9:00 a.m.
Energy and Natural Resources
Public Lands and Resources Subcommittee
To hold oversight hearings on the implementation of the Wild Horses and Burros Act.
3110 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 695, to impose on former Federal procurement personnel an extended time period during which they may not work for defense contractors.
5302 Dirksen Building
Governmental Affairs
Intergovernmental Relations Subcommittee
To hold hearings on S. 600, the Regulatory Reform Act of 1977.
6226 Dirksen Building
Select Indian Affairs
To hold hearings on S. 905, the Central Arizona Indian Tribal Water Settlement Act of 1977.
Room to be announced

MAY 24

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on S. 657, to establish an Earth Resources and Environmental Information System.
5110 Dirksen Building
Select Small Business
To resume hearings on alleged restrictive and anticompetitive practices in the eyeglass industry.
424 Russell Building

10:00 a.m.
Energy and Natural Resources
Energy Production and Supply Subcommittee
To hold oversight hearings to review the proposed exchange of land between the Superior Oil Company and the Federal Government.
3110 Dirksen Building
Foreign Relations
To hold hearings on Convention on the Prevention and Punishment of the Crime of Genocide (Exec. O, 81st Cong., 1st sess.).
4221 Dirksen Building
Governmental Affairs
Intergovernmental Relations Subcommittee
To continue hearings on S. 600, the Regulatory Reform Act of 1977.
Governmental Affairs
Subcommittee on Reports, Accounting, and Management
To resume hearings to review the processes by which accounting and auditing practices and procedures, promulgated or approved by the Federal Government are established.
6202 Dirksen Building

MAY 25

9:00 a.m.
Energy and Natural Resources
Energy Conservation and Regulation Subcommittee
To hold hearings on S. 19, S. 743, and H.R. 130, to provide for the protection of franchised distributors and retailers of motor fuel.
3110 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To continue hearings on S. 657, to establish an Earth Resources and Environmental Information System.
5110 Dirksen Building
Energy and Natural Resources
Energy Production and Supply Subcommittee
To resume hearings on S. 977, to conserve gas and oil by fostering increased utilization of coal in electric generating facilities and in major industrial installations.
4200 Dirksen Building
Select Small Business
To continue hearings on alleged restrictive and anticompetitive practices in the eyeglass industry.
424 Russell Building
Select Indian Affairs
To hold hearings on S. 660, seeking an agreement with the Cherokee, Choctaw, and Chickasaw Indian Tribes of Oklahoma for the purchase or lease of their rights in the riverbed of the Arkansas River.
Room to be announced
*Veteran's Affairs
To hold hearings on S. 247 and S. 1414, to provide recognition to the W.W. II Women's Air Forces Service Pilots and W.W. I Signal Corps telephone operators, respectively; and S. 129, to restore rights and benefits to certain Filipino combat veterans of W.W. II.
318 Russell Building

10:00 a.m.
Governmental Affairs
Intergovernmental Relations Subcommittee
To continue hearings on S. 600, the Regulatory Reform Act of 1977.
6226 Dirksen Building
*Joint Economic
To receive testimony on the economic impact of the President's energy proposals.
1114 Dirksen Building
Select Small Business
To hold hearings on S. 807, to authorize grants to assist individuals and small business concerns in developing solar energy equipment and energy-related inventions.
235 Russell Building

1.00 p.m.
Governmental Affairs
Governmental Efficiency Subcommittee
To hold hearings to receive testimony on a GAO study alleging inaccurate financial records of the Federal flood insurance program.
1224 Dirksen Building

MAY 26

9:30 a.m.
Energy and Natural Resources
Public Lands and Resources Subcommittee
To hold hearings on S. 1338, to authorize the issuance of permits on public domain national forest lands for commercial outdoor recreation activities.
3110 Dirksen Building
Select Small Business
To continue hearings on alleged restrictive and anticompetitive practices in the eyeglass industry.
235 Russell Building

10:00 a.m.
Foreign Relations
To continue hearings on Convention on the Prevention and Punishment of the Crime of Genocide (Exec. O, 81st. Cong., 1st sess.).
4221 Dirksen Building
Governmental Affairs
Subcommittee on Reports, Accounting, and Management
To continue hearings to review the processes by which accounting and auditing practices and procedures, promulgated or approved by the Federal Government, are established.
6202 Dirksen Building
Select Small Business
To continue hearings on S. 807, to authorize grants to assist individuals and small business concerns in developing solar energy equipment and energy-related inventions.
424 Russell Building

JUNE 3

11:00 a.m.
Joint Economic
To hold hearings to receive testimony on the employment/unemployment situation in May.
1202 Dirksen Building

JUNE 6

10:00 a.m.
Commerce, Science, and Transportation
Communications Subcommittee
To hold oversight hearings on the cable TV system.
235 Russell Building
Select Indian Affairs
To hold oversight hearings on the Indian Education Reform Act (P.L. 93-638).
Room to be announced

JUNE 7

10:00 a.m.
Commerce, Science, and Transportation
Communications Subcommittee
To continue oversight hearings on the cable TV system.
235 Russell Building
Foreign Relations
To hold hearings on an agreement with Canada concerning the transit oil pipeline (Exec. F, 95th Cong., 1st sess.), and the Inter-American Treaty of Reciprocal Assistance (Exec. J, 94th Cong., 1st sess.).
4221 Dirksen Building
Human Resources
Health and Scientific Research Subcommittee
To hold hearings to evaluate information upon which the FDA based its decision to propose regulations banning the use of saccharin.
4232 Dirksen Building
Joint Economic
Economic Growth and Stabilization Subcommittee
To hold hearings on economic development in rural areas.
1202 Dirksen Building
Select Indian Affairs
To continue oversight hearings on the Indian Education Reform Act (P.L. 93-638).
Room to be announced

JUNE 8

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on S. 421, to establish a program to educate the public in understanding climatic dynamics.
5110 Dirksen Building

10:00 a.m.
Commerce, Science, and Transportation
Communications Subcommittee
To continue oversight hearings on the cable TV system.
235 Russell Building
Human Resources
Health and Scientific Research Subcommittee
To continue hearings to evaluate information upon which the FDA based its decision to propose regulations banning the use of saccharin.
4232 Dirksen Building
Joint Economic
To hold hearings to review economic conditions and to discuss the future outlook.
6202 Dirksen Building

JUNE 9

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To continue hearings on S. 421, to establish a program to educate the public in understanding climatic dynamics.
5110 Dirksen Building

10:00 a.m.
Joint Economic
To continue hearings to review economic conditions and to discuss the future outlook.
1202 Dirksen Building

JUNE 10

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To continue hearings on S. 421, to establish a program to educate the public in understanding climatic dynamics.
5110 Dirksen Building

JUNE 12

10:00 a.m.
Foreign Relations
To hold hearings on the Vienna Convention on the Law of Treaties (Exec. L, 92nd Cong., 1st sess.).
4221 Dirksen Building

HOUSE OF REPRESENTATIVES—*Thursday, May 12, 1977*

The House met at 11 o'clock a.m.

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. WRIGHT) laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
May 12, 1977.

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore for today.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

Rev. Jeffrey U. La Rouere, associate pastor, Church of the Holy Spirit, Forestville, Md., offered the following prayer:

Brother Lord, may Your presence itself shower upon these men and women, given the precious trust to speak for our freedom as a people. Let them be inspired to heed the gentle promptings of Your Spirit, so that they might be worthy and ethically motivated servants. Let them indeed realize that they serve the people as brothers and sisters, united in cooperation and selflessness.

You do give them the opportunity to "build the Earth," and let it remain our own. May they never shirk their responsibilities, multiply their troubles, or compromise their principles. Let them always be aware that they are invested with the sacred duty of building a better city within the very heart of man.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 735. An act to amend the Federal Aviation Act of 1958 relating to eligibility for aircraft registration; and

H.R. 5040. An act to authorize additional appropriations for the Department of State for fiscal year 1977.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 5840) entitled "An Act to amend the Export Administration Act of 1969 in order to extend the authorities of that Act and improve the administration of export controls under that Act, and to strengthen the antiboycott provisions of that Act," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. PROXMIRE, Mr. SPARKMAN, Mr. WILLIAMS, Mr. MCINTYRE, Mr. CRANSTON, Mr. STEVENSON, Mr. BROOKE, Mr. TOWER, Mr. GARN, and Mr. HEINZ to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 1279. An act to provide temporary authorities to the Secretary of Commerce to facilitate emergency actions to mitigate the

impacts of the 1976–77 drought and promote water conservation; and

S. 1468. An act to amend the Energy Supply and Environmental Coordination Act of 1974.

DISCHARGING COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION FROM FURTHER CONSIDERATION OF H.R. 6305 AND REREFERRAL OF H.R. 6305 TO COMMITTEE ON THE JUDICIARY

Mr. JOHNSON of California. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from the further consideration of the bill (H.R. 6305) to direct the Attorney General to provide for the construction of a correctional center in Los Angeles County, Calif., and that the bill be re-referred to the Committee on the Judiciary.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

PERMISSION FOR COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO FILE REPORTS ON HOUSE RESOLUTION 322, H.R. 6010, H.R. 6401, H.R. 6197, AND H.R. 5885

Mr. JOHNSON of California. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation may have until midnight tonight to file reports on the following resolution and bills:

H. Res. 322, which directs the Architect of the Capitol to conduct a feasibility study and report on using solar energy in connection with the heating, cooling, and hot water systems of the House Office Building complex;

H.R. 6010, to amend title XIII of the Federal Aviation Act of 1958 to expand the types of risks which the Secretary of Transportation may insure or reinsure, and for other purposes;

H.R. 6401, to authorize appropriations for the administration of the Deepwater Port Act of 1974;

H.R. 6197, to amend the Disaster Relief Act of 1974 to provide for authorization of appropriations thereunder through fiscal year 1978; and

H.R. 5885, authorizing additional appropriations for prosecution of projects in certain comprehensive river basin plans for flood control, navigation, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

THE PLIGHT OF AMERICA'S WHEAT FARMERS

(Mr. PRESSLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PRESSLER. Mr. Speaker, I would like to call the attention of the House of Representatives to the tragic situation our wheat farmers are facing throughout our Nation.

Many of our wheat farmers are literally going broke or have gone broke and up to one-fourth of them will not be able to repay their loans on wheat this year.

Mr. Speaker, the wheat target price that has been set is far too low, and we are going to lose a generation of family wheat farmers if something is not done. I think all of America has an interest because consumers have an interest in the preservation of the family farm. If we lose the family farm, which is the most efficient unit of production, it will be replaced by the corporate farm, which is far less efficient and which is much more likely to engage in price fixing of food in the future in our country.

Mr. Speaker, I think the House should be aware of the great trouble that our wheat farmers are in. Coming from a family farm myself I am well aware of the extreme hardship our wheat producers are suffering. We must act on the trade front and on the domestic price front to get relief for our wheat farmers.

LANDING OF THE CONCORDE SST AT KENNEDY AIRPORT

(Mr. SCHEUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SCHEUER. Mr. Speaker, this morning, Judge Milton Pollack of U.S. Federal District Court in Manhattan, ruled that the port authority must allow the Concorde SST to land at Kennedy Airport.

Two weeks ago, the judge previewed his decision as he criticized the port authority and suggested that the port authority needs to learn to "think it is still part of the United States."

Mr. Speaker, I represent the congressional district in which Kennedy Airport is located. Working together, we in Howard Beach, Lindenwood, Laurelton, Rosedale, Cambria Heights, the Rockaways, Canarsie, Mill Basin, the Flatlands, and East New York, have fought to reduce the horrendous noise which emanates from the airport and is mercilessly pounding at our senses and our psyches. The port authority, the U.S. Department of Transportation, and our own U.S. Congress, have begun the process of forcing a reduction in aircraft and airport noise levels across the country at the cost of several billion dollars to be paid by the airlines, and ultimately, by the traveling public.

Now the operators of the Concorde—a far noisier plane than any other in the world—insist on forcing us to accept it into Kennedy Airport and a Federal judge tells us to learn to think we are "still part of the United States" and orders us to allow the plane into our community.

What we want is to be allowed to be "part of the United States" rather than being "the aircraft noise capital" of the world.

Judge Pollack's decision has struck a cruel blow at our communities. I do not believe that the judge's opinion will be supported on appeal and I have urged the port authority to act swiftly to appeal this decision.

INTERNATIONAL DEVELOPMENT AND FOOD ASSISTANCE ACT OF 1977

Mr. MEEDS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 556 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 556

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6714) to amend the Foreign Assistance Act of 1961 to authorize development assistance programs for fiscal year 1978, to amend the Agricultural Trade Development and Assistance Act of 1954 to make certain changes in the authorities of that Act, and for other purposes, and all points of order against section 206 of said bill for failure to comply with the provisions of clause 5, rule XXI are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on International Relations, the bill shall be read for amendment under the five-minute rule by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Washington (Mr. MEEDS) is recognized for 1 hour.

Mr. MEEDS. Mr. Speaker, I yield 30 minutes to the gentleman from Illinois (Mr. ANDERSON), pending which I yield myself such time as I may consume.

Mr. Speaker, the resolution provides for the consideration of the bill (H.R. 6714), the International Development and Food Assistance Act of 1977.

It is a 1-hour open rule and provides for waiver of points of order against section 206 of the bill for failure to comply with clause 5, rule XXI, which prohibits appropriation language in authorization bills.

Also, the rule provides that the bill shall be read for amendment under the 5-minute rule by titles instead of by section.

The bill authorizes $613.2 million for food and nutrition programs of the Agency for International Development. These funds are to be used to stimulate agricultural production in poorer countries so that they can produce their own food.

The bill also contains authorization of $181 million for population planning, and includes provisions to encourage further study of the relationship between population growth and economic development.

Authorization of $10 million is made for the development and use of local and

small-scale energy sources in rural areas of developing countries.

Human rights provisions are extended for food for peace programs and limited funding is authorized for studying and carrying out activities which promote human rights.

Authorization is made for participation by the United States in a long-term international undertaking for economic development in the Sahel countries in Africa.

The bill also directs AID to give special assistance programs which help integrate women in the developing economies of recipient nations.

The total authorization provided for the international development assistance and international disaster assistance programs set out in this bill amounts to $1,706,950,000.

Mr. Speaker, the administration and the committee are to be commended for presenting this legislation which embodies a "direct relief to people" effort to attack the problems of hunger in the developing countries. I urge the adoption of the rule so that the House may consider this legislation.

Mr. ANDERSON of Illinois. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is a 1-hour open rule providing for the consideration of the bill, H.R. 6714, the International Development and Food Assistance Act of 1977. The rule waives points of order against section 206 of the bill for failure to comply with clause 5 of rule XXI which prohibits appropriations on an authorization bill. Section 206 establishes a new food-for development program under which funds from title I concessional sales may be used for agricultural and rural development, including voluntary family planning, health and nutrition programs. Under this new feature, funds generated by local sale of commodities may be used for these purposes and credited against repayments of loans made by the United States. According to the Parliamentarian's office, this loan repayment forgiveness provision, conditioned on the transfer of revenues from local commodity sales to approved development programs, technically constitutes an appropriation of funds and thus necessitates this waiver.

The only other special feature of this rule is that it shall be read by titles instead of sections for amendment under the 5-minute rule.

Mr. Speaker, H.R. 6714 authorizes $1.7 billion in fiscal year 1978 for various international development assistance programs. This legislation builds on the new directions foreign aid policy charted by Congress in 1973 which targeted funds for the most needy nations, with special emphasis on food and nutrition, population planning and health, and education and human resources. Those new directions were reinforced by a 2-year extension in 1975 which significantly reformed the food-for-peace program.

The bill which will be before us today will carry forward those new directions by still more salutary changes in our foreign assistance efforts. This legislation allocates one-third of the funds for agricultural and rural development in poor countries, with special emphasis on helping those countries increase their own food production. The bill authorizes an additional $181 million for population planning and $106 million for health programs; $85 million is authorized for education, and $110 million for technical assistance, energy, and other projects; $272 million is designated for multilateral assistance through international organizations, and $200 million for Sahel development. The bill also makes further amendments to the food-for-peace program (P.L. 480) including sanctions against countries which engage in gross violations of human rights, removing restrictions on countries which trade with Cuba and Vietnam, and permitting loan forgiveness on local sales of commodities if the proceeds are channeled into certain approved development projects under the new food-for-development program I have already discussed.

Mr. Speaker, it has often been said that foreign aid has no natural constituency in the United States and we have all received mail from time to time critical of any foreign aid so long as we have unmet needs here at home. And yet, the Congress has continued to recognize that we not only have a humanitarian obligation to assist those nations less fortunate than ours, but also that it is in our national self-interest to do so. I think this is best summed up on page 5 of the committee report on this bill which reads, and I quote:

> The programs of U.S. economic assistance abroad authorized in this legislation are . . . in the self-interest of the United States because improvement in the lot of the world's hungry and poor lessens pressures which could erupt in international conflict involving our country.

The report goes on, and again I quote:

> Such programs additionally provide benefits for the American economy. The raw materials for U.S. industry come increasingly from foreign sources, particularly from the developing countries which we are now helping to get started on their own broadgaged economic development. These countries in turn are becoming increasingly important as markets for American products.

And the report concludes:

> And from the standpoint of U.S. foreign policy, the legislation is a major instrument in America's new relationships with the Third World as well as a practical expression of the desire of the United States to help those in need.

Mr. Speaker, I have noted with interest in the past 2 or 3 years that there actually is a growing constituency for U.S. foreign development assistance. This growing concern and commitment to helping less developed countries has emanated from church congregations across this land. Perhaps television more than anything else has brought into our homes the painful realities on world hunger and starvation in places like Bangladesh and the Sahel region. We can no longer turn our backs to these nations and ignore their problems. As an island of affluence in a sea of poverty, we are coming to recognize our growing interdependence with the rest of the world and our moral duty to help other countries help themselves. Interdependence is no longer just an option, but an imperative for the survival of this planet.

Mr. Speaker, I urge adoption of this rule and support for the development assistance bill it makes in order for consideration.

Mr. Speaker, I have no further request for time, and I reserve the remainder of my time.

Mr. MEEDS. Mr. Speaker, I want to commend the gentleman from Illinois (Mr. ANDERSON) for a very fine statement and join with him in stating my own belief that this foreign aid bill I believe to be a very fine departure from years ago, at least in that it is more people-oriented and directed to small programs that really reach the people, rather than the massive dam building and steel mill programs that we have had in the past. I think it is a good bill. I certainly agree with my colleague, the gentleman from Illinois (Mr. ANDERSON), that it is, among other things, clearly not only within the humanitarian interests of the United States but also the best interests of the United States to provide this kind of aid.

I have no further request for time, Mr. Speaker, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LEVITAS. Mr. Speaker, I object to the vote on the ground that a quorum is not present, and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 380, nays 14, not voting 38, as follows:

Mr. Price with Mr. Stockman.
Mr. Dingell with Mr. Conable.
Mr. Ambro with Mr. Quillen.
Mr. Van Deerlin with Mr. Walker.
Mr. Roe with Mr. Wiggins.

Messrs. BONKER and SEIBERLING changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. ZABLOCKI. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6714) to amend the Foreign Assistance Act of 1961 to authorize development assistance programs for fiscal year 1978, to amend the Agricultural Trade Development and Assistance Act of 1954 to make certain changes in the authorities of that act, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. ZABLOCKI).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 6714, with Mr. EVANS of Colorado in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Wisconsin (Mr. ZABLOCKI) will be recognized for 30 minutes, and the gentleman from Michigan (Mr. BROOMFIELD) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the bill before the Committee of the Whole—H.R. 6714, the International Development and Food Assistance Act of 1977—authorizes $1.7 billion for bilateral economic development assistance to most needy countries for fiscal 1978, and makes various other amendments to the Foreign Assistance Act and to Public Law 480, the food for peace program.

It is a good bill, drafted by the International Relations Committee following hearings and recommendations from its subcommittees, designed to serve humanitarian interests and at the same time the national interests of the United States.

It carries forward the American tradition of extending help to people in need, while at the same time encouraging the developing countries to help themselves, in a way which will insure the most effective use of our aid funds.

It is a bill which contains the major provisions requested by the President as a necessary part of his foreign policy program. It has bipartisan backing.

The $1.7 billion in authorizations for fiscal 1978 include the following:

The sum of $613 million—more than one-third of the total—for agricultural production, rural development and nutrition assistance to needy countries, to help in the campaign to increase food supplies and combat the malnutrition which afflicts the impoverished majorities in developing countries.

The sum of $181 million for assistance in population planning, and $106 million for health.

The sum of $85 million for education and human resources development, mainly to help improve education systems in poor countries.

The sum of $110 million for various forms of technical assistance, including technical aid to developing countries in developing non-nuclear sources of energy.

The sum of $50 million for U.S. participation in an international development program for the Sahel, which suffered from severe drought in recent years.

The sum of $272 million for U.S. contributions to international organizations and programs.

The sum of $220 million for operating expenses for the Agency for International Development.

The sum of $25 million for international disaster assistance worldwide.

The sum of $20 million for help to the victims of the recent earthquakes in Italy.

And $25 million for American schools and hospitals abroad.

The total of $1,706,950,000 is $152 million above the President's budget request for fiscal 1978—but the committee, after economizing where it could, nonetheless felt the other amounts are equally justified. I will identify for you the principal reasons:

For the food and nutrition assistance program, $61 million was added to provide for the potential renewal of a U.S.

bilateral aid program with India. This is simply a renewal of an amount previously proposed by the executive branch but not used last year. As Members know, there was a significant and encouraging change in India resulting from the elections this spring. The committee feels we should be in a position to take advantage of this potential aid relationship to the largest country in the developing world.

The sum of $14 million is added for assistance in the area of population planning, which is an effort strongly supported by the Congress.

The sum of $10 million is added for technical assistance to developing countries, mainly in the field of non-nuclear energy.

The sum of $17.5 million is for American schools and hospitals abroad, to restore that program to the level of $25 million which Congress has consistently approved over the past several years.

The sum of $26 million is for U.S. voluntary contributions to international organizations, such as UNDP, the U.S. Children's Fund, the OAS voluntary programs, and other worthwhile undertakings which were not included in the Presidential request.

And $20 million is added for assistance to victims of the earthquakes which struck Italy last year, an item for which there is no budget request but which has substantial congressional support.

Having pointed to the increases in this bill above the Presidential request, all of which are well merited, I wish to stress at the same time that the executive branch budget is not the only yardstick to use.

We have our own congressional budget measurements. If one looks at those, you will see that the total for international affairs spending for fiscal 1978 is running below the prospective congressional ceiling.

Furthermore, there are important nonbudget considerations such as our trade balances with developing countries—and most of them get nothing from this bill. Our trade surplus with developing countries was $8.9 billion in 1975.

And of course, most of what is in this bill is spent right here in the United States for the goods and services supplied. Of the $1.3 billion for development assistance in 1975, $1 billion was spent in the United States.

Mr. Chairman, there are other provisions of the bill which do not involve new funding. Basically, these are amendments to the Foreign Assistance Act and to Public Law 480 which strengthen the "new directions" mandated for foreign economic aid in 1973 and the food for peace reforms of 1975. These provisions assist the President's new initiatives for a constructive U.S. approach in the so-called "north-south dialog" with the world's developing nations.

We include recommendations designed to help improve the status of women and increase their integration into the national economies of developing countries, and thus help the total development effort.

The committee approved a human rights provision to the food for peace program similar to that which is already in effect for economic development assistance.

There are also provisions to encourage development in poor countries of alternative, nonnuclear sources of energy.

For Public Law 480, the food-for-peace program, we raise the minimum required for Public Law 480 title II humanitarian grant programs, which are administered to the needy abroad by private voluntary agencies.

And we add to Public Law 480 a food-for-development provision which is designed to give added incentive for the most effective use of Public Law 480 food for agricultural development in poor countries. The committee recommends debt forgiveness on Public Law 480 concessional sales for the countries undertaking special development programs with the proceeds from the food they receive.

Members may also wish to note that several restrictions in existing law against aid to countries trading with Vietnam or Cuba are removed. These restrictions have become outdated and relatively meaningless, since they are already subject to Presidential waiver. However, this bill in no way changes present restrictions against U.S. aid to either Vietnam and Cuba.

In sum, H.R. 6714 stresses the humanitarian aspect of our foreign policy by focusing on basic human needs of the poor in developing countries. It stresses self-help by the developing countries. And it seeks to use our funds in the most effective way to achieve these ends.

At the same time it is a bill very much in our national self-interest. To the extent that we can improve the lot of the hungry and poor abroad, we are lessening pressures which could erupt in international conflict involving our country.

Also, the developing countries receiving assistance under these programs are becoming increasingly important sources for raw materials which we need. And as their economies expand, so do their purchases of American products.

I urge the House to overwhelmingly approve this bill because of the meritorious provisions contained therein.

Mr. BROOMFIELD. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would first like to congratulate our chairman, the gentleman from Wisconsin (Mr. ZABLOCKI), who has done such an excellent job in handling this bill before our committee.

I certainly want to join in the gentleman's remarks in articulating the purpose of this legislation.

I rise in support of H.R. 6714. This bill is a continuation of the "new directions" approach developed by the International Relations Committee in 1973 and refined in the last few years with the support of the Ford administration.

The hallmark of this approach is its movement away from the large, showplace type of projects which once characterized U.S. development assistance programs and a movement toward a new emphasis on programs to increase the capacity for self-help of the neediest sectors of the population in developing nations. This is the heart of our "new directions" philosophy.

In my opinion, this legislation would provide a reasonable and justifiable level of assistance to the people of developing nations.

A few other AID donor countries give more assistance as a percentage of GNP, by some measures, than the United States. However, the quality and nature of the assistance given is one of the most important aspects in assessing the value of foreign aid. By any measure, I believe the United States excels in this respect.

One of the most fundamental problems facing developing countries today is the need for progress in rural development to improve their food production and distribution capabilities. This facet of development is basic to a long-term capacity for self-help. America has demonstrated a unique ability and expertise in the area of agricultural productivity. We can therefore contribute very constructively to the overall development of the world's neediest people by helping them develop appropriate skills in agricultural production and distribution.

Indeed, the legislation we are considering strongly recognized this fact. More than one-third of the funds authorized by H.R. 6714 are allocated to agricultural and rural development, with particular emphasis on improving the productivity of small farmers who make up the vast majority of the populations of most recipient nations. H.R. 6714 also adds a new "food for development" provision to U.S. food aid programs, further emphasizing the use of our Public Law 480 title I food aid to promote rural development in needy countries.

Some of my colleagues remain skeptical about foreign assistance programs in general. In this regard, I want to point out that the levels of assistance authorized by this legislation are justified by enlightened self-interest as well as the compelling humanitarian concerns more frequently cited. Our development aid can help reduce the conditions of poverty and thus reduce the likelihood that the frustrations inherent in such conditions may result in outbreaks of international conflict. Moreover, our own economic development in the United States increasingly relies on raw matrials from developing countries. Promoting the general development of these nations in a manner designed to equitably distribute the benefits can help to increase their stability as sources of raw materials, as well as providing expanding markets for U.S. goods and services.

Lastly, I want to touch upon the serious issue of human rights. The administration has called increasing attention to its views on this issue, especially as regards countries receiving U.S. aid. I agree that the issue of human rights is one of fundamental importance to

Americans, as it should be. However, I believe that the administration must take great care to utilize rational and meaningful criteria in its efforts to promote human rights abroad. These criteria ought to be applied in an even-handed manner. This application should reflect a coherent policy recognizing not only the ideal of human rights, but the practical aspects of implementing U.S. human rights policy in a world in which only a small number of countries are practicing democracies, as Americans understand that term. Fundamental considerations such as these must be addressed if the United States is to be known as the most effective advocate of human rights rather than merely the most outspoken.

In conclusion, I believe this bill should be passed, and I urge your support.

At this time, Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Kansas (Mr. WINN).

Mr. WINN. Mr. Chairman, I thank the gentleman from Michigan for yielding to me. I also rise in support of H.R. 6714 which is known, of course, to all of us as the International Development and Food Assistance Act of 1977.

As the chairman of the full committee, the gentleman from Wisconsin (Mr. ZABLOCKI) said this bill would authorize a total of $1.7 billion dollars for U.S. self-help development assistance programs for the people of some of the neediest countries in the international community for fiscal year 1978, as well as making certain amendments to Public Law 480.

H.R. 6714 authorizes programs which are addressed to fundamental problem areas faced by development nations. More than a third of the funds authorized by the bill are allocated for rural development and increasing agricultural productivity. There is virtually no one who is not yet aware of the serious world food problem. The emphasis in this legislation on self-help programs to increase the agricultural productivity of the small farmers who make up such a large segment of the needy majorities in developing nations is a necessary aspect of achieving long-term solutions to the debilitating and destabilizing problems of hunger and malnutrition.

The bill also authorizes funds for important development programs in the areas of population, health, education, technical assistance, and disaster relief, among others. Population and health are closely interrelated matters affecting development. Without the promotion of effective population planning efforts by developing countries, continued rapid population growth will just tend to offset progress in areas such as increasing per capita food production.

Obviously, poor health conditions which are principally manifested by high rates of infant mortality make it more difficult for the poor in developing countries to convince themselves of the importance of population planning. Ironically, of course, when health programs do begin to bear fruit, there often seems to be a persistent lag in commencing population planning programs. This lag coupled with the declining death rates arising from successful health programs further exacerbates population growth problems for a period of time. One important health program will direct effects on development which H.R. 6714 will support is the U.S. contribution to the multidonor program to wipe out the serious disease problem of river blindness in a number of the West African countries. Eradication of this hazard will allow resettlement and argicultural development of some large relatively fertile areas in Mali, Ghana, Upper Volta, Ivory Coast, Niger, Togo, and Benin.

This legislation will help to promote the development of appropriate energy resources in recipient countries. H.R. 6714 earmarks funds for research, development, and the use of renewable, small-scale energy sources specifically appropriate to agricultural and rural development needs. Similarly, the bill contains technical assistance funds to help encourage developing countries to concentrate on nonnuclear energy sources. Such programs are essential in view of the fact that developing countries have suffered the most from the enormous increases in oil prices.

One section of H.R. 6714 which I consider significant is the provision dealing with women in development. This section recognizes that women constitute a significant human resource for enhancing development efforts. Unfortunately, U.S. assistance programs have often given insufficient attention to integrating women into the national economies of developing countries. Thus, our aid programs have under-utilized the potential for further enhancing recipient countries' overall development inherent in the more effective participation of women. H.R. 6714 would encourage AID to give greater attention to implementing development assistance projects, programs, and activities which will better achieve this integration.

Title II of this legislation makes a number of worthwhile amendments to Public Law 480. Among the most significant is the one authorizing the inclusion of high protein, blended and fortified foods in title I concessional sales programs. This section is particularly important to those poor countries whose level of programs toward economic self-sufficiency is enabling them to begin the transition from title II humanitarian grant programs toward title I concessional sales. Second, I feel the provision of the committee's bill to increase the minimum tonnage of commodities for the title II humanitarian grants is commendable. An increase to 1.6 million tons from the present minimum of 1.3 million tons is provided for. Much of these commodities go into needed material and child health programs administered by private, nonprofit voluntary agencies such as CARE and Catholic Relief Services.

I have not adequately addressed all of the good features of this legislation in the interest of conserving time. However, in conclusion, I want to point out that H.R. 6714 may be justified by considerations of U.S. self-interest in addition to the obvious humanitarian reasons. It should be apparent to any prudent person that continued U.S. prosperity is increasingly closely related to development of Third World countries and the increased stability which the benefits of that development imply. That increased stability and progress in the developing world directly reduces the risk of outbreaks and international conflicts into which the United States may be drawn. These improved conditions should hopefully also help to provide a more rational and reliable basis for U.S. access to raw materials and offer expanded markets for U.S. exports. In light of the above considerations, I would encourage passage of H.R. 6714.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. WINN. I am happy to yield to the gentleman from Illinois (Mr. FINDLEY), a member of the full committee.

Mr. FINDLEY. Mr. Speaker, I thank the gentleman for yielding and I am glad that the gentleman from Kansas (Mr. WINN) pointed out the emphasis on food productivity in this bill. I congratulate the Agency for International Development, and in particular Governor Gilligan and the new Board for International Food and Agricultural Development, headed by Clifton Wharton, president of Michigan State University, for doing excellent preparatory work under the title XII program which will give a major new role to land grant universities in establishing better systems for educating farmers in the third world.

Again I thank the gentleman from Kansas for yielding to me.

Mr. WINN. Mr. Chairman, I thank the gentleman from Illinois (Mr. FINDLEY) for his kind words. I know of the gentleman's keen interest in this field and we appreciate the work he has done in putting this bill together.

Mr. ZABLOCKI. Mr. Chairman, I yield 2 minutes to the gentleman from West Virginia (Mr. RAHALL).

Mr. RAHALL. I want to congratulate, Mr. Chairman, the chairman of the committee and the members of that committee for their long and hard work on this bill. I have agonized long over this bill, Mr. Chairman, and find many features of it that I fully agree with in helping the poor in the underdeveloped countries and in the developing countries. However, Mr. Chairman, I must be very frank with you and my colleagues as we consider H.R. 6714 on the floor today.

I believe that it is unfair to ask me to support legislation that authorizes $25 million to provide prompt disaster assistance for developing nations, with an additional $20 million to rebuild earthquake damage in northern Italy, when I cannot get more direct aid to help flood victims in Appalachia.

For 7 weeks now, southern West Virginia residents have been frustrated, pacified, and downright refused prompt Federal aid to help alleviate their suffering due to the recent flooding.

Those who live in the developing na-

tions stand to receive disaster relief from the U.S. Congress quicker than the flood victims in West Virginia, who live less than 6 hours from Washington, D.C., by car.

After seeing for myself the hell that the flood victims have experienced, it would be ludicrous for me to tell them that their tax dollars were going to rebuild homes in northern Italy, when they have been sleeping in the rear of pickup trucks.

I am asked to support H.R. 6714, because it will be good for the American economy. But I feel, Mr. Chairman, it is time to reflect upon the inequities that exist all too often in our own Nation. The elderly, the poor, and the hungry in the United States, suffer just as much as the afflicted in India or the Sahel.

I am astonished that this body would intend to authorize the spending of $110 million for energy development projects oversees, when we can not even protect our own coal miners from black lung disease.

It is mind boggling, Mr. Chairman, and all I ask of my colleagues, those who represent districts where disasters have occurred in the past recently or where disasters may occur in the future, is that they think about the needs of their own constituents before voting on this authorization.

Mr. BROOMFIELD. Mr. Chairman, I yield 3 minutes to the gentleman from Alabama (Mr. BUCHANAN).

Mr. BUCHANAN. Mr. Chairman, I rise in support of this legislation. We Americans do, of course, have problems, and we have human needs, but we are so enormously wealthy we do not even understand our wealth, and the modest amount that we are investing in foreign assistance programs and economic assistance programs around the world not only helps to alleviate desperate human needs but also to serve our national self-interest.

I should like to address my remarks primarily to the title II food-for-peace provisions of the legislation.

Mr. Chairman, our record as a humanitarian Nation in meeting world food needs is well established. Since 1954 when the Agricultural Trade Development and Assistance Act—better known as Public Law 480—became law, the United States has provided more than $25 billion in food aid. In the past 10 years 80 percent of all the food that moved in world food-relief channels originated in the United States.

Even Emma Rothschild in her overly critical article entitled "Is It Time To End Food for Peace," published in the New York Times Magazine on March 13 of this year, has admitted that in Public Law 480—

> The U.S. Congress wrote a law which changed the diet and the political life of half the world.

Since the inception of Public Law 480, the U.S. Government has sent food to 130 countries around the world.

In my judgment, the food-for-peace program is neither obsolete nor a failure in its mission. There may well have been mistakes in its administration or errors in judgment or motives which were less than charitable at times, but the overall record of the program is an impressive one. Who can determine how many more human beings may have died from starvation had it not been for the food provided by Public Law 480? How can the number yet to be saved from starvation by Public Law 480 be ascertained?

In providing assistance to the less fortunate countries the United States faces a three-fold problem; and in the legislation before us today, H.R. 6714, the Committee on International Relations has sought to address itself to and provide a measure of relief to each phase of the problem.

First, there is the necessity of providing immediate relief for hunger around the world and the alleviation of emergency disaster situations when they may arise. Second, there is the problem of malnutrition in the poorer countries and their inability to meet the increasing needs of their citizens for more adequate diets. Third, there is the long-term problem of increasing population.

The immediate relief of hunger and disaster situations takes the form of direct food aid through Public Law 480. When a man is hungry because of lack of food or because of inability to buy, the solution to his problem is food aid. Programs to improve agricultural production will not help in this instance. He will die of starvation before the improvement materializes.

U.S. food aid under Government financial programs totaled $1.4 billion in fiscal 1976. Public Law 480 accounted for about four-fifths of all Government program shipments in the last fiscal year. Title I sales amounted to $645 million. Wheat accounted for almost 60 percent of all title I shipments, followed by rice at 22 percent of the total, with wheat flour, soybean oil, and cotton at 6 percent each. Bangladesh was the principal title I importer, taking about one-fourth of the total.

As in recent years, Public Law 480 title II exports last year accounted for about one-fourth of all food aid under the food-for-peace program. During 1976 value of commodities shipped under title II amounted to $327 million. In 1977 estimates of the value of title I commodities stand at $834 million with title II at $541 million.

The International Development and Food Assistance Act of 1975 required that at least 75 percent of the food commodities provided under title I be allocated to countries with a per capita GNP under $300. In fiscal 1976, 70 percent of all title I food shipments went to nine countries that had a 1974 per capita GNP below $300 and whose population represented about 52 percent of total developing countries population. If all food aid shipments were included—title II and AID's mutual security—for 1976, then about 57 percent of all Government exports went to 38 countries with a per capita GNP below $300. It should be noted that there were a total of 44 countries which had a GNP per capita below $300.

So long as the committees of the Congress continue to fine tune the provisions to meet present world needs and changing situations, Public Law 480 will not become obsolete. This year the Committee on International Relations is recommending that emphasis of direct food aid be concentrated on individual human needs and the use of food aid to promote economic development in poor countries. H.R. 6714 amends the present title I 75–25 allocation formula as required by existing statute by: First, determining eligibility for countries in the 75 percent catagory based on the poverty criterion of the International Development Association, IDA, rather than the $300 per capita GNP figure, thus taking into account the weakening of the dollar by inflation; second, extending the Presidential waiver authority, allowing the 75–25 requirement to be waived if he certifies that the quantity of commodities that could be otherwise allocated to countries in the 75 percent category could not be used effectively for humanitarian purposes; and third, removing the provision for congressional disapproval.

As written, our bill would also raise the minimum tonnage of commodities to be distributed under title II from 1.3 million tons to 1.6 million tons. Of that total, the amount that must be distributed through nonprofit voluntary agencies and the world food program is raised to 1.3 million metric tons. Highest priority in distribution is to be given to malnourished children and the poorest regions of developing countries.

The committee, to keep Public Law 480 a fresh and vibrant force in the international community, recommends that no Public Law 480, title I sales agreement be made with any country that engages in a consistent pattern of gross violations of human rights, unless the President determines such assistance will directly benefit the needy. Such a provision is consistent with the policy of the administration and the provisions already incorporated in the Foreign Assistance Act of 1975 relative to other forms of assistance.

There are at least three purposes to Public Law 480. It began in 1954 as a program to dispose of surplus agricultural commodities. It has evolved into a program to help hungry people. It remains a way to create markets for American food. There is no need to apologize for any of these. Each one complements the other and, to be sure, there have been times when each has competed and jousted with the other. But this attests to its flexibility and its usefulness both to our own country and to the developing nations of the world.

It should also be observed that while the United States has supplied 80 percent of the world's food aid during the last 10 years she has done this, on the whole, without making the recipient nations deeply dependent upon our continual assistance. There is always this grave danger in providing food aid that we might also provide disincentives to the recipient nations impeding their abilty to achieve self-sufficiency in agricultural production. To the everlasting

credit of donor and recipient, this danger has been, for the greater part, averted.

Direct food aid through Public Law 480 represents our attempt to alleviate the present immediate problem of hunger. At this juncture the emphasis on the mid-term programs comes into focus. In general, these programs are designed to improve the world food situation through self-help programs within those developing countries through the expansion of agricultural production in those countries. In the promotion of this goal, H.R. 6714 authorizes $613 million for aid to promote self-help by developing countries in enlarging their farm output and advancing rural development. These funds are focused on raising the productivity of small farmers who comprise the bulk of rural populations of the Third World.

FAO has concluded that out of 97 developing countries, 57 were deficient in food energy and has estimated the number of malnourished in the world—excluding Communist Asia—at about 460 million people. The best solution to the problem of malnutrition is to develop programs and policies to provide farmers in the developing countries with techniques and assistance to raise their production, and to provide others with employment opportunities to raise their incomes to enable them to pay for adequate diets.

There is little doubt that the emphasis on self-help and technical assistance is the right track. Several authoritative studies agree that only 44 percent of the world's cultivatable land is actually being cropped. Country-by-country investigations, even in a country like Bangladesh, have led to the conclusion that there may well be no country without adequate agricultural resources to feed its population. But these resources must be developed.

It was for this reason we recommend establishing under Public Law 480 a new food for development program, under which funds from title I concessional sales may be used for agricultural and rural development, including voluntary family planning, health, and nutritional programs. Under this program funds generated by local sales of commodities may be used for these purposes and credited against repayments which the country would otherwise have to make.

This brings us to the long-term problem and the long-term solution. Long-term assistance in family planning must be the main thrust on into the 21st century. Population growth, the major determinate of demand for food, is faster among the developing countries where 70 percent of the world's people live. World population is growing at a rate of 70 million people a year, with the developing countries accounting for 86 percent of the annual increase.

The United Nations has generally accepted a world population estimate of 6.2 billion by the year 2000 and 9 billion by the 21st century. The committee's bill contains provisions that are specifically designed to enable the United States to deal more effectively with the problem of rapid population growth. We are recommending an authorization of $181 million for specific activities in the field of population planning.

In a related measure, Mr. Chairman, the committee has recognized and addressed the need for affording women a greater role in the development process in poor countries. This provision encourages AID to give greater consideration to U.S. development assistance programs to the important contributions that can be made through programs and activities which tend to integrate women into the national economies of their countries, thus improving their status and assisting the total development effort. Sociologists agree that the population problem will never be solved in the developing countries until the role of women is elevated.

Finally, Mr. Chairman, it should be admitted that the programs of U.S. food and economic assistance abroad authorized in this legislation are not only humanitarian and altruistic, but also serve the self-interest of the United States as well. Improvement in the lot of the world's hungry, malnourished, and poor not only lessens the economic burdens which our humanitarian concerns lead us to bear but relieves pressures which could erupt in international conflict involving our country. There is credibility to be found in the ancient saying that even God does not dare approach a hungry man without a piece of bread in His hand. A prospering world is a more peaceful world.

This legislation is also an integral part of American foreign policy because it embodies America's new relationship with the Third World and serves as a practical expression of the desire of the United States to help those in need. Assistance authorized under this legislation is an investment in the future for our generation and the generations which are to follow. In my judgment, these investments will pay impressive dividends in the future.

These programs will also provide benefits for the American economy. Many of these developing countries will be supplying increasing amounts of raw material for U.S. industry. These same countries, in turn, are becoming increasingly important as markets for American products, especially agricultural commodities. This is of vital interest to the American farmer. It is a well known fact that American farmers have the capacity to produce far beyond that which the domestic market can absorb. This productive capacity has become vital to our balance of payments. In fiscal 1975 a $12 billion surplus in agricultural trade more than offset a $10 billion deficit in trade of nonagricultural products. Agricultural exports alone, amounting to $22 billion, nearly offset the foreign exchange cost of our petroleum imports. In fiscal 1976 exports of $22.8 billion produced an agricultural trade surplus of $12 billion, bringing the overall U.S. trade balance into the black despite a large deficit in nonagricultural trade.

If farm exports were still running at the $6 billion annual level of 1969, instead of the current $23 billion level, many more people in the world would be hungry. Many more U.S. citizens would be out of work if it were not for the current high level of agricultural exports. Approximately 1 million jobs, both on and off the farm, are generated by export of farm products.

We must sell a large part of our farm production abroad. Farmers export one-half or more of their soybeans, rice, and cattle hides; two-thirds of their wheat; one-fourth of their feed grains; one-third of their cotton, tobacco, and tallow and sizable shares of other commodities. Efficient production combined with aggressive commercial marketing of American farm goods, tied with concessional sales and outright food grants to nations in emergency situations benefit both domestic and foreign consumers, as well as the American farmer.

Food assistance under Government-financed programs amounts to 5 percent of our total agricultural exports now totaling 103 million metric tons. Every State contributes to the Nation's export achievement realizing American dollars for their efforts. While 10 States—Illinois, Iowa, Texas, California, Kansas, Nebraska, Indiana, Minnesota, Ohio, and North Carolina—accounted for 60 percent of the total, my State of Alabama realized its healthy share. In fiscal 1976 the value of export shares of agricultural commodities for Alabama amounted to $222.7 million. In 1973 her share amounted to $120.3 million, in 1974 the figure was $183.9 million, and in 1975 the amount was $221.7 million. Soybeans, cotton, feed grains, protein meal, and poultry products contributed the most.

Under the food-for-peace program in fiscal year 1976 alone, Alabama farmers and processors received $14,204,000 for grain and other agricultural commodities distributed to people in developing countries.

In addition to Alabama farmers, Alabama manufacturers and suppliers also benefit from the foreign aid programs administered by AID having received $196,495 in fiscal year 1976 for U.S. commodities shipped to less developed countries. The amount for fiscal 1976 brings to $76,593,756 the total value of AID financed products purchased in Alabama during the 8-year period—fiscal 1969 through 1976. The commodities produced by U.S. workers in private enterprise help economic development in the lesser developed and developing countries. These commodities include agricultural and industrial equipment, iron and steel mill products, electrical equipment, engines and turbines, fertilizers, motor vehicles, chemicals, and rubber products.

Besides financing exports of various products, AID also has contracts with Alabama universities, research institutions, and qualified experts for specialized technical services. These contracts enable the United States to apply American skills and experience to help people in developing countries in their struggle against disease, hunger, illiteracy and overpopulation.

In Alabama, such AID contracts in effect June 30, 1976, had a total value of $13,617,302. One of these contracts is with Auburn University in the amount

of $2,107,412 for a continuing aquaculture research project in which experimentation and research are carried out as to the breeding and raising of fish in fresh and brackish waters. Such a program has already been of great help to the developing countries and to our own population with their findings as to catfish farming.

Other Alabama contracts exist with Doss Aviation of Fort Rucker, International Fertilizer Development Center in Florence, and Tuskegee Institute.

It is elementary, though sometimes unacknowledged, that in order to assure the availability of agricultural commodities for donation those commodities must be produced by the American farmer. The farmer, in turn, must have the incentive to produce those commodities. Title I sales have been an important component of that incentive throughout the history of Public Law 480. Since 1974 the Government has no longer paid farmers not to produce. Crops set-asides have been discontinued. With a hungry world and an even increasing world population to deal with it is imperative to maintain full, efficient, and all-out production. Full production is mandatory not only for the quantity of food realized, but it is also necessary to assure that food is produced as economically as possible. The technology and efficiency of the American agriculture operation is unsurpassed anywhere else in the world.

Mr. Chairman, those of us who formulate these programs and pass these laws must keep reminding ourselves that Congressmen, Senators, bureaucrats, and journalists do not produce food and fiber. Only farmers produce food and fiber and the farmer must be assured an adequate income while producing not only enough to insure adequate domestic supplies but enough to assist in the feeding and nourishing of the underfed, the undernourished, and the underdeveloped nations of the world.

Mr. ZABLOCKI. Mr. Chairman, I yield 3 minutes to the gentlewoman from New Jersey (Mrs. MEYNER).

Mrs. MEYNER. Mr. Chairman, I rise in support of H.R. 6714. This bill extends and strengthens the "New Directions" program mandated by Congress in 1973. The New Directions program seeks to assure that our development program benefits the truly needy people of the world.

I would like to address myself to two aspects of this bill that have been of particular interest to me as a member of the International Relations Committee. The first is section 108 of this bill, which seeks to integrate women into the national economies of the countries receiving our assistance. Our chairman, the gentleman from Wisconsin (Mr. ZABLOCKI), touched on this, during his opening remarks.

The role of women in the third world has often been neglected by development officials. For example, in many parts of Africa and Latin America, women play the primary role in agricultural production and marketing. Yet, Western officials who seek to provide agricultural assistance to these people, have often assumed that men run the show. The result is often disruption and inefficiency.

Section 108 recognizes the important human resources represented by women and calls on AID to integrate women into their development efforts in a systematic way.

I would also like to discuss the role of private voluntary organizations in our aid programs. One of the key elements in the New Directions program, is the emphasis on the utilization of private voluntary organizations, or PVO's, for the delivery of many of the services provided by our Government abroad. Many of the PVO's have an excellent record of efficency, compassion, and understanding of local conditions that makes them ideal vehicles for our development assistance.

I was disappointed to note in committee that AID has estimated that the amount of aid going through PVO's is expected to decline somewhat in fiscal year 1978. I was asured by AID officials that this was merely an estimate.

However, I would like to take this opportunity to state again my strong feeling that the amount of aid going through PVO's should be increased and not cut back.

In addition, I would like to urge AID to consider routing as much aid as possible through small, innovative PVO's with good records of efficiency. There smaller organizations are less likely to suffer from the maladies of waste, excessive administrative costs and inertia that afflict national and international development institutions.

I have highlighted only two of the features of our development program today. However I believe this bill contains many excellent features that are equally praiseworthy. I urge my colleagues to support this measure.

Mr. BROOMFIELD. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio (Mr. WHALEN).

Mr. WHALEN. Mr. Chairman, I rise in support of H.R. 6714. I would like to direct my comments this morning to section 115 of the bill which deals with the Sahel development fund. The new directions provide that economic assistance should be focused on the poorest of the poor nations. Indeed, section 115 does exactly that. During the Easter recess the gentleman from Michigan (Mr. DIGGS), chairman of the African Subcommittee, along with the gentleman from New York (Mr. SOLARZ) and myself made an inspection trip to the Sahel nations. I would like to make just a few observations at this point regarding this part of the world.

There are eight countries that constitute the Sahel region. They have a total population of about 25 million. They are located in western Africa, many of them abutting the Sahara Desert. As I indicated, they are the poorest of the poor countries in the world. They have an average annual per capita income of less than $100. The infant mortality rate, depending upon the country, is 30 to 40 percent. The average life expectancy is less than 40 years. The literacy rate is less than 10 percent.

As we all recall, in 1973 this area of Africa experienced a very severe drought. As a result, thousands of lives were lost. Hunger was rampant due to the loss of agricultural commodities, as well as cattle and livestock. The nations of the world responded to this crisis. In the last 5 fiscal years the Sahel states have received from donor countries approximately $3.1 billion. Of this, the United States will have provided approximately $250 million. However, the eight Sahel countries were determined that they would try to overcome the problem so that this would not recur in the future. Therefore, these eight states set up an organization known as the Interstate Commission To Combat the Effects of the Drought. Its acronym is CILSS. They have been meeting for about 3 years in an effort to develop a long-range program.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. BROOMFIELD. Mr. Chairman, I yield 2 additional minutes to the gentleman from Ohio.

Mr. WHALEN. Mr. Chairman, CILSS' long-range program is designed not only to avoid future droughts, but also to enable the Sahel countries to become agriculturally self-sufficient as well as to achieve economic viability. At the same time, a counterpart organization was established among 12 donor nations, including the United States, and 22 international organizations. This compact is known as the Club des Amis du Sahel—Club of the Friends of the Sahel. This group stands ready to provide funds and assistance to the eight Sahel nations. These eight nations concluded their planning discussions during their April meeting in Jagadovgov, Upper Volta. They will present the projected 23-year program in Ottawa, Canada, on May 31, June 1, and June 2. At that time, phase one of the program, which will extend through 1983, will be considered by the club, possibly modified, and then will be adopted. The United States, along with the other members of the club, has promised to lend financial support.

Mr. Chairman, this bill authorizes a $50 million contribution to the Sahel Development Fund for fiscal year 1978 plus an additional $150 million to be expended in the future. Since we are seeking to help the poorest of the poor nations, in my opinion one of the important features of H.R. 6714 is the Sahel Development Fund, section 115. I hope that this section will be preserved and the Members of this body will approve H.R. 6714.

Mr. ZABLOCKI. Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. SOLARZ).

Mr. SOLARZ. Mr. Chairman, I would

like to begin by taking this opportunity to compliment the chairman of our committee, the distinguished gentleman from Wisconsin (Mr. ZABLOCKI), who I think has done an absolutely superb job in bringing his first foreign aid bill to the floor. I know that this, in political terms, is a baptism under fire, and I think that he has acquitted himself with the utmost distinction. Of course, he had 19 years of training as the ranking majority member of the committee in order to prepare himself for this great day, and I think he has demonstrated in the way in which he chaired the meetings of our committee, and in the way in which he defended the bill on the floor, that he has just about mastered the details of this complex and significant legislation.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the chairman.

Mr. ZABLOCKI. I thank the gentleman for yielding, and I also want to thank him for his very high compliment, but if I have had any success as the new chairman, it is, in part, because of the great contribution which the gentleman from New York has made to the committee and to the consideration of legislation before that committee. I want to express my appreciation for his help.

Mr. SOLARZ. I appreciate that very much, Mr. Chairman.

Let me say, addressing myself to the substance of the bill, that I think this legislation is really the embodiment of American idealism. It is an effort on the part of our country to help the poorest people of the poorest parts of the world improve the social and economic conditions under which they live. There are today throughout the world over a billion people living in conditions of the most abject and abysmal poverty imaginable.

I have had an opportunity, as a member of the International Relations Committee, over the course of the last year, to travel to many of these countries. I have been to Bangladesh and India on the subcontinent. I have, as has the distinguished gentleman from Ohio and the distinguished gentleman from Michigan, visited the Sahelian countries in old French West Africa, and I have seen people living under the kinds of conditions which I think the great majority of the American people would find almost virtually impossible to comprehend. These are people who live in countries in which over 90 percent are illiterate; people who live in countries in which the per capita income is less than $100 per year; people who live in countries in which the life expectancy of the average person is somewhere in the vicinity of 37, 38 or 39 years; and they are people who live in countries in which, incredible as it may seem, up to 50 percent of the children die before they reach the age of 5.

It seems to me that as the richest country in the world, that we do indeed have a moral obligation to share some of the plentitude of our own resources with the poorest peoples of the world, in an effort to help them surmount the overwhelming obstacles that lie in the path of their own development. We do, after all, have only 6 percent of the population of the entire world, at the same time that we consume and produce over a third of the world's riches and resources.

It seems to me that we ought to be doing what we can to share this wealth and these resources and these riches with those who are less fortunate than ourselves. But, beyond whatever moral obligation we may have to extend foreign aid and assistance to the poorest peoples of the world, it seems to me that we also have a significant economic interest in the enactment of this legislation as well. The fact is that almost 30 percent of our exports and almost 25 percent of our imports are either sent to or come from the least-developed countries in the world.

So I would submit that this legislation is not only a manifestation of idealism but an exercise in self-interest.

The CHAIRMAN. The time of the gentleman from New York (Mr. SOLARZ) has expired.

Mr. ZABLOCKI. Mr. Chairman, I yield 3 additional minutes to the gentleman from New York (Mr. SOLARZ).

Mr. SOLARZ. Mr. Chairman, I think we ought to view this legislation as an effort which might, in commercial terms, be called market development. In the long term, the growth and the development of our own economy is inextricably related to the growth and the development of the economy of the poorest countries of the world

I would suggest, in these terms, that this legislation will ultimately pay enormous dividends, not only to the poorest people living throughout the developing world, but ultimately to the people of our own country, who will benefit from the natural growth in imports from, and exports to, these developing countries as well.

If I may, Mr. Chairman, I would like, in closing, to deal briefly with two of the major criticisms which have been leveled against our foreign aid program.

The first is that foreign aid, in effect, constitutes a program in which we tax poor people in our country in order to help rich people in the developing countries. I am rather inclined to agree with the contention that our own tax code is inequitable. But I must fundamentally disagree with the contention that foreign aid is an effort to help rich people in other countries.

The fact is that over two-thirds of the food and nutritions aid in this program is destined for countries with people who have a per capita income of less than $300 a year. The fact is that three-fourths of our Public Law 480 assistance is destined for countries with people who have a per capita income of less than $520 a year. To someone who has exhaustively examined our foreign aid programs in countries all over the world, I can tell the members of this committee that, with very few exceptions, our foreign aid is in fact being used to help the poorest people in the poorest countries learn how to read, how to increase their agricultural production, and how to uplift their health standards as well.

The second major criticism levied against this bill is that, at a time when we have so many unmet social and economic problems here at home, we cannot afford to spend so much money on foreign aid abroad.

Let me tell my colleagues on the Committee that if there is any criticism to be made about this bill, it is not that we are doing too much, but rather that we are doing too little. The fact of the matter is, as a percentage of our gross national product, we are spending less on official development assistance than most of the richest countries in the world. Indeed, of the 17 most developed nations in the world we rank 12th in terms of the percentage of our gross national product which is devoted to development assistance.

And, if we look at it in constant dollar terms, we are actually spending 50 percent less today on foreign aid than we did almost 15 years ago.

So I think we should support this bill—even if it does not do as much as I think it should—because it does constitute a constructive response to the plight of hundreds of millions of poor people around the world who desperately need our assistance.

Mr. BROOMFIELD. Mr. Chairman, I yield 4 minutes to the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Chairman, I rise to discuss H.R. 6714, since I have some misgivings about it. The committee applied itself to the consideration and development of this legislation with the best of intentions, and in many ways the product of these efforts is commendable. However, in a spirit of the most constructive skepticisms, I entertain some doubts concerning facets of this bill.

To begin with, H.R. 6714 continues the regrettable trend, which the Congress has embraced with such unseemly alacrity, of constantly increasing levels of Federal expenditures. How any public servant can have failed to note the anguished cries of the vast majority of taxpayers seeking reasonable restraints on the official disciples of the theory that more spending is the solution to every problem is beyond me. Yet, the level of authorizations contained in H.R. 6714 exceeds our fiscal year 1977 authorization by some $210 million. Loyal supporters of the current administration will note that this bill provides for nearly $152 million more than the administration's budget request. In a spirit of generosity, this legislation even exceeds the committee's own recommendations to the budget committee by $32 million.

H.R. 6714 also further expands the reporting burden of the executive branch. A degree of required reporting is necessary for meaningful legislative oversight, but in looking over the provisions of this bill, one is left with the uncomfortable feeling that requiring periodic reports by the executive branch on virtually anything and everything is becoming a psychological compulsion for some Members.

May I remind the Members we have

established a special committee to deal with the problem of Federal paperwork. The President has vowed to deregulate many industries and has joined in the chorus against paperwork demanded by the Federal bureaucracy. Yet here is Congress, and specifically the House International Relations Committee and the Senate Foreign Relations Committee, demanding more and more reports often reaching the stage of trivia.

Another matter which gives me pause is the apparent continuation in H.R. 6714 of the recent trend toward loading down the statute books with gratuitous and rather loose philosophical comments and advice. Too frequently such provisions are vague at best, and more often largely redundant. An example of this phenomenon in H.R. 6714 is the section concerning future U.S. development assistance. Even given a charitable reading, it is difficult to identify much there in the way of practical guidance for the executive branch.

This legislation will add a provision to title I of Public Law 480 to prohibit concessional commodity sales under that title to countries which consistently violate human rights. A limited waiver is possible under certain circumstances. I sympathize with the good intentions from which this provision sprang. I am as committed to the important principle of respect for human rights as are other Members. Nevertheless, under this new restrictive provision. I am curious whether the administration will be able to continue its proposed title I programs for such countries as Ethiopia, Pakistan, and Guinea, to name a few.

It is one thing to be committed to human rights in the abstract, and quite another to encumber our foreign aid legislation with prohibitions that past experience should have taught us are difficult to carry out in a fair and coherent manner.

Mr. Chairman, I first wish to commend the chairman of our committee, the gentleman from Wisconsin (Mr. ZABLOCKI) for his astute handling of this bill. I say this not in a perfunctory manner, because I sincerely appreciate the effectiveness of the gentleman. Also at this time I wish to pay my personal compliments to our committee chief of staff, Dr. Jack Brady, for his magnificent work.

Also, in the spirit of bipartisanship which marks legislation of this nature, I wish to commend our ranking Republican Member, the gentleman from Michigan (Mr. BROOMFIELD). He is a true statesman.

If the Members will note, we did not provide opposition or minority views.

We provided only supplemental views. There are a number of reasons for this: First, the members of the committee who were not in complete accord with all the provisions of the bill felt nevertheless that in the spirit of Senator Vandenberg politics should stop at the water's edge. We feel that overall there is much to be commended in this bill, but our duty requires that we point out the pitfalls and weaknesses of the legislation.

Furthermore, I think it is too early in this administration to be discussing foreign affairs in a partisan fashion. Quite frankly, any President needs much more than 100 days or 4 or 5 months to definitely develop a foreign policy.

So this bill is really a rehash of the committee positions of the last few years. It is not innovative, and it does not have really much of a stamp of the Carter administration; it has the grudging acquiescence of the administration.

In fact, one of the weaknesses of the bill—and I say this on behalf of the administration—is that it goes to great length to instruct the administration on how to handle any country that has a history of real or alleged human rights violations. This is especially interesting, for example, when we look at one of the provisions relating to Public Law 480.

Public Law 480 serves the poorest of countries. But we find that some of the poorest countries of Africa are not democracies. For example, notwithstanding the fact that they are impoverished countries, we would not think that in the central African empire or Guinea Bissau or Mozambique we would find that they have little respect for democracy or for individual human rights. And yet the committee goes to great lengths to lecture the President on how he should administer the program for those countries, and then it provides the President with the possibility of flexibility if he takes the initiative and states that it is in the interests of the needy people of those countries.

Mr. Chairman, at the proper time I will, along with a number of my colleagues on the committee, offer perfecting amendments to try to improve this bill. Perhaps we can add a touch of perfection to a well intended but somewhat imperfect instrument.

Mr. BROOMFIELD. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. Mr. Chairman, if I may have the attention of the chairman of the committee, I will take this time to make as clear as possible the status of the law and any changes made therein by this legislation as it might affect trade with Vietnam.

In the Foreign Assistance Act, section 620(f), as amended in 1962, assistance to any Communist country, including North Vietnam is prohibited.

It is my understanding that this provision has not been altered in this legislation; is that correct?

Mr. ZABLOCKI. Mr. Chairman, if the gentleman will yield, that is correct, it is not altered at all in this bill. As I stated in my remarks aid to Vietnam and to Cuba would still be prohibited.

Mr. ASHBROOK. Mr. Chairman, if I may continue, a prohibition against agricultural aid to North Vietnam is found in sections 102 and 411 of Public Law 480.

It is my understanding that we are in no way changing, altering, or rescinding that particular provision of law; is that correct?

Mr. ZABLOCKI. That is true, we are not. The bill does not make any change in that respect.

Mr. ASHBROOK. Mr Chairman. I thank the gentleman.

The Department of State Authorization Act of 1973, section 13, flatly prohibits assistance to North Vietnam except by specific act of the Congress.

It is my understanding that section is not amended, rescinded, or altered?

Mr. ZABLOCKI. The gentleman is correct, it is not.

Mr. ASHBROOK. Mr. Chairman, I thank the gentleman for the information.

Mr. BROOMFIELD. Mr. Chairman, I yield 2 minutes to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Chairman, I wish to extend my commendation to the chairman of the committee and to the committee members for the very fine work they have done on this act, and especially for including within section 103 the substance of H.R. 3979, which was introduced by myself and cosponsored by some 80 Members of this body.

I also want to express my thanks to the gentleman from Ohio (Mr. WHALEN), the gentleman from Kansas (Mr. WINN), the gentleman from Massachusetts (Mr. HARRINGTON), and the gentleman from New York (Mr. BINGHAM) for their assistance and help in this area.

I am referring to the provisions which amend the Foreign Assistance Act by establishing a cooperative program with developing countries to accelerate the production of nonconventional, decentralized, rural energy technologies. The explicit purpose of this program is to stimulate the commercialization of small-scale power systems by U.S. private industry, to the mutual benefit of the United States and developing countries.

The program includes a series of regional and country studies to be carried out with the close cooperation of private industry to determine what energy needs, uses and sources can be identified in various climatic regions, and the establishment of a comprehensive information network which will permit the early transferability of these technologies around the world. Pilot projects are to be started as quickly as possible. Aid is authorized in the amount of at least $10 million for fiscal year 1978 to carry out this program.

This proposal ratifies the best thinking along appropriate energy technology lines that has emerged from AID and ERDA, and it mandates and funds a conceptualization which has been the subject of a recent memorandum of understanding between the two agencies.

Mr. Chairman, I think this program has an excellent chance of enhancing our image around the world with developing nations and will also help them in the energy crisis which has also engulfed us. I think it will help them in years to come.

Mr. Chairman, I wish again to commend the committee for including this provision.

Mr. ZABLOCKI. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, I take this time only to commend the gentleman from Illinois (Mr. DERWINSKI) on my own time and to express appreciation for the tone of his supplemental views and those of our colleagues, the gentleman from Florida (Mr. BURKE), the gentleman from California (Mr. LAGOMARSINO), and the gentleman from Pennsylvania (Mr. GOODLING), who joined in those suplemental views. Mr. Chairman, the tone was very appropriate, and I very much appreciate the support and concern expressed by them.

Mr. Chairman, I also applaud the support and concern that they have expressed in their views for the Carter administration policy, but particularly I appreciate their observation that the bill H.R. 6714 has some good features and that the committee worked diligently on the bill. The outcome of our efforts, the end product, is commendable, and when I say that I am quoting from the supplemental views as presented in the report.

Again, Mr. Chairman, I appreciate their endorsement of the bill.

Mr. Chairman, I yield the balance of our time to the gentleman from Minnesota (Mr. FRASER).

Mr. DIGGS. Mr. Chairman, will the gentleman yield?

Mr. FRASER. I yield to the gentleman from Michigan.

Mr. DIGGS. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in support of H.R. 6714 and to comment on the Sahel development program.

It is important to recall that the notion of a long-term comprehensive development program for the Sahel was a congressional initiative. We added an amendment to the Foreign Assistance Act, approved on December 17, 1973, which supported the initiative of the U.S. Government in undertaking consultations and planning with the countries concerned, with other nations providing assistance, with the United Nations, and with other concerned international and regional organizations, toward the development and support of a comprehensive long-term African development program.

In fiscal years 1976 and 1977, the Congress authorized to be appropriated $5,000,000 for the purposes of planning the Sahel development program in concert with the affected African countries and other organizations. The $200,000,000, no-year authorization included in the fiscal 1978 request represents the first of what is expected to be an annual U.S. contribution of approximately $100,000,000 for the 10 to 20 years of the program. The administration has stated that the U.S. contribution would under no circumstances exceed 15 to 20 percent of the total program costs.

The Agency for International Development expects to obligate $50,000,000 of the $200,000,000 in fiscal 1978, of which they anticipate only $15,00,000 will be expended.

There is little need to review the drought and its devastating impact on the economies of the eight countries now members of the Interstate Committee for Drought Control—CILSS—Senegal, Mauretania, Mali, Upper Volta, Niger, Chad, the Gambia, and Cape Verde—for the results of this disaster are familiar to us all. Even in the best of times these countries are among the least developed with per capita incomes ranging from $80 per annum in Mali to $330 per year in Senegal. They suffer from high infant mortality rates, low literacy levels, grossly inadequate infrastructure, and have isolated centers of production and consumption which are frequently 700 to 1,700 miles from seaports.

The Sahel development program which has the following principal objectives: Food self-sufficiency, improvement of living standards, and increased growth and development in the eight Sahelian States of Senegal, Mauritania, Mali, Niger, Chad, Upper Volta, Cape Verde, and the Gambia, is being planned by the Club des Amis du Sahel. This unique coordinating mechanism created in 1975 through the initiative of the United States and France brings together the Interstate Committee for Drought Control—CILSS—which is the regional organization of the Sahelian States, and about 18 major western donors.

The Club has established nine specialized working teams and a synthesis group to carry out the planning and programing activities. Four of these are concentrating on sectors basic to food self-sufficiency: Livestock, rainfed agriculture, irrigated agriculture, and fisheries; and the other five are working on the principal human, structural, and technical aspects of development in the region: Ecology, technology adaptation, human resources and health, transportation and infrastructure and pricing policy, storage and marketing.

The committee amendments seek to address several issues. The Sahel development program has been subsumed under chapter 1 by creating two new sections: section 119, Sahel development program—planning; and section 120, Sahel development program—implementation. This modification places the program in the portion of the bill that encompasses other development assistance programs and outlines the policy guidelines for such assistance. However, in recognition of the low level of development in the region for promoting ecological balance and for developing an effective infrastructure including transporation and setting a limitation on the percentage of funds to be used for major infrastructure projects.

Subsection (b) of section 120 of the Sahel development program requires the President to prepare an annual report on the allocation of the American contribution to the program, the contributions from other donors, the effectiveness of the Club des Amis du Sahel model, and the progress made in achieving the objectives of the program. It was the sense of the committee that this report shall include but not be limited to the following considerations: Increased per capita income, increased life expectancy, reduced infant mortality, improved literacy rates, more equitable distribution of resources, increased productivity per unit of land, and measures to reduce the effects of future droughts and regional efforts to rationalize markets and reduce trade barriers.

The final subsection (c) sets limits on the amount of money to be appropriated for the program for fiscal year 1978.

As a result of the special needs of the countries in the Sahelian region and the unique coordinating mechanism which is jointly planning the development strategy, this program affords an unusual opportunity to test a new model for development cooperation. Because of the special character of this multilateral undertaking, some flexibility may be necessary in implementing development assistance guidelines.

Finally, the committee believes that it would be desirable for the administration to coordinate with other major donors to the Sahel program on procurement policy questions concerning projects funded under the SDP, particularly with a view toward minimizing the regional standardization of equipment. The committee wishes to underline the need for flexible donor country policies in this area.

I urge unanimous support for H.R. 6714 and the Sahel development program.

Mr. FRASER. Mr. Chairman. I take this time to indicate my view that this bill is one of the better products that we have produced in our Committee on International Relations.

I think a large share of the credit for that should go to the chairman.

I also want to commend the staff for the report which has been drafted. The report is very clearly written. It is written in the style and format that make it more understandable than many committee reports have been, and I hope it will become the pattern that we follow in the future.

Mr. Chairman, I also share the same view as that of the gentleman from New York that the United States, through the international economic development program, is indeed making a modest effort.

Mr. Chairman, President Carter this morning indicated his own view that the U.S. contribution to international development was too low. He indicated that in comparison with our European neighbors the United States was contributing far too small a share in the effort to assist the poor countries of the world in their development problems.

I do believe that this bill deserves strong support from the House. I hope that as the debate progresses this afternoon we will find that support.

Mr. BONKER. Mr. Chairman, no item in the Federal budget is more controversial and consistently faces more hostility than the foreign aid bill. As we prepare to vote on this year's bill, it is fitting to reflect for a moment on the history of U.S. economic aid—its successes and

failures—and on the changes in purpose and method it has undergone in recent years.

Large scale American economic aid began with efforts to sustain our allies in World War II and then, with the postwar Marshall plan, to help rebuild the shattered economies of Western Europe. A distinct anti-Communist philosophy became a central feature of our aid programs, beginning with the Truman decision to aid Greece and Turkey in resisting Soviet pressure in 1947. As President Truman put it:

> I believe that it must be the policy of the United States to support free peoples who are resisting attempted subjugation by armed minorities or by outside pressures.

John Kennedy expressed much the same theme 15 years later, stating that:

> Foreign aid is a method by which the United States maintains a position of influence and control around the world, and sustains a good many countries which would definitely collapse or pass into the Communist bloc.

From the beginning, however, there were also deep humanitarian concepts behind American aid. In 1949, the Point Four program of technical assistance was started as the first American attempt to deal with the general problem of underdevelopment. The competing demands of NATO and the Korean war, however, quickly reduced funds available to Point Four. In 1954 the Public Law 480 or "food for peace" program was begun, both as an attempt to alleviate food shortages abroad and as a means to cope with American farm surpluses at home. The bulk of Public Law 480 shipments were sold for local currencies which were then loaned or granted back to the recipient to fund local development projects.

Other aspects of U.S. foreign assistance took shape in the late fifties and early sixties as the United States began to use long-term development loans to supplement short-term assistance and technical help as component of the aid program. Western European nations, their economies rebuilt, began to join the United States in multilateral agreements as donors and lenders to the third world.

But the path to social and economic development in the third world was far more complex than we had thought. In the sixties our aid programs, most notably the Alliance for Progress, suffered from what many recipients considered highhanded American attempts to dictate internal reforms or to attach strings requiring political support as the price for U.S. aid. Third world nations often did not share our anti-Communist philosophy and had little incentive to support our wish for global power and influence. The use of economic aid, particularly Public Law 480, to support the war in Vietnam further reduced its credibility as an instrument for development.

Economically, U.S. aid in the sixties relied principally on larger scale, capital intensive projects, often in or near cities, in the belief that new wealth introduced into the modern sector would "trickle down" to the peasants. This strategy was supposed to provide the political stability and Western alinement we sought.

A succession of reversals and revolutions confounded the "trickle down" strategy and brought into question the whole concept of tying our aid with political strings. U.S. aid was neither buying friends nor relieving the burdens of the world's poor. Much of it seemed to find its way into the pockets of the local elites. One very bright exception was the Peace Corps, a grassroots program concentrating on teaching skills to help people help themselves.

Concerned over the mixed record and poorly defined philosophy of U.S. aid, Congress in 1968 promoted efforts to study and then restructure U.S. economic aid. The result, implemented beginning in 1973, was a markedly different approach to aid. Called New Directions, the revised concept shifted emphasis away from capital intensive projects to smaller scale projects with direct impact on the lives of the world's poor. "Trickle down" was abandoned in favor of basic grassroots development. More emphasis was put on meeting development needs as defined by recipients and in looking on the development process as a complex, interrelated whole instead of a series of separate projects. More stress was put on family planning, land tenure, credit and marketing assistance, and training.

Program	*Fiscal year 1978 Authorization*
Bilateral development assistance:	
Food and nutrition	$613.2
Population planning	181.0
Health	105.9
Education and human resources development	84.9
Technical assistance, energy, research, reconstruction selected program	110.0
Sahel development	50.0
Other programs:	
American schools and hospital abroad	25.0
International organization and programs	271.75
International disaster assistance	25.0
Italy relief and rehabilitation	20.0
Operating expenses	220.2

The current bill also includes special provisions to help develop credit, farm and rural electric cooperatives overseas, to improve the status of women and to help develop alternative sources of energy.

Politically, the New Directions philosophy assumes that economic aid with heavy political strings is counterproductive. The aid program cannot buy friends. If in fact the United States is interested in the stability of the Third World, then the surest path to that stability lies in meeting the basic socioeconomic requirements of the world's poor.

Toward these ends I worked successfully to add to the fiscal year 1978 aid bill and report two basic proposals that will encourage movement from the philosophy and rhetoric of New Directions policy to its actual implementation. One was an operational model of what the process of rural development should be. Sudan was used for the initial program, but we hope and expect that the general outlines of the model will be applicable throughout the third world. The second advance was the requirement of specific criteria from AID by early next year that could give the Congress and the American people one quantitative basis for judging the success of New Directions policy in practice.

The Sudan aid program is built on a systems analysis approach that has come into development studies in the last few years. The premise is that for poor people to improve their livelihood, it is not enough simply to improve the factors of production—human skills, seeds, and so forth—as most development projects have heretofore done. Integrated development requires equal emphasis on an individual's motive for producing more and on his or her ability to reap the rewards of production. In the rural areas of western Sudan the farmer produces as much as twice or more than required for subsistence level living, but he lives at a level below healthy subsistence. A more producer-centered market system is thus fundamental to significant growth. The strategy as a whole is spelled out in some detail in the bill report (H. Rept. 95-240, pp. 21-22) and in the CONGRESSIONAL RECORD (Apr. 6, 1977, pages 10770-10772).

The effort to force the creation of criteria to measure development progress came from our overall inability to judge whether or how aid programs were satisfactory. An initial February 1977 AID report on this topic denied any universal criteria of measurement and insisted that the statistical base was too weak. However, the Overseas Development Council at the same time published an initial discussion of their "Physical Quality of Life Index." It suggests very clearly that despite imperfect data, which improves every year, we can begin to create criteria to measure different aspects of a society's ability to improve the welfare of the people.

Several colleagues will point out today that we should not spend money on foreign aid when other great needs exist here at home. It is a compelling argument, to be sure, and it is tempting to vote against development assistance for that reason. But these same people say that America should remain strong and exert leadership in the world, for our national security reasons and to prevent the spread of communism. Being a world power, however, is more than having a nuclear arsenal and intimidating other nations. It is a responsibility that involves building alliances, helping our friends, and competing with adversaries. We Americans also take pride in our Christian heritage and humanitarian concerns that are evident in this legislation.

If this Nation lived in isolation, there would, indeed, be less purpose to assistance sent abroad. But the world has become increasingly interdependent. Our welfare here increasingly depends on what happens abroad, and vice-versa. A measured, closely supervised program of U.S. foreign economic aid, in contributing to the social and economic development of the world's poor, promotes the peace, stability, and cooperation which in turn enhance the quality of our lives in the United States.

Mr. Chairman, U.S. economic aid has come a long way from Point Four to the New Directions and I am proud to have been able to play a part in efforts to improve it further. I unhestitatingly endorse our current aid program as well-conceived, well-implemented expressions of our national interest.

Mrs. COLLINS of Illinois. Mr. Chairman, I rise in support of H.R. 6714, the international development and food assistance bill, that I cosponsored. This bill provides a $1.7 billion authorization for bilateral humanitarian, economic, and multilateral assistance. A major portion of this authorization is for food and nutrition programs, with a substantial commitment to bilateral population planning. Together, these two categories account for approximately 53 percent of the total authorization, or $894.2 million of the $1.7 billion figure in this bill. Food and nutrition programs account for one-third of the total funds.

The food and nutrition money is of particular interest to me since it will be directed toward the rural areas of poor countries, consistent with the congressional intent to aid the disadvantaged people of the underdeveloped world in their efforts to ward off the ravages of hunger and malnutrition. We as legislators of the richest country in the world, need not pay homage to the bromide that "the poor will always be with us." As informed leaders of the United States, we must act in the cause of sustenance and nutritional stability.

I am also pleased that the bill contains $8 million to aid countries in developing alternatives to nuclear energy, as well as providing $50 million for the drought-ridden Sahel region in Africa. This is certainly in keeping with the commitment of this country toward establishing ways of limiting the possibilities of nuclear catastrophies as well as providing for severe human tragedies that afflict our neighbors abroad.

In summary, this bill represents a significant effort toward fulfilling our role in economic development, and for this reason, I urge my colleagues to join me in support of H.R. 6417.

Mr. FRENZEL. Mr. Chairman, I have usually been supportive of foreign aid authorizations, but this one was brought to the House almost 15 percent over last year's expenses, and was also well over the President's recommendation.

Foreign aid is a useful tool of the Executive in its international relations. This particular bill has some especially good features, including its emphasis on agricultural development and family planning. Nevertheless, I cannot support this excessive amount especially when we are about to vote another huge deficit in our budget resolution. This bill simply asks for too much. It should be defeated.

Mr. KETCHUM. Mr. Chairman, once again we are being asked to generously contribute to the assistance of other nations. Certainly the bill before us incorporates some admirable provisions, but how much longer are we to continue legislating multibillion dollar foreign aid programs as if we had nothing better to do with our money? What recompense does such a bill offer the hard working American taxpayer for his investment? In so many cases the only return we receive is an ungrateful recipient nation which considers it our "duty" to be giving away our dollars in assistance.

I for one, am not content to sit back idly and watch while this country's domestic priorities are in the least way hindered by wasteful foreign spending. Already the United States has extravagantly poured funds into nations abroad amounting to more than half of our Federal deficit since World War II. For too long we have neglected to keep our generosity under better check, and the Congress as the responsible American legislative body had better reexamine its own conscience in this regard. The American people will not be taken advantage of when they find that the solution to their own problems takes a back seat to flagrant foreign misspending.

Mr. Chairman, I urge my colleagues to fully consider the impact of H.R. 6714 and to vote this measure down as a step in the direction of sounder fiscal management.

Mr. BADILLO. Mr. Chairman. I am pleased to rise in support of H.R. 6714, the International Development and Food Assistance Act of 1977. I think this is a bill that makes great strides toward strengthening the congressional mandate to develop a "New Direction" in our foreign aid programs.

There are several aspects of this bill that are particularly important to this country, and to the countries to which we are granting aid. One of the most important is the stress this bill places on the development of agricultural and rural programs in poor countries so that they can increase their food production and fight hunger and malnutrition. Those programs, coupled with the revamping of the food for peace program to make it really responsive to the human needs of the poor countries by providing incentives for using our food for economic development purposes, comprise a far-sighted and useful package.

I am convinced that when we are talking about human rights in other countries we must concern ourselves as much with the economic freedom of people as with their political rights. I feel strongly that if a person living under an oppressive regime is hungry and exhausted, he or she does not have the strength or energy to protest—or even to care—what form of government exists. I think that this legislation will go a long way toward establishing the principle that economic rights are not an adjunct, but an integral part of the human rights of the citizens of developing countries.

I am pleased, as well, to see a $14 million increase over the administration's request for slowing population growth. The nations of the world are faced with a critical situation, for the population of many countries will double before the turn of the century if we do not act in concert with these other nations to limit growth. What that means is that, no matter what kinds of development strategies we work out, there will be a total inability to keep up with growth. People in developing countries will get poorer, instead of more economically independent.

The population provision, coupled with the agricultural development provisions, tie in positively with a great concern of mine. One of the major problems associated with illegal immigration to this country has been the lack of employment, coupled with a rapidly-increasing population growth in the larger "sender" countries. I have recently become increasingly aware that the problem of illegal immigration can only be stopped at its roots—by stemming the population tide, and creating job producing programs in those countries that send us most of these economic refugees. And so it is particularly gratifying to me that these concerns are shared by the members of the committee and by the administration.

Another concern of mine that is admirably dealt with in this legislation is the addition of strong human rights language to Public Law 480, the food for peace program. This law was one of the glaring omissions in our policy of linking aid to human rights in the donee countries. I am glad there is language which precludes our aid to countries that are in gross violation of the human rights of its citizens, and I am also glad that the affirmative approach has been taken, and that funds have been earmarked for developing programs and activities that will encourage increased adherence to the principles of civil rights. This provision strikes a fine counterpoint to the economic rights I spoke about earlier, and I compliment the committee for its concern.

Finally, I would like to mention the provision that mandates AID to give important consideration to the contribution that can be made by women in developing countries. Our programs abroad have forgotten women, the donee countries' programs have forgotten women. Not only are they on the very lowest rung of the economic and political totem pole, but they have a great contribution to make in increasing productivity, maintaining and developing good health and education within their communities, and assuming new professional and policy-making roles. It is an important statement that the President has appointed an outstanding activist and feminist, Arvonne Fraser, to head the women and development section at AID, and so it is imperative that we follow his lead by providing the mandate to see that women in other countries achieve their full potential.

Mr. BIAGGI. Mr. Chairman, I rise to indicate my support of H.R. 6714. Specifically, I wish to address the provision in the bill which will provide for a continuation of desperately needed assistance to earthquake ravaged sections of Italy.

On May 6 and September 15 of last year, two major earthquakes struck the northeastern part of Italy. The very day after the first earthquake occurred, I introduced legislation which provided $25 million in emergency relief and rehabilitation aid for Italy. The bill was eventually added to the supplemental appropriations bill and was signed into law.

The funds provided under last year's legislation have been used prudently, to respond to the most urgent needs of the

area. I have been personally briefed on several occasions by the chief U.S. official involved in the Italian earthquake relief, Mr. Arturo Constantino. He has kept me advised of progress already made including the construction of new housing units and schools. He has also advised me of the compelling need for additional assistance not only in terms of damages caused from the September earthquake, but also, those damages resulting from a series of severe tremors which have occurred periodically during 1976.

According to the committee report, the total amount of damage from the earthquakes totals $3.2 billion. This includes property damage, as well as losses incurred in agriculture, the main industry of the affected regions of Italy. While the United States and the Government of Italy as well as other nations have been active in terms of providing aid and technical assistance, more is urgently needed.

The committee has recommended an additional $20 million for relief aid. The Senate has already passed legislation authorizing $35 million. It is, therefore, apparent that at the time a final agreement is made we will be providing nearly the amount we did last year. It will be gratefully accepted by the people of Italy whose lives have been devastated by the earthquake.

In addition to the obvious humanitarian benefits of providing this assistance, there are also political benefits to be derived from the providing of aid. As many of my colleagues are aware, the nation of Italy has come under the increasing influence of the Communist Party. They narrowly missed assuming full control of the Italian Government during last year's election. Absent the visible assistance and support of the United States on behalf of aiding the victims of these natural calamities, the Communists would have made a political issue of the earthquake relief effort, which if successful could have toppled the Christian Democratic Party last year. Much like the humanitarian concerns, the political considerations justifying continued aid are just as persuasive.

Many of the members of the Italo-American community in this Nation have been deeply concerned about the Italian earthquakes. Many have relatives and friends in the affected regions. Private contributions from Italo-Americans have helped tremendously in the rebuilding effort. Their efforts are continuing, but will no doubt be bolstered by the knowledge that their Government is also continuing its commitment.

Passage of this legislation today, will be a further demonstration of this Nation's leadership on behalf of providing assistance to the needy around the world. We have provided millions of dollars to aid other victims of natural calamities including earthquake victims in Guatemala and Turkey. Contained in another portion of this bill, are funds to aid the drought-stricken areas of the African Sahel.

Certainly the tragedy which has struck and continues to affect Italy merits our continued response. The devastation and suffering cannot be measured merely in dollars and cents. We are talking about the separation of families, the destruction of homes and businesses, the loss of economic livelihoods of thousands of Italians. The pleas of the people of Italy must be answered again this year. I therefore urge the expeditious consideration of this legislation today and its early approval by the President.

At this point in the RECORD, I wish to insert a factsheet provided to me by Mr. Constantino outlining the full extent of the damages which have occurred in Italy as a result of the earthquakes.

[Memorandum]

THE EARTHQUAKES OF MAY AND SEPTEMBER 1976 IN FRIULI

(1) General outline of Friuli—

Friuli is part of Friuli-Venezia Giulia (F.V.G.), a self-governing Region measuring 7.850 Kmq at the furthest eastern corner of the Italian Peninsula, bordering with Jugoslavia and with Austria. The total population of F.V.G. is 1,234,000. The main cities are Trieste (272,000); Udine (102,000); Pordenone (50,000); Gorizia (45,000).

The active population of F.V.G. is 430,000 employed as follows: 42 percent in industry; 9 percent in agriculture; 49 percent in the service sector. In 1972, the net regional product has been 1420 billion lire ($1.580 million).

(2) The earthquake—

Since May 1976 Friuli has been hit by a series of earthquakes with disastrous consequences. Between the 6th and 9th of May and the 11th and 15th of September the seismic activity reached its peak with quakes of respectively 6.5 and 6.1 intensity. Up to February 1977, 372 important quakes have been recorded. A total of 119 towns have been hit of which 41 disastrously.

(3) The earthquake damages and the economic repercussions—

The earthquake that struck Friuli in 1976 both for the size of the area concerned and for the amount of the damages, are likely to represent the biggest natural disaster of Western Europe in this century.

The main figures of the catastrophe are:

An affected area of 4.800 Kmq equivalent to 62 percent of the Region's territory;

More than half a million people hit, equivalent to 42 percent of the total population of F.V.G.;

939 dead on the 6th of May and 12 on the 15th of September;

2.400 wounded;

12.700 evacuees after the 6th of May;

Further 34.000 evacuees to the sea-side resorts after the 15th of September;

32.000 people whose houses have been completely destroyed or irreparably damaged;

157.000 people with their houses seriously damaged;

6.500 companies affected (16.000 employed in the industrial sector only)

1,000 billion lire ($1,110 million) damages to the producing apparatus;

2,000 billion lire ($2,220 million) damages to private houses;

370 billion lire ($410 million) damages induced by the decrease of revenue in the services produced in the main towns. After the 15th of September it is reckoned that further 800–1,000 billion lire ($880–$1,110 million) damages brought the final figure to 4.400 billion lire ($4.900 million).

(4) Central and Regional Government Action—

In July, once the first emergency and immediate relief action had been completed, the F.V.G. Government launched a plan for the erection of 9.281 prefabricated houses (=m² 342.000) for 35.000 homeless, with an expenditure of 50 billion lire (55 million). After the September earthquake, the Regional plan being inadequate to cope with the newly arisen needs, the Commissioner Extraordinary appointed by the central Government launched a supplementary plan for 9.590 pre-fabs (=m² 403.000) at a cost of almost 80 billion lire ($89 million).

The latter plan will be achieved by March 31st 1977.

(5) The reconstruction—

The Italian Government is preparing a bill of law for the reconstruction of Friuli.

The priorities spelled out in the process can be summed up as follows:

(a) reconstruction of social infrastructure and public services;

(b) enactment of the building plans for new houses in tune with the economic recovery;

(c) creation of new employments in the economy on specially attractive terms.

The necessary respect of anti-seismic regulations will entail an increase in building costs of 10–15%.

Mr. HAMILTON. Mr. Chairman, I rise in support of H.R. 6714, the International Development and Food Assistance Act of 1977.

The bill supports several important foreign policy and foreign aid initiatives of the Congress which have been made over the last few years. The bill strengthens the New Directions mandated by the Congress for foreign aid programs in 1973. Second, the bill reinforces reforms of 1975 in the food for peace program and develops the humanitarian and developmental purposes of that program. And third, this bill represents a constructive and realistic endorsement of American initiatives to develop a North-South dialog with the developing nations of the world.

H.R. 6714 seeks an authorization of $1.7 billion in economic and food aid. This amount represents an increase of nearly $400 million over what was appropriated for fiscal year 1977. Important increases are made in population and health programs, in support of several international programs and in the development of a long range development program of the Sahel area of Africa, a program which represents a cornerstone of our new initiatives on that continent.

The bill rightly puts emphasis on efforts to promote agricultural and rural development. Nearly one-third of the funds authorized are in the category of food and nutrition. With these funds we seek to help poor nations increase their food production and thereby gain leverage in the continuing battle against disease, malnutrition and hunger. In other provisions, the bill seeks to provide increased incentives for nations to make greater use of U.S. food aid for economic development purposes.

Mr. Chairman, at the heart of this important piece of legislation is an American tradition of extending help to people in need, trying to give the millions of this world who live in abject poverty hope for the future and encouraging self-help efforts everywhere. In 1973, under the leadership of the Committee on International Relations, we sought to redirect our bilateral economic aid programs to providing a greater proportion of our assistance to the poorer people in rural areas, especially in agriculture, population, and health programs.

Those New Directions are alive and well. The economic aid program, in part

because of the New Directions, is now able to stand alone. It is becoming more popular because it promotes and preserves important American traditions.

I urge adoption of H.R. 6714.

Mr. LONG of Maryland. Mr. Chairman, a number of provisions of this economic aid authorization bill—H.R. 6714—are worthy of support. I am speaking especially of the following provisions:

Section 103, to provide rural energy sources for developing countries—this section is derived from legislation I introduced with other Members early in this session of Congress;

Section 106(c) to encourage poor countries to use nonnuclear sources of energy;

Section 104(c) and section 112, which state the need to give attention in all AID programs to the impact on population growth and on the motivation for smaller family size;

Section 114, which requires that the effect of AID programs on the natural resource base of a country be taken into account; and

Section 108, which affirms the need to provide capital and technical assistance to cooperative programs in poor countries.

The International Relations Committee of the House has made clear in previous authorization bills that the Congress wishes to see our economic development aid go to help the poor of the world. I heartily concur, and by the poor I mean poor people and not rich people in poor countries.

However, one action by the committee I must disagree with. That action is the addition of $61.2 million to the food and nutrition category of AID's program, which the committee report indicates should go to India. According to the report, "The committee is encouraged by the recent demonstration of democratic principles and by the restoration of suspended political freedom in that country—India." (H. Rept. 495–240, p. 20.)

Disillusionment with India's uses of foreign aid began long before Indira Gandhi's grab for dictatorial power and, indeed, is rooted in a generation of mistaken economic policies. During the 10 years 1965–74, while India was receiving $7.6 billion in foreign aid from the U.S. and the multilateral development banks, it chose to spend $16.4 billion on its military; its population grew by over 100 million; and it imported over 50 million metric tons of food—all this before Indira Gandhi suspended parliamentary democracy. Very little of India's resources have ever gone to help its poor. Yet its vast Gangetic plain is capable of immense productivity under smallholder cultivation, and it has the resources of underutilized labor to do this cultivation and to fashion the agricultural implements needed to make the cultivation more efficient.

Although Prime Minister Desai is reportedly a disciple of Mahatma Gandhi—no relation to Indira—he has given no sign yet of renouncing India's development of nuclear explosives. On the contrary, what he has done (in an April 19th press conference) is to reaffirm India's refusal to sign the Nuclear Nonproliferation Treaty until all other nations scrap their nuclear weapons—a disingenuous way of saying "never." India's nuclear explosion will sting its neighbors into developing their own nuclear weaponry and when they do, as Pakistan seems in the process of trying, India's intransigence will certainly be intensified.

Another reason for resuming bilateral economic aid to India, according to the committee, is that "the new Indian government has stressed the need for more rapid development based on a rural-led, employment-oriented strategy to increase agricultural production and small-scale industry. The government has emphasized the need to decentralize decisionmaking to the village level and provide more effective support for small farmers." (H. Rept. 495–240, p. 20.) If such programs were actually implemented, renewed bilateral development aid for India might well be called for, if combined with reduced military spending and a renunciation of nuclear explosive development. However, Indira Gandhi's Congress Party often paid lip service to these worthy goals, scarcely more. Further, these statements by the Indian Government to which the committee refers are contained first, in the Janata Party Platform, a campaign document; second, in a statement by the Indian Finance Minister when he presented the 1977–78 budget—a budget prepared by the former Congress Party government—to the Indian Parliament, in March; and third, in debate on that budget. Budget amendments to begin the implementation of the "rural-led, employment-oriented strategy" to which the committee report refers are not expected until June, and those budget changes may be no more than small steps in this direction. It will be a number of months until the real intentions and capabilities of the new Indian Government in economic and other areas are known. Given the years of aid programs and the billions of dollars wasted in India, we should have more than the return of parliamentary democracy on which to base resumed bilateral development aid to India.

Instead, we should have India's unmistakable commitment that it intends to shift away from military, heavy industry and nuclear programs, toward the village development Mahatma Gandhi called for during his struggle for India's independence.

Mr. WIRTH. Mr. Chairman, I rise today in strong support of H.R. 6714—the International Development and Food Assistance Act of 1977.

World economic development and the eradication of poverty and hunger represent two of the major goals on the international agenda. We are slowly coming to the realization that independent nation-states no longer exist in isolation from the world community. A growing interdependence among the nations of the world requires the active pursuit of transnational initiatives to achieve common goals.

The International Development and Food Assistance Act will facilitate a cooperative effort toward world economic development. The act places emphasis on assisting the development of labor-intensive, rural agricultural projects in needy countries. In addition, the act expresses the humanitarian principle of American foreign policy by extending to the food for peace program the same human rights qualifications now a part of our other foreign assistance programs.

Finally, it authorizes further research funds for studying the relationship between economic development and population growth. Placed in the context of the recent World Food Conference, which was held in Rome in October of 1974, the determination of such a relationship could serve as the solution to a perplexing problem that many observers view as our most pressing: the situation of expanding world population in excess of world food production.

The United States can be proud of what has proceeded here today. The International Development and Assistance Act of 1977 paves the way for further bilateral assistance by martialling America's financial and moral capabilities with the spirit of hope existing in the world's poorest countries.

Mr. BROOMFIELD. Mr. Chairman, I yield back the balance of my time.

Mr. ZABLOCKI. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. All time having expired, pursuant to the rule, the Clerk will now read the bill by titles.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "International Development and Food Assistance Act of 1977".

TITLE I—INTERNATIONAL DEVELOPMENT ASSISTANCE

DEVELOPMENT ASSISTANCE POLICY

SEC. 101. (a) Subsection (d) of section 102 of the Foreign Assistance Act of 1961 is amended—

(1) in the first sentence—

(A) by striking out "For the purpose of assuring that development" and inserting in lieu thereof "Development";

(B) by striking out "is" and inserting in lieu thereof "shall be";

(C) by inserting "the most" immediately after "will make";

(D) by striking out the comma after "assistance)" and inserting in lieu thereof a period and "In order to make possible consistent and informed judgments concerning which countries will make the most effective use of such assistance.";

(E) by striking out "establish" and inserting in lieu thereof "propose"; and

(F) by inserting "and factors" immediately after "criteria";

(2) in the second sentence—

(A) by striking out "establishing" and inserting in lieu thereof "developing";

(B) by inserting "and factors" immediately after "criteria"; and

(C) by striking out "the efforts of countries" and inserting in lieu thereof "countries' actions which demonstrate genuine concern and effective action for materially improving the lives of the poor and their ability to participate in development, including (but not limited to) efforts";

(3) in the next to the last sentence by inserting "and factors" immediately after "criteria"; and

(4) in the last sentence by inserting immediately before the period ", including the proposed criteria and factors".

(b) Such section 102 is further amended by adding at the end thereof the following new subsection:

"(e) For the purpose of promoting economic growth in the poorest countries, the President is authorized, notwithstanding any other provision of law, to make available to the relatively least developed countries assistance under this chapter on a grant basis to the maximum extent that is consistent with the attainment of United States development objectives.".

FOOD AND NUTRITION

SEC. 102. Section 103(a) of the Foreign Assistance Act of 1961 is amended—

(1) by striking out "$291,000,000" and all that follows through "1976 and"; and

(2) by inserting "and $613,200,000 for the fiscal year 1978" immediately after "1977".

RENEWABLE ENERGY SOURCES FOR RURAL AREAS

SEC. 103. Section 103 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new subsection:

"(h) Of the funds made available to carry out this section for the fiscal year 1978, not less than $10,000,000 may be used only for programs in research, development, and use of small-scale, decentralized, renewable energy sources for rural areas. Programs under this subsection shall be undertaken in cooperation with the Energy Research and Development Administration or its successor and carried out to the greatest extent possible through and in conjunction with activities under section 107 of this Act. The emphasis of these programs shall be on the earliest practicable development and use of energy technologies which are acceptable to and affordable by the users, environmentally acceptable, and simple and inexpensive to use and maintain.".

POPULATION PLANNING AND HEALTH

SEC. 104. (a) Section 104 of the Foreign Assistance Act of 1961 is amended by striking out subsection (a) and inserting in lieu thereof the following new subsections:

"(a) In order to increase the opportunities and motivation for family planning and to reduce the rate of population growth, the President is authorized to furnish assistance, on such terms and conditions as he may determine, for population planning. There is authorized to be appropriated to the President for the purposes of this subsection, in addition to funds otherwise available for such purposes, $181,000,000 for the fiscal year 1978, which amount is authorized to remain available until expended.

"(b) In order to prevent and combat disease and to help provide health services for the great majority, the President is authorized to furnish assistance, on such terms and conditions as he may determine, for health, disease prevention, and environmental sanitation. There is authorized to be appropriated to the President for the purposes of this subsection, in addition to funds otherwise available for such purposes, $105,900,000 for the fiscal year 1978, which amount is authorized to remain available until expended.".

(b) Subsection (b) of such section 104 is redesignated as subsection (c).

(c) Such section 104 is further amended by adding at the end thereof the following new subsections:

"(d) Assistance under this chapter shall be administered so as to give particular attention to the interrelationship between population growth, development growth and overall improvement in living standards in developing countries. To the maximum extent consistent with the principles set forth in section 102, projects in other development fields should be designed to provide the appropriate balance between population growth and development growth.

"(e) Of the amount made available to carry out subsection (b) for the fiscal year 1978, $1,700,000 shall be available only for contribution to the World Health Organization Onchocerciasis Control Program covering seven states in West Africa.".

(d) The amendment made by subsection (a) of this section shall take effect on October 1, 1977.

EDUCATION AND HUMAN RESOURCE DEVELOPMENT

SEC. 105. Section 105(a) of the Foreign Assistance Act of 1961 is amended—

(1) by striking out "$90,000,000" and all that follows through "1976 and"; and

(2) by inserting "and $84,900,000 for the fiscal year 1978" immediately after "1977".

TECHNICAL ASSISTANCE, ENERGY, RESEARCH, RECONSTRUCTION, AND SELECTED DEVELOPMENT PROBLEMS

SEC. 106. Section 106 of the Foreign Assistance Act of 1961 is amended—

(1) in subsection (a)—

(A) by striking out "and" at the end of paragraph (5);

(B) by striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and"; and

(C) by adding the following new paragraph immediately after paragraph (6):

"(7) programs to help less developed countries prevent or reverse severe environmental damage.";

(2) in subsection (b)—

(A) by striking out "$99,550,000 for the fiscal year 1976 and"; and

(B) by inserting "and $110,000,000 for the fiscal year 1978" immediately after "1977"; and

(3) by adding at the end thereof the following new subsection:

"(c) Of the amounts made available under this section for the fiscal year 1978, not less than $8,000,000 shall be available only for activities under paragraph (2) of subsection (a) which are designed to enable and encourage countries to use nonnuclear sources of energy.".

COST-SHARING AND FUNDING LIMITS

SEC. 107. Section 110 of the Foreign Assistance Act of 1961 is amended—

(1) in subsection (a) by striking out "107" and inserting in lieu thereof "106"; and

(2) in subsection (b)—

(A) by striking out "No" and inserting in lieu thereof "Except for grants to countries determined to be relatively least developed based on the United Nations Conference on Trade and Development list of 'relatively least developed countries', no"; and

(B) by striking out "107" and inserting in lieu thereof "106".

DEVELOPMENT AND USE OF COOPERATIVES

SEC. 108. (a) Section 111 of the Foreign Assistance Act of 1961 is amended—

(1) in the first sentence by striking out "assistance in the development" and inserting in lieu thereof "technical and capital assistance in the development and use"; and

(2) by amending the second sentence to read as follows: "Not less than $10,000,000 of the funds made available under this Act for the fiscal year 1978 may be used only for technical assistance to carry out the purposes of this section.".

(b) The amendments made by subsection (a) shall take effect on October 1, 1977.

INTEGRATING WOMEN INTO NATIONAL ECONOMIES

SEC. 109. Section 113 of the Foreign Assistance Act of 1961 is amended to read as follows:

"SEC. 113. INTEGRATING WOMEN INTO NATIONAL ECONOMIES—(a) In recognition of the fact that women in developing countries play a significant role in the economic production, family support, and overall development process of their national economies, this part shall be administered so as to give particular attention to those programs, projects, and activities which tend to integrate women into the national economies of foreign countries, thus improving their status and assisting the total development effort.

"(b) The President shall transmit to the Speaker of the House of Representatives and to the Committee on Foreign Relations of the Senate a report on the impact of development programs, projects, and activities on the integration of women into the developing economies of countries receiving assistance under this part. The report shall include—

"(1) an evaluation of progress toward developing an adequate data base on the role of women in the national economies of recipient countries;

"(2) a specific description of the efforts undertaken to implement subsection (a); and

"(3) an evaluation of the effectiveness of the efforts described pursuant to paragraph (2).

"(c) The report required by subsection (b) shall be transmitted not later than one year after the date of enactment of this subsection.".

LIMITATIONS ON DEVELOPMENT ASSISTANCE

SEC. 110. Section 115(a) of the Foreign Assistance Act of 1961 is amended to read as follows:

"(a) None of the funds made available to carry out this chapter may be used in any fiscal year for any country to which assistance is furnished in such fiscal year under chapter 4 of part II (security supporting assistance) or under part VI (assistance for Middle East peace) unless the Congress has specifically authorized such use of those funds. The specific authorization requirement of this subsection shall be deemed to be satisfied if the purpose for which funds are to be used is described in the annual presentation materials on proposed development assistance programs submitted to the Congress and the Congress does not indicate its disapproval of such use.".

HUMAN RIGHTS

SEC. 111. Section 116 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new subsection:

"(e) Of the funds made available under this chapter for the fiscal year 1978, not less than $750,000 may be used only for studies to identify, and for openly carrying out, programs and activities which will encourage or promote increased adherence to civil and political rights, as set forth in the Universal Declaration of Human Rights, in countries eligible for assistance under this chapter. None of these funds may be used, directly or indirectly to influence the outcome of any election in any country.".

EXAMINATION OF POPULATION GROWTH IMPACT

SEC. 112. Chapter 1 of part I of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 117. EXAMINATION OF POPULATION GROWTH IMPACT.—(a) Assistance under this chapter shall be administered so as to give particular attention to the impact of all programs, projects, and activities on population growth. All activities proposed for financing under this chapter shall be reviewed to identify their possible impact on human fertility. Particular attention shall be given to opportunities to build motivation for family planning into programs in other fields such as education in and out of school, nutrition, disease control, maternal and child health services, agricultural production, rural development, and assistance to the urban poor. Care should be taken to consider indirect as well as direct influences on fertility.

"(b) The President is authorized to study

the complex factors affecting population growth in developing countries and to identify the factors which might motivate people to plan family size or space their children. To the maximum extent consistent with the principles set forth in section 102, projects in other development fields should be designed to reduce population growth and to maximize recognition of the benefits of planned family size.".

INFANT NUTRITION

SEC. 113. Chapter 1 of part I of the Foreign Assistance Act of 1961, as amended by section 112 of this Act, is further amended by adding at the end thereof the following new section:

"SEC. 118. INFANT NUTRITION.—The President is encouraged (1) to devise and carry out in partnership with developing nations a multifaceted strategy designed to promote breast-feeding within the context of integrated programs of nutrition and health improvement for mothers and children, and (2) to provide technical, financial, and material support to individuals or groups at the local level for such purpose.".

MAINTENANCE OF NATURAL RESOURCES

SEC. 114. Chapter 1 of part I of the Foreign Assistance Act of 1961, as amended by sections 112 and 113 of this Act, is further amended by adding at the end thereof the following new section:

"SEC. 119. MAINTAINING THE NATURAL RESOURCES BASE FOR SUSTAINABLE DEVELOPMENT.—In the development and implementation of programs, projects, and activities under this part, the President shall take into account their effect on the natural resource base of the recipient, and he is encouraged, consistent with the other objectives of this part, to give attention to projects the objective of which is to maintain the natural resource base essential for sustainable development. Special efforts shall be made to maintain and where possible restore the land, vegetation, water, wildlife, and other resources upon which depend economic growth and human well-being, especially that of the poor.".

SAHEL DEVELOPMENT PROGRAM

SEC. 115. Part I of the Foreign Assistance Act of 1961 is amended—

(1) by redesignating section 494B as section 120 and inserting such redesignated section at the end of chapter 1 of such part, as amended by sections 112, 113, and 114 of this Act;

(2) by amending the section caption of such redesignated section 120 to read "SAHEL DEVELOPMENT PROGRAM—PLANNING"; and

(3) by inserting the following new section 121 immediately after such redesignated section 120:

"SEC. 121. SAHEL DEVELOPMENT PROGRAM—IMPLEMENTATION.—(a) The President is authorized to furnish assistance, on such terms and conditions as he may determine, for the long-term development of the Sahelian region. Assistance furnished under this section shall be in accordance with a long-term, multidonor development plan which calls for equitable burdensharing with other donors, such assistance to be furnished whenever appropriate in cooperation with an international coordinating mechanism. In view of the special conditions in this region of countries that are among the least developed, the President shall take into account, in furnishing assistance under this section, the special needs in the region for promoting ecological balance and for developing an effective infrastructure, including transportation. The percentage of funds allocated for major infrastructure projects under this section may not exceed the percentage of funds contributed by all countries which are allocated for major infrastructure projects in the worldwide Sahel Development Program.

"(b) The President shall prepare an annual report on the Sahel Development Program concerning the allocation of the United States contribution to the Program, the extent of the contributions from other donor countries, the effectiveness of the integrated effort through the Club des Amis du Sahel, and the progress made in achieving the objectives of the Program.

"(c) There is authorized to be appropriated to the President for the purposes of this section, in addition to funds otherwise available for such purposes, $200,000,000, except that not to exceed $50,000,000 may be appropriated under this section for fiscal year 1978. Amounts appropriated under this section are authorized to remain available until expended."

AMERICAN SCHOOLS AND HOSPITALS ABROAD

SEC. 116. Section 214 of the Foreign Assistance Act of 1961 is amended—

(1) in subsection (c)—

(A) by striking out "each of the fiscal years 1974" and all that follows through "1976 and" and inserting in lieu thereof "the fiscal year";

(B) by inserting "and for the fiscal year 1978, $25,000,000," immediately after "$25,000,000,"; and

(C) by adding at the end thereof the following new sentence: "Amounts appropriated under this subsection may not be used to furnish assistance under this section in any fiscal year to more than four institutions in the same country, and not more than one such institution may be a university and not more than one such institution may be a hospital."; and

(2) in subsection (d)—

(A) by striking out "1974" and all that follows through "1976 and"; and

(B) by inserting "and 1978" immediately after "1977".

INTERNATIONAL ORGANIZATIONS AND PROGRAMS

SEC. 117. (a) Section 32(a)(1) of the Foreign Assistance Act of 1961 is amended—

(1) in the first sentence—

(A) by striking out "for the fiscal year 1974," and all that follows thereafter through "$194,500,000 and"; and

(B) by inserting immediately before the period "and for the fiscal year 1978, $271,750,000"; and

(2) by amending the second sentence to read as follows: "Of the amounts made available to carry out the purposes of this chapter for the fiscal year 1978, not less than $500,000 may be used only for a contribution to the Namibia Institute.".

(b) Section 305 of such Act is amended by adding at the end thereof the following new sentence: "The President is further requested, in making United States contributions to such organizations, to take into account the progress, or lack of progress, of such organizations in adopting and implementing policies and practices which encourage and promote the integration of women into the national economies of member and recipient countries and into professional and policymaking positions within such organizations, in accordance with the World Plan of Action of the Decade for Women.".

INTERNATIONAL DISASTER ASSISTANCE

SEC. 118. Section 492 of the Foreign Assistance Act of 1961 is amended in the first sentence by striking out "1976 and 1977" and inserting in lieu thereof "1977 and 1978".

ITALY RELIEF AND RECONSTRUCTION

SEC. 119. Section 495B of the Foreign Assistance Act of 1961 is amended to read as follows:

"SEC. 495B. ITALY RELIEF AND REHABILITATION.—In addition to amounts otherwise available for such purpose, there is authorized to be appropriated $20,000,000 for fiscal year 1978 for assistance under this chapter for the relief and rehabilitation of the people who have been victimized by the earthquakes which occurred in the Friuli region of Italy in May and September 1976. Amounts appropriated under this section are authorized to remain available until expended.".

USE OF FOREIGN VOLUNTARY NONPROFIT AGENCIES

SEC. 120. (a) Section 607 of the Foreign Asistance Act of 1961 is amended by inserting immediately before the period at the end of the first sentence "(including foreign voluntary nonprofit relief agencies so registered and approved when no United States voluntary nonprofit relief agency is available)".

(b) For purposes of implementing the amendment made by subsection (a), the President shall issue regulations governing registration with and approval by the Advisory Committee on Voluntary Foreign Aid of foreign voluntary nonprofit agencies.

REPEAL OF PROHIBITION ON AID TO COUNTRIES ASSISTING OR TRADING WITH CUBA OR VIETNAM

SEC. 121. (a) Section 620(a) of the Foreign Assistance Act of 1961 is amended—

(1) in the first sentence of paragraph (1) by striking out the semicolon and all that follows through "States"; and

(2) by striking out paragraph (3).

(b) Section 620(n) of such Act is repealed.

(c) Section 664 of such Act is repealed.

INSPECTOR GENERAL, FOREIGN ASSISTANCE

SEC. 122. (a)(1) Section 624(d) of the Foreign Assistance Act of 1961 (22 U.S.C. 2384(d)) is repealed.

(2) The President (A) may assign to the Inspector General, Foreign Service, any of the duties and responsibilities vested by such section 624(d) in the Inspector General, Foreign Assistance, and (B) may authorize the Inspector General, Foreign Service, to exercise such of the authorities granted by such section 624(d) to the Inspector General, Foreign Assistance, as the President determines are necessary to carry out any duties or responsibilities so assigned.

(b) Section 5315 of title 5, United States Code, is amended by repealing paragraphs (52) and (53).

(c) The amendments made by this section shall take effect on January 1, 1978.

ANNUAL REPORT ON UNITED STATES INTERNATIONAL DEVELOPMENT POLICIES AND PROGRAMS

SEC. 123. Section 640B(d) of the Foreign Assistance Act of 1961 is amended to read as follows:

"(d) The President shall report to the Congress during the first quarter of each calendar year on United States actions affecting the development of less developed countries. The report shall include (1) a comprehensive and coordinated review of all United States policies and programs having a major impact on the development of such countries, including but not limited to the areas of bilateral and multilateral assistance, trade, commodities, monetary affairs, private investment, debt, employment, food, energy, technology, population, oceans, environment, human settlements, natural resources, and participation in international agencies concerned with development, and (2) assessment of the impact of such policies and programs on (A) national employment, wages, and working conditions in the United States, as well as other aspects of the United States economy, and (B) the well-being of the poor in the less developed countries in accordance with the approach to development outlined in subsections (c) and (d) of section 102 of this Act.".

REIMBURSABLE DEVELOPMENT PROGRAMS

SEC. 124. Section 661 of the Foreign Assistance Act of 1961 is amended—

(1) by striking out "up to $1,000,000" and all that follows through "1976, and";

(2) by inserting "of the funds made available for the purposes of this Act" immediately after "$2,000,000" the second place it appears; and

(3) by inserting "and $2,000,000 of the funds made available for the purposes of this Act in the fiscal year 1978" immediately after "1977".

OPERATING EXPENSES

SEC. 125. (a) Section 667 of the Foreign Assistance Act of 1961 is amended to read as follows:

"SEC. 667. OPERATING EXPENSES.—(a) There are authorized to be appropriated to the President, in addition to funds otherwise available for the purposes of this section, for the fiscal year 1978—

"(1) $220,200,000 for necessary operating expenses of the agency primarily responsible for administering part I of this Act; and

"(2) such amounts as may be necessary for increases in salary, pay, retirement, and other employee benefits authorized by law, and for other nondiscretionary costs of such agency.

"(b) Amounts appropriated under this section are authorized to remain available until expended.".

(b) Section 109 of such Act is amended by striking out "The" in the last sentence and inserting in lieu thereof "Except for transfers to section 667, the".

NOTIFICATION OF PROGRAM CHANGES

SEC. 126. Chapter 3 of part III of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 670. NOTIFICATION OF PROGRAM CHANGES.—None of the funds authorized to be appropriated to carry out the purposes of this Act (except for programs under title III or title IV of chapter 2 of part I, chapter 5 of part I, and programs of disaster relief and rehabilitation) may be obligated for any activities, programs, projects, types of materiel assistance, countries, or other operations not justified, or in excess of the amount justified, to the Congress for obligation under this Act for any fiscal year unless the Committee on Foreign Relations of the Senate, the Committee on International Relations of the House of Representatives, and the Committees on Appropriations of both Houses of the Congress are notified fifteen days in advance of such obligation.".

FUTURE UNITED STATES DEVELOPMENT ASSISTANCE

SEC. 127. It is the sense of the Congress that the United States should increase substantially its assistance for self-help development among the world's poorest people. Such assistance should be provided in accordance with the general policies and principles of chapter 1 of part I of the Foreign Assistance Act of 1961, with particular emphasis on encouraging and supporting more equitable patterns of economic growth, especially in the poorest countries, and should be coordinated with similar expanded efforts by international organizations, donor nations, and the recipient countries themselves.

Mr. ZABLOCKI (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

AMENDMENT OFFERED BY MR. YOUNG OF MISSOURI

Mr. YOUNG of Missouri. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. YOUNG of Missouri: Page 22, immediately after line 16, insert the following new section:

Prohibition on Use of Funds for Sterilizations.

(1) by striking out "ABORTIONS.—" and inserting in lieu thereof "ABORTIONS OR STERILIZATIONS.—(a)"; and

(2) by adding at the end thereof the following new subsection:

"(b) None of the funds made available to carry out this part shall be used to pay for the performance of sterilizations as a method of family planning or to motivate or coerce any person to practice sterilizations.".

Mr. YOUNG of Missouri. Mr. Chairman, I strongly object to the section of H.R. 6714 that would authorize funds for a far-reaching sterilization program as part of the population planning effort.

The amendment I offer would revise the Foreign Assistance Act to prohibit the use of International Development Act funds for sterilization as a means of family planning. And it would bar any attempts to force any person to submit to sterilization.

The United States can look with pride at its efforts to provide food and general medical assistance to developing nations.

But the United States has no right to establish and finance extreme population control programs for other nations. It is just another example of American intervention that can infringe on the human rights of thousands of persons abroad.

Imagine yourselves in the position of a poor person in an underdeveloped nation. Would it not seem suspicious that a powerful nation is providing equipment and training doctors for a large-scale sterilization program in your nation? Would you believe that the motives for such a program are humanitarian, or would it smack of self-interest?

We must remember that we are not talking about an experimental program. We are talking about a program on a frighteningly large scale. More than 950,000 people have been sterilized in just 7 nations since the American-sponsored program began about 5 years ago. More than 445,000 people in the country of Thailand alone have been sterilized as a result of this program. Those statistics are from the Office of Population.

Congress has appropriated more than $37 million for sterilization programs through fiscal year 1977. And now we are asked to add another $25 million to that sum.

This program is becoming entrenched, and it is time that it is called to a halt.

To give an idea of the possible extent of this program, I will quote an article from the St. Louis Post-Dispatch, dated April 27, 1977. In it, the Director of the Office of Population is quoted as saying that the United States is seeking to provide the means by which as many as 100 million women around the world could be voluntarily sterilized.

He also said that one reason for the program is to maintain—and I quote:

The normal operation of U.S. commercial interests around the world.

To me, these are frightening statements. The Agency for International Development has since denied such goals and motives. But if that is not our policy, why is the man in charge of the office that supervises the program making these statements? Why did he make similar statements in testimony before Congress last year?

The people who want this program fall back on the notion that this is a voluntary sterilization program. But in an underdeveloped country with uneducated people it seems to me that there is a very thin line between "voluntary sterilization" and what can be a distinctly nonvoluntary submission to such operations.

In fact, I remember instances of that sort right here in the United States, in a so-called voluntary sterilization program. A General Accounting Office report in November 1976, reported that more than 3,400 American Indians were sterilized in Western States—apparently without being informed that such operations were not mandatory.

And there are plenty of other examples. If such abuses can happen here, I hate to think what could happen in poverty-stricken nations abroad.

The proponents of these programs also say that the United States is not directly paying for the sterilizations, since we just train the doctors and provide all the equipment.

In my opinion, this does not relieve us from the bulk of the responsibility, and it also leaves the program open to pressures from individual governments that could some day lead to widespread abuse.

I repeat, that I strongly support the rest of this bill, providing food and medical assistance abroad. But you will notice that the requests for general medical assistance have been going down, while the requests for population planning and sterilization planning has gone up.

I appeal to you—in the spirit of the strong "human rights" stand that the United States seeks to take—to support this amendment.

Let us provide food and badly needed medical assistance to the needy in other nations—and not meddle in highly personal matters that could open our programs to horrible abuses.

Mr. Chairman, in summary, I should also like to compliment the chairman of the committee, the gentleman from Wisconsin (Mr. ZABLOCKI), for the tremendous job he has done on the bill as a whole.

AMENDMENT OFFERED BY MR. FINDLEY AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. YOUNG OF MISSOURI

Mr. FINDLEY. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. FINDLEY as a substitute for the amendment offered by Mr. YOUNG of Missouri: Page 22, immediately after line 16, insert the following new section:

PROHIBITION ON USE OF FUNDS FOR INVOLUNTARY STERILIZATIONS

SEC. 128. Section 114 of the Foreign Assistance Act of 1961 is amended—

(1) by striking out "ABORTIONS.—" and inserting in lieu thereof "ABORTIONS or INVOLUNTARY STERILIZATIONS.—(a)"; and

(2) by adding at the end thereof the following new subsection:

"(b) None of the funds made available to carry out this part shall be used to pay for the performance of involuntary sterilizations as a method of family planning or to coerce or provide any financial incentive to any person to practice sterilizations.".

Mr. FINDLEY. Mr. Chairman, I feel the gentleman from Missouri (Mr. YOUNG) has put his finger on some important points. We certainly want to protect human rights. We want to avoid in any and all circumstances the use of our funds under the population program to coerce people into a certain course of action in population planning. We want to make sure that everything is on a voluntary basis. Our own good name as a nation is at stake in this program. So I commend the gentleman for putting his finger on those problems, but I feel that his amendment goes too far, and for that reason I have offered my substitute language.

My language would prohibit clearly involuntary sterilization. It would also prohibit payments, any kind of financial incentives, to any person to participate in a sterilization program. It would also prohibit coercion in any form; but, nevertheless, it would not prohibit a country, in good faith and with good standards and with good regulations and good practices, from carrying out totally voluntary sterilization programs.

Sterilization has become a popular means of family planning in this country as well as in other countries, and if we want our efforts at family planning to have effect worldwide, we should not tie the hands of those who would administer the programs by prohibiting those programs that are carried out on a satisfactory voluntary basis.

I should be glad to yield to anyone who would like to ask questions concerning the amendment.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

The gentleman knows, as we all know, the country of India up to around the last of January or the first of February had an involuntary sterilization program. Is that correct?

Mr. FINDLEY. It was regarded by some people as involuntary. I am not a sufficient expert to answer that question.

Mr. VOLKMER. It was required in certain instances by the law of India that there be sterilization of the male.

Mr. FINDLEY. Under my language our administrators would require an assurance that the program to be carried out, and the program as carried out, would be totally voluntary.

Mr. VOLKMER. What I am getting at is, if any other country so prescribed that would be considered under the gentleman's amendment as an involuntary sterilization; would it not?

Mr. FINDLEY. A label on a program could not be sufficient and I have enough confidence in our AID administrative staff to be confident that they would look beyond the label and get assurances that the program in practice is voluntary.

Mr. VOLKMER. What does the gentleman mean by the word "involuntary"?

Mr. FINDLEY. An absence of coercion.

Mr. VOLKMER. In other words if the person himself would object to it, then neither the Government nor anyone else would have the right to obligate the person to have a sterilization. Is that right?

Mr. FINDLEY. It would certainly prohibit the use of U.S. funds for such purpose.

Mr. VOLKMER. That is right, for that type program.

Mr. FINDLEY. Yes.

Mr. VOLKMER. I thank the gentleman very much.

Mr. SOLARZ. Mr. Speaker, will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman from New York.

Mr. SOLARZ. I appreciate the gentleman yielding.

I would if I might shed some light on the question raised by the gentleman concerning the sterilization program in India. I had an opportunity to visit India in December and I looked very carefully into the program they had going, and at that time it was at the height of the sterilization program. I can report to the gentleman that while there were certainly numerous instances where Indians were in effect coerced into having sterilizations, there were no instances in which as a matter of law Indians were legally compelled to have sterilizations.

There was one Indian State which did pass a law mandating under certain circumstances sterilization.

Mr. VOLKMER. That is right.

Mr. SOLARZ. But according to the Indian Constitution a law passed by a State cannot become effective until approved by the President of the entire country and that law was never so approved. Subsequently the Ghandi government was defeated and the new government has in effect brought the previously existing sterilization program to an end.

So while there were certainly instances where people in effect were coerced by overeager solicitors for the sterilization program there was not a single instance where anybody was obligated by law to undergo sterilization.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

(On request of Mr. SOLARZ, and by unanimous consent, Mr. FINDLEY was allowed to proceed for 1 additional minute.)

Mr. SOLARZ. Mr. Chairman, if the gentleman will yield further, I want to make it clear I strongly support the substitute offered by the gentleman from Illinois because it is based on the notion that while we are against coercion we do favor choice.

Sterilization is the most popular form of birth control in our own country among couples where the wives are over 30. It is rapidly becoming the method of choice throughout the developing countries of the world. Millions of women want tubal ligations and millions of men want sterilizations. Where such programs are based on choice rather than coercion I think we should be in a position to support them.

I can assure our colleagues that not a single American dollar was used in bilateral assistance to coerce Indians to have a sterilization.

Mr. VOLKMER. I do not believe the gentleman can assure the Members of that, the gentleman's information to the contrary notwithstanding.

Mr. LONG of Maryland. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, a number of provisions of this economic aid authorization bill deserve the support of this Congress. I am speaking especially of—

Section 103, to provide rural energy sources for developing countries;

Section 106(c) to encourage poor countries to use nonnuclear sources of energy;

Section 104(c) and section 112, which state the need to give attention in all AID programs to their impact on population growth and on the motivation for smaller family size;

Section 114, which requires that the effect of AID programs on the natural resource base of a country be taken into account; and

Section 103, which affirms the need to provide capital and technical assistance to cooperative programs in poor countries.

The International Relations Committee of the House has made clear in previous authorization bills that the Congress wishes to see our economic development aid go to help the poor of the world. I heartily concur and by the poor I mean poor people and not rich people in poor countries.

However, one action by the committee I must disagree with. That action is the addition of $61.2 million to the food and nutrition category of AID's program, which the committee report indicates should go to India. According to the report:

> The committee is encouraged by the recent demonstration of democratic principles and by the restoration of suspended political freedom in that country (India).—H. Rept. 95-240, p. 20).

Disillusionment with India's uses of foreign aid began long before Indira Gandhi's grab for dictatorial power and, indeed, is rooted in a generation of mistaken economic policies. During the 10 years 1965–74, while India was receiving $7.6 billion in foreign aid from the U.S. and the multilateral development banks, it chose to spend $16.4 billion on its military; its population grew by over 100 million; and it imported over 50 million metric tons of food—all this before Indira Gandhi suspended parliamentary democracy. Very little of India's resources have ever gone to help its poor. Yet its vast Gangetic plain is capable of immense productivity under the smallholder cultivation, and it has the resources of underutilized labor to do this cultivation and to fashion the agricultural implements needed to make the cultivation more efficient.

Although Prime Minister Desai is reportedly a disciple of Mahatma Gandhi (no relation to Indira), he has given no sign yet of renouncing India's development of nuclear explosives. On the contrary, what he has done (in an April 19th press conference) is to reaffirm India's refusal to sign the Nuclear Nonproliferation Treaty until all other nations scrap their nuclear weapons (a disingenuous way of saying "never". India's nuclear explosion will sting its neighbors into developing their own nuclear weaponry and when they do, as Pakistan seems in the process of trying, India's intransigence will certainly be intensified.

Another reason argued for resuming bilateral economic aid to India, is that—

The new Indian Government has stressed the need for more rapid development based on a rural-led, employment-oriented, strategy to increase agricultural production and small-scale industry. The Government has emphasized the need to decentralize decision-making to the village level and provide more effective support for small farmers. (H. Rep't. 95-240, p. 20).

If such programs were actually implemented, renewed bilateral development aid for India might well be called for, if combined with reduced military spending and a renunciation of nuclear explosive development. Indira Gandhi's Congress Party often paid lip service to these goals, but has accomplished relatively little of them. Further, these statements by the Indian Government to which the committee refers are contained in the Janata party platform, a campaign document: in a statement by the Indian Finance Minister when he presented the 1977–78 budget—a budget prepared by the former Congress Party government—to the Indian Parliament, in March; and in debate on that budget. Budget amendments to begin the implementation of the "rural-led, employment-oriented strategy" referred to the committee are not expected until June, and these budget changes may be no more than small steps in this direction. It will be months until the real intentions and capabilities of the new Indian Government in economic and other areas are known. Considering the years of aid programs and the billions of dollars wasted in India, we should have more than the return of parliamentary democracy on which to base resumed bilateral development aid to India.

Instead we should have India's unmistakable commitment that it intends to shift away from military, heavy industry and nuclear programs, toward the village development Mahatma Gandhi called for during his struggle for India's independence.

Mr. BINGHAM. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, frankly I would not have thought that the substitute amendment offered by the gentleman from Illinois was necessary but I certainly think that it is perfectly acceptable. I greatly prefer it to the amendment offered by the gentleman from Missouri.

We start with the proposition that runaway population is one of the greatest threats the world faces today. This House of Representatives has led the way, and I am proud of the record we have made, in pushing for assistance to population control programs. This has come from our committee to a large extent and I think it has been a great contribution and has been supported by several administrations since.

Now, one of the most effective methods of population control is voluntary sterilization. It would be a tragedy, in my opinion, if we could not assist in programs of that nature.

The gentleman from Missouri suggests that people in the underdeveloped countries do not know the difference between voluntary and compulsory. I suggest that is a very mistaken notion. These results are not so naive. In fact, my understanding is that the results of the election in India reflected to a very considerable extent their resentment against the degree of coercion that had existed in the Indian sterilization program.

Mr. FRASER. Mr. Chairman, will the gentleman yield?

Mr. BINGHAM. I yield to the gentleman from Minnesota.

Mr. FRASER. Mr. Chairman, I want to join in the views of the gentleman from New York. I fully share them. In my view, it would be well to accept the Findley substitute. It does get to the heart of the problem. I think none of us want to see any involuntary sterilization funded by the United States assistance program.

Mr. BINGHAM. Mr. Chairman, would the gentleman not agree, it is very wrong to suggest that people do not know the difference between voluntary and compulsory in a program of this kind?

Mr. FRASER. I agree with the gentleman. I asked a prominent Indian leader about the effect of what happened in India in the elections. It was his view that what the events involving compulsory sterilization proved, was that this not only worried people, but it gave them an illustration of what can happen under an authoritarian government and they decided they did not want any more of that government.

Mr. BINGHAM. Let me make one more point: If we stop sterilization, we are going to get more abortions.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. BINGHAM. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, I do not agree with the gentleman as to whether the people in the underdeveloped nations know they would be required to have sterilization or not.

Mr. Chairman, I would point out an article to some of the Members here from the New York Times of November 23, last year. It is pointed out that 3,400 Indians in this country during a 4-year period had sterilization operations. Many of them did not know that it was not required. They signed a white paper without knowing what was on it and were sterilized. That is in this country. That is not in India. That is not in Africa. That is not in Asia. That is no place else. To say that people over there are more intelligent and, therefore, they will know, I think is wrong. I think we must admit that these things do occur and did occur in this country.

Mr. BINGHAM. Mr. Chairman, I would like to reclaim my time. May I say that I doubt very much the accuracy of that statement. I have had some experience in the field of technical assistance back a number of years ago. I visited health clinics in India where this process goes on. I know the state of mind that these people go through. They are in doubt about what they should do, but they know that it is their personal decision and it is a difficult personal decision in many cases. The reality of the choice is very real to them. The people of the developing world are not naive. They are not ignorant in the sense of world wisdom. They know very well the difference between compulsion and consent.

The CHAIRMAN. The time of the gentleman from New York has expired.

(At the request of Mr. HALL, and by unanimous consent, Mr. BINGHAM was allowed to proceed for an additional 2 minutes.)

Mr. HALL. Will the gentleman yield?

Mr. BINGHAM. I yield to the gentleman from Texas.

Mr. HALL. Does the gentleman know how much money has been spent in prior years in India with reference to our contribution to their sterilization program?

Mr. BINGHAM. We have had no program in India for a number of years, no AID program there. I certainly would agree if there was an element of coercion in the Indian program in the past, it is not something that we would want to support and that would be taken care of by the Findley substitute. It is also taken care of under the AID guidelines, and would simply be put into the statute by the substitute offered by the gentleman from Illinois.

Mr. HALL. Does the gentleman know how much money the United States has spent in other developing nations of the world with reference to the sterilization programs?

Mr. BINGHAM. I cannot give the gentleman the totals. Perhaps someone with the figures could indicate the totals of our population program. It has been substantial, because we have recognized in our committee that all the efforts we make to grow more food to help the developing nations solve their problems can be frustrated if they cannot engage in intelligent population control efforts.

Mr. HALL. Does the gentleman know whether or not, as a result of any of the funds that have been spent, there has been a decrease in the population of those countries where the money has been spent?

Mr. BINGHAM. There certainly has been a decrease in the population growth. We are not even so bold as to hope for a population decrease. We are hoping for some leveling off in the population growth which is so explosive.

Mr. BROOMFIELD. Mr. Chairman, I move to strike the last word, and I rise in support of the Findley amendment.

I would like to take a moment to say that we are in receipt of a copy of a letter which was sent to the chairman of our committee, which I think is quite important in clarifying this very subject. This letter comes from Mr. Nooter, Act-

ing Administrator for AID, and the letter follows:

AGENCY FOR INTERNATIONAL DEVELOPMENT,
Washington, D.C., May 12, 1977.

Hon. CLEMENT ZABLOCKI,
Chairman, Committee on International Relations, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: You are no doubt aware of recent newspaper articles concerning A.I.D.'s support for voluntary sterilization activities through its population assistance program. Since you are about to take up our authorization legislation for FY 1978, I want to provide on behalf of Governor Gilligan, who is now in Africa, this Agency's views concerning these articles and summarize our policy with regard to voluntary sterilization:

First, this Government has no goals of any kind to sterilize any number of women around the world.

Second, our population assistance program does not seek to maintain the normal operation of U.S. commercial interests around the world.

Third, it is not the main purpose of this program or any of its training activities to emphasize sterilization as a method of family planning.

The recent news articles emanated from an interview with Dr. R. T. Ravenholt, Director of A.I.D.'s Office of Population. In his response to the editor of the St. Louis Post-Dispatch on April 26, 1977, Dr. Ravenholt asserted that the Post-Dispatch article of April 22 distorted both his comments and the objectives of the United States, including the matter of alleged goals for voluntary sterilization.

Whatever was said in that interview, I want to reiterate that it has been and is contrary to the policy of the U.S. Government in general and of A.I.D. in particular to set any targets whatsoever for voluntary sterilization programs. We intend to take whatever steps are necessary to assure that this policy is fully understood and carried out by all A.I.D. employees.

The population policies of A.I.D. are founded on the interests of human beings as individuals, not as numbers on any chart. These policies must reflect the right of each couple to space and plan their families on a voluntary basis. They must also reflect the impact that population growth can have on the overall economic and social development of a particular nation. The provision of family planning services by A.I.D. is intended to respond to the welfare of the individual and the prosperity of his or her own country, certainly not the commercial interests of this country.

A.I.D.'s population assistance program supports training activities through major universities, such as Johns Hopkins University, the University of Pittsburgh and Washington University, St. Louis, and private organizations such as the Pathfinder Fund, the Association for Voluntary Sterilization, Family Planning International Assistance and the International Planned Parenthood Federation. Such programs provide the training of physicians from developing countries in the latest obstetrical and gynecological (OB/GYN) technology, including sterilization techniques. But these training programs do not emphasize sterilization as a method of family planning. Rather they cover a broad scope of training in OB/GYN practice including endocrinology, health aspects of pregnancy, the identification of cancerous conditions and the management of infertility as well as of fertility through techniques of family planning, including sterilization.

Over the past several months, we have made a concerted effort to complete work on the elaboration of guidelines which will govern all A.I.D.-funded voluntary sterilization programs. These guidelines spell out detailed provisions relating to informed consent to ensure that the acceptance of sterilization as a method of family planning through any program supported by A.I.D., whether bilateral or through private organizations, is truly voluntary in all respects. Moreover, these guidelines emphasize the general health and human factors governing such programs.

These guidelines are expected to be issued in the near future to all A.I.D. missions and private organizations which receive A.I.D. funds for the support of any aspect of voluntary sterilization programs. In the meantime the attachment outlines the major policy points which may be of interest to you and other Members of Congress when considering our legislation.

Finally, I wish to assure you and other Members of Congress that the philosophy of A.I.D. is fully in accord with the principles of voluntary acceptance of family planning which you believe have guided and should guide our actions in this vital area of mutual concern.

Sincerely yours,

ROBERT H. NOOTER,
Acting Administrator.

Mr. Chairman, I yield to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Chairman, I speak most urgently on behalf of the Findley substitute. I think it is a very important step that we take here today, and it would be tragic if we moved in the direction that the amendment of the gentleman from Missouri suggests.

We have no conception in this country—no conception of what those people are up against—until we see them. I have been in Bombay and have seen the people living on the streets, crowded around puddles of water, filthy puddles of water, where the animals are sloshing in and out. I know what over-population means. I did not even dream of the situations in which these people find themselves. They wish to try to control their population, and it is pathetic that this Nation, where it is legal, where people take advantage of it, where people with money do it all the time—it is pathetic that it should be denied to other people who may wish it.

To forbid voluntary sterilization is antihumanitarian in a very true sense. We are unwilling to even consider the situation in which other people find themselves. That is what is somehow suggested by this amendment of the gentleman from Missouri. I think the amendment of my colleague from Illinois (Mr. FINDLEY) really represents what the people of this country would support. We will not support programs where people are urged or offered bribes or pushed or coerced—we will only support with our help voluntary procedures.

If we do not support with our help those voluntary programs, we are going to have intensified need for programs of every other kind. There is no stop to population growth once it gets started.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Illinois (Mr. FINDLEY).

Mr. FINDLEY. Mr. Chairman, I want to assure my colleagues that in voting for my substitute amendment they are not voting for sterilization. What they are voting for is language to prohibit involuntary sterilization.

It may be that some felt that my language would put them on record in favor of sterilization. It does not. It puts them on record in opposition to involuntary sterilization, in opposition to the use of financial incentives to bring about sterilization.

Mr. VOLKMER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Findley substitute amendment and in support of the amendment offered by the gentleman from Missouri (Mr. YOUNG).

Mr. Chairman, it is my feeling that a large number of American dollars have been used, through information that I have received, for sterilization in many countries throughout the world, not only through the programs that are here in this bill, but also through the United Naions Fund for Population Activities. This information comes directly from Dr. Ravenholt, who is the Federal Government's Office of Population Director. It is his position that, within a period in the future, one-quarter of the fertile women in the world should be sterilized. The reasons for this are, basically, he says four, including basically and primarily the protection of U.S. economic interests, the commercial interests, not the human interests of those countries, not the human interests of this country. He lists this as a third point:

Population control is needed to maintain the normal operation of U.S. commercial interests around the world.

Without our trying to help these countries with their economic and social development, the world would rebel against the strong U.S. commercial presence. The self-interest thing is a compelling element.

So whose interests are we really worried about here with the Findley amendment?

I also feel that it is wrong for this country to support with its tax dollars the use of funds through other means and other entities where the countries do not want sterilization, where they object to it. That is being done.

Dr. Ravenholt says:

In some countries, however, political sensitivity makes it impossible for the U.S. to negotiate such agreements . . .

We have agreements with 30 countries for voluntary sterilization.

He says, "In those cases, efforts are made to set up population programs under the aegis of other organizations, such as the United Nations Fund for Population Activities"—I would like to know how much of our money is used in India — "and the International Planned Parenthood Federation."

"In countries with less opposition to the involvement in population affairs, the opposition generally comes from leftists or religious elements or both," Dr. Ravenholt said.

I do not know if I am a leftist, Mr. Chairman, but I do believe in human dignity, and I worry more about people with children than I do about their standard of living. That is really what we are talking about here. We are saying by the Findley amendment for sterilization that fewer people would have more time for

recreation, they would have more time and money for pleasure, they would have college educations and high school educations. I would provide these for all people without sterilization.

For that reason, Mr. Chairman, I oppose the substitute offered by the gentleman from Illinois (Mr. FINDLEY), and I will support the amendment offered by the gentleman from Missouri (Mr. YOUNG).

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words.

I made myself a pledge, Mr. Chairman, to be reasonably brief this afternoon, and I will try to live up to my pledge.

I think that this amendment automatically demonstrates the problems encountered in debating this subject, because we have gone far astray from the point of the amendment offered by the gentleman from Missouri (Mr. YOUNG). In an attempt to be logical, I am, therefore, supporting the original amendment offered by the gentleman from Missouri (Mr. YOUNG), and I am opposing the substitute. The reason why I take that position, it seems to me, is quite simple.

If the letter from the Administrator that was read means what it says, then there should be no objection to the amendment offered by the gentleman from Missouri (Mr. YOUNG), because if in fact the AID agency is not involved directly or indirectly in any enforced sterilization programs, they should have no objection to the amendment.

Repeated references in arguments made for and against the amendment have been made to the political developments in India, where sterilization was a major political issue. From all the reports I have read, and from the Indians of all persuasions to whom I have spoken, there is no doubt that the policy of enforced sterilization—and it was enforced sterilization that was practiced by Mrs. Gandhi's Government—was one of the major causes of the complete political repudiation of that government by the Indian people.

As much as someone might claim that we do not and have not supported sterilization programs in India, that really is not so. The massive support we have given India over the years in the form of Public Law 480 funds and the fact that we wrote off $3 billion in counterpart funds, as I recall, we obviously freed other funds available to that government to embark on a number of other programs, including enforced sterilization. We heard testimony before one of our subcommittees of the Committee on International Relations that was made by political opponents of Mrs. Gandhi that the program of enforced sterilization was aimed at peoples who had different political or religious views, and that this was not an accidental thing, that it was a cold, calculated political ploy.

As I understand our aid program, we do not try to force our philosophy on others, we do not try to force our views concerning such a delicate subject on any government or people. I should think there would be no objection to the amendment offered by the gentleman from Missouri (Mr. YOUNG).

Frankly, in anticipation of the point that the gentleman from New York (Mr. BINGHAM) will probably make, I am one member of the committee who does not believe that the support for population control that the majority of the committee emphasizes is sound. acceptable policy, and I separate myself from that contention.

Mr. BINGHAM. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from New York.

Mr. BINGHAM. Mr. Chairman, from what the gentleman has said, I think he is under a misapprehension as to what the amendment offered by the gentleman from Missouri (Mr. YOUNG) states. It does not refer only to enforced sterilization. It says:

> None of the funds . . . shall be used to pay for the performance of sterilizations as a method of family planning or to motivate or coerce any persons to practice sterilizations.

Mr. Chairman, I think the argument made by the gentleman from Missouri (Mr. YOUNG) makes it plain that he is opposed to any use of funds for even voluntary sterilization, so I do not understand the argument of my colleague, the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Chairman, let me make it plain that that is my position also.

Mr. ZABLOCKI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, at the very outset I wish to commend our colleague, the gentleman from Missouri (Mr. YOUNG), for bringing this particular issue to the attention of the committee.

The question was raised that in our report we do not mention a word about sterilization. The report did not mention sterilization, and it did not mention abortion either.

But I want to assure my colleagues that it was certainly the understanding and the perception of the members of the Committee on International Relations—certainly it was the understanding of the chairman of the committee—that U.S. policy in this area was not to endorse and not to support involuntary sterilizations or to promote or to use any AID funds for that purpose or to promote sterilization on a priority basis.

It was not the main purpose of the population program or of any other related activities to emphasize sterilization as a method of family planning.

This was our understanding, so we did not include it in our report. However, I rise in support of the substitute amendment offered by the gentleman from Illinois (Mr. FINDLEY) because it, indeed, prohibits any use of funds for involuntary sterilization and further prohibits use of funds to coerce, or provide any financial incentive to, any person to practice sterilization. The substitute therefore is consistent with the intent and purpose behind the amendment of the gentleman from Missouri (Mr. YOUNG), and I can assure him that we will carefully review and follow up this program to insure that AID does not change its policy with respect to the use of funds for involuntary sterilization programs. If we find that the agency should use such funds, I can assure the gentleman from Missouri (Mr. YOUNG) that we will take care of it during the next go-around.

I therefore urge, Mr. Chairman, that the substitute amendment offered by the gentleman from Illinois be adopted.

Mr. YOUNG of Missouri. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Missouri.

Mr. YOUNG of Missouri. Mr. Chairman, I appreciate and I understand the chairman's remarks very well. I also appreciate the fact that the committee will pay particular attention to this problem in the future, as the gentleman indicated.

Mr. Chairman, this is a very important matter, and I think the American people will appreciate it. I think they would much rather be assured that their funds are going for medicine and food. That is what a lot of us said when we campaigned last time.

In supporting the International Development Act, if we will have that assurance, I am sure it will be beneficial for everybody. What we are trying to do throughout the world is to help feed the hungry and clothe the poor people.

Mr. ZABLOCKI. Mr. Chairman, I assure the gentleman that it would be unconscionable if we were spending U.S. funds for involuntary sterilization, forcing this method of family planning on people who do not want it. This is not our intent, and this is something we would not want practiced.

Mr. HALL. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Texas.

Mr. HALL. Mr. Chairman, may I ask this question: The gentleman indicates that it would be reprehensible to spend U.S. funds for involuntary sterilization. Should that not also hold true with reference to the expenditure of U.S. funds for voluntary sterilization?

Mr. ZABLOCKI. To answer the gentleman, Mr. Chairman, if a recipient or a government is making the choice available to its people as a method, on the basis of their own choice, I find it personally reprehensible. However, I do not think we should insist that our mores and standards must be applied to the recipient countries if they voluntarily want to use this method.

Mr. HALL. Mr. Chairman, is there any prohibition that prevents the country where these people live from bearing the cost, obligation and responsibility of that voluntary sterilization program?

Mr. ZABLOCKI. No, there is not any prohibition.

Mr. HALL. Why should the United States pay for that sort of program?

Mr. ZABLOCKI. If the recipient country uses moneys for these purposes and we assist that country, it is what may be called a joint effort or a joint incentive.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. ZABLOCKI) has expired.

(On request of Mr. YOUNG of Missouri and by unanimous consent, Mr. ZABLOCKI

was allowed to proceed for 1 additional minute.)

Mr. YOUNG of Missouri. Mr. Chairman, will the gentleman yield further?

Mr. ZABLOCKI. I yield to the gentleman from Missouri.

Mr. HALL. Mr. Chairman, could the gentleman give me the amount of money that has been spent? I thought I saw the gentleman with that information on his desk earlier. Could he give me the amount of money that has been spent by the U.S. Government?

Mr. ZABLOCKI. If my memory serves me correctly—and we will have the chart before us in a moment—it was at one time $12 million; but now $25 million is proposed for fiscal year 1978.

Mr. HALL. $25 million for fiscal year 1978?

Mr. ZABLOCKI. Some of it is used for the training of surgeons, for biomedical research, for information, and education. Of that $25 million, about $5.9 million, or about one-fifth, would go for those purposes. The other funds go for other services and the delivery of services.

Mr. HALL. Is any of this $25 million set aside for voluntary or involuntary sterilization in any foreign country?

Mr. ZABLOCKI. This would be only for voluntary sterilization programs.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. ZABLOCKI) has expired.

(On request of Mr. HALL and by unanimous consent, Mr. ZABLOCKI was allowed to proceed for 1 additional minute.)

Mr. HALL. Mr. Chairman, will the gentleman yield further?

Mr. ZABLOCKI. I yield to the gentleman from Texas.

Mr. HALL. Mr. Chairman, do I understand from the gentleman from Wisconsin that one-fifth of the $25 million is set aside for voluntary sterilizations?

Mr. ZABLOCKI. All of it. Any of it can be used. The $25 million is the worldwide, total amount for this program including the voluntary sterilization program. Of that $25 million, $5,900,000 is for development and support of voluntary surgical contraceptive programs, including training of surgeons, biomedical research, and information and education.

Mr. HALL. We are setting aside $5 million for contraceptives in foreign countries?

Mr. ZABLOCKI. No, more than that.

Mr. HALL. More than that? That makes it that much worse.

I believe that is all I have to say.

Mr. FRASER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will only take just a minute, but I did not want to let the record stand that the Director of the Population Control Program of AID argued that we need a population control program in order to protect the commercial interests of the United States.

Since this report was based upon a story appearing in the St. Louis Post Dispatch, Dr. Ravenholt wrote a letter correcting what may have been an honest error in understanding in order to make clear that the U.S. commercial interests run to the general program of economic development assistance. Population planning is only a small part of our effort. It is to our interest to help promote development in Third World countries as a matter of enlightened self-interest on the part of the United States, and it is only in that context that Dr. Ravenholt suggests that these programs were in our interest.

To suggest that the population programs serve the commercial interests of the United States I think is a misreading of his intentions. But I can understand why someone might get that impression based upon the story in the newspaper.

As I say, Mr. Chairman, I just want to see that that is clarified in the RECORD.

Mr. BEILENSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to speak in support of the substitute amendment proposed by the gentleman from Illinois (Mr. FINDLEY) and in opposition to the original amendment of the gentleman from Missouri (Mr. YOUNG).

I think the amendment offered by the gentleman from Missouri (Mr. YOUNG) is an unconscionable one which would prohibit men and women in other countries from freely choosing that form of contraception that may be best suited to their needs—and is desired by them. I find this especially anomalous because, as the gentleman from New York (Mr. SOLARZ) has earlier pointed out, sterilization is now the most popular and most widely used form of contraception in our own country among couples where the woman is over age 30. Vasectomies alone in the United States have risen from about 100,000 per year in the early 1970's to about 700,000 per year at the present time, and female sterilizations have now become even more numerous.

Mr. Chairman, adoption of the amendment would force women who want to practice responsible parenthood to rely on birth control pills or intrauterine devices—both of which pose potential serious health problems and both of which have substantial failure rates—or to rely on abortion, which we certainly do not want to encourage.

I think it is important to reemphasize that there are already adequate safeguards in the law and regulations against our funding involuntary sterilization procedures. Section 291(c) of the title X amendment to the Foreign Assistance Act presently requires:

> In carrying out programs authorized in this title, the President shall establish reasonable procedures to insure, whenever family-planning assistance from the United States is involved, that no individual will be coerced to practice methods of family planning inconsistent with his or her moral, philosophical, or religious beliefs.

In addition, the Office of Population of AID has for some months now directed that there be inserted into each contract and grant monitored by that Office the following statement:

> The grantee (and contractee) shall establish procedures to insure that all funds provided by A.I.D. for family planning assistance are used in accordance with the moral, religious and philosophical beliefs of the individuals to whom services are provided. Under no circumstances shall any individual or group be coerced into receiving such services. In the case of voluntary sterilization, informed consent shall be documented and the rights of the individual protected in accordance with those standards considered acceptable under the laws and customs of the country in which the program is operating. Procedures for ensuring informed consent shall include a description of the risks and benefits of the procedure, and the statement that the procedure is considered nonreversible.

It is important to emphasize, Mr. Chairman, that AID and other U.S. organizations, public and private, support sterilization only on a voluntary basis, without coercion and with a requirement for informed written consent. And it is useful to point out, also, that sterilization is legal, for contraceptive or health purposes, in nearly all developing countries and that AID-supported programs are carried out in full compliance with local legal requirements. In many developing countries which are faced with serious population growth problems there are presently Government-supported voluntary sterilization programs in which sterilization together with oral contraceptives and IUD's, is available on a voluntary basis—and there is no legitimate reason why U.S. funds should not be used to further the family planning policies already adopted by these countries.

In most developing countries, the age of marriage is very young—about 15 years. Thus by age 30, a woman has often had 5 to 6 children and still faces 15 years of continued reproductive life. Because IUD's often require medical followup, and oral contraceptives are difficult to distribute to rural areas, women welcome an effective, permanent method to prevent the continuing danger of pregnancy. After age 30, pregnancy represents a serious health risk, especially to undernourished women living in poverty with limited access to medical care. For such women, sterilization is often preferable to continued use of other methods with higher failure rates, greater complications and problems of supply, followup, and personal convenience.

New techniques for female sterilization have made it possible to perform sterilizations on an outpatient basis with minimal discomfort and inconvenience and few complications. But physicians and medical teams in developing countries need adequate training and equipment in order to perform these procedures safely. Moreover, in order to serve poor women without charge or at low fees, present overcrowded clinics and hospitals in developing countries need additional support. AID funds are provided only where local governments, health facilities, and physicians are willing to provide such a service.

Finally, Mr. Chairman, this proposal was not presented to either our full Committee on International Relations or to any of the several subcommittees that considered the bill before us, with evidence of the alleged abuses so that they could be discussed dispassionately and

with the opportunity for the AID people to respond to these allegations. I do not think this is the proper way to legislate in such an important and sensitive area.

For these reasons, Mr. Chairman, I think the original amendment by the gentleman from Missouri is unwise and should be rejected, and the amendment by the gentleman from Illinois (Mr. FINDLEY) should be adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. FINDLEY) as a substitute for the amendment offered by the gentleman from Missouri (Mr. YOUNG).

The question was taken; and the Chairman being in doubt, the committee divided, and there were—ayes 30, noes 11.

So the amendment offered as a substitute for the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. YOUNG) as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. LOTT

Mr. LOTT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LOTT: Page 16, strike out lines 8 through 18 and insert in lieu thereof the following:

(1) by striking out "for the fiscal year 1974," and all that follows thereafter through $194,500,000 and"; and

(2) by inserting immediately before the period at the end of the first sentence "and for the fiscal year 1978, $246,000,000.".

Mr. LOTT. Mr. Chairman, I have an amendment at the desk

Mr. Chairman, my amendment is very simple. It reduces by $25,750,000 the funding in section 117 of the bill for U.S. voluntary contributions to international organizations and programs for fiscal year 1978.

It is my understanding that the administration requested $246 million for our voluntary contributions to certain international groups and programs in fiscal year 1978.

The Subcommittee on International Organizations of the International Relations Committee added to the President's request, and these additions were accepted by the full committee. The authorization now sought for this section of the legislation is $271,750,000.

Very briefly, the committee added to three programs which the President included in his request: The U.N. development program, $10 million; the U.N. Children's Fund, $5 million; and the Organization of American States voluntary programs, $2.5 million. Next, the committee added authorizations for organizations and programs for which the President made no request: The U.N. Decade for Women, $3 million; the U.N. Capital Development Fund, $2 million; the U.N. associate experts program, $2 million; the U.N. Year of the Child, $750,000; and the U.N. Namibia Institute, $500,000. The total of the committee's authorizations above the Carter administration request is $25,750,000.

I think it is important, when we contemplate making voluntary contributions to these types of international programs, to look closely at how the money designated for this purpose compares with the rest of the funding in the legislation. Approximately 36 percent of the $1.7 billion authorization in the bill for fiscal year 1978, or $613.2 million, is earmarked for food and nutrition. The next largest authorization in the entire bill, $271.75 million, is for our voluntary contributions to international organizations and programs. This purpose has been given a higher priority than population planning; has been recognized as a greater need than health and education combined; and has received more than double the proposed funding for energy, environmental, and disaster research.

How can a Member of Congress justify this to his constituents?

Actually, my amendment to delete a mere $25.75 million would only return the authorization for voluntary contributions to the President's request. That is all. It would not cut the administration's budget for this purpose one penny.

It is fair to say that I have always questioned whether our contributions to international programs have been in the best interest of the American people. I just find it very difficult, when I go back to my congressional district, which is located in the State with the lowest average per capita income in the Nation, to explain why the U.S. Congress has authorized the spending of their hard-earned tax dollars for programs of which they have never even heard supposedly to benefit countries of which they likewise have never heard.

So in the interest of fiscal restraint, commonsense, and better placed priorities, I urge the passage of my amendment.

Mr. BINGHAM. Mr. Chairman, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from New York.

Mr. BINGHAM. I thank the gentleman for yielding.

Is it not true the amendment offered by the gentleman would also cut out $5 million for the U.N. Children's Fund? That is the one the children go out at Halloween and collect pennies for.

Mr. LOTT. That is right. The $5 million was added to the request of the administration, which was $20 million.

Mr. BINGHAM. And the gentleman's amendment would cut $10 million from the U.N. development program.

Mr. LOTT. That is correct, but it still leaves $130 million for the program.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

(On request of Mr. BINGHAM, and by unanimous consent, Mr. LOTT was allowed to proceed for 2 additional minutes.)

Mr. BINGHAM. Mr. Chairman, if the gentleman will yield further, it cuts $10 million from the U.N. Development Fund, which is the program being run by our former colleague, Bradford Morse.

Mr. LOTT. But this bill adds $10 million above the administration request.

Mr. BINGHAM. But I want to get the gentleman's agreement that $15 million of the cost he proposes would reduce those two programs.

Mr. BEARD of Tennessee. Mr. Chairman, if the gentleman will yield, the gentleman said this would eliminate the UNICEF program?

Mr. BINGHAM. No. I said it would cut $5 million from the committee's recommendation for UNICEF and $10 million from the program run by Brad Morse.

Mr. LOTT. It would cut $5 million but they would still have $20 million in this program. We are not cutting the program out. I am saying let us stay within the budget request of the President of the United States. This amendment cuts only $25 million. I just think this is one area where we can make a saving.

Mr. FRASER. Mr. Chairman, I rise in opposition to the amendment.

The subcommittee which I chair held two hearings on the items in the voluntary contributions to international organizations. We recommended certain changes in the President's recommendation. Several of our changes however, unofficially I believe, are now within the purview of what the administration wishes, and clearly the Assistant Secretary for International Organization who testified indicated there was strong merit to each of the items in our budget.

Let me make the point. The main items in this $25 million are, first, the children's fund. The committee has in recent years repeatedly added a small amount to the U.S. contribution to the children's fund because it is believed that this fund is wisely administered, it reaches the young people, the children of the world who often are the real victims of poverty and oppression. So there was agreement in the committee to this $5 million add-on for the children's fund.

The second significant item in this is the $10 million additional for the United Nations Development Program. This is a program which is now being administered by our former colleague Bradford Morse, who took this responsibility at the United Nations with the expectation of making the UNDP a more effective program in assisting the poor countries of the world. He is having some success in that regard. At the meetings of the governing board of the UNDP they have agreed to focus their efforts on the very poorest of the poor of the world.

It is an important adjunct to the U.S. assistance programs. They are tightening up on administration. They are reducing the number of staff and making it a leaner and more effective program than ever before.

I would like to make one point that is important to remember historically, and that is that when the Congress voted to impose a limitation on the U.S. contributions at 25 percent, this is now the assessed contribution of the United States, in the negotiations which our representatives undertook at the U.N., in exchange for agreement by the U.N. General Assembly to reducing U.S. assessed obligations to 25 percent, we undertook a strong and firm commitment to increase our support to the U.N. Development Program. Unfortunately that commitment has not been fully carried out and the U.N. Development Program has

had difficulty in the face of rising inflation and rising costs in maintaining the level of programs which it has had in the past.

This is an important program. It is a multilateral program. Our contributions currently run at only 23 percent, which is one of the lower shares which the United States pays in international programs. But I think our confidence in Brad Morse and his administration would be demonstrated by the acceptance of the committee view that there was $10 million justified as an add-on to this program.

Other programs include the U.N. program of the Year of the Child, which is only $750,000.

Then there is the U.N. Decade for Women. In part, this involves funding the U.N. Decade for Women program, which includes an institute in Iran, in which the Government of Iran has great interest. It will be funded by contributions from a number of countries. So, altogether, I think it can be said that this $25 million, while not a large amount, will touch a number of important U.N. programs.

I think the United States is making a new start in the U.N. under the leadership of Ambassador Young, who has been effective in breaking down some of the prejudices against the United States in voting on issues that we have faced in the past.

The U.N. was the forum in which President Carter spoke strongly of the American commitment to human rights. It was warmly received there. I think this effort to provide some substance to the American commitment to the U.N. is fully justified. I would urge its passage.

Mrs. SMITH of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. FRASER. I yield to the gentlewoman from Nebraska.

Mrs. SMITH of Nebraska. Mr. Chairman, in the Subcommittee on Foreign Operations of the Committee on Appropriations we are told that we cannot get an audit on the money we give to the World Bank. We cannot get an audit of the International Development Agency or the Asian Development Bank.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

(By unanimous consent, Mr. FRASER was allowed to proceed for an additional 2 minutes.)

Mrs. SMITH of Nebraska. Mr. Chairman, if the gentleman will yield further, do we have an audit available on how the money that we turn over to the United Nations for this development fund is used?

Mr. FRASER. This has been a continuing problem and the committee has been involved in it. The gentlewoman is right. These international institutions do not particularly appreciate the U.S. auditors coming in and looking at their books. They view their international operations as inconsistent with a single nation undertaking an audit of this kind. Nevertheless, we have sought a variety of ways to assure ourselves that this money is being spent properly. In the 5th Committee of the General Assembly, in which our colleague, the gentleman from Alabama, Mr. JOHN BUCHANAN, served for awhile, there has been an increasingly rigorous examination of budgets of the U.N. in an effort to make sure we are cutting out the fat and getting as much for the moneys as we can. Moreover, the largest item is the UNDP, which Brad Morris heads, and I have myself rather substantial confidence in Brad Morris in making sure these moneys are spent carefully.

I am not really telling the gentlewoman that we have the full kind of audit capability with these international institutions that we would like to have, but in variety of ways we are assuring ourselves that the money is being carefully spent.

Mr. LOTT. Mr. Chairman, will the gentleman yield?

Mr. FRASER. I yield to the gentleman from Mississippi.

Mr. LOTT. Mr. Chairman, if we look at the amendment we have offered, I suggest another $25.75 million from this particular section to put back at the President's budget request.

Mr. FRASER. But if money is not taken off the programs I have described, it means it is coming out of the international atomic energy effort, which is increasingly involved in our attempts to monitor nuclear proliferation around the world.

The CHAIRMAN. The time of the gentleman from Minnesota has again expired.

(By unanimous consent, Mr. FRASER was allowed to proceed for 1 additional minute.)

Mr. FRASER. Mr. Chairman, the U.N. Relief Program for Refugees in the Middle East is a matter of some sensitivity and here we are speaking of maybe some progress toward a Middle East settlement. If we do not take it out of the programs I referred to, it will come out of other programs that have an even higher priority.

Mr. LOTT. Mr. Chairman, if the gentleman will yield further, it could come out of the U.N. University. I understand there is $10 million there. We could have used this amount.

Mr. FRASER. The funding for the U.N. University represents the only U.N. presence in Japan. We have a letter to the United States signed by several hundred members of the Japanese Diet asking that we join other countries in support of the U.N. University. I think it is a most significant proposal.

Mr. HALL. The gentleman indicated a moment ago that the various agencies of the United Nations that have received money from the United States have some reservations about giving accounts as to how the moneys have been spent. The gentleman said that is a continuing problem with the committee.

Mr. FRASER. Well, I would like to correct the gentleman. Actually, I would like to yield to the gentleman from Illinois (Mr. DERWINSKI) to answer this more fully, but no, they are providing a full account of how they spend the money. The question is whether they will permit GAO auditors in to examine receipts, vouchers, and invoices. There is where the problem arises. There is a full accounting of the expenditures available to all the member countries, and it is gone over rather carefully by the U.S. representatives.

I would like to yield at this point to the gentleman from Illinois.

Mr. DERWINSKI. The gentleman from Minnesota is correct. What is known as Committee 5 in the U.N.—in effect, the Budget Committee—has a subcommittee of about 9 or 10 people, which includes a permanent U.S. representative, and which really controls the U.N. budget. All the figures are available there to our U.S. mission.

The issue has come up again and again, as the gentleman from Minnesota accurately noted, but the one thing they will not do is to permit member countries to carry out their own individual inspections. They feel that is not the relationship they should have with, legislative bodies of the individual countries.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. FRASER. I yield to the gentleman from Florida.

Mr. FASCELL. In addition to that, at the committee's insistence, we wrote into the law section 301(e) of the Foreign Assistance Act. These guidelines have been followed by the administration. This has strengthened independent internal audits. Also the U.S. Comptroller General has promulgated guidelines for these audits. And finally these audits are available to the U.S. representatives, and through them to the General Accounting Office. So to answer the gentleman's question, there is auditing, and the audits are available to the United States.

Mr. HALL. Are we satisfied with that audit?

Mr. FASCELL. Yes, substantially as to the arrangements for audits. But we are constantly seeking improvements and closer fiscal scrutiny.

The CHAIRMAN. The time of the gentleman from Minnesota has again expired.

(By unanimous consent Mr. FRASER was allowed to proceed for 1 additional minute.)

Mr. FRASER. The answer is, we are satisfied with the audit. I would not want to say that we are satisfied always with the way the money is spent, but generally speaking, I think we are doing better in monitoring the expenditure payment.

Mr. DERWINSKI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I just want to add one footnote to the point made by the gentleman from Minnesota. Our former colleague, Bradford Morse, is now the director of the UNDP program. He inherited that program when it was in total shambles, his predecessor had actually overspent the budget and had even spent funds committed for the following years. What Mr. Morse had to do was to extricate that program from insolvency. Effective steps he has taken include moves to tighten up personnel, eliminate waste and streamline administrative procedures. The program is now one of the better of United Nations operations.

The committee felt, therefore, that the extra support for UNDP was warranted.

I make this point because I think there is some danger in justifying expenditures based on the fact that one individual, whom we know, will temporarily hold a certain position but since we are dealing with the present, I think that Mr. Morse has done a truly fine job, the committee properly supported that particular item in the bill.

Mr. BAUMAN. Mr. Chairman, I move to strike the last word.

I rise in support of the amendment. Mr. Chairman, I have listened with interest to the justifications of the opponents of the amendment offered by the gentleman from Mississippi, but I do not think the burning issue is the character of Bradford Morse. He is a nice fellow, and many of us know him, but the issue is whether or not the Congress is going to join President Carter in his announced intention of balancing the budget.

The President of the United States and Mr. Lance, as Budget Director, at some point sat down and made a decision on spending for international organizations. The amount they requested was $246 million. Now, this committee gratuitously, after its own hearings and justifications in their own minds, came in with almost $26 million more for these programs.

In so doing, they funded a number of programs the President did not even feel should be considered. Many have alluded here today, as reasons why we ought to retain this money, reasons such as funding for the U.N. Decade for Women program. The bill contains $3 million for that purpose. I am not sure, but I assume that this funds a program which was adopted at a conference in Mexico City a year and a half ago. It was one of the most radical, leftist programs to the point where some of the American delegates even thought of walking out; and in fact, the conference organizers would not allow, as I remember, the wife of the Israeli Premier to speak at that Congress.

Yet the committee says we ought to carry out a U.N. Decade for Women program as mandated, I assume, at that conference.

For another example, the President saw no need to fund the U.N. Namibia Institute. I am not sure what that institute is doing. I have read the report. I gather it is training people to take over Southwest Africa when the Republic of South Africa finally relinquishes control.

Mr. Chairman, I raise the question: Should the Congress be training foreigners to go into a country and take it over? Is it our role to do that?

There are a lot of expendable programs, as the President indicated, that do not need financing in this section of the bill.

All the gentleman from Mississippi is urging is that we adhere to the $246 million spending level and not add the $26 million. That is the only question here. I think Brad Morse will enjoy the RECORD when he reads this. I am sure President Carter will feel this is a responsible approach to try to keep the budget in line. We do not live in an unreal world here in Congress all the time. Let us try to confine our enthusiasm for some of the less necessary programs and adopt this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Mississippi (Mr. LOTT).

The question was taken; and on a division (demanded by Mr. LOTT) there were—ayes 18, noes 31.

Mr. LOTT. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count.

Mr. FRASER. Mr. Chairman, I wonder if the gentleman from Mississippi (Mr. LOTT) will withdraw his point of order of no quorum. Perhaps we can get him a vote.

RECORDED VOTE

Mr. LOTT. Mr. Chairman, I withdraw my point of order of no quorum, and I again demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 233, noes 171, not voting 28, as follows:

[Roll No. 225]

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Heftel against.

Mr. McDonald for, with Mr. Price against.

Mr. Bevill for, with Mr. Ambro against.

Mr. Walker for, with Mr. Van Deerlin against.

Mr. Guyer for, with Mrs. Heckler against.

Mr. HAWKINS changed his vote from "aye" to "no."

Messrs. LEVITAS, HANNAFORD, JENKINS, and BARNARD changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. Are there other amendments to title I? If not, the Clerk will read title II.

The Clerk read as follows:

TITLE II—FOOD FOR PEACE

REPEAL OF PROHIBITION ON TITLE I SALES TO CERTAIN COUNTRIES

SEC. 201. (a) Section 102 of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out ": *Provided*," and all that follows through the end of the section and inserting in lieu thereof a period.

(b) Section 103(d) of such Act is amended by striking out ", or (3)" and all that follows through "United Arab Republic under title I of this Act".

ALLOCATION OF TITLE I AGREEMENTS

SEC. 202. Section 111 of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out the first three sentences thereof and inserting in lieu thereof the following: "Not more than 25 per centum of the food aid commodities provided under this title in each fiscal year shall be allocated and agreed to be delivered to countries other than those meeting the poverty criterion established for International Development Association financing and affected by inability to secure sufficient food for their immediate requirements through their own production or commercial purchase from abroad, unless (1) the President certifies to the Congress that the use of such food assistance is required for humanitarian food purposes, or (2) the President certifies to the Congress that the quantity of commodities which would be required to be allocated under this section to countries which meet the International Development Association poverty criterion could not be used effectively to carry out the humanitarian or development purposes of this title. A reduction below 75 per centum in the proportion of food aid allocated and agreed to be delivered to countries meeting the International Development Association poverty criterion and affected by inability to secure sufficient food for their immediate requirements through their own production or commercial purchase from abroad which results from significantly changed circumstances occurring after the initial allocation shall not constitute a violation of the requirements of this section.".

AVAILABILITY OF ADEQUATE STORAGE FACILITIES

SEC. 203. Title I of the Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof the following new section:

"SEC. 112. Before entering into agreements with developing countries for the sale of agricultural commodities under this title, the President shall determine, taking into account predicted harvests, expected shipments from other sources, existing stocks, and projected levels of consumption, whether or not there is a substantial likelihood that adequate storage facilities will not be available in the recipient country. In the event that he finds that such a likelihood exists, he shall implement a monitoring system to assure in connection with each purchase authorization that the requisite facilities are available. The shipment shall not take place unless the President makes a determination on the basis of this monitoring system, that in all probability, adequate storage facilities will be available.".

HUMAN RIGHTS

SEC. 204. Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended by section 203 of this Act, is further amended by adding at the end thereof the following new section:

"SEC. 113. (a) No agreement may be entered into under this title to finance the sale of agricultural commodities to the government of any country which engages in a consistent pattern of gross violations of internationally recognized human rights, including torture or cruel, inhuman, or degrading treatment or punishment, prolonged detention without charges, or other flagrant denial of the right to life, liberty, and the security of person, unless such agreement will directly benefit the needy people in such country. An agreement will not directly benefit the needy people in the country for purposes of the preceding sentence unless either the commodities themselves or the proceeds from their sale will be used for specific projects or programs which the President determines would directly benefit the needy people of that country. The agreement shall specify how the projects or programs will be used to benefit the needy people and shall require a report to the President on such use within 6 months after the commodities are delivered to the recipient country.

"(b) To assist in determining whether the requirements of subsection (a) are being met, the Committee on Agriculture, Nutrition, and Forestry of the Senate or the Committee on International Relations of the House of Representatives may require the President to submit in writing information demonstrating that an agreement will directly benefit the needy people in a country.

"(c) In determining whether or not a government falls within the provisions of subsection (a), consideration shall be given to the extent of cooperation of such government in permitting an unimpeded investigation of alleged violations of internationally recognized human rights by appropriate international organizations, including the International Committee of the Red Cross, or groups or persons acting under the authority of the United Nations or of the Organization of American States.

"(d) The President shall transmit to the Speaker of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, in the annual presentation materials on planned programing of assistance under this title, a full and complete report regarding the steps he has taken to carry out the provisions of this section.".

HIGH PROTEIN, BLENDED, AND FORTIFIED FOODS

SEC. 205. Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended by sections 203 and 204 of this Act, is further amended by adding at the end thereof the following new section:

"SEC. 114. (a) The Congress declares it to be the policy of the United States to assist developing countries in the transition from food assistance recipients to economic self-sufficiency and to assist those nations which have been recipients of high protein, blended or fortified foods under title II of this Act to continue to combat hunger and malnutrition among the lower income segments of their population, especially children, through the continued provision of these foods under this title.

"(b) In implementing the policy declared in subsection (a), the President, in entering into agreements for the sale of high protein, blended or fortified foods under this title with countries which (1) give assurance that the benefits of any waiver under this section will be passed on to the individual recipients of such foods, and (2) have a reasonable potential for transition to economic self-sufficiency with regard to the acquisition of such foods, may make provisions for a waiver of repayment of up to that part of the product value which is attributable to the costs of processing, enrichment, or fortification.".

FOOD FOR DEVELOPMENT PROGRAM

SEC. 206. (a) Title I of the Agricultural Trade Development and Assistance Act of 1954 is amended—

(1) by inserting "PART 1—GENERAL AUTHORITY" as a heading immediately before section 101; and

(2) by adding the following new part at the end of title I:

"PART 2—FOOD FOR DEVELOPMENT

"SEC. 131. (a) In order to establish a strong relationship between United States food assistance and efforts by developing countries to increase the availability of food for the poor in such countries, and to improve in other ways the quality of their lives, the President is authorized to encourage the use of the resources provided by the concessional financing of agricultural commodities under this Act for agricultural and rural development, including voluntary family planning, health, and nutrition programs, by permitting the funds accruing from the local sale of such commodities which are used for such purposes to be applied against the repayment obligation of governments receiving concessional financing under this Act. The agreement between the United States Government and an eligible developing country government which provides for repayment of the loan obligation to the United States accruing from the concessional sale of United States agricultural commodities by the use of funds from the sale of such commodities in the participating country for specified development purposes shall be called a food for development program.

"(b) The overall goal of assistance under this part shall be to increase the access of the poor in the recipient country to a growing and improving food supply through activities designed to improve the production, protection, and utilization of food, and to increase the well-being of the poor in the rural sector of the recipient country. Assistance authorized under this part shall be used for programs of agricultural development, rural development, nutrition, health services, and population planning, and the program described in section 406(a)(1) of this Act, in those countries which are undertaking (or are seriously prepared to undertake in connection with the provision of agricultural commodities under this Act) self-help measures to increase agricultural production, improve storage, transportation, and distribution of commodities, and reduce population growth in accordance with section 109 of this Act, when such programs are directed at and likely to achieve the policy objectives of sections 103 and 104 of the Foreign Assistance Act of 1961 and are consistent with the policy objectives of this Act. Particular emphasis should be placed on activities which effectively assist small farmers, tenants, sharecroppers, and landless agricultural laborers, by expanding their access to the rural economy through services and institutions at the local level, and otherwise providing opportunities for the poor who are dependent upon agriculture and agriculturally related activities to better their lives through their own efforts.

"SEC. 132. (a) Whenever the President, in consultation with the government of a developing country, determines that such developing country meets the criteria specified in subsection (b) of this section and could benefit from the sale of United States agricultural commodities (including processed and blended foods) for the purposes of generating funds or distributing such commodities for agricultural and rural development, and improving food distribution and use within such country, the President may designate such country as eligible for a food for development program.

"(b) In order to be eligible for a food for development program under this section, a country must (1) have a need for external resources to improve its food production, marketing, distribution, and storage systems; (2) meet the criterion used to determine basic eligibility for development loans of the International Development Association of the International Bank for Reconstruction and Development; (3) have the ability to utilize effectively the resources made available by the sale of food commodities under this sec-

tion for the purposes specified in clause (1); and (4) indicate the willingness to take steps to improve its food production, marketing, distribution, and storage systems.

"(c)(1) Except as provided in paragraph (2)—

"(A) for fiscal year 1978, not less than 5 percent,

"(B) for fiscal year 1979, not less than 10 percent, and

"(C) for fiscal year 1980 and each fiscal year thereafter, not less than 15 percent,

of the aggregate dollar amount of financing made available under all agreements entered into under this title for such fiscal year shall be made available under agreements under this part.

"(2) The President may waive the requirement of paragraph (1) with respect to a fiscal year if he determines that there are an insufficient number of agricultural and rural development projects which qualify for assistance under this part and that therefore the humanitarian purposes of this Act would be better served by furnishing financing under other provisions of this title. Any such waiver shall be reported to the Congress, together with a detailed statement of the reasons for the lack of acceptable projects and a detailed description of efforts by the United States Government to assist eligible countries, pursuant to section 133(a), in identifying appropriate projects for assistance under this part.

"(3) Greatest efforts shall be made by relevant United States agencies to encourage maximum utilization of title I aid for food for development projects under this part, even beyond the minimums required by paragraph (1).

"SEC. 133.(a) A country designated as eligible and wishing to participate in a food for development program shall formulate, with the assistance (if requested) of the United States Government, a multiyear use proposal which shall be submitted to the President. Such proposal shall include the annual value or amount of agricultural commodities proposed to be financed under the authority of part 1 of this title pursuant to the provisions of this part, and a plan for the intended uses of the funds generated from the sale of such commodities, on an annual basis for each year such funds are to be disbursed. Such proposal shall also specify the nature and magnitude of problems to be affected by the effort and shall present targets in quantified terms, insofar as possible.

"(b) The multiyear utilization proposal for any food for development program shall include, but not be limited to, a statement of how assistance under such a program will be integrated into and complement that country's overall development plans and with other forms of bilateral and multilateral development assistance, including assistance made available under section 103 of the Foreign Assistance Act of 1961 or under any other provision of this Act.

"(c) In his review of any utilization proposal for a food for development program the President shall be satisfied that such assistance is intended to complement, but not replace, assistance authorized by the Foreign Assistance Act of 1961, or any other program of bilateral or multilateral assistance, or under the development program of the country desiring to initiate a food for development program.

"SEC. 134. (a) Whenever a proposal has been agreed upon by the President and the participating country, credit may be furnished under the authority of part 1 of this title to the participating country for the purchase of a specific annual value of agricultural commodities to be delivered over a period of from one to five years, subject to the availability of such commodities under section 401 of this Act.

"(b) Notwithstanding any other provision of this Act, no payment except as provided for under this part shall be required of the recipient government as a part of any agreement to finance the sale of agricultural commodities pursuant to a food development program.

"(c) In making food assistance available under this part to a country on the United Nations Conference on Trade and Development's list of relatively least developed countries, the President may waive any requirement contained in section 133 (a) or (b), in that portion of section 133(c) which requires that assistance under this part is intended to complement but not replace any part of the development program of the participating country, or in section 136, if he finds that such country is unable to meet such requirement but could use assistance under this part of meet important humanitarian or developmental objectives of this Act. Such waivers, and the reasons therefor, shall be reported annually by the President to the Congress.

"SEC. 135. Funds generated from the sale of agricultural commodities by any participating country under this part shall be held in a special account where practicable to be disbursed for the purposes described in the approved food for development program of such country. The amount of funds disbursed for such purposes, and in accordance with the agreement, shall be deemed payment for the purposes of section 103(b) of this Act.

"SEC. 136. Not more than one year after the initial delivery of commodities to any country under this part and each year thereafter for the period of agreement, the government of the participating country, with the assistance (if requested) of the United States Government, shall submit a comprehensive report to the President on the activities and progress achieved under the food for development program for such country, including but not limited to, a comparison of results with projected targets, a specific accounting for funds generated, their uses, and the outstanding balances at the end of the most recent fiscal year. Such annual report may also include recommendations for modification and improvement in the uses of funds under the food for development program of such country. The President shall consider suspending shipments under a food for development program if the annual report with respect to such program is not received within ninety days after the date on which such report is due.

"SEC. 137. Each year the President shall review the disposition of all agreements providing for the use of the proceeds from the sale of agricultural commodities pursuant to this part for which such funds had not been fully disbursed the preceding year. The results of such review shall be included in the annual report to the Congress required under section 408(a). If the President finds that the provisions of such agreements are not being substantially met, he shall not extend financing for sales under this part until the end of the following fiscal year or until the situation is remedied, whichever occurs first, unless the failure to meet the provisions is due to unusual circumstances beyond the control of the recipient government.".

(b) Section 103(b) of such Act is amended by striking out "106(b)(2)" in the proviso and inserting in lieu thereof "part 2 of this title".

(c) Section 106(b) of such Act is amended by striking out the second and third sentences.

(d) Section 408 of the Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof the following new subsection:

"(d) Not later than October 1, 1978, and at the end of each 5 year interval thereafter, the President shall submit to the Congress a comparative cross-country evaluation of programs conducted under title II and under part 2 of title I. Such evaluations shall cover no fewer than five countries sampled from the developing regions (Asia, Africa, Latin America, and the Caribbean), and shall assess the nutritional and other impacts, achievements, problems and future prospects for programs under title II and under part 2 of title I.".

TITLE II MINIMUM DISTRIBUTION

SEC. 207. (a) Section 201(b) of the Agricultural Trade Development and Assistance Act of 1954 is amended—

(1) by striking out "1,300,000" and inserting in lieu thereof "1,600,000"; and

(2) by striking out "one million" and inserting in lieu thereof "1,300,000".

(b) The amendments made by subsection (a) shall apply to fiscal years beginning after September 30, 1977.

TITLE II DISTRIBUTION PRIORITIES

SEC. 208. Section 202 of the Agricultural Trade Development and Assistance Act of 1954 is amended—

(1) by inserting "(a)" immediately after "SEC. 202.";

(2) by striking out the next to the last sentence; and

(3) by adding at the end thereof the following new subsection:

"(b)(1) Assistance to needy persons under this title shall be directed, insofar as practicable, toward community and other self-help activities designed to alleviate the causes of need for such assistance.

"(2) In order or assure that food commodities made available under this title are used effectively, indigenous workers shall be employed to the extent feasible, to provide information on nutrition and conduct food distribution programs in the most remote villages.

"(3) In distributing food under this title priority shall be given, to the extent feasible, to those who are suffering from malnutrition by using means such as (A) giving priority within food programs for preschool children to malnourished children, and (B) giving priority to the poorest regions of countries.".

USE OF FOREIGN NONPROFIT VOLUNTARY AGENCIES

SEC. 209. (a) Section 202(a) of the Agricultural Trade Development and Assistance Act of 1954, as so redesignated by section 208(1) of this Act, is amended by inserting the following new sentence immediately after the second sentence: "If no United States nonprofit voluntary agency registered with and approved by the Advisory Committee on Voluntary Foreign Aid is available, the President may utilize a foreign nonprofit voluntary agency which is registered with and approved by the Advisory Committee.".

(b) For purposes of implementing the amendment made by subsection (a), the President shall issue regulations governing registration with and approval by the Advisory Committee on Voluntary Foreign Aid of foreign nonprofit voluntary agencies.

Mr. ZABLOCKI (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The CHAIRMAN. Are there amendments to title II?

AMENDMENT OFFERED BY MR. GRASSLEY

Mr. GRASSLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GRASSLEY: Page 23, strike the period in line 19 and insert in lieu thereof the following: ", and (3) neither House of Congress disapproves such use by resolution, within thirty calendar days after any such certification."

Mr. GRASSLEY. Mr. Chairman, I offer an amendment to H.R. 6714 which would have the effect of retaining the provision in existing law which permits Congress to disapprove an administrative waiver of the 75–25 requirement under title I of Public Law 480.

This provision was added to the law in 1975 after it became apparent that the Public Law 480 program had been abused and used for political purposes.

The administration has recommended deletion of the congressional veto—a recommendation which is reflected in the language of this bill as reported from committee. I think it is perfectly natural for the administration to propose changes in the law which tend to increase its own flexibility and decrease congressional checks and balances. It is human nature. And I have supported such changes, in the past, when warranted.

But this clearly is not such an instance. The administration proposal would all but eliminate congressional oversight over "75–25" waivers.

The existing congressional veto provision, in my recollection, has not been used. But it has served as a deterrent to program abuse; and it has firmly established an ongoing congressional oversight capability with respect to title I concessional sales under the Public Law 480 program.

It is worth noting that the Agriculture Committee, which shares jurisdiction over Public Law 480, unanimously agreed to an identical amendment, just 2 weeks ago, to retain congressional veto authority in the law. I am advised that the distinguished chairman and ranking minority member of the Committee on International Relations also support this amendment.

I trust and hope that any colleagues here on the floor will react similarly to this amendment.

An amendment which retains existing law.

An amendment which is necessary to insure adequate congressional oversight over title I concessional sales, and to deter program abuse.

An amendment which received the unanimous approval of the Agriculture Committee, and enjoys the support of the leadership of the International Relations Committee.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. GRASSLEY. I yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. Mr. Chairman, I thank the gentleman for yielding.

This amendment is similar to a provision in existing law. As I understand it, it reflects the desire of the House Agriculture Committee as shown in their markup of the omnibus agriculture bill. I know of no objection, and we accept the gentleman's amendment.

Mr. BROOMFIELD. Mr. Chairman, if the gentleman will yield, we also accept the amendment on this side of the aisle.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. GRASSLEY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. JOHNSON OF COLORADO

Mr. JOHNSON of Colorado. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JOHNSON of Colorado: Page 38, immediately after line 9, insert the following new section:

TOBACCO AND TOBACCO PRODUCTS

"SEC. 210. Section 402 of the Agricultural Trade Development Assistance Act of 1954 is amended by striking the following words in the first sentence of such section: 'for the purposes of title II of this Act,'."

Mr. JOHNSON of Colorado. Mr. Chairman, this amendment is a simple one. As the law presently reads it states that the term "agricultural commodities" shall include alcoholic beverages and for the purposes of title II of this act tobacco or tobacco products. If we strike the language as proposed in my amendment, then the term "agricultural commodity" would not include tobacco or tobacco products, which would mean the sale of those products under Public Law 480 would be discontinued and would be made out of order from now on. Under Public Law 480, title I, we financed $66 million worth of sales in 1977. In 1978, it is estimated we are going to provide $24 million worth of tobacco products to five different countries. This would provide food assistance for 890,000 people. That is, 890,000 people could be fed with the amount of money that we are going to provide in tobacco financing.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman from Colorado yield?

Mr. JOHNSON of Colorado. I yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. Mr. Chairman, as the gentleman knows, his amendment could very well fit in better in the Agriculture Committee consideration of the omnibus agriculture bill. There is a question of this committee's jurisdiction over what the gentleman's amendment intends to do. Can the gentleman advise me whether his amendment was proposed to the Agriculture Committee?

Mr. JOHNSON of Colorado. The amendment was proposed in the Agriculture Committee and defeated by a vote of 29 to 10, as I recall.

Mr. ZABLOCKI. It was defeated almost 3 to 1.

Mr. JOHNSON of Colorado. Yes.

Mr. ZABLOCKI. I would respectfully suggest that the gentleman should propose his amendment when the omnibus farm bill will be before the House of Representatives. I must, therefore, oppose the gentleman's amendment.

Mr. JOHNSON of Colorado. I know there is no question, but what the amendment is in order at this point. Whether it should be proposed here or when the agriculture bill is before the House is a question.

I gather from the attention that this amendment is drawing that we will not get much more support here than we did in the Committee on Agriculture; but I would point out that this is a commodity which the Federal Government has time and again warned the public of the dangers. We have spent since 1965 about $5 billion in our cancer research. We had warning after warning about this particular commodity. At the same time we condemn the commodity, we also spend money supporting it through the tobacco subsidy program and in export sales abroad.

It seems to me it would be perhaps appropriate to give it away to our enemies, instead of financing it on these long-term contracts to our friends. We are actually financing the sale of tobacco to the Philippines, Egypt, Zaire, Portugal, and Syria. The American taxpayer is providing that money. It seems to me a terrible inconsistency to spend all the money we do every year on education about the dangers of tobacco, to spend all the money we do on cancer research and to warn the American public, as we have, and at the same time to finance through this program $24 million of aid that would feed 890,000 people. Instead of feeding them, we are giving them the benefits of this particular product.

Mr. FOUNTAIN. Mr. Chairman, I rise in opposition to the amendment to strike tobacco from the Public Law 480 program. This amendment is extremely ill-advised and is certainly not in the best interests of our Nation. I sincerely hope that my colleagues will join with me in voting against this amendment.

We considered a similar provision in the International Relations Committee, and I am pleased to report that the committee quickly made a decision not to eliminate tobacco.

Tobacco is an important economic asset. At least half of all the tobacco we produce is exported, bringing in vitally needed foreign exchange.

If we vote down this amendment, as we should, we will be saving our tobacco farmers an immediate 30–35 million pound export market in this crop year alone. And this is important, especially at a time of economic uncertainty.

May I point out that Public Law 480 tobacco assistance—a very small program as Federal programs go—has built a basis for a strong commercial customers of our tobacco in many countries, as we have seen most recently in Thailand and the Philippines.

To be more explicit, U.S. tobacco exports in 1976 totaled nearly $1.5 billion. Unmanufactured tobacco accounted for over $920 million of this. After deducting duty paid imports, tobacco's net contribution to U.S. trade in 1976 was more than $1 billion.

Of this record level of exports, only about 2 percent—$20.5 million—was Public Law 480 assisted. These shipments were to two countries—Egypt and Syria—which in the past have been important tobacco trade partners of the United States and with whom the United States today is in the process of recon-

structing political and commercial relations.

The Public Law 480 program in the past has helped the U.S. tobacco industry maintain a market presence in countries which have become strong commercial customers. For example, in 1974 Thailand was a market for $28.5 million of U.S. tobacco; only $6.5 million of this was Public Law 480 assisted. Commercial exports to Thailand were $32.8 million in 1975 and over $47 million in 1976. The Philippines in 1974 took $12.8 in U.S. exports; only $2.1 million was Public Law 480 assisted. Commercial exports to the Philippines were $17.7 million in 1975 and $26.4 million in 1976.

We estimate that in 1977 Public Law 480 assisted exports may total $30 to $35 million or about 3 percent of the total value of anticipated exports. Authorizations would cover exports to Portugal, as well as to Syria and Egypt.

Tobacco is the major source of farm income to over 600,000 farm families in the United States of which an overwhelming majority are family-size producers. Tobacco is the fifth largest cash crop produced in the United States. It was America's first export. Tobacco is a major crop in no less than 16 States, which are as follows: North Carolina, Kentucky, Virginia, South Carolina, Georgia, Tennessee, Florida, Maryland, Connecticut, Indiana, Ohio, Pennsylvania, Wisconsin, Massachusetts, Missouri, and West Virginia.

In addition, tobacco is also produced to a lesser extent in Alabama, Arkansas, Illinois, Kansas, Louisiana, Minnesota, and New York.

I do not wish to question the motives of the introducer of this amendment, but I would like to explain that passage of his amendment would not in any way affect the smoking habits of any of the nations scheduled for this worthwhile program of aid this year.

On the contrary, all the passage of this amendment would do is to insure that several potential markets for American-produced tobacco would be closed to us and these markets would likely go to other tobacco-producing nations.

Remember, tobacco is grown in many, many countries around the globe, and can be grown in many others. During World War II they even grew tobacco in the Swiss Alps. What I am trying to underscore is the importance of this program as a promotional device as well as a mechanism for aiding the less-developed countries.

I urge you to vote down this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado (Mr. JOHNSON).

The question was taken: and on a division (demanded by Mr. ZABLOCKI) there were—ayes 49, noes 26.

So the amendment was agreed to.

The CHAIRMAN. Are there further amendments to title II?

Mr. BAUMAN. Mr. Chairman, I move to strike the last word.

I would like to address a question to the gentleman from Wisconsin regarding the general policies of the administration in administering the programs which this bill authorizes, particularly food for peace.

I received information within the last few weeks that on May 20 of this year a vessel known as the *Delta Brazil* will be leaving the port of Pensacola, Fla., containing $4.2 million worth of foodstuffs under the aegis of UNICEF and also under food for peace to be shipped to Angola. It appears to me if the administration is serious in its desire to prevent the spread of revolution and military activities on the part of the Communist government controlling Angola, for instance, the incursions into Zaire, it runs counter to that policy to authorize shipments that go directly to those perpetuating revolution.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. Mr. Chairman, the gentleman from Wisconsin is not aware or has not read or heard of the source of that information. Could the gentleman share with us where the gentleman received the information and from what the gentleman is quoting?

Mr. BAUMAN. Yes. I am quoting from an internal document from AID. I would be glad to provide a copy of it, detailing the amounts of corn, other foodstuffs and grains being shipped, the date of shipping, and arrival dates in Luanda.

Mr. ZABLOCKI. Under the aegis of UNICEF?

Mr. BAUMAN. It is partially under UNICEF and partially under the food for peace program.

Mr. ZABLOCKI. And the gentleman's concern is that these food products would be aiding a government such as that in Angola?

Mr. BAUMAN. It is my understanding the administration has provided aid of a nonmilitary nature to Zaire to respond to the attacks being mounted from Angola and being encouraged by Cuban troops training in Angola.

It seems to me that these policies are working at cross-purposes if we are going to rescue the economies of Communist nations, and on the other hand offer aid to those they are attacking.

Mr. ZABLOCKI. The assistance would not be working at cross-purposes, since this aid, as the gentleman surely understands, would be going to needy children. I am sure the gentleman from Maryland, as humanitarian a person as he is, would want children, regardless of where they are, to be assisted if they are in need. So, this assistance would not be, in my opinion, be working at cross-purposes in this instance.

Mr. BAUMAN. The gentleman from Maryland attempted to find out from the appropriate officials whether it would be earmarked for any particular group of recipients, and so far as I am able to ascertain, it is going to the Government of Angola, which can use it to supply, I assume, troops attacking other countries, not children.

Mr. ZABLOCKI. I will assure the gentleman that I will look into this, and if there is any semblance of cross-purposes, I will take appropriate action.

Mr. BAUMAN. I will rely on the gentleman's guarantee so that we can discover a full explanation of exactly what the Department is doing.

Mr. ZABLOCKI. With the assurance of the gentleman from Wisconsin given the gentleman from Maryland, can we expect the gentleman to vote for the program and the bill?

Mr. BAUMAN. The gentleman is stretching assurances a little bit too far.

Mr. THORNTON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I am very pleased to note that this measure which we are considering today, H.R. 6714, the International Development and Food Assistance Act, incorporates the language contained in a bill I introduced on March 1 regarding the 75–25 requirement for title I of the Public Law 480 program.

Present law requires that at least 75 percent of the exports must go to nations having a per capita gross national product of $300 or less. The changes which I had proposed in H.R. 4233 and which are contained in section 202 of H.R. 6714 will allow the President to waive the 75 percent export requirement and replaces the $300 ceiling with a more flexible standard.

I believe these changes will provide new flexibility to the food-for-peace program, will allow us to increase our exports under this program, and to allocate title I commodities to those nations that can most effectively use them.

AMENDMENT OFFERED BY MR. ASHBROOK

Mr. ASHBROOK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ASHBROOK: On page 38, immediately after line 9, add the following new title:

"TITLE III—PROHIBITION OF AID TO VIETNAM AND CUBA

"SEC. 301. None of the funds authorized to be appropriated in this Act shall be used for the purpose of allowing any form of aid or trade, either by monetary payment or by the sale or transfer of any goods of any nature to the Socialist Republic of Vietnam or Cuba."

Mr. ASHBROOK. Mr. Chairman, I take this time and offer this amendment for one basic purpose. I think we all recognize that we are in an area of changing policies based on changing situations and conditions. We already note, in this legislation, the rescinding of a provision of law, which none of us would argue with, that relates to our former attempt to invoke an embargo on those nations dealing with Vietnam. Situations have changed, and I think most of us recognize that the change in this legislation represents is a reasonable policy at this point.

Second, I think that we must also recognize that in the other body there are strong initiatives for circumventing, if not outright abolishing, provisions of law that prohibit trade and aid with Vietnam and Cuba. In an earlier colloquy with the gentleman from Wisconsin,

our esteemed and admired chairman, it was pointed out that currently on the statute books, there are three basic provisions which prohibit aid to Communist countries. Section 620(f) of the Foreign Assistance Act, as amended in 1962, would prohibit assistance to any Communist country, including Vietnam and Cuba. A provision against agricultural aid is found in sections 102 and 411, Public Law 480. Department of State Authorization, 1973, section 13, flatly prohibits assistance to North Vietnam, except by specific act of Congress.

All right. Stipulating that, why then should I offer this amendment?

I offer the amendment for the two reasons cited earlier. One, we are, to repeat, in a time of changing policies. Congressional intent was expressed in 1962, 1968, and 1973. It might be argued that that is a long time ago, maybe the Congress does not feel that way anymore. And, secondly, I think we must realistically recognize in the House of Representatives that there is in the Senate a very concerted effort to change, if not to abrogate, these policies. So I think it is entirely appropriate—indeed, it may be necessary—that we go on record to strengthen the hand of our chairman and ranking minority member.

I would say at this point that there is no doubt in my mind that the gentleman from Wisconsin and the gentleman from Michigan will be able and articulate exponents of the position that is on the books in section 620(f) in the Agricultural Act and sections 102 and 411 and section 13 of the State Department Authorization Act. There is no doubt in my mind that is their position. They made it clear. I happen to think, however, it would be of great use to them, in their bargaining and dealing which is going to be taking place in many areas in the next few months in negotiating with the Members of the other body, to have a strong and clear assertion by this body that, even though 15 years have passed since one provision became law, 7 years have passed in another, and 4 in another, the House of Representatives still believes that our basic national purpose is better served by not having aid in any form to the Socialist Republic of Vietnam or Cuba.

So it is with that idea, not of criticizing, not raising questions, not doubting the resolve and the intent of our committee members, but merely to recognize that there is on the other side an initiative and that we should not sit back and let the senior Senator from South Dakota alone speak on congressional policy that on this side we should have a clear and succinct enunciation of policies we do not want abrogated or rescinded in any way.

Mr. ZABLOCKI. Mr. Chairman, would the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. I thank the gentleman for yielding.

Mr. Chairman, as the gentleman realizes, I did speak to the gentleman relative to the amendment he is proposing. It is redundant. The prohibitions contained in the amendment are in several laws already.

I want to take this opportunity to thank the gentleman, however, for his kind remarks and the confidence he has expressed in the gentleman from Wisconsin and the confidence he has in our colleague and ranking Republican Member, the gentleman from Michigan. Let me assure the gentleman in the well that his statement is sufficient to strengthen our position in the conference.

So I would hope the gentleman would withdraw his amendment, given our assurances that we will certainly uphold the duty that we commonly hold.

Mr. ASHBROOK. I thank the gentleman for his remarks.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. ASHBROOK) has expired.

(By unanimous consent, Mr. ASHBROOK was allowed to proceed for 2 additional minutes.)

Mr. ASHBROOK. Mr. Chairman, for the record, I would stipulate everything the gentleman has said. I would stipulate that provisions which would be covered by the Ashbrook amendment which I am offering now are already on the books. But I would also ask my friend, the distinguished chairman, whether or not his position in conference, in future conferences, would not be substantially enhanced by having a strong vote of approval by the House of Representatives.

Mr. ZABLOCKI. Not at all. With the earlier expression of confidence that the gentleman had made concerning the steadfast position that the gentleman from Wisconsin would hold, there is no need to stiffen my neck any more. I will not be able to bend it.

Mr. ASHBROOK. I thank the gentleman.

It certainly is not my thought or concern that the gentleman from Wisconsin would yield. I am merely pointing out, as I indicated earlier, that there is a very definite initiative on the other side. And I guess I am one of those who believe, when I say "Senate initiative," we have several options: One, do we say little and acquiesce? Two, do we agree or disagree with their position? Three, do we affirmatively state our position?

Mr. Chairman, the first two alternatives do not strike me as a Member of this body as being legitimate alternatives. I would rather have a direct statement of the House of Representatives.

Mr. BROOMFIELD. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Michigan.

Mr. BROOMFIELD. Mr. Chairman, I would like to compliment the gentleman from Ohio (Mr. ASHBROOK) on his fine statement. I hesitate to rise in disagreement with the chairman of my committee, but I think in this day and age it is sometimes important to send a signal on certain critical issues.

I see nothing wrong with our having a recorded vote on this amendment, even though it might be redundant. I think the amendment would help the legislation.

Mr. ASHBROOK. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. ASHBROOK).

The question was taken; and the chairman announced that the noes appeared to have it.

Mr. ASHBROOK. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

The CHAIRMAN. Are there further amendments to the bill?

If not, under the rule, the committee rises.

Accordingly, the committee rose; and the Speaker pro tempore having assumed the chair, Mr. EVANS of Colorado, Chairman of the Committee of the Whole House on the State of the Union, reported that that committee, having had under consideration the bill (H.R. 6714) to amend the Foreign Assistance Act of 1961 to authorize development assistance programs for fiscal year 1978, to amend the Agricultural Trade Development and Assistance Act of 1954 to make certain changes in the authorities of that act, and for other purposes, pursuant to House Resolution 556, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment?

Mr. JENRETTE. Mr. Speaker, I demand a separate vote on the so-called Johnson of Colorado amendment.

The SPEAKER pro tempore. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The Clerk will report the amendment on which a separate vote has been demanded.

The Clerk read as follows:

Amendment: Page 38, immediately after line 9, insert the following new section:

TOBACCO AND TOBACCO PRODUCTS

"SEC. 210. Section 402 of the Agricultural Trade Development Assistance Act of 1954 is amended by striking the following words in the first sentence of such section: 'for the purposes of title II of this Act,'."

The SPEAKER pro tempore. The question is on the amendment.

The question was taken and the Speaker pro tempore announced that the noes appeared to have it.

Mr. JOHNSON of Colorado. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 229, nays 178, not voting 25, as follows:

[Roll No. 226]

The Clerk announced the following pairs:

Mr. Teague with Mr. Charles Wilson of Texas.
Mr. Weaver with Mr. Bonker.
Mr. Moorhead of Pennsylvania with Mr. Del Clawson.
Mr. Dent with Mr. Guyer.
Mr. Bevill with Mrs. Heckler.
Mr. Heftel with Mr. Burgener.
Mr. Ryan with Mr. Hillis.
Mr. Stratton with Mr. Lujan.
Mr. Price with Mr. Cederberg.
Mr. Roe with Mr. Quillen.
Mr. Van Deerlin with Mr. Conable.

Messrs. HARKIN, RUSSO, JONES of Oklahoma, LENT, AMMERMAN, RODINO, and OBERSTAR changed their vote from "nay" to "yea."

Ms. OAKAR and Mr. DICKINSON changed their vote from "yea" to "nay."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. ASHBROOK

Mr. ASHBROOK. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. ASHBROOK. I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. ASHBROOK moves that the bill be recommitted to the Committee on International Relations with instructions that it be reported back to the House forthwith with the following amendment: On page 38, immediately after line 9, add the following new title:

"TITLE III—PROHIBITION OF AID TO VIETNAM AND CUBA

"SEC. 301. None of the funds authorized to be appropriated in this Act shall be used for the purpose of allowing any form of aid or trade, either by monetary payment or by the sale or transfer of any goods of any nature to the Socialist Republic of Vietnam or Cuba."

Mr. ASHBROOK. Mr. Speaker, I do not need the 5 minutes. I am only taking this time to inform the Members of the House who were not here during general debate to understand that this is precisely the same amendment that we voted on overwhelmingly on May 4 to prohibit aid of any kind to Vietnam and Cuba.

I take the time largely for the purpose of yielding to my friend, the gentleman from Illinois, who has a statement at this point.

Mr. DERWINSKI. Mr. Speaker, last week when we voted on the amendment the gentleman referred to, I spoke against it and voted against it at that time. I felt it was the wrong vehicle; however, I believe this bill is the proper vehicle for such an amendment. In view of certain statements made in the other body, I think it is most practical for the House to adopt the gentleman's motion to recommit.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 288, nays 119, not voting 25, as follows:

[Roll No. 227]

The Clerk announced the following pairs:

Mr. Teague with Mr. Burgener.
Mr. Heftel with Mr. Conable.
Mr. Dent with Mr. Lujan.
Mr. Bevill with Mr. Mathis.
Mr. Stratton with Mr. Cederberg.
Mr. Shipley with Mr. Guyer.
Mr. Weaver with Mr. Stockman.
Mr. Charles Wilson of Texas with Mr. Del Clawson.
Mr. Van Deerlin with Mr. Quillen.
Mr. Price with Mr. Caputo.
Mr. Roe with Mr. Hillis.

Messrs. AMBRO, MAZZOLI, KREBS, LLOYD of California, MURPHY of Illinois, DINGELL, FOLEY, and BREAUX changed their votes from "nay" to "yea."

So the motion to recommit was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER. The Chair recognizes the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, pursuant to the instructions of the House, I report the bill H.R. 6714 back to the House with an amendment.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment: On page 38, immediately after line 9, add the following new title:

"TITLE III—PROHIBITION OF AID TO VIETNAM AND CUBA

"SEC. 301. None of the funds authorized to be appropriated in this Act shall be used for the purposes of allowing any form of aid or trade, either by monetary payment or by the sale or transfer of any goods of any nature to the Socialist Republic of Vietnam or Cuba."

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was orderd to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on passage of the bill.

Mr. BROOMFIELD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 252, nays 158, not voting 22, as follows:

[Roll No. 228]

The Clerk announced the following pairs:

On the vote:

Mr. Heftel for, with Mr. Teague against.
Mr. Price for, with Mr. Bevill against.
Mr. Weaver for, with Mr. Burgener against.
Mr. Van Deerlin for, with Mr. Guyer against.
Mr. Caputo for, with Mr. Del Clawson against.
Mr. Cederberg for, with Mr. Lujan against.
Mr. Conable for, with Mr. Quillen against.

Until further notice:

Mr. Dent with Mr. Hillis.
Mr. Roe with Mr. Stockman.
Mr. Charles Wilson of Texas with Mr. Stratton.

Mr. SKUBITZ changed his vote from "yea" to "nay."

Mr. VOLKMER changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was not announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill (H.R. 6714), just passed.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would like to make the following announcement: The House will now consider House Resolution 560 and then hopefully get into general debate. In the event that the committee cannot complete general debate the Chair would hope the House would adjourn somewhere between 5 and 5:30.

It is the intention that we will follow the schedule exactly the way the schedule was laid out. In other words, the countercyclical bill will be on the calendar tomorrow.

The Chair would also appreciate and respects the fact that Members know that May 15 is a vital day under the Budget Act for reporting legislation and does not understand why any Members have assigned for themselves committee responsibilities outside of the city at a time like this and would urge the Members of any committee that has a meeting tomorrow or between now and May 15 outside the Capital to agree that it be postponed.

The House will go forward with the legislation as announced by the majority leader to the minority leader last week.

The House will adjourn tomorrow afternoon at 3 o'clock.

INTERGOVERNMENTAL ANTIRECESSION ASSISTANCE ACT OF 1977

Mr. DODD. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 560 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 560

Resolved, That upon the adoption of this resolution it shall be in order to move, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6810) to amend and extend title II of Public Law 94-369, to establish a new title to the State and Local Fiscal Assistance Act of 1972, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Government Operations, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Government Operations now printed in the bill as an original bill for the purpose of amendment. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto without intervening motion except one motion to recommit with or without instructions.

The SPEAKER. The gentleman from Connecticut (Mr. DODD) is recognized for 1 hour.

Mr. DODD. Mr. Speaker, I yield 30 minutes to the distinguished gentleman from Illinois (Mr. ANDERSON) for the purpose of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 560 provides for consideration of H.R. 6810, the Intergovernmental Antirecession Assistance Act of 1977. This measure authorizes Federal financial aid to city, town, and State governments trying to cope with hard economic times.

This resolution provides for an open rule with 2 hours of general debate. It waives section 402(a) of the Congressional Budget Act of 1974, it makes the committee amendment in order as an original bill for the purpose of amendment, and it provides for one motion to recommit with or without instructions.

A waiver to this section of the Budget Act is required, Mr. Speaker, because H.R. 6810 changes the authorization for this program for the last quarter of fiscal 1977, the fiscal year which already has begun. Under usual circumstances, such an authorization would have been required to be reported by May 15, 1976, under the Budget Act.

H.R. 6810 would authorize additional appropriations under title II of the Public Works Employment Act of 1976, one of Congess major initiatives last year to provide jobs for millions of Americans and to stimulate economic recovery nationwide.

Title II of this act was intended to counter the crippling effects of recession by providing Federal funds to help local governments avoid reducing services and laying off workers during periods of declining revenues and rising expenditures.

Mr. Speaker, H.R. 6810 would make additional funds available to States and localities that are experiencing high rates of unemployment. Certainly these funds have provided needed assistance in my own State of Connecticut, which now has an unemployment rate of 8.7 percent with 127,000 people still out of work.

Under the Public Works Act, a total of $1.25 billion was authorized through fiscal 1977. The money was to be distributed by quarterly payments of $125 million plus $62.5 million for each full one-half of a percentage point that the national unemployment rate two quarters earlier exceeded 6 percent.

As amended by the Committee on Government Operations, H.R. 6810 would raise the authorization ceiling for the five quarters beginning July 1976 to $2.25 billion and extend the authorization through fiscal 1978.

The money to high unemployment areas would be based on a new formula which provides for quarterly payments of $125 million plus $30 million for each full one-tenth of a percentage point that the national jobless rate two quarters earlier exceeds 6 percent. This formula would become effective in July 1977.

The measure before us today also would provide for stricter antidiscrimination requirements than under present law, Mr. Speaker, extending to the handicapped and the elderly some needed civil rights protection in local programs receiving these Federal funds.

The problems of discrimination against the handicapped have been of particular concern to me during my ten-

ure in Congress, and the Committee on Government Operations should be commended for strengthening these civil rights provisions.

Last, in recognition of some of the questions raised about the allocation formula used in this program, H.R. 6810 mandates that the Secretary of the Treasury, in consultation with the Secretary of Commerce, investigate and report to Congress no later than March 1, 1978, as to alternative methods for disbursing antirecession funds.

Mr. Speaker, I am aware of the controversy surrounding certain aspects of this antirecession program and the extent of differing opinions as to its effectiveness and the need for it in a period when our economy seems to be improving.

I would like to say that I still believe that the concept of Federal antirecession aid to States and localities is a valid one, and that as far as Connecticut and my own second congressional district are concerned, this program still is needed and serves a legitimate purpose.

I also would point out that, despite some apparent economic improvement, there still are some 6.7 million Americans out of work—a disturbing statistic.

All of us want the most effective antirecession program possible, Mr. Speaker, and the resolution before us should allow for ample debate and consideration of H.R. 6810 as the House works to shape an assistance program meeting this goal of maximum effectiveness.

I urge adoption of the rule in order that this legislation be considered.

Mr. ANDERSON of Illinois. Mr. Speaker, I yield myself as much time as I may use.

Mr. Speaker, this is an open rule, providing for 2 hours of general debate on H.R. 6810, the Intergovernmental Antirecession Assistance Act of 1977. Following general debate, the bill will be read for amendment under the 5-minute rule, and the committee amendment in the nature of a substitute will be considered as an original bill for the purpose of amendment. The rule further provides for a recommittal motion, with or without instructions. Finally, it should be pointed out that this rule waives points of order against the bill for failure to comply with section 402(a) of the Budget Act. That section of the Budget Act prohibits the consideration of a bill authorizing new budget authority after May 15 preceding the fiscal year in which that new budget authority takes effect. Since this bill authorizes new budget authority for the final quarter of this fiscal year, 1977, it is in violation of section 402(a) since it was reported subsequent to May 15, 1976.

The Rules Committee has received a letter from Chairman GIAIMO of the House Budget Committee, dated May 11, 1977, in which he writes:

The funds authorized to be appropriated in H.R. 6810 have been assumed in the Third Budget Resolution for FY 1977. Since the Budget Committee has authorized me to support Budget waivers where necessary to permit consideration of matters assumed in the Third Budget Resolution, I would not object to a waiver of section 402(a) at this time.

In view of the fact that this new budget authority has been assumed under the third budget resolution for fiscal year 1977, I think the waiver is justified.

Mr. Speaker, the purpose of H.R. 6810, the so-called Intergovernmental Antirecession Assistance Act of 1977, is to extend through fiscal 1978 the countercyclical assistance program, first established under title II of the 1976 Public Works Employment Act. This countercyclical approach originally came to us from the other body in the conference report on that Public Works Employment bill last year. The original authorization was $1.25 billion from July of 1976 through fiscal 1977 for the purpose of assisting State and local governments, hard hit by the recession, in maintaining their basic services. Under the original formula, $125 million was to be made available in each quarter, plus $62.5 million for every half a percentage point the national unemployment rate exceeded 6 percent. Localities would qualify for the funding on the basis of the unemployment rates—not less than 4.5 percent and the general revenue sharing allocation. One-third of the funds were allocated for State governments and two-thirds for local governments.

The other body had attached this title II extension into its version of the Tax Reduction and Simplification Act, and the conferees have reported this feature in disagreement pending House action on H.R. 6810, the bill which this rule would make in order.

Under the terms of the bill reported by the Government Operations Committee, which is actually a substitute for the version reported by the subcommittee, $2.25 billion is authorized for the title II program for a period of five successive quarters beginning July 1 of this year.

On top of the base funding of $125 million per quarter, the bill authorizes $30 million for every one-tenth of a percentage point the national unemployment rate exceeds 6 percent. The bill also provides funding for Puerto Rico, Guam, American Samoa and the Virgin Islands out of the one-third State allocation; it prohibits the use of funds for construction, other than for supplies or repairs necessary to maintain basic services; and it prohibits discrimination for all act programs in conformity with the Revenue Sharing Act's antidiscrimination provision, and extends discrimination to include that on the basis of age or handicapped status; and the bill provides both civil and administrative enforcement procedures for the antidiscrimination provision.

The Congressional Budget Office estimates that the additional costs for the program under this bill would be $452.5 million in fiscal 1977 and $1.6 billion in fiscal 1978, based on an assumed decline in the national unemployment rate from 7.3 percent in the fourth quarter of this fiscal year to 6.6 percent in the fourth quarter of fiscal 1978.

I think it should be noted that the members of the subcommittee have issued a rather scathing indictment of the present program, and the committee bill, in their minority views. They maintain that the existing program has failed to meet its objectives of either creating jobs or stimulating the economy, that it uses an allocation formula that discriminates against numerous States, that it is not countercyclical because it relies on inaccurate unemployment data which do not distinguish between cyclical and long-term economic problems; and finally that many of these funds have been deposited in bank accounts instead of being used as intended.

The gentleman from Wisconsin (Mr. ASPIN), a member of the subcommittee, has indicated that he will offer an amendment to change the allocation formula now in the bill so that the "tax effort" of the State and local governments is taken into account. It is his contention that the rationale for the tax effort formula is the same as that for countercyclical funds. During a recession, municipalities face increasing demands for services and decreasing revenues to meet those demands, thus necessitating either a reduction in services or an increase in taxes. Communities with the high tax efforts and thus a high level of services are most likely to cut those services and/or raise taxes when a recession hits. Mr. ASPIN thus concludes that a distribution formula based on tax effort would send the money where it would be used most effectively to fight the recession—that is, to communities which have a developed structure of services to serve as an outlet for the funds.

The second amendment which will be offered on behalf of the subcommittee would establish a new title to the general revenue sharing act to provide authority for special antirecession assistance in the event a national recession occurs during the 5-year period following the extension of the present program.

Proponents of the committee bill, particularly the gentleman from New York (Mr. WYDLER) who offered the committee substitute, argued before the Rules Committee that the alternative to the committee bill was no program at all because of the time constraints we are under with the Budget Act, the action taken by the other body, and the administration's position.

I am certain these conflicting views will be thoroughly aired during the 2 hours of general debate provided by this rule and that the subcommittee's amendments will receive proper consideration during the amendment process. I therefore urge adoption of this rule.

Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

Mr. DODD. Mr. Speaker, I yield 10 minutes to the gentleman from Texas (Mr. BROOKS) the distinguished chairman of the Committee on Government Operations.

Mr. BROOKS. Mr. Speaker, I want to

express my appreciation for the courtesy of the Rules Committee in acting expeditiously on our request for a rule on H.R. 6810, the so-called countercyclical assistance legislation. I did not set in motion the events that have required hasty action on the part of both the Government Operations Committee and the Rules Committee.

Unfortunately, the Senate has once again chosen to add a nongermane amendment to a conference report and expects the House to act on it without the benefit of proper consideration and without regard to our long-standing rules. I appreciate the cooperation of the Rules Committee and the House leadership in making the arrangements necessary to permit this legislation to come to the floor under proper procedures. If nothing else is gained, we have acted to preserve the integrity of our House rules and I want to commend the Rules Committee for their part in doing that.

Mr. DODD. Mr. Speaker, I ask unanimous consent to make two technical corrections in the resolution.

On page 1, line 7, the word "establish" is misspelled.

On page 2, insert the words "to final passage" between the word "thereto" and the word "without," on line 13.

The SPEAKER pro tempore (Mr. KILDEE). Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. DODD. Mr. Speaker, I yield myself 1 additional minute.

Mr. Speaker, I want to compliment the distinguished chairman of the Committee on Government Operations and I want to thank him, on behalf of the Committee on Rules, for his generous comments about that committee.

Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and Speaker pro tempore announced that the ayes appeared to have it.

Mr. ROUSSELOT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 390, nays 3, not voting 39, as follows:

Dent	Pepper	Wilson, Tex.

The Clerk announced the following pairs:

Mr. Teague with Mr. Ashley.
Mr. Heftel with Mr. Runnels.
Mr. Dent with Mr. Van Deerlin.
Mr. Bevill with Mr. Cederberg.
Mr. Price with Mr. Del Clawson.
Mr. Weaver with Mr. Findley.
Mr. Stratton with Mr. Clay.
Mr. Roe with Mr. Conable.
Mr. Santini with Mr. Burgener.
Mr. Caputo with Mr. Lujan.
Mr. Marks with Mr. Marriott.
Mr. Gradison with Mr. Quillen.
Mr. Vander Jagt with Mr. Sebelius.
Mr. de la Garza with Mr. Stockman.
Mr. Hawkins with Mr. Charles Wilson of Texas.
Mr. Moorhead of Pennsylvania with Mr. Mazzoli.
Mr. McCormack with Mr. Pepper.

Mr. GILMAN changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. BROOKS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6810) to amend and extend title II of Public Law 94-369, to establish a new title to the State and Local Fiscal Assistance Act of 1972, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. BROOKS).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 6810, with Ms. HOLTZMAN in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Texas (Mr. BROOKS) will be recognized for 1 hour, and the gentleman from New York (Mr. HORTON) will be recognized for 1 hour.

The Chair recognizes the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Madam Chairman, I yield myself such time as I may consume.

Madam Chairman, H.R. 6810, as reported by the Committee on Government Operations, is a simple extension of the countercyclical revenue sharing program that was enacted last year as a temporary antirecession measure.

It would carry the program through fiscal year 1978, with increased spending recommended by President Carter as part of his economic stimulus program.

Once again the House is having to act under the gun on this legislation. You will recall that it came before the House last year as a nongermane Senate amendment in a conference report. The House accepted it and the program went into effect last July 1. It authorized $1.25 billion for a 15-month period for grants to State and local governments to help them maintain basic services which they might have to reduce as a result of the recession.

Now we are again faced with a nongermane Senate amendment in a conference report. This one, which provides a still higher level of funding at $2.25 billion each year for the countercyclical program, has been added to the conference report on the tax bill, due to be taken up as soon as we finish with this bill. Our committee appreciates the decision of the House leadership to call up H.R. 6810 before the conference report is considered so that this time the House will have an opportunity to debate and amend this important legislation.

In addition to extending the program through fiscal year 1978, the committee bill makes only a few changes in the existing law:

It increases the level of funding from $1.25 billion for 5 quarters to $2.25 billion for 5 quarters starting July 1;

It adjusts the national allocation formula to make it responsive to changes of one-tenth of a percent in the unemployment rate, instead of one-half of a percent, as at present;

It permits Puerto Rico, Guam, American Samoa, and the Virgin Islands to participate in the program as State governments;

It imposes the same nondiscrimination requirements on the spending of the money as are in the general revenue sharing program;

It prohibits the use of the money for construction; and

It requires the use of the most recent revenue sharing data for determining payments to State and local governments.

Most of these changes were recommended by President Carter. One Presidential recommendation the committee did not go along with was for a 5-year extension of the program as it is now operating.

The Intergovernmental Relations and Human Resources Subcommittee, under the chairmanship of the gentleman from North Carolina (Mr. FOUNTAIN) conducted intensive hearings on the program. These hearings disclosed there were serious problems in connection with the present program, and a considerable question as to whether it was meeting its goals.

The subcommittee, working with experts in the administration and the General Accounting Office developed a new approach that it felt was better suited for a true antirecession program. The new program would have been based on reliable indicators of a recession, namely a drop in the GNP and in real wages. The distribution of funds would have been determined by taxes collected and tax effort rather than the totally unreliable unemployment figures used in the present program.

The subcommittee recommended shifting to that new program on April 1, 1978. This would have allowed for a transition period of 9 months under the old program, but at a higher level of funding. Even during that transition period, the subcommittee recommended that the distribution of funds be on a more equitable basis in which all governments would participate.

The recommendation of the subcommittee was rejected by the full committee by a vote of 23 to 19 in favor of the bill we bring before you now. However, I think it is fair to say that even those who opposed the subcommittee bill agreed with its basic premise that the present program has weaknesses that must be addressed. The committee bill calls for an investigation by the Secretary of the Treasury, in consultation with the Secretary of Commerce, of alternatives to the present method of allocating funds, and directs them to report back to Congress by March 1, 1978.

Madam Chairman, in recent years there has been a steady increase in the amount of Federal support for State and local governments. The total has risen in 20 years from a little over $3 billion to more than $70 billion, and Federal aid now makes up about 25 percent of all State and local expenditures.

This trend should be of concern to those who believe in our Federal system of government, and I hope it will be kept in mind as we proceed with the consideration of this bill.

Mr. ROSENTHAL. Madam Chairman, will the gentleman yield?

Mr. BROOKS. I yield to my distinguished friend, the gentleman from New York (Mr. ROSENTHAL).

Mr. ROSENTHAL. I appreciate the gentleman's yielding.

During the course of his discussion the chairman said that one of the reasons the program needed changing was that unemployment figures were totally unreliable. I wonder if the gentleman could cite any authority to support that proposition.

Mr. BROOKS. The only authority I could cite was testimony of the General Accounting Office and the Bureau of Labor Statistics which provided those statistics. In testimony before one of our subcommittees, the one chaired by Mr. FOUNTAIN, they said, as I recall, that the unemployment information for major cities was fair but that the unemployment figures for anything less than the major cities was two things.

It was either unavailable or under a cloud. They said really the truth is the unemployment figures used in most communities in the United States were really "random numbers."

The only authority I have is the people that make those statistics available to the U.S. Government and upon which this legislation has been rather foolishly predicated.

Mr. ROSENTHAL. Madam Chairman, if the gentleman will yield further, my recollection of the testimony of the General Accounting Office was that in communities or cities with a population of less than 50,000, the unemployment figures were not as precise as they would like in the ordinary statistical profession, but that in communities with a population of 50,000 they were thoroughly reliable, so reliable that the Department of the Treasury supports the committee bill because they believe the statistics are reliable and useful.

As a matter of fact, the Secretary of the Treasury in a letter to me said:

> DEAR MR. ROSENTHAL: I want to express to you personally my appreciation for the key support that you provided for the Administration's Counter-cyclical Revenue Sharing proposal in the Government Operations Committee. As you know, the countercyclical aid program is an integral component of the Carter Administration's economic stimulus package. Your support for the program is significant in our economic recovery efforts.
>
> Sincerely,
>
> W. MICHAEL BLUMENTHAL.

Mr. BROOKS. Madam Chairman, let me reply and conclude that I understand the Secretary of the Treasury, a very fine and able public servant. Mr. Michael Blumenthal, is also understandably supporting this legislation. Some people have differences with him.

Mr. HORTON. Madam Chairman, I yield 5 minutes to the gentleman from New York (Mr. WYDLER), the ranking Member of the subcommittee.

I wish to take this opportunity to congratulate the gentleman from New York (Mr. WYDLER) for the work that the gentleman has done on the subcommittee and to express the hope that the bill will pass.

Mr. WYDLER. Madam Chairman, we are going to be considering a most important piece of legislation this afternoon and tomorrow. I heard a lot of discussion, some of it intended to be humorous and otherwise to the effect that New York State and New York City get too much under this bill and that it is unfair for that reason. I wish all the people that are thinking that way would consider the fact that this Congress has in the past for many years put the money where it was needed. We enacted the Appalachian program; we have had special reclamation projects for regions of the country in need of new water sources. These and other regional programs have had support from many Members of Congress and, of course, from other States.

Now we have a program that again is helping, not just one area, but does concentrate more on a per capita basis. It gives New York more. But that is because New York and the Northeast are where the problem exists. This program is based on unemployment. I think everybody that sits on this side of the Chamber or that side of the Chamber considers unemployment to be a problem that is most serious, that deserves our attention. All of us should make some effort to remedy it and particularly remedy it where it exists.

Now, it so happens that the unemployment figures show that in many of the older cities of our country, in the metropolitan areas of our country, that unemployment is staying high. Even while most of the country is coming out of the recession, even while most of the unemployment figures are coming down in most States and many areas, they are not coming down in the New York area and in many other areas of our country.

The question we have is, are we going to address that problem, or continue to address it in those areas, or are we not? I would hope that those Members who think that this problem is an important one, that we should have remedies and help areas that have persistent unemployment, that they should get a little help and a little aid, will support this program.

I know the chairman of the subcommittee, the gentleman from North Carolina, and I have fought side by side on many programs. We fought the battle of the revenue sharing program last year, and it was a delight to be on his side in that struggle. But, as he knows, then there were many Members who were trying to change the revenue sharing program in very definite and drastic ways. We knew that many of the Members who were trying to change it in those drastic ways really were hoping that the program would die. They wanted to do away with it, and they realized that perhaps if they could change it enough and create enough conflict and confusion in it, the result was going to be that we would not have a revenue sharing program any more.

I am going to suggest to the gentleman from North Carolina that under the circumstances that we face here today with this legislation, with the pressures that we operate under of extending this program as it now exists, attempts to greatly change this program and come in with new formulas, to do things of that nature, we run a very substantial risk of losing the entire program. That will mean that no matter what chart one picks up for his congressional district or his State and tries to examine how much he will get under formula A or formula B, that if that impasse develops between this body and the other body—and it may well develop—then the Members will find that there will be nothing.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. HORTON. Madam Chairman, I yield 5 additional minutes to the gentleman from New York.

Mr. WYDLER. The Members in this Chamber will find that no matter what anything on those charts say about how much the districts are going to receive under A or B, they will not receive a single dollar, and their entire program will be lost, and the Members will have to face the consequences of that decision.

I am not going to take the part of the other body. I do not think they have acted in this matter as they should have, but the fact of the matter is that the President has asked this Congress to continue this program as part of his stimulus program. Some Members may want to support the President in that effort, and if they do, I would suggest that they support the committee bill as it has been reported to the floor of the House. If they do that, we have a very good chance of getting the other body to agree on the program and getting the program extended and the stimulus into the mainstream of our country when we need it.

I just have a few words about the committee bill, which is essentially an amendment which I offered in committee as a substitute for the subcommittee bill. The committee bill does four things. The first thing it does is extend the program into fiscal year 1978, the current program, at a funding level requested by President Carter. The second thing it does is that it incorporates a nondiscrimination provision of the general revenue sharing program. That was an amendment offered and put into the bill by the gentlewoman from Texas. The third thing it does is that it allows for an allocation of the territories of Guam, Puerto Rico, American Samoa, and the Virgin Islands. The last thing it does is to address the question one hears over and over again about whether we can have a better program, whether there is a better program; how it should be devised; how it should be written; how we can improve this part of the formula or that part of the formula; how we can change the triggering device program. All these things the Members are going to hear a lot about. This part of my amendment addresses that part of the program by requiring that the Department of the Treasury, the Bureau of the Census, and the Department of Commerce produce and present to the Government Operations Committee of the House a complete and detailed countercyclical proposal by March 1 of 1978.

Frankly, some people ask why an extension of the program is appropriate at this time? The fact is that it is necessary to do it this way at this time because of the pressures under which we operate, because of the action of the other body, because they have attached this program as a nongermane amendment to the tax bill conference that we are going to deal with immediately after we deal with this legislation.

I do not know what kind of a parliamentary quagmire we may create if we try to rewrite this program into a totally new program and then somehow try to attach that to the tax bill and send that back to the Senate. We may not only endanger the passage of this program, but we may endanger the provisions of the tax bill, as well. I think that it is a serious matter that every Member of the House should take account of.

So I am going to ask the Members of this body on both sides of the aisle to make a conscious decision to consider the consequences at this time and in this place of trying to write a totally new countercyclical proposal. The results may not be that our districts will get more under formula B that is offered in place of the formula in this bill; the results of that action may well be that our districts will get nothing.

Mr. BROOKS. Madam Chairman, I yield 5 minutes to the gentleman from New York (Mr. ROSENTHAL).

Mr. ROSENTHAL. Madam Chairman, I associate myself if I might, with the remarks of the gentleman from New York (Mr. WYDLER), who has made a very significant contribution to the development of this legislation, as has my colleague, the gentleman from New York (Mr. HORTON).

Madam Chairman, I think the important issue for us to understand is the choices that are available to the Members of the Committee. On one hand, we have the committee bill, which was perfected after a great deal of effort, time, and discussion within the full committee, which maintains consideration of unemployment as the cornerstone of the countercyclical program. It is indeed one of the major efforts of the President's antirecession programs. In a letter to me, delivered last night, the Secretary of the Treasury said, and I quote:

> As you know, the countercyclical aid program is an integral component of the Carter Administration's economic stimulus package.

The countercyclical program was designed to deal expressly with those communities which had sustained significant financial losses by way of unemployment. It is still designed as an important element in the Carter stimulus program because it deals with unemployment.

The proposal that will be offered by the gentleman from Wisconsin (Mr. ASPIN) and the amendment to be offered, presumably, by the gentleman from North Carolina (Mr. FOUNTAIN) would lift unemployment out of the formula used to distribute these funds and replace unemployment by taxes collected and by tax effort.

In other words, at a time when the Nation's unemployment rate stands at 7 percent, with more than 6.7 million Americans out of work, the Aspin amendment, as I understand it, would disregard unemployment in assessing the state of local economy.

To justify this rather extraordinary recommendation for changing the basic underpinning of the entire program, the Fountain-Aspin group makes three arguments. Essentially they say what the chairman of the full committee, my distinguished friend, the gentleman from Texas (Mr. BROOKS), said that unemployment figures are inaccurate and unusable, that unemployment is not a good indicator of the impact of a recession, and that the tax effort is a better indicator.

In my judgment, each of these arguments is misleading or wrong, and I will tomorrow, when we discuss these amendments specifically, deal with these claims.

But let me just say one thing further now.

If the Aspin amendment is agreed to, Montgomery County, Md., which is probably one of the wealthiest counties in this country, if not the wealthiest, with a 3 percent unemployment figure, would get the same amount of money per capita as Oakland, Calif., with 13 percent unemployment. In general terms the Aspin formula would distribute 25 percent of the total funds to areas of unemployment with a rate of less than 6 percent.

In other words, it would for all practical purposes and for all intents end this program. It would reward the wealthiest communities in the country for their presumed tax effort and disregard and destroy those communities where unemployment is the highest. That is to me absurd.

It is equally illogical to say that the unemployment figures are inaccurate and that unemployment should not be the measure of Federal responsibility. The facts are that the General Accounting Office suggested that unemployment figures—and this is supported by the Bureau of Labor Statistics—are thoroughly accurate except in those communities with a population of generally less than 50,000 where they lack the ability to obtain precise statistics. But in the major areas of the country, the industrial areas and the areas that are hardest hit by unemployment, the figures in those communities are unassailable.

Madam Chairman, it is an absurd and almost incredible argument to say that we should change the program and not use unemployment as a basis for fighting recession because in some communities of the country the figures are inaccurate.

The CHAIRMAN. The time of the gentleman from New York (Mr. ROSENTHAL) has expired.

Mr. BROOKS. Madam Chairman, I yield 2 additional minutes to the gentleman from New York (Mr. ROSENTHAL).

Mr. LEVITAS. Madam Chairman, will the gentleman yield?

Mr. ROSENTHAL. I yield to the gentleman from Georgia.

Mr. LEVITAS. Madam Chairman, I thank the gentleman for yielding. I want to make just one brief point.

Mr. ROSENTHAL. I hope the gentleman is not going to use the entire 2 minutes.

Mr. LEVITAS. I will use as much as I need.

Madam Chairman, the gentleman makes the point that since unemployment figures are used as part of a triggering mechanism, that means somehow that this is an unemployment-fighting bill. I would like to point out to the gentleman that the money that is put out under this bill does not go to fight general unemployment. All of it goes to municipal or governmental employment, and we have no evidence as to what that level of unemployment is.

However, we do know that over one-third of the local governments that took this money in the past used it to raise salaries and not to keep people employed.

Mr. ROSENTHAL. Madam Chairman, I do not know if that assessment of the situation is correct. Frankly, I doubt it. I would be pleased if the gentleman could support that statement with reliable material.

The fact is that this formula in the bill has a triggering mechanism, and for those communities where unemployment goes up above 4½ percent Federal funds become available.

Mr. WYDLER. Madam Chairman, will the gentleman yield?

Mr. ROSENTHAL. I yield to the gentleman from New York.

Mr. WYDLER. Madam Chairman, whether or not this is true, I sat and listened to the same testimony before the subcommittee about the weaknesses of the unemployment figures in various parts of the country, and there are weaknesses, there is no question about it. But these figures are also generally a very strong and a very reliable indicator. This is an indicator on which we base not only this program but others. Many of the Government aid programs are based on unemployment factors.

If we are going to make a determination here that these figures are not going to be used for any purpose, I think we will have to make that same determination relative to an awful lot of Federal programs. After all, there are quite a few that are being funded by the Congress right now which rely on unemployment figures, so we would have to question those programs on how they distribute aid, whether they should distribute aid, and when they distribute aid.

Madam Chairman, there is nothing unique about this program in the fact that it is using unemployment figures.

Mr. HORTON. Madam Chairman, I yield 8 minutes to the gentleman from Illinois (Mr. CORCORAN).

Mr. CORCORAN of Illinois. Madam Chairman, I rise in support of the Fountain and Aspin amendments that will be offered to amend H.R. 6810, as reported by the full committee, in order that we bring it in line with the original subcommittee bill. I am a member of the subcommittee which produced this bill, and I am proud of that final product. I feel that it is a significant step in improving the current countercyclical program and making it accomplish what all of us have expected it to do from the very beginning.

As many of you remember, this program was tacked on to the local public works jobs bill of 1976. The House has never once held hearings on that bill, and it is my opinion that had the House held hearings, that bill would not have been reported out in its final form.

WHAT'S WRONG WITH THIS PROGRAM?

It is supposed to be countercyclical, yet it pumps money into the economy regardless of indicators of cyclical economic activity. Although the program has triggered in, it probably never will trigger out considering current labor statistics.

Unemployment statistics are lagging cyclical indicators. If the current title II program had been in effect—it would not have triggered in during the 1957–58 recession until 75 percent through that period; it would have done the same during the 1960–61 recession; it would have completely missed the 1970–71 recession; and it would not have kicked in until three-quarters of the way through the 1974–75 recession.

It is supposed to stimulate the economy, yet 82 percent of the money already allocated is still in the bank accounts of State and local governments.

The program is supposed to target money to those governments most in need, yet some 24,000 participating governments may receive amounts of only $100 to $200 per quarter. What possibly can be done with $100 to fight unemployment caused by a recession?

Some people say that this program is similar to a jobs bill. Yet how can we expect governments to hire people when the program is temporary, the moneys received are small, and it fluctuates from quarter to quarter?

A good countercyclical program should have the following characteristics:

First. Since the impact of recession is rarely felt at the same time and intensity in every part of the country at once, the aid should be disbursed to local governments in a way that recognizes how severely they have been impacted by the recession. Thus, only governments taking countercyclical steps—raising taxes, reducing programs—should be a part of such a program.

Second. This program has an implicit notion that enough aid at the right time can prevent the downward cycle from building momentum. The program needs to kick in early in a recession which means that the indicator must be an early warning indicator; that is, a leading as opposed to lagging indication of recession. If the program kicks in too late with the downward cycle gaining momentum, then the program's ability to cut the downward momentum becomes less effective.

Third. Also, implicit in this program is a funding level large enough to make a significant dent in the magnitude of recession-induced local government tax increase or program cutbacks.

Fourth. The countercyclical program must distinguish between long-term secular changes in the economy as opposed to short-term cyclical fluctuation in the economy. Secular problems in the economy are represented by major economic trends such as: the steady decline of manufacturing jobs in metropolitan areas of the country, high unemployment among teenagers, the declining tax base of major central cities in the Northeast quadrant, and so forth. Cyclical trends are represented by increased taxes or cuts in programs to meet what are viewed as temporary declines in revenues due to the downward cycle in the economy.

H.R. 6810 as modified by the full Government Operations Committee does not have any of these important characteristics. The amendments to be offered today to the committee substitute will make a significant improvement in the bill as reported out by the committee.

I wish to state my support for these amendments:

First, I support the use of a tax-effort-based formula: Tax-effort data is more reliable because it is not sampled data but rather exists for all units of local government. Aggregate taxes are a good measure of government size and activity level. Tax effort is a good measure of the need for budgetary support. On the whole, local governments that are commonly felt to have a need for general budgetary support also have relatively high tax efforts. Unemployment is also a good measure of need but only for large jursdictions and even here the error rates are high.

Second, I support the use of a wage and salary as well as a GNP trigger in an effective countercyclical program. Real wages and salaries tend to track cyclical activity much more accurately than unemployment. Wages and salary data can be developed down to the county-area level. Wages and salary data more closely approximate the revenue loss to local governments caused by a cyclical downturn. Wage and salary data is not sampled data and as a consequence has a lower error rate.

Madam Chairman, for these and other reasons, I stand in full support of the reforms of the current title II program as contained in the original subcommittee bill. I urge my fellow members of this House to follow suit and enact this truly countercyclical, antirecession program.

Mr. WYDLER. Madam Chairman, will the gentleman yield?

Mr. CORCORAN of Illinois. I yield to the gentleman from New York.

Mr. WYDLER. Madam Chairman, first I want to commend the gentleman from Illinois now in the well for the help and attention the gentleman gave this matter during the subcommittee markup and in the hearings but, in addition to that, Madam Chairman, I would like to ask the gentleman from Illinois this question:

The gentleman from Illinois says he is in favor of the so-called Fountain triggering device and formula. Is the gentleman from Illinois aware of the fact that if we had really had that formula in existence prior to this that we really would not have had a program in fiscal year 1977?

Mr. CORCORAN of Illinois. I am aware of that, but I think that if the program is to be used in the future it should not be activated until we have a recession.

Mr. WYDLER. Then the gentleman from Illinois does not believe we should have a program at all, is that correct?

Mr. CORCORAN of Illinois. I think we should have a countercyclical program as provided in the subcommittee bill when we actually do have a recession. The subcommittee bill provides that when we have a decline in terms of the GNP and wages and salary then it triggers in but when we do not have two successive quarterly declines then the countercyclical triggers out. I believe that is how a countercyclical program ought to perform.

Mr. WYDLER. Mr. Chairman, I want the gentleman from Illinois to realize the implication of what he is suggesting to this committee that in fact if we were to adopt what is known as the Fountain triggering device and had we done so prior to this that we would have had no program at all. That would have been the answer.

Mr. CORCORAN of Illinois. The Fountain triggering device as contained in the subcommittee bill would provide for fiscal 1977 a continuation of the current program.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

Mr. HORTON. Madam Chairman, I yield 2 additional minutes to the gentleman from Illinois.

Mr. CORCORAN of Illinois. Madam Chairman, I thank the gentleman from New York for yielding me the additional time.

Madam Chairman, it is my understanding that the amendments which will be offered later during the 5-minute rule will provide that for the current fiscal year as well as for the coming fiscal year, that there will be a continuation of the program but that at the end of that time, based on the testimony developed during our hearings before the subcommittee, and supported with one dissenting vote, the consensus was that we ought to make a change in the program along the lines that we have already discussed.

Mr. WYDLER. I understand that, but the fact of the matter is that is because we are going to delay the implementation of the Fountain triggering device until some time in the future. But that if we had had that same device some day in the past, if it did not go into effect then we would not have had a program at all, because the way we would have had the law we would have had no countercyclical program law, is that not a fact?

Mr. CORCORAN of Illinois. I think, by definition, that countercyclical aid should only be forthcoming when we have a recession. That is the purpose and that is the design of the subcommittee bill. That is why I support the bill.

Mr. BROOKS. Madam Chairman, I yield 5 minutes to the gentlewoman from Texas (Ms. JORDAN).

Ms. JORDAN. Madam Chairman, we have heard a bit of discussion, the few of us who are listening, about what is wrong with using unemployment statistics as the data base for this program of countercyclical revenue sharing.

I would like to point out that even though I agree that unemployment statistics are unreliable and inadequate, that there is still a further reason to reject unemployment as the data base as it is contained in the committee bill. For instance: Unemployment statistics are distorted and skewed by geographical differences. If we look at unemployment for Houston, Tex., we will see a low rate of unemployment relative to the rest of the country. Relative to the rest of the country, Houston would have a rather low rate for unemployment. Houston, Tex., includes all of the surrounding suburban areas. The unemployment figure would represent not only the central city of Houston, but also the high-income surrounding areas which were annexed to the central city area. So we get low unemployment in the suburbs, high unemployment in the city, but the average comes out to low unemployment. Because of this distortion, the unemployment statistics which would be relied upon for countercyclical assistance for this particular community would be unreliable and distorted and skewed.

Contrast that with, let us say, the city of Detroit. It is of a comparable size to the city of Houston, but the city of Detroit covers 140 square miles; the city of Houston covers 520 square miles. Detroit with its concentrated, contained central city area showing a high unemployment rate contrasts with this large and expanded area known as Houston, Tex., showing a low unemployment rate and, therefore, unable to receive these funds under the formula of the full committee bill.

I think that the Committee of the Whole can do better. We can do better than the full Committee on Government Operations. We do not have to accept—we are under no requirement to accept—figures which are inadequate and unreliable. I am sure that as we hear further debate on this issue, we will remember that millions and millions of the dollars authorized and appropriated for revenue sharing countercyclical have yet to be spent. They have not gone to relieve the plight of the unemployed. They have not gone into those areas where they were most needed, but instead have been used for the subsidization of local services.

Mr. WYDLER. Madam Chairman, will the gentlewoman yield?

Ms. JORDAN. I yield to the gentleman from New York.

Mr. WYDLER. I thank the gentlewoman for yielding.

That statement has been made a lot, and I have heard that before. That was based on a GAO report we got which was based on an investigation GAO made prior to that time. The actual factual base of it really goes back to the very early beginnings of this program. I know the gentlewoman, in the fair manner she has, realizes that starting a Federal program, getting it organized, getting money into the local hands, getting the local government used to handling it, all takes a little time. We have to understand how to handle it. If the local governments are not expecting the money and are not ready right away to spend it, they have to get used to it.

Ms. JORDAN. Madam Chairman, if I may recapture my time, would the gentleman say that that assertion is inaccurate and wrong, that this money did get out to where it was needed?

Mr. WYDLER. If the gentlewoman will yield further, I doubt that the period of time of which the gentlewoman is talking any longer exists. This whole investigation and report from the GAO is based on facts in a period of time long ago. We are not in that period of time now.

The CHAIRMAN. The time of the gentlewoman has expired.

Mr. HORTON. Madam Chairman, I yield one additional minute to the gentlewoman from Texas.

Ms. JORDAN. Madam Chairman, we have not heard the gentleman from New York (Mr. WYDLER) state that the statement which was made by me was inaccurate. He pleads that a new program needs time to get started. I would say to him that the program under the Fountain-inspired formula needs time to get started, and let us see whether it will work in a more equitable and fair and logical and consistent manner than the present program.

Mr. MINETA. Madam Chairman, will the gentlewoman yield?

Ms. JORDAN. I yield to the gentleman from California.

Mr. MINETA. I thank the gentlewoman for yielding.

I believe it is true that the statement is not incorrect, but the survey was made the early part of February of 21 jurisdictions. The law said that jurisdictions had 6 months in which to spend the money. The checks went out in November, and I think to say that on the 21st of February, as I recall the date, that those jurisdictions had not spent the money is really unfair.

The CHAIRMAN. The time of the gentlewoman has expired.

Mr. BROOKS. Madam Chairman, I yield 1 additional minute to the gentlewoman from Texas.

Ms. JORDAN. I will conclude with 1 more minute of my very own. It seems that what is being focused on by those who have engaged me in colloquy is the fact that much of the money did not get out to the areas and the communities where it was needed and it did not get out expeditiously.

If that were the only thing which was wrong with using unemployment as the data base, I suppose we would have to concede a point. But that is not all that is wrong. The unreliabilities, the inadequacies, the inefficiencies, the distortions, the whole program being skewed by relying on unreliable information is enough for us to consider a new data base similar to, if not the same as, the one which was approved by the subcommittee after very careful and very thorough consideration.

Mr. HORTON. Madam Chairman, I yield to the gentleman from New York (Mr. WYDLER) 2 minutes.

Mr. WYDLER. Madam Chairman, I am really sorry the gentlewoman from Texas has taken that position. I am not trying to put her arguments in the wrong light. I am really trying to make sure she fully understands the implications of some of the things she is saying.

Just think for a moment, and I know the gentlewoman has a very open mind and is a very clear thinker, but she is arguing against this program because the local governments that are receiving the money from the Federal Government did not get it out fast enough. But what she is really arguing about and trying to get us to change is the formula.

I am going to suggest to the gentlewoman that regardless of what formula we use to try to decide what the check is going to be that the local government will receive, the local government's inertia is still going to be there in figuring out how to use the money. I ask the gentlewoman to think about that.

I have heard the argument that they did not get the money spent quickly enough, and so on. But that problem is going to exist no matter what formula we use. I wish the gentlewoman would consider that. That is a fact that I am trying to tell her.

Mr. ASPIN. Madam Chairman, will the gentleman please yield?

Mr. WYDLER. I yield to the gentleman from Wisconsin.

Mr. ASPIN. Madam Chairman, I would like to point out to the gentleman one of the purposes of putting the distribution formula in is to send the money to the high-tax-effort States and localities. The high-tax-effort States and localities, the municipalities have a more extensive panoply of services that they offer and therefore those kinds of communities are better able to get the money out quicker.

I would submit changing the formula does get to the problem the gentlewoman from Texas raised.

Mr. HORTON. Madam Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. ANDERSON).

Mr. ANDERSON of Illinois. Madam Chairman, I would first of all congratulate the distinguished gentleman from New York (Mr. WYDLER) for being an exceptionally able advocate for his State, the State of New York. He has been on his feet throughout the hour or so of debate that we have been occupied on this bill.

And well he might take the position that he does. When I look at page 27 of the report on this bill, which I did when the matter was before the Rules Committee a day or two ago, I find out his State is getting 21.5 percent of the total funds, and that their increased share is coming from States like Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Minnesota, Missouri, Montana, New Hampshire, North Carolina—and the list goes on and I would take my 5 minutes if I were to continue to recite the number of jurisdictions that are going to have to suffer losses if we adopt the committee bill.

So it is no wonder the gentleman from New York is very articulate and very active in advocating the course that he does. He suggests that since we have in the past discriminated in behalf of certain regions of the country in other pieces of legislation that we ought to do that in this bill and he even used the example and cited the Appalachian bill. I never thought the day would come when the proud Empire State of New York would ask to be treated like Appalachia, but he said that is where the problem is.

It is not just a question of where the problem is. It is how are we going to solve the problem. Are we going to use the right remedy? Is this the remedy?

I think the gentleman forgets the title of this bill. It is an antirecession bill. The problems of New York State and some of the other jurisdictions that would benefit more handsomely under the committee bill than under the subcommittee approach are cyclical and long-term and not caused by the recession which reached its nadir in April 1975, and is now more than 2 years past. The problems of New York are long-term in nature.

Let me say also it was just a day or 2 ago, yesterday, as a matter fact, that I supported the dual formula approach of the housing bill that we passed, a bill that it was argued was for the benefit of the older cities of the Nation. That would certainly include New York City and many of the other cities in that State.

Fine. Are we two times in a single week to enact legislation which, in effect, is special legislation for the benefit of New York? I would not even object to doing that if I felt we were taking an approach that was going to solve the basic long-term problems that afflict that particular jurisdiction; but this bill is certainly not designed to do that.

When we get the General Accounting Office to say that the bill has not met its stated objectives, they do not have any ax to grind, they are an arm of the Congress, they are reporting on this program and they are telling us very unequivocally that this program as presently constituted is not meeting its stated objective. When we get the Commissioner of Labor to say that it is in support of the argument of the distinguished gentlewoman from Texas (Ms. JORDAN) that we are not using the right trigger when we depend upon unemployment statistics that are inaccurate and out of date, and I have some tables before us that indicate, as the gentleman from Illinois (Mr. CORCORAN) so ably pointed out, that there is a lag in how it works. We can see the chart I have before us showing the unemployment rates for the 1960–61 recession, the 1970–71 recession and the 1974–75 recession. It clearly indicates the countercyclical formula based on the unemployment rates tends to trigger in after the economy is well into a recession. Therefore, it will not meet the problem of New York State and some of those that think the formula is going to greatly benefit them.

Mr. LEVITAS. Madam Chairman, will the gentleman yield?

Mr. ANDERSON of Illinois. I yield to the gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. Madam Chairman, I would like to associate myself with the remarks of the gentleman from Illinois. I wish I could have stated my views on their subject as articulately as the gentleman from Illinois has just done.

I would like to reinforce one point that the gentleman from Illinois made; that is the nature of the report of the General Accounting Office to the Committee on Government Operations. In connection with the title II program, the GAO says this:

As set forth in the conference report, title II was designed to meet three criteria as an antirecession program:

To provide assistance directly into the economy, with as little administrative delay as possible,

To provide selectively targeted assistance, so that only those governments substantially

affected by the recession would receive funds, and third,

To phase itself out, as the economy improves.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. HORTON. Madam Chairman, I yield 2 additional minutes to the gentleman from Illinois.

Mr. LEVITAS. Madam Chairman, if the gentleman will yield further, it continues:

Based on our preliminary observations, the current program does not meet the first two criteria. The effectiveness of the phasing-out provision remains to be evaluated.

Madam Chairman, I think that is what we have before us today.

Mr. ANDERSON of Illinois. Madam Chairman, I thank the gentleman for his support.

Very quickly, let me sum up the argument I sought to make in the minute I have remaining; that is, I think it is important when we are defining a countercyclical program, and let us not lose sight of the program, that that is what we are trying to do with this legislation, not solve the long-term cyclical problem of a secular nature in New York City. We are trying to design an effective countercyclical program and when we do that it is important to have a measure to distinguish between cyclical budgetary disruption that has a very significant impact on the budgetary receipts of the revenues of those high tax effort States that the gentleman from Wisconsin (Mr. ASPIN) talked about a moment ago.

We have to distinguish between that and long-term secular decline, and therefore when the appropriate time comes, I will certainly rise in support of the amendment to be offered by the gentleman from Wisconsin (Mr. ASPIN), and hope that we would return to the theory—and I think the very correct theory—of this bill as it was propounded by the subcommittee.

Mr. BROOKS. Madam Chairman, I yield 5 minutes to the gentleman from North Carolina (Mr. FOUNTAIN).

Mr. FOUNTAIN. Madam Chairman, members of the committee, I want to make a few observations before presenting my own statement in connection with this legislation.

I want to commend the members of the subcommittee for the diligent way in which they cooperated in helping me, as the chairman of the Subcommittee on Intergovernmental Relations and Human Resources, come out to the full committee with what I think was a good piece of legislation. We had fine attendance and there was excellent participation in the hearings and in the markup of this legislation.

I want to thank the gentleman from Florida (Mr. FUQUA), the gentleman from Oklahoma (Mr. ENGLISH), the gentleman from Georgia (Mr. LEVITAS), and our new Member this Congress—the gentleman from California (Mr. WAXMAN), the gentleman from South Carolina (Mr. JENRETTE), the gentleman from Iowa (Mr. BLOUIN), and the gentleman from Wisconsin (Mr. ASPIN), who is one of the older Members of Congress in terms of service.

On the other side, I want to thank my friend from New York (Mr. WYDLER), who has worked actively with the subcommittee, and who I had hoped, after he saw the evidence and the committee's willingness to increase the duration of the program, would support the subcommittee bill. Nonetheless, I want to thank him for his active participation in the work of the subcommittee.

I also want to thank the gentleman from Ohio (Mr. BROWN), and the gentleman from Illinois (Mr. CORCORAN), who is another new subcommittee member. And I would like to associate myself with his excellent remarks. He, too, is an outstanding new member of our committee.

I particularly want to commend the gentlewoman from Texas (Ms. JORDAN) for her excellent statement in connection with this legislation. She was a member of our subcommittee last year and participated actively in the development of the general revenue sharing legislation.

She decided to move on to another subcommittee. We miss her, but we are delighted to have her support in the debate on this legislation. She made an excellent statement, with which I want to associate myself.

I also want to commend the gentleman from Illinois (Mr. ANDERSON) for his very excellent and incisive summary of the arguments in support of the subcommittee bill. I would be remiss in not expressing my appreciation to the chairman of the full committee, the gentleman from Texas (Mr. BROOKS), for his cooperation and for the expeditious way in which he has acted to bring this legislation to the floor of the House so as to avoid having the other body continue to dictate to us how to legislate.

I want to make a comment in response to a statement made by the gentleman from New York (Mr. ROSENTHAL) before proceeding further with my statement. The gentleman inadvertently, I am sure, misstated the testimony of the Commissioner of Labor Statistics before our subcommittee. Commissioner Shiskin in fact said that only the national unemployment rate is highly reliable because it is based on a statistically reliable monthly survey. The monthly State unemployment rates are derived from a different source in which the data vary widely among the States. The Bureau of Labor Statistics adjusts these State rates annually, both up and down for individual States, but only after the assistance payments have been made on the basis of a preliminary and often erroneous rates. For large cities, the estimated rates are of only fair reliability, and for places of 50,000 or less they are "random numbers," according to the BLS Commissioner's testimony.

Of much greater significance is the fact that unemployment rates have little relevance to the budget needs of cities, counties and States.

Mr. Chairman, I think the Members have been inundated with information on this legislation, and I do not intend to add to the confusion. Instead, I will try to strip the issues down to their fundamentals so that we can deal with the facts, rather than the misrepresentations and scare tactics many of us have been exposed to.

If I were to ask the Members of this body whether or not the House would enact a general assistance program which gave almost 22 percent of the total funds to one State, which provided not 1 cent to four States—including their local governments—and which gave only a pittance to another dozen States, what would you reply? I am absolutely certain the vast majority would say such a program is a political fantasy—that it would never get out of committee. And legislative history would support that view.

Yet, we do have such a program in operation today. It is called countercyclical or antirecession assistance, and it came into existence last year as a Senate floor amendment to the House-passed public works employment bill. No comparable legislation was under consideration in the House. That nongermane amendment was accepted by our conferees, and approved by the House, on the representation that the Senate would hold the important public works bill hostage unless we gave in. This is an old game of what some call "political blackmail" by the other body, but usually such action relates to matters without great national consequence. I am unaware of any previous occasion in which this tactic was used to create a completely new grant program funded at $1¼ billion for starters.

Would anyone believe that same tactic would be used a second time just 1 year later? Probably not. Yet we have the same program before the House today in the conference report on the tax bill, again as the result of a Senate floor amendment. Now the program is called countercyclical revenue sharing, with funding at double the original level.

Once more, a large number of States are completely excluded from participation, or receive only token payments, while a single State receives approximately 22 percent of the total funding. And, this time the Senate Legislative Committee did not spend 5 minutes in hearings on this multibillion dollar program before the Senate attached it to the tax bill by another floor amendment. We can judge for ourselves whether this represents political and fiscal responsibility.

I am proud to say that the House Intergovernmental Relations and Human Resources Subcommittee takes its legislative responsibilities seriously. That was demonstrated last year in connection with general revenue sharing; and it was demonstrated this year in the subcommittee's thorough, in-depth hearings and investigations devoted to this legislation. Since the subcommittee's hearings in early March, we have worked closely with the most knowledgeable experts in the executive branch, in the GAO, and elsewhere to devise the best possible formula for allocating funds in this program.

The subcommittee's rigorous evalua-

tion of the title II program, which is basically the same as the committee bill now before the House, established conclusively that the title II program has completely failed to accomplish its stated objectives. And, there is no reason to believe it would accomplish them in the future. It is not an antirecession program; it is not a jobs program; and it has not served to stimulate the economy.

Title II is nothing more than a duplicative and poorly designed general revenue sharing program that distributes money unfairly on the basis of inappropriate, inaccurate, and unreliable unemployment rates.

There should be no doubt that title II is not an antirecession or countercyclical program, since it was enacted more than 2 years after the 1974–75 recession had ended. While it is true that this last recession—the most severe one since the Great Depression—may have produced more lasting effects in certain communities, the fact is that the financial accounts of State and local governments as a whole, had returned solidly into the black, by the fourth quarter of 1976, with a surplus estimated at $5.8 billion at an annual rate, excluding social insurance accounts. The primary factor responsible for this turnabout, according to testimony at our hearings, has been growth in the State and local sector's own revenue sources, in response to the economy's recovery.

Some of my colleagues tend to equate the special long-term economic problems of chronically depressed communities and regions with a national recession. These are very different things. Moreover, the title II program was never intended to deal with the problems of declining areas and structural unemployment, as the Senate committee, which originated this legislation, has made clear. Such problems simply cannot be dealt with by a program of general assistance.

Title II is not a jobs program, because payments can be used for virtually any purposes the recipients choose. This is discretionary money. It is fungible, or substitutable for local money, just as in the general revenue sharing program. Indeed, the Congress has already created a variety of other programs designed specifically for increasing the number of jobs, including the public service employment titles under CETA and the Public Works Employment Act.

The GAO has informed the subcommittee, on the basis of its study of the impact of title II payments on State and local governments, that it has found relatively few instances in which these funds have actually been used to create new jobs or to maintain existing jobs. In other words, any connection between the title II program and the reduction of unemployment is wholly speculative.

Moreover, as presently constituted, title II is not an economic stimulus program. The only reliable information on the actual use, or impact of title II money, is provided by the field investigation conducted by the General Accounting Office.

As of February 28, 1977, the GAO had visited 51 recipient governments constituting a good cross-section of the States, cities and counties participating in the program. For the first three quarters of title II payments, these 51 governments had received $262 million, or more than 30 percent of the total paid to some 23,000 governments.

The GAO found that only 18 percent of the total amount available from the payments for July and October 1976, and January 1977, had been spent by those governments. The GAO also found that the governments with unemployment rates above 8 percent for the first three quarters were spending the funds only slightly faster than those with lower unemployment rates.

The GAO study disclosed that most recipients are putting their title II money into bank accounts rather than spending it to stimulate the economy and this is what they should do until they have essential uses for these funds.

The GAO findings are really not surprising or unexpected, since these funds must be spent in accordance with the laws and budgetary procedures applicable to each government's own revenues. In addition, local and State governments cannot plan ahead to include title II funds in their budgets, as they do revenue sharing, and they would be foolhardly to create new jobs because this is a temporary program with payments geared to fluctuating unemployment rates.

In summary, the subcommittee found that the title II program simply does not accomplish its objectives. Worse still, it duplicates an existing program and does so badly by distributing funds in a most irrational, arbitrary, and inequitable manner. This is the perfect example of a program in search of a problem.

After careful consideration and deliberation with full discussion, it was the subcommittee's judgment that the title II program should be terminated. However, since the expectations of State and local governments had been raised by the inclusion of an extended title II program in the President's economic stimulus package, the subcommittee felt some appropriate phaseout period is justified.

Accordingly, the bill reported by the subcommittee did provide an additional three quarters, beginning in July, at the higher funding level proposed by the President. The full committee raised this to five quarters, but with a formula for distribution which continues the serious flaws and inequities to which I have referred. In its present form, the bill almost doubles the inequities.

At the same time, the subcommittee strongly recommended that a rational and equitable allocation formula replace the present title II formula. It also recommended the establishment of a true antirecession program as an amendment to the General Revenue Sharing Act.

These recommendations will be discussed further when amendments are offered by Mr. ASPIN and myself to substitute the subcommittee's provisions for parts of the committee bill.

Mr. HORTON. Mr. Chairman, I yield 6 minutes to the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Chairman, I rise in support of the amendment to extend the title II program for 1 year. I would like to confine my remarks to the reasons underlying my qualified support of this 1-year extension. As we know, the current title II program was passed last year as part of the Public Works Employment Act of 1976. This program was tacked onto the Public Works Act by the Senate and there was never 1 day of hearings held in the House at that time.

The Intergovernmental Relations Subcommittee, of which I am a member, held extensive hearings on how well this program is achieving its goals. The general conclusion of the subcommittee study is that the program is not achieving its goals.

In the first place, the statistical mechanisms by which the program operates do not make adequate distinction between short-term cyclical problems in the economy and the long-term secular problems of economic decline.

Secondly, the unemployment rate that triggers the Federal funds designed to give emergency support grants to local governments which suffer declining revenues as a result of general economic downturns is a lagging indicator of a recession. The use of an unemployment rate trigger causes the program to trigger in well after the economy is into a recession which has reduced local tax revenues.

Additionally, there is a great deal of dissatisfaction with the quality and usefulness of unemployment data used in the program as a mechanism to distribute funds to local communities. The Commissioner of the Bureau of Labor Statistics has testified that, for jurisdictions of less than 50,000 population, unemployment data provides no better than a random guess at the real impact of recession on local communities.

Furthermore, until recent winter storms and layoffs, most local economies were experiencing high unemployment rates. This raises serious questions of the extent to which local revenue sources have been diminished because of increases in unemployment. Clearly, if more people are working than ever before, this casts serious doubts on the argument that higher unemployment rates reflect cyclical declines in economic activity. Higher unemployment rates may merely reflect more new people entering the work force—generally called higher participation rates.

It is the intent of the countercyclical program to provide antirecessionary aid to local communities where incomes to finance public services are adversely affected by real recessions. When the economy improves, the program is supposed to phase out. As the program is now constructed, it will not phase out in this decade, even though the country is moving well out of the most recent recession. This program not only has triggered in late, but it will probably not trigger out for years and years.

It is my understanding that the Government Operations Committee staff, in working with the Department of Commerce, Bureau of Labor Statistics, Bureau of the Census, and the Office of Revenue Sharing, is close to completing a countercyclical formula that would be sensitive to cyclical economic downturns at the local government level. It is my understanding that in only a few months' time, this program will be ready for a detailed analysis which will put all of us in a much better position to assess its limits and its strengths against the current program.

Our real problem today is what to do until this current study can be completed. It is my concern that we not move too hastily to substitute another untried or untested program for the current countercyclical program which was too quickly devised and was also untested. The Senate put the current program together in a frantic rush last year and our hearings have all too well documented its deficiencies. In our haste to improve a flawed program which has established its failures and inadequacies, we must not make the same mistake of excessive haste.

Therefore, I support an extension of the current program for 1 year on the condition that the Government Operations Committee present to the Congress by March 1 of 1978 an adequate and full countercyclical proposal for our consideration.

Today's debate must focus on the best way to achieve an improvement in the program and not become a big grab for dollars. Finally, whatever changes are made over the next year, State and local governments must be given adequate time to prepare and plan their own budgets in light of Federal action.

Mr. Chairman, H.R. 6810 has my active support and I urge my colleagues to give this bill their most careful consideration.

Mr. LEVITAS. Mr. Chairman, I yield 1 minute to the gentleman from South Carolina (Mr. JENRETTE).

Mr. JENRETTE. Mr. Chairman, I wish to commend the committee for bringing us this continuation of a very fine program in the bill as reported out of the committee. I had the pleasure of working with the chairman of the subcommittee, the gentleman from North Carolina (Mr. FOUNTAIN), who, I believe, was responsible for the provision in the bill that would require a study which promises to be very helpful toward effecting a continuation of this fine program.

I commend the chairman of the committee, the chairman of the subcommittee, and, particularly, my friend, the gentleman from New York (Mr. WYDLER), who worked so diligently to bring us what I believe is a very good bill.

Mr. Chairman, there seems to be some confusion about whether or not we have recovered from the great recession and thus whether or not we require an antirecession fiscal assistance program for State and local governments. We have not recovered from the recession. Two years of slow upswing have certainly brought us far out of the depths, but they have left us far from the plateau of America's need.

The conclusion that we have recovered from recession is a conclusion that the world has been transformed and that good times for America now means unemployment of 7 percent plus a snail's pace growth in our national product. Those who think that we have recovered from the recession have given up on America and have decided that stagnation rather than vitality is now our natural condition. Fortunately, there are only a few of that opinion.

While the 2 years of recovery have been real and welcome steps toward renewed prosperity, many steps lie before us. Nationally, recovery is expressed in averages and smooth trends. But the extremes that make up those averages and the uneven change that adds up to a trend can be seen around the Nation in our cities and towns. One of the great virtues of this program is its responsiveness to differences in local conditions. While national unemployment is at a too high 7.3 percent, there are places in this country where it is 2, 3, 4, and even 5 percentage points higher. You ask the people in those places whether or not the recession is over. It is not.

In the depths of the recession State and local governments lost hundreds of billions in revenue. We saw that as not only a local problem but a national problem because it forced them to even worsen the recession through layoffs and tax increases. Today many of those governments are still forced to reduce workforces, cut services, and raise taxes. As they do, they slow recovery. This program would replace only a small part of the shortfall facing places under severe fiscal stress. But even though it is a small response to the lingering recession-caused problems of State and local governments, it is critical for those places that need it.

The Nation needs the fiscal assistance act to protect the national recovery. States and localities need the fiscal assistance act to support their even slower recoveries. We should extend the act.

Not only should we extend it, but we must maintain the existing program with its allocation formula based on unemployment rates. Certain Members of this body would argue that the allocation formula should be based on tax effort.

What is the point of wanting to replace the unemployment based formula in the Antirecession Fiscal Assistance Act with one that is exclusively tax effort? To make this change we would have to conclude that there is something very wrong with the current formula and very right with the proposed alternative. As a matter of fact, exactly the opposite is the case.

The intent of this program is to assist those localities hardest hit by recession, to reduce their need to lay off workers and increase taxes and, to support the national economic recovery. Unemployment, which triggers the program nationally, and determines the amount of money to be distributed both nationally and locally is a condition directly caused by recession and one which is closely related to a local government's ability to raise money and its need to deliver services. Unemployment represents a general condition of fiscal stress caused by a recession. Places with relatively low unemployment get little or no money and as the local conditions improve the amount received by a local government declines.

But, the unemployment statistics have been criticized for several reasons. It is said that they do not accurately portray the facts of unemployment generally and that they are inaccurate for smaller places. While it may be no help to the larger places, it is generally agreed that the statistics significantly undercount unemployment and so we are not throwing money away. And while the smaller places may think they are discriminated against, the greater portion of the money goes to places of over 50,000 where the statistics are agreed to be more sound. This bill, by the way, contains a provision which would make it possible to get funds to more of the smallest jurisdictions which may now get lost in the balance of state. Unemployment statistics are not perfect but they are good enough. More importantly, unemployment has something to do with recession. Tax effort does not.

Some may wish to support an antirecession program that has nothing to do with recession for their own reasons. Should we let the computer spit out dollar signs that cause us to empty an important program of its purpose? No. We should take the reasonable and responsible course and extend a program that responds to recession-caused need.

Mr. LEVITAS. Mr. Chairman, I have no further requests for time, and I reserve the balance of my time.

Mr. HORTON. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I rise in support of H.R. 6810.

In February of this year, the unemployment rate of our country was 7.5 percent. In Newark, N.J., unemployment stood at 16 percent; in New York City, 10.4 percent; in Oakland, 12.8 percent; in St. Louis, 11.4 percent; in Detroit, 11.6 percent. The State of New York had an unemployment rate of 9.6 percent; the State of Michigan, 8.3 percent; the State of New Jersey, 9.5 percent; the State of California, 8.4 percent; the State of Florida, 7.9 percent. Across the country 8 million people were unemployed.

In pure and simple terms, those astonishingly high unemployment figures tell us that, while the recession might technically no longer be with us, the effects of that recession are still very much with us. Those people without jobs don't care what the textbook definition says about recession. They know what their pocketbook says and their pocketbook says that hard times are still very much a part of America's economic picture. Accordingly, this country still needs an antirecession program, one that will continue to put money where the needs are greatest.

To my colleague who would suggest that those needs are best measured by tax effort. I offer just one simple example to suggest just the opposite. Beverly Hills, Calif., has a high tax effort, but who in

this Chamber will tell us that Beverly Hills needs antirecession funds?

Unemployment puts a tremendous financial burden on local governments. For one thing, unemployed people do not pay taxes, so the local treasury is deprived of that normal revenue. For another, unemployment costs local governments money in the additional expenditures necessary to care for them. Unemployment is what our focus should be on here today, not tax effort.

I understand there are those who would like to introduce a new trigger for the program. This trigger would allow distribution of money only when there is a downturn in the economy as measured by a decline in real wages and salaries. Since these indicators are not going down, it means that no money will be distributed. Regardless of what some people would tell you, we are not out of the recession and we will not be out until unemployment rates are brought down to an acceptable level. Our State and local governments need this program to combat the effects of the recession.

The current program of countercyclical revenue sharing has been operating now for about 1 year, by and large directing Federal money into the hands of those State and local governments that have suffered most from the recession. The bill reported out of the Government Operations Committee is what the administration would like. It is my understanding that it is also favored by the leadership.

Mr. Chairman, I strongly support a simple 1-year extension of the current countercyclical revenue sharing program. Accordingly, I urge my colleagues to vote for H.R. 6810.

Mr. WYDLER. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from New York.

Mr. WYDLER. Mr. Chairman, I think as we wind up this debate, I would just like to reiterate the point which I think all the Members who are looking at any sheet of paper and trying to figure out how to get 1 percent more under this formula in their State than the formula actually provides had better keep in mind a couple of facts, realities that exist in the situation that we face.

Of course, No. 1, the figures cannot really be projected accurately for the life of the program. We are making guesstimates and estimates of what the figures may really be; but there are two major dangers that are being suggested by the amendments that are going to be offered to the bill before us. There is a good chance that Members may get nothing at all for their districts in their States. That is the risk they are running when they adopt these amendments; and when they vote for them they had better realize that consciously because they may have to answer to the people in their States, their mayors and their Governors, for the loss of this program and all the money under this program.

Mr. HORTON. Mr. Chairman, I think the gentleman made a good point earlier when he said that if this program were now in effect, there would be no program because the triggering devices would indicate that there would not be a recession. Therefore, there would not be any distribution, in spite of the fact that we have pockets of very high unemployment.

Mr. WYDLER. Mr. Chairman, if the gentleman will yield further, that is exactly correct.

The fact is if we had the wage and salary triggering device that is going to be suggested as the triggering device for the future, if we had that last year, we would not be here arguing. There would not be any program at all. There would not have been $1 for anybody under this program.

Some people are for that. That is fine, but everybody voting here ought to realize that those are the consequences of adopting this particular triggering device.

Mr. HORTON. Mr. Chairman, I thank the gentleman.

Mr. WYDLER. Mr. Chairman, I highly commend the gentleman from New York (Mr. HORTON) for the statement he has made.

Mrs. COLLINS of Illinois. Mr. Chairman, I rise in support of H.R. 6810, the countercyclical antirecession assistance bill. Passage of this legislation is crucial to the budgetary health of many of our local and State governments during this time of continued high unemployment.

As a member of the Government Operations Committee that reported this bill, I would like to emphasize that in addition to providing assistance for maintaining basic services during times of high unemployment, the bill also requires implementation of a comprehensive study to consider alternative funding systems or improvements in the current formula for fund distribution among the States and localities where unemployment is a major problem.

The time to cut off countercyclical assistance is not while alternatives to the current formula are under discussion. Too many cities and States are depending on these funds to preclude their having to increase taxes to maintain these unemployment services.

For example, the city of Chicago desperately needs the same $18 million in countercyclical funding this year that it received last year just to sustain essential city services at the same level. If Chicago does not get the money, it will have to raise the taxes of its residents. Most other city and State governments are in similar positions.

Therefore, I urge my fellow Members to give this bill the careful consideration it deserves and to vote for its passage.

Mr. FRENZEL. Mr. Chairman, while I have been a consistent supporter of our foreign assistance program since coming to Congress I find I cannot in good conscience support H.R. 6714, the International Development and Food Assistance Act of 1977.

The House, having just approved a budget busting $66 billion deficit for the coming fiscal year, now has before it a bill which is 14 percent above last year's authorization and 10 percent above the Carter administration's request. Indeed, the $1.7 billion contained in this authorization bill exceeds the committee's own recommendation to the Budget Committee by $32 million. Given our continuing fiscal crisis, I must reluctantly oppose this bill and urge that the committee reconsider its recommendation in the light of our already inflationary budgetary situation.

While total spending needs to be scaled down, the bill does contain several desirable features which should be retained in the final package. I am pleased that the committee continued the recently established practice of providing for separate consideration of the military and economic assistance. When this approach was first tried, fears were expressed that the economic assistance portion of the total program could not win support on its own merits. Happily, our experience has proven just the opposite to be the case. The economic assistance programs have enjoyed slow but steady growth in recent years following a long period of declining support. This year's bill continues these favorable trends but unfortunately attempts to make too much of a good thing.

I also favor strong support for the agricultural development and population planning features of the program. Gradually we have modified the thrust of the food and nutrition programs, giving less emphasis to direct relief while placing more emphasis on helping small farmers increase the productivity of their land. This self-help approach should provide a more enduring solution to the continuing problem of world hunger than was the case with the previous attempts at dollar diplomacy.

This bill also continues the innovative title XII "Famine Prevention" program first enacted in 1975. Our land-grant universities have played an important role in our agricultural success story and they are well positioned to share the secrets of our success with the food-dependent countries of the world.

The population planning programs also deserve our strong support. World population is expected to increase 50 percent between now and the turn of the century. Unless we can reduce this anticipated rate of population growth, our efforts to increase the production of food will fall short of the expected demand. The food and nutrition programs and the population planning efforts compliment each other, and both deserve strong support.

We should be able to continue these important programs within a total spending limit that more adequately reflects the current fiscal crisis. In the final analysis we will be doing the poor countries of the world a disservice if we continue to spend far beyond our means and further contribute to international economic instability. The impact of world oil price manipulations has taught us that inflation imposes the cruelest penalties on those poor nations we are seeking to assist through this legislation. For their sake as well as our own we should bring the total authorization more in line with the administration request. As it stands now, this bill is clearly inflationary.

Mr. WEISS. Mr. Chairman, I rise in support of the Intergovernmental Antirecession Assistance Act of 1977, H.R. 6810, and in opposition to the amendment by the gentleman from Wisconsin which seeks to change the allocation formula for this program.

Countercyclical grants help local governments avoid service cutbacks, employee layoffs, tax increases, and other service actions in times of recession when revenues often fall below expenditures. The program, as originally enacted in the 94th Congress, is activated when national unemployment exceeds 6 percent. National allocations of $125 million are then authorized quarterly, with an additional $62.5 million provided for each one-half percent of unemployment over 6 percent. These funds are distributed according to a formula which uses the rate of unemployment as the measure of the recession's severity in each jurisdiction. This formula, though imperfect, has generally targeted these moneys to the hardest hit areas.

As a member of the Government Operations Committee, I voted last week to extend the program through fiscal year 1978 at the funding level which had been requested by President Carter—$125 million quarterly at 6 percent unemployment, plus $30 million for every one-tenth of a percent increase above 6 percent. The current distribution formula based upon unemployment rates was continued by the committee.

The amendment by the gentleman from Wisconsin would drastically alter the method by which funds are allocated by replacing the unemployment rate formula with one based upon a tax effort criterion. This proposed formula completely ignores the basic tenets of this legislation. It is the resources of local governmental units—the providers of health, welfare, and social services—which are most severely burdened when high unemployment increases the demands for these services. The countercyclical program under the present formula, is specifically designed to "counter" the economic "cycle" by aiding those governments which are then most adversely effected by unemployment.

The proposed amendment would provide many areas with high unemployment, such as New York, with substantially less money, while areas with relatively low unemployment would receive more. New York, for example, now receives about 21.5 percent of the countercyclical funds, but its share would be reduced to approximately 17 percent under the proposed amendment. Yet few would deny that New York has been one of the areas hardest hit by the recession.

The proposed tax effort formula also ignores the fact that many of the highest unemployment areas are also burdened with the highest tax rates. And in order to stimulate their economies, many of these areas are now attempting to reduce their tax rate, not increase it. But the proposed amendment would, in effect, punish these areas for attempting to cut taxes by decreasing their share of countercyclical funds.

Passage of this bill in its original form is crucial to the budgetary health of New York and the Nation. I am pleased to have had the opportunity to help bring this legislation to enactment as a member of the Government Operations Committee. I urge my colleagues to continue the program in the manner in which most effectively meets the needs of those people who have been hardest hit by the recession. H.R. 6810, as reported to the House by the Government Operations Committee, is the best available means of attaining this goal. It deserves the support of the full House.

Mr. HORTON. Mr. Chairman, I have no further requests for time.

Mr. LEVITAS. Mr. Chairman, I have no further requests for time.

The CHAIRMAN pro tempore (Mr. MINETA). Pursuant to the rule, the Clerk will now read the committee amendment in the nature of a substitute recommended by the Committee on Government Operations now printed in the reported bill as an original bill for the purpose of amendment.

The Clerk read as follows:

H.R. 6810

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Intergovernmental Antirecession Assistance Act of 1977".

SEC. 2. (a) Subsection (b) of section 202 of the Public Works Employment Act of 1976 (42 U.S.C. 6722(b)) is amended to read as follows:

"(b) AUTHORIZATION OF APPROPRIATIONS.—Subject to the provisions of subsections (c) and (d) of this section, there are authorized to be appropriated for each of the five succeeding calendar quarters (beginning with the calendar quarter which begins on July 1, 1977) for the purpose of payments under this title—

"(1) $125,000,000, plus

"(2) $30,000,000 multiplied by the number of whole one-tenth percentage points by which the rate of seasonally adjusted national unemployment for the most recent calendar quarter which ended three months before the beginning of such quarter exceeded 6 per centum.".

(b) Subsection (c) of section 202 of the Public Works Employment Act of 1976 (42 U.S.C. 6722(c)) is amended to read as follows:

"(c) LIMITATION ON AUTHORIZATION.—In no case shall the aggregate amount authorized to be appropriated under the provisions of subsection (b) of this section for the five successive calendar quarters beginning with the calendar quarter which begins July 1, 1977, exceed $2,250,000,000.".

SEC. 3. (a) Paragraph (2) of section 203(b) of the Public Works Employment Act of 1976 (42 U.S.C. 6723(b)(2)) is amended to read as follows:

"(2) APPLICABLE STATE PERCENTAGE.—For purposes of this subsection, the applicable State percentage is equal to the quotient resulting from the division of—

"(A) the product of—

"(i) the State excess unemployment percentage, multiplied by

"(ii) the State revenue sharing amount

(B) by the sum of such products for all the States,

except that, for purposes of subparagraph (A), the product for a State as defined in paragraph (3)(A)(ii) shall be deemed to be equal to the product of the population of that State multiplied by lowest per capita factor of any State (as defined in paragraph (3)(A)(i)) determined in accordance with paragraph (3)(E).".

(b) Subparagraph (A) of section 203(b)(3) of the Public Works Employment Act of 1976 (42 U.S.C. 6723(b)(3)(A)) is amended to read as follows:

"(A) the term 'State' means—

"(i) each of the several States;

"(ii) each of the following: Puerto Rico Guam, American Samoa, and the Virgin Islands;".

(c) Section 203(b)(3) of the Public Works Employment Act of 1976 (42 U.S.C. 6723(b)(3)) is amended—

(1) by striking out "and" at the end of subparagraph (C);

(2) by striking out the period at the end of subparagraph (D) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new subparagraph:

"(E) the lowest per capita factor is smallest quotient resulting from the division of—

"(i) each product (other than products which are equal to zero) determined under paragraph (2)(A) for each State as defined in subparagraph (A)(i) of this paragraph,

"(ii) by the population of such State.".

SEC. 4. (a) Section 203(b)(3)(D) of the Public Works Employment Act of 1976 (42 U.S.C. 6723(b)(3)(D)) is amended by striking out "for the one-year period beginning on July 1, 1975" and inserting in lieu thereof "for the most recently completed entitlement period, as defined under section 141(b) of such Act".

(b) Section 203(c)(4)(C) of the Public Works Employment Act of 1976 (42 U.S.C. 6723(c)(4)(C)) is amended by striking out "for the one-year period beginning on July 1, 1975" and inserting in lieu thereof "for the most recently completed entitlement period, as defined under section 141(b) of such Act".

(c) Section 203(c)(4)(E)(i) of the Public Works Employment Act of 1976 (42 U.S.C. 6723(c)(4)(E)(i)) is amended by striking out "Social and Economic Statistics Administration" and inserting in lieu thereof "Bureau of the Census".

SEC. 5. Section 204 of the Public Works Employment Act of 1976 (42 U.S.C. 6724) is amended by striking out "and for construction unless such supplies and materials or construction are to maintain basic services" and inserting in lieu thereof "or for construction, except for normal supplies or repairs necessary to maintain basic services".

SEC. 6. Section 207 of the Public Works Employment Act of 1976 (42 U.S.C. 6727) is amended to read as follows:

"NONDISCRIMINATION

"SEC. 207. (a)(1) IN GENERAL.—No person in the United States shall, on the ground of race, color, national origin, or sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity of a State government or unit of local government, which government or unit receives funds made available under this title. Any prohibition against discrimination on the basis of age under the Age Discrimination Act of 1975 or with respect to an otherwise qualified handicapped individual as provided in section 504 of the Rehabilitation Act of 1973 shall also apply to any such program or activity. Any prohibition against discrimination on the basis of religion, or any exemption, from such prohibition, as provided in the Civil Rights Act of 1964 or title VIII of the Act of April 11, 1968, commonly referred to as Civil Rights Act of 1968, shall also apply to any such pogram or activity.

"(2) EXCEPTIONS.—

"(A) FUNDING.—The provisions of paragraph (1) of this subsection shall not apply where any State government or unit of local government demonstrates, by clear and convincing evidence, that the program or activity with respect to which the allegation of discrimination has been made is not funded in whole or in part with funds made available under this title.

"(B) CONSTRUCTION PROJECTS IN PROG-

RESS.—The provisions of paragraph (1), relating to discrimination on the basis of handicapped status, shall not apply with respect to construction projects commenced prior to January 1, 1977.

"(b) ENFORCEMENT AND REMEDIES.—The provisions of subsection (a) of this section shall be enforced by the Secretary in the same manner and in accordance with the same procedures as are required by sections 122, 124, and 125 of the State and Local Fiscal Assistance Act of 1972 to enforce compliance with section 122(a) of such Act. The Attorney General shall have the same authority, functions, and duties with respect to funds made available under this title as the Attorney General has under sections 122 (g) and (h) and 124(c) of such Act with respect to funds made available under that Act. Any person aggrieved by a violation of subsection (a) of this section shall have the same rights and remedies as a person aggrieved by a violation of subsection (a) of section 122 of such Act, including the rights provided under section 124(c) of such Act.".

SEC. 7. Section 215 of the Public Works Employment Act of 1976 (42 U.S.C. 6735) is amended by adding at the end thereof the following new subsection.

"(c) ALTERNATIVE METHODS OF ALLOCATION.—The Secretary shall, in consultation with the Secretary of Commerce, conduct an investigation of—

"(1) the extent to which allocations of funds provided under this Act might be more precisely related to true economic conditions by the use of data on aggregate declines in private real wages and salaries;

"(2) the extent to which other factors, such as relative tax effort, should also be made part of the allocation system provided by this Act; and

"(3) the availability and reliability of data concerning Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands, and the extent to which such territories may properly be made part of the regular allocation system applicable to the several States.

The results of such investigation shall be submitted to the Congress not later than March 1, 1978, in order that such results may be available during congressional consideration of any extension of this Act beyond the fiscal year ending September 30, 1978.".

Mr. LEVITAS (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LEVITAS. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. MINETA, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6810) to amend and extend title II of Public Law 94-369, to establish a new title to the State and Local Fiscal Assistance Act of 1972, and for other purposes, had come to no resolution thereon.

GENERAL LEAVE

Mr. LEVITAS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on this bill, H.R. 6810.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

PRINTING OF HOUSE REPORT ENTITLED "CLEAN AIR ACT AMENDMENTS OF 1977"

Mr. ROGERS. Mr. Speaker, I offer a simple resolution (H. Res. 568), calling for the printing of additional copies of the report of the Committee on Interstate and Foreign Commerce, to accompany the bill H.R. 6161 and entitled the Clean Air Act Amendments of 1977, and ask unanimous consent for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 568

Resolved, That there shall be printed for the use of the Committee on Interstate and Foreign Commerce of the House of Representatives the maximum number of copies of the House report to accompany the bill (H.R. 6161) and entitled the "Clean Air Act Amendments of 1977" which may be printed at a cost not to exceed $1200.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I presume that the minority Members have been consulted about this and have approved it?

Mr. ROGERS. Mr. Speaker, if the gentleman from Maryland will yield, the answer is yes, we have checked with the minority.

Mr. BAUMAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

COMMUNICATION FROM THE CHAIRMAN OF THE COMMITTEE ON PUBLIC WORKS

The SPEAKER laid before the House the following communication from the chairman of the Committee on Public Works; which was read and, together with the accompanying papers, referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION,
Washington, D.C., May 10, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the provisions of section 201 of Public Law 89-298, the Committee on Public Works and Transportation of the House of Representatives has adopted Committee resolutions authorizing the following water resources development projects:

Fairport Harbor, Ohio.

Flathead and Clark Fork River Basins (Flathead River near Kalispell), Montana.

Upper Baker Project, Skagit River Basin, Washington.

Copies of the resolutions are enclosed.

Sincerely,

HAROLD T. "BIZZ" JOHNSON,
Chairman.

INTRODUCTION OF THE TELECOMMUNICATIONS PRIVACY ACT

(Mr. KILDEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KILDEE. Mr. Speaker, today I respectfully introduce the Telecommunication Privacy Act, an act to regulate the interception of telecommunications. The legislation will rewrite our present laws governing wiretapping and wiretap authorizations; regulate the interception of telecommunications by the common carrier and the business community; and extend the provisions of the act to technologies of telecommunications presently not covered by the Federal law. As well, it is an attempt to make Federal law conform with recent significant judicial rulings.

The act will require all interceptions for law enforcement purposes to have prior judicial authorization. Judicial warrants will be required to be more specific in the description of individuals and the information sought. Minimization procedures are established to limit the intrusiveness of wiretapping, so that even with a warrant wiretapping is not a license to pry into areas unrelated to criminal activity. Only law enforcement officials may apply for a warrant, and only for interceptions of communications involving a crime punishable by 5 years or more. The intent is to make a wiretap warrant as identical as possible to a search warrant as addressed by the fourth amendment to the Constitution.

This legislation will extend coverage to American citizens traveling in foreign countries for the interception of communications by U.S. Government agencies.

Communication common carriers will be required to get a court order and intercept communications exclusively in conjunction with a beep tone. Employees are provided protection against coerced consent of interceptions by employers and to consent required as a condition of employment. Telecommunication technologies not presently covered by Federal law are made subject to the provisions of this act. Microwave, satellite, and optical technologies, as well as wire, cable and oral communications are protected. The transmission of both verbal and symbolic communications are subject to the provisions of this act. The legislation protects all information associated with conduct of a communication.

I have introduced the Telecommunications Privacy Act in an attempt to recover and secure rights and liberties which were once considered fundamental to our Nation. Rights which today, unfortunately are neither secure nor in hand. We, as a people have long since reached the threshold of a highly technological society. It is past time to assess our technology for its human dominating characteristics. I believe there is a critical need for public law which insures that individual freedom and personal privacy are not sacrificed for the convenience, efficiency, and exactness of our many and great technological accomplishments in telecommunications. So that our highest achievement be that

sophisticated technology exists in the midst of a proud and free people. I would ask for your consideration of this legislation and your support.

INTRODUCTION OF OCCUPATIONAL ALCOHOLISM PREVENTION AND TREATMENT ACT OF 1977

(Mr. SCHULZE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SCHULZE. Mr. Speaker, I am today introducing the Occupational Alcoholism Prevention and Treatment Act of 1977.

Three major diseases threaten the American citizen—heart disease, cancer, and alcoholism. There are 9,000,000 victims of alcoholism—I should say primary victims of alcoholism, because the toll on secondary victims in the ripple effect of alcoholism cannot be estimated. The primary victim may be the husband or wife, but the tragic toll of the effects of alcoholism does not stop there but spreads through the family structure—perhaps damaging it beyond repair. The ripple effect continues through the business community. Dollar estimates for the latter range from $15 billion to $25 billion in absenteeism, accidents, reduced productivity, faulty decisions, and personnel turnovers.

Sadly, the Federal Government's tax revenues benefit from the alcoholic and from the general increased consumption of alcohol. Yet the Federal Government does not energetically support programs of assistance for that alcoholic whose consumption has increased the general revenue. In 1976, for example, the Federal Government spent $762,647,000 on cancer research—and it should have. It also spent $370,347,000 on heart and lung disease—and it should have. But contrast those spending figures with the $150 million to cover research, treatment, and rehabilitation, prevention, and several other programs to help the victim of alcoholism. Compare that $150 million spent to help alcoholics with the $6 billion the Federal Government received in 1976 from the taxes on alcohol.

There are programs designed to help the alcoholic, but only when he has hit rockbottom. Yet the so-called skidrow type comprises but 3 to 5 percent of the category of active alcoholics, whereas 90 percent of all alcoholics are estimated to be currently working.

My bill will authorize the Secretary of Health, Education, and Welfare—through the National Institute on Alcohol Abuse and Alcoholism—to make available grants for up to one-half of the costs of occupational alcoholism programs. Applicants for those grants may be employers or unions or consortiums of employers or of unions. The money will be apportioned so that each State will have set aside for applications from it, sums equal to the relative labor force population of that State. The bill authorizes an annual appropriation equal to 2.5 percent of the total Federal alcohol taxes collected on beer, wine, and liquor for the fiscal years 1979 through 1982. Actual appropriations will be required each year.

As I indicated earlier, studies demonstrate that the "skid row" types comprise but a small portion of the total category of alcoholics. Where are the remainder? The assistant attorney general for the State of California in 1971, Mr. Emmett Daily, described it best when he answered:

They are behind venetian blinds, protected by their families and never reaching the jail blotters.

I believe that the time is long past when we should reach out a helping hand.

The text of my bill follows:

H.R. 7150

A bill to provide Federal financial assistance to employers, labor organizations, or consortiums thereof, or other groups or individuals, to establish and operate occupational alcoholism programs for the diagnosis and treatment of alcohol abuse and alcoholism in employed persons, including managerial personnel, and their dependents, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Occupational Alcoholism Prevention and Treatment Act of 1977".

STATEMENT OF FINDINGS

SEC. 2. (a) The Congress hereby finds and declares that—

(1) significant numbers of working Americans currently suffer from alcohol abuse and alcoholism, generating an incalculable social and economic cost for themselves and their families, and for American industry as a result of absenteeism, accidents, reduced productivity, increased need for health care, faulty decisions, personnel turnover, and other effects;

(2) occupational alcoholism programs have demonstrated their effectiveness in diagnosing and treating alcohol abuse and alcoholism in employed individuals and managerial personnel, including the identification of such problems at an earlier stage than they are generally diagnosed outside the occupational setting; and

(3) while certain large employers and labor organizations have underwritten their own occupational alcoholism programs because of the demonstrated cost effectiveness of such programs, economies of scale for most employers and labor organizations will prevent the establishment and operation of such programs unless the Federal Government provides incentives and technical assistance to such employers and organizations for that purpose.

(b) It is the purpose of this Act to authorize grants to employers, labor organizations, consortiums of employers and labor organizations, and public or private nonprofit agencies and organizations, to pay up to half of the cost of establishing and operating occupational alcoholism prevention and treatment programs.

SEC. 3. (a) The Secretary of Health, Education, and Welfare (hereinafter referred to as the "Secretary"), acting through the National Institute on Alcohol Abuse and Alcoholism (hereinafter referred to as the "Institute"), shall make grants to employers, labor organizations, consortiums of employers or labor organizations or both, and to public or private nonprofit agencies organizations, to pay no more than 50 per centum of the cost of establishing and operating occupational alcoholism programs.

(b)(1) For the purpose of making such grants, there are hereby authorized to be appropriated for fiscal years 1979, 1980, 1981, and 1982 not to exceed 2.5 per centum of those amounts determined by the Secretary of the Treasury to be equivalent to the taxes received in the Treasury under section 5001(a)(1), section 5041(a), and section 5051(a) of the Internal Revenue Code (relating to the rate of tax on alcohol) in the most recent fiscal year for which such information is available.

(2) The program authorized by this Act shall not qualify as one of the exceptions provided in section 401(d) of the Congressional Budget and Impoundment Control Act of 1974.

(3) Sums appropriated pursuant to this Act shall be available until expended.

ALLOTMENTS TO STATES

SEC. 4. (a)(1) From the sums appropriated pursuant to this Act, the Secretary shall allot not more than 1 per centum among Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands according to their respective needs.

(2) From 90 per centum of the remainder of such sums the Secretary shall allot to each State an amount which bears the same ratio to such 90 per centum as the labor force population of the States bears to the labor force population of all States.

(3) The remainder of the sums appropriated pursuant to this Act shall be available to the Secretary for administration of this Act, including the evaluation of, and research into, the effectiveness of occupational alcoholism programs, and the training of occupational alcoholism program personnel.

(b)(1) The amount by which any allotment to a State for a fiscal year under subsection (a) exceeds the amount which the Commissioner determines will be required for such fiscal year for applications approved under section 5 within such State shall be available for reallotment to other States in proportion to the original allotments to such States under subsection (a) for that year, to the extent necessary to fund approved applications in such other States.

(2) In order to afford ample opportunity for all eligible applicants in a State to submit applications for assistance under this title, the Secretary shall not fix a date for reallotment, pursuant to this subsection, of any portion of any allotment to a State for a fiscal year which date is earlier than ninety days prior to the end of such fiscal year.

(3) In any year in which funds appropriated pursuant to this Act are determined by the Secretary to exceed the amount required to fund all approved applications for occupational alcoholism programs, the remainder of such funds may be expended by the Secretary, acting through the Institute, to provide treatment and prevention services to other currently underserved populations, such as racial and ethnic minorities, native Americans, youth, female alcoholics, and individuals in geographic areas where such services are not otherwise adequately available.

(c) For the purpose of this Act the term "State" shall include the Commonwealth of Puerto Rico and the District of Columbia.

(d) The labor force population of a State and of all States shall be determined by the Secretary on the basis of the most recent satisfactory data available to him from the Bureau of Labor Statistics of the Department of Labor.

SEC. 5. (a)(1) Sums allotted to each State under this Act shall be used by the Secretary to make grants to approved applicants in the State, including employers, labor organizations, consortiums of employers or labor organizations or both, and public or private nonprofit agencies or organizations which enter into cooperative agreements with such employers, labor organizations or consortiums, to establish and operate occupational alcoholism treatment programs.

(2) For the purpose of this Act "occupational alcoholism programs" shall be defined as programs operated primarily for the diagnosis or treatment, or both, of alcohol abuse and alcoholism in employed persons, includ-

ing managerial personnel, and their dependents. Such programs may include, but shall not be limited to, intervention, diagnosis, counseling, referral, treatment, prevention, and rehabilitation.

(b) Any individual or organization which desires to receive funds pursuant to this Act shall submit an annual application for such funds, for approval by the Secretary, which shall include a description of the program to be carried out, and which shall include assurances of—

(1) the availability of funds, from non-Federal sources, to pay at least 50 per centum of the cost of the program;

(2) the professional capability to carry out the program described in the application; and

(3) the need for such a program, including the lack of adequate services currently available to the population intended to be served.

(c)(1) All applicants approved by the Secretary shall be eligible to receive grants from the Secretary out of the sums allotted to the State in which the applicant's program is located, or in the case of applications affecting individuals residing in two or more contiguous States, out of the allotments of more than one State, at the discretion of the Secretary.

(2) If the sums allotted to a State for any fiscal year are not sufficient to fund all the approved applications in that State, the Secretary may, in his discretion, prorate the allotted sums among all approved applicants, or fund only a portion of the approved applications, pursuant to criteria which he shall publish.

A MEANS OF CONSERVING ENERGY

The SPEAKER pro tempore (Mr. MONTGOMERY). Under a previous order of the House, the gentleman from New Hampshire (Mr. CLEVELAND) is recognized for 5 minutes.

Mr. CLEVELAND. Mr. Speaker, the following statement written by one of my constituents addresses itself to a means of conserving energy that has been largely overlooked or ignored thus far. The author, Thomas Heavey, owner/director of the Biking Expedition, Inc., of Hillsboro, N.H., and his wife Susan run a bicycle touring business which includes tours in Europe as well as the United States and Canada. A former member of my staff has been employed by the Biking Expedition as a trip leader.

I would like to call my colleagues' attention to Mr. Heavey's message which points out the many benefits of increased use of the bicycle as a means of transportation.

The statement follows:

STATEMENT OF THOMAS HEAVEY, OWNER/DIRECTOR, THE BIKING EXPEDITION, INC. OF HILLSBORO, N.H.

President Carter's energy program is an extremely important first step in facing a critical national problem. The essential thrust of the program—its emphasis on conservation through economic sanctions—is long overdue. However, the President's proposals represent only a partial solution.

They did not address the pressing need for Americans to develop less reliance on the automobile—no matter how much more efficient it may become—as their primary means of local transportation. There is an urgent need now for a high-priority program by our federal government to promote adult use of the bicycle, a non-polluting, non-energy consuming vehicle, for the everyday uses for which Americans are totally dependent upon the automobile.

An example of a country in which the bicycle plays a significant role is the Netherlands, where it is widely used for commuting to and from work and for shopping, as well as for recreation. There is no reason why the bicycle cannot play an equally important part in the lives of Americans, especially in urban and suburban areas where trips are generally short and congestion is at its worst. The potental for conservation of energy, improvement in the quality of our atmosphere, and a striking advance in the health of Americans is enormous.

Two major roadblocks hinder acceptance of the bicycle as a substitute and/or replacement for the automobile. First, although a number of American cities have made progress in this area, there are too few bikeways or other facilities for American bikers to use without endangering themselves. In the Netherlands, by contrast, bicycles have separate roadways and separate traffic devices.

Second, the automobile commands a high degree of status in the American culture. Unfortunately, too few American men and women think of using a bicycle for commuting or shopping. However, through a government-sponsored educational campaign, the bicycle could become more widely accepted and could be enjoyed by many more adult Americans.

With adequate biking facilities and with recognition of the bicycles as an energy-saving, non-polluting vehicle to be used in the national interest, millions more Americans would find it healthful, relaxing, inexpensive and convenient. Trained riders can do in excess of 20 miles an hour, but even a novice biker in average physical condition can ride six miles an hour without effort, and with practice can increase this to 12 miles an hour or better.

Any attempt to replace automobiles totally with bicycles would be out of the question. However, there are many situations where a lightweight bicycle is a more appropriate means of transportation for an adult than a 4,000-pound automobile.

With the active encouragement of the federal government, the bicycle could become a significant factor in the preservation of America's dwindling energy reserves.

TAX REDUCTION IS THE KEY TO REVITALIZING NEW YORK STATE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 15 minutes.

Mr. KEMP. Mr. Speaker, earlier this week I addressed the New York Chamber of Commerce and Industry Council on a program for revitalizing New York State. The key to this program is a reduction in tax rates across-the-board in order to create new jobs and halt the exodus of existing jobs and businesses out of New York.

Everyone knows that New York State has been losing jobs and people for several years. Between 1970 and 1975 New York State had a net loss of approximately 121,000 in population. Over the same period, the State also lost 364,000 nonagricultural jobs. The loss of 45,000 additional jobs between February 1976 and February 1977 shows that this trend has not changed, and explains why New York continues to suffer from double-digit unemployment in spite of the continuing economic recovery throughout the rest of the Nation.

While it cannot account for the entire loss in jobs, one significant factor is the movement of corporate headquarters out of the State and especially New York City, where most of the job and population loss has occurred. In the past year, for example, a number of the Nation's 500 largest companies have either moved out of the city altogether or made firm plans to do so. This group includes General Signal, the Pittston Co., Texasgulf, General Host, Texaco, Union Carbide, and Anaconda.

In addition, Mobil and St. Regis Paper are expected to leave in the very near future. Their loss will reduce the number of top 500 companies with headquarters in New York City from 140 in the 1960's to less than 80. Thus the city alone has lost 468,000 jobs since 1970, and 328,000 in population between 1970 and 1975. In western New York as well, companies like Houdaille, Western Electric, and National Gypsum have moved elsewhere.

Obviously, the reasons for this situation are varied and complex. I do not think there is any doubt, however, that the extremely high tax rates in New York City and New York State have substantially contributed to the decline in employment, business activity, and population. The following record shows how New York State reached the point where its per capita State and local tax burden reached $1,025 in 1975—the highest in the Nation:

1959: Three new brackets were added to the income tax. There were also hikes on cigarette and gasoline taxes and an increase in the estate tax.

1961: Insurance taxes added two percent on gross premiums by foreign and alien title insurers.

1963: Taxes (referred to as fees) were increased on alcoholic beverage control licenses, liquor, beer and wines.

1965: The state sales and use tax was imposed at two percent. The cigarette tax was doubled from 5¢ to 10¢ per pack. Passenger vehicle registration fees increased by 50 percent. Parimutual taxes were increased.

1966: A "temporary" 25 percent surtax was added to the stock transfer tax. (This was made permanent in 1968.)

1968: Taxes increased on banks, corporations utilities and insurance companies; also on cigarettes and gasoline. Four new brackets were added to the personal income tax. In addition two new taxes were added. These were the real estate transfer tax and a fuel tax which was added to the already existing highway use tax.

1969: The state sales tax was increased from two percent to three percent.

1970: A new, unrelated business income tax was imposed and a minimum income tax for individuals was established.

1971: The state sales tax was increased from three percent to four percent—and the "hot dog" tax extended it to include meals under $1.00. In addition, taxes increased on corporations, banks and utilities and the pari-mutual flat-track takeout was raised.

Taxes on alcoholic beverages, cigarettes and gasoline were increased, another bracket was added to the personal income tax and the minimum tax rate doubled; a gift tax was imposed, percentage depletion disallowed and capital gains taxability went from 50 percent to 60 percent. This was also the year the 2.5 percent surcharge was attached to the personal income tax.

1975: The stock transfer tax was increased 25 percent. The bank tax was increased from eight percent to 12 percent on net income and a 30 percent surcharge was imposed on bank tax liability for 1975 and 1976; the corporation franchise tax was increased from

nine percent to 10 percent of net income and a "one-year" surcharge of 20 percent was added to the corporation franchise tax.

1976: The 2.5 percent surcharge on the personal income tax was extended through March 31, 1977.

If you examine the history of taxation in New York City, you get the same picture, which is why city residents have a combined State and local tax burden of approximately $1,518 per capita:

1946 Gross receipts tax doubled to one-tenth of 1 percent.

1946 City sales tax doubled to 2 percent.

1948 Gross receipts tax doubled again to one-fifth of 1 percent.

1951 City sales tax increased to 3 percent.

1955 Gross receipts tax increased to one-fourth of 1 percent.

1959 Gross receipts tax increased to two-fifths of 1 percent.

1960 Commercial motor vehicle tax imposed.

1963 City sales tax increased to 4 percent.

1963 City commercial rent occupancy tax imposed at 5 percent.

1965 City sales tax decreased to 3 percent.

1965 State sales tax imposed at 2 percent, exempting machinery, equipment, fuel and utilities.

1966 Gross receipts tax replaced with the general corporation (business income) tax at 5.5 percent.

1970 City commercial rent occupancy tax increased to 7.5 percent.

1971 General corporation (business income) tax increased to 6.7 percent.

1974 City sales tax increased to 4 percent.

1975 General corporation (business income) tax increased to 10.05 percent.

It should be emphasized that however high the taxes may be on business in New York State, the primary problem is the high tax on individuals. In fact, business taxes as a percent of State revenues have actually been declining over the years. In 1963–64 they represented 21 percent of State revenues, compared to 18 percent in 1975. Thus you discover that the main reason cited by companies for leaving New York is the difficulty of attracting high quality personnel, and the main reason for this is the high individual income tax.

Recently the State senate labor committee released a report with the results of a survey taken among the largest industrial companies in New York City. Corporate leaders were asked to comment on the possibility of an increase in the commuter tax and how it would affect their companies. Almost unanimously they replied that any further increase in taxes would reduce the city's attractiveness as a corporate headquarters site. For example, George Zipf, chairman of Babcock & Wilcox, replied:

It is my personal opinion, as well as that of other Babcock & Wilcox management, that the current New York City commuter tax is modest and imposes no hardship.

The problem lies with the state income tax, which is a real detriment to conducting business in New York. We find it very difficult to attract out-of-state persons to transfer to New York and one of the major factors is the income tax.

Certainly an increase in taxes is one more negative factor that must be considered in our deliberations on whether or not to move our offices out of the state.

One industry in particular is threatening to move out of New York en masse unless something is done about taxes—the financial industry, which is highly labor-intensive. Citibank, one of the largest banks in the country, recently released a report to this effect. In its conclusion, the report said:

State and local government in New York have treated the financial sector as a captive industry. The degree to which the industry is captive in New York is defined by the extent to which New York is the center of the investment markets of the nation and the world, the benefits received by individual financial firms in being headquartered near each other, and in inertia. Each and every one of these reasons for remaining in New York is being eroded. Parts of the industry are moving to the suburbs of Long Island and New Jersey, and firms headquartered elsewhere are increasingly finding themselves near population and business centers of the nation, and in smaller financial centers of their own. There is no longer any reason why a new combined New York and American Stock Exchange has to be located in New York. There is no reason why the largest U.S. banks have to remain in New York. And there is even less reason why major life insurance firms have to stay in the City.

The report also added:

New York City and New York State have taxed the financial sector with little concern for the possibility that the goose may be killed.

A consequence of the loss in population and employment, of course, is a reduction in the tax base, resulting in reduced tax revenues. In the case of the financial community, for example, the city would lose more than 15 percent of its total tax revenues were it to leave. In the case of manufacturing, the following table shows how much city revenue is derived from each job:

Estimated New York City revenues per manufacturing employee: 1976

Type of Revenue:	*Estimated Revenue Per Employee*
City income tax	$115
City sales tax [1]	135
Miscellaneous city taxes	15
Bus and subway tolls based on an assumed average of 400 rides per year [2]	200
Residential property taxes assuming an average assessment of $3,300 per employee's family	300
Total city personal taxes per employee	765
City business taxes per employee [3]	630
Total city taxes per employee	1,395

[1] With adjustment for difference from state sales tax, i.e., parking tax, entertainment tax, tax on services, etc.

[2] While bus and subway fares are not technically taxes, the City's subsidization of the transit system gives them that effect.

[3] Included with these taxes are the fees and charges, especially water charges, levied on manufacturers in New York City.

When one considers that New York City has lost 527,800 manufacturing jobs since 1969, you can see that the revenue loss is enormous.

The fiscal situation is now so acute that the General Accounting Office has warned that any effort by New York City to raise additional revenues through increased taxes will actually have the opposite effect. I believe it already has achieved counterproductivity. Conversely, the mayor's temporary commission on city finances has proposed a plan for tax rate reduction on manufacturing industries which will increase revenues within 3 years.

The idea that tax rate reduction will lead to increased revenues is really not so hard to grasp. When one considers that taxes are fundamentally a disincentive to work, investment, production, and employment, one can see that at some point it is no longer worthwhile to bother increasing one's income. People and businesses will then either leave for somewhere else where taxes are lower, forsake income opportunities altogether and consume additional liesure, or spend more of their time and money finding tax shelters or other ways to reduce their tax burden.

An excellent example of this is the cigarette tax. Because it is so high in New York City, where there is an 8-cent tax on top of the high State tax, nearly half of all cigarettes sold are smuggled in from States like North Carolina where cigarette taxes are very low.

Consequently, a State task force recently concluded that an elimination of the 8-cent city tax and a reduction in the State tax on cigarettes of 1-cent would increase State tax revenues on cigarettes by $7.4 million, by making it less worthwhile to run the risk of smuggling. And the same thing happens with people when they weigh the relative merits of investing in private industry or tax-free municipal bonds.

Rather than dealing with this fundamental problem, some in New York City have reacted by trying to force businesses to stay in the city through court action. Union Carbide is the first target of this new approach and is being sued for violation of civil rights statutes, on the grounds that the company's move out of the city is harmful to minorities and the poor. While this approach has yet to be upheld in the courts—and is not likely to be—I think that the type of thinking involved here helps explain why the city is in the crisis it is in.

Though New York City has yet to recognize the fundamental position of its tax system in the continuing migration of people and jobs to lower taxed areas of the South and West, it is clear that this problem is becoming more widely recognized. For example, a report by the Business and Labor Working Group on Jobs and Economic Regeneration in New York City concluded:

That the rising level of New York City and State taxation of individuals and businesses is increasingly uncompetitive and a major cause of job loss. Indeed, our studies strongly confirm reports of other organizations that many elements of the City and State tax structures are counter-productive to future industrial and employment growth in New York City. Public tax policy must recognize that a lesser share of something is better than all of nothing, and that it is the tax base with which we must be increasingly concerned.

I would recommend that a similar Business and Labor Working Group be set up on the State level to deal with the problem of State taxation as well. This

task force should consist of prominent businness leaders and the presidents of the AFL–CIO councils from all the State's metropolitan areas, including New York City, Buffalo, Rochester, Syracuse, Long Island, Utica, Rome, and Binghamton. Additional membership also would involve representatives from major categories of businesses and labor such as construction, transportation, communications, garment manufacturing, foreign trade, finance, shipping, and printing.

The first priority of the task force would be to prepare a blueprint of across-the-board reductions in tax rates to stop the growing tide of tax exiles from New York State. High taxes have chased wage earners and businesses from Great Britain and we are confronting the same kind of exodus from New York State. And there should be a deadline of 3 months for devising this tax package which should then be taken up by a special session of the State legislature.

Unless something is done soon, New York State will go the way of Great Britain. There will be a continuing loss of jobs, population, and business out of the State, and the Government will be left with higher welfare costs and a shrinking tax base. New York City is worse off than the rest of the State only because it has traveled further along the road of ruinous taxation. But it is only a matter of time before Buffalo, Syracuse, Utica, and the rest follow suit. I think that the trend must be stopped by reducing taxes and stimulating jobs and investment for New York State now and in the future. The people demand action at the Federal, State, and local level.

WHALEN/BEDELL ADDRESS THE CRISIS IN SOCIAL SECURITY FINANCING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 5 minutes.

Mr. WHALEN. Mr. Speaker, today the gentleman from Iowa (Mr. BEDELL) and I, along with our colleagues, Messrs. BAUCUS, DELLUMS, EDGAR, EILBERG, HUGHES, KREBS, NOLAN, PEASE, and SIMON, are introducing legislation to provide adequate income for the social security trust funds. This measure is designed to meet the immediate short-term crisis in financing without changing the basic nature of the system.

Over a 3-year period, our bill would increase the amount of wages upon which the social security payroll tax is collected from both employees and employers from the present $16,500 to $20,000 in 1978, to $25,000 in 1979, and to $30,000 in 1980.

Earlier this week the President made his recommendations for insuring the financial soundness of the social security system. I welcome this initiative for it is clear we have waited too long to tackle this difficult problem. While I do not agree with some of the administration's specific proposals, three facts are apparent:

First. There are no easy solutions. To endorse any of the funding proposals before us will require study as well as conviction.

Second. There are no painless solutions. Someone in society will pay the additional financing mandated by any plan.

Third. During the 95th Congress every Member of Congress will be required to make decisions on the merits of the various proposals before us and on what the nature of the System will be in the future.

Too, it would be difficult to overestimate the importance of the program to the more than 33 million persons who now receive cash benefits and to their families. Social security has served our country well for 42 years, and the 104 million Americans now contributing into the system deserve our best efforts to insure that the system be placed on sound financial footing.

The Whalen-Bedell proposal for a graduated increase in the wage base for contributions for both employee and employer is not a radical solution. When social security first came into existence, 95 percent of covered workers and their employers contributed into the trust fund on all of wages paid. In the mid-1930's, this was around $3,000. Over the years the amount of covered wages eroded until in 1974 when the amount to which the tax applied, or the "wage base for contributions," was $13,200, 25 percent of the workers earned wages above that.

By easing back into a situation where 95 percent of workers and their employers are again contributing on total earnings, we can meet the existing emergency without doing violence to the system. It is predicted that by 1980, 95 percent of covered workers will be making $30,000 or less. Under our proposal, their entire wages would be covered by the payroll tax.

According to Congressional Research Service calculations, over the 3-year period, our plan would bring in almost exactly the same amounts as the sums we are currently paying out in excess of receipts. Thus, there would be no dramatic gain in the fund during the first 3 years after enactment. However, the downward trend would be reversed. Our best estimates indicate that after 3 years the fund will gradually begin to build up at a moderate rate. We are assuming that the present double-indexing flaw will be corrected by other legislation.

In conclusion, we are pleased to note that the House Subcommittee on Social Security has already received administration witnesses on social security financing and next week will receive additional testimony. We commend the subcommittee for timely action, and we urge that a substantial increase in the wage base be seriously considered by the subcommittee as one of the most equitable solutions to the dilemma of additional funding for the social security system.

NEW YORK CITY EMPLOYEES COULD LOSE SOCIAL SECURITY COVERAGE BECAUSE OF CITY NEGLIGENCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KOCH) is recognized for 10 minutes.

Mr. KOCH. Mr. Speaker, a matter of grave concern relating to all the employees of the city of New York is discussed in the letter which I am appending to this statement. I am placing it in the CONGRESSIONAL RECORD so as to alert those who are interested in this matter to write immediately to Mayor Abraham Beame urging that he resolve the issue at once by promptly filing the necessary letter of rescission with the Social Security Administration. The letter follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., May 11, 1977.

Hon. ABRAHAM BEAME,
Mayor,
City Hall,
New York, N.Y.

DEAR ABE: Recently a constituent called me seeking to learn whether the application filed by New York City on March 31, 1976 to withdraw coverage of City employees from the Social Security System had, in fact, been retracted by the City. You will recall that Deputy Mayor John Zuccotti disclosed that the City had agreed to scrap the pullout plan on January 6, 1977 and on January 14, 1977, Public Employees Press reported that agreement in detail.

As you know, there is a mandatory two year waiting period for such a withdrawal to be effected and at the end of that time New York City employees would cease to be covered under Social Security. Regrettably, I have discovered that since March 31, 1976 when the City's letter was submitted to Commissioner Cardwell, the clock has been ticking like a time bomb.

Before reporting to the constituent on the status of this matter I called Mr. John Reilly of Commissioner Cardwell's office to ascertain whether or not the City's letter voiding its March 31, 1976 application has been filed. I was shocked to learn that it had not and that as of this moment the City's application to withdraw its employees from Social Security coverage is still operative and ticking away. I need not stress to you, because you have already accepted the verities in this matter, that as Victor Gotbaum said, "The loss of Social Securiy would have been a crippling blow." And as Richard Shinn, Chairman of the Mayor's Management Advisory Board, said, "It is good economic sense to remain in the Social Security system."

I urge you to send a letter immediately withdrawing your original request of March 31, 1976 so as to make certain that no City employee will lose his or her Social Security coverage. Unless that is done, they will lose that Social Security coverage after March, 1978. As you know, once the pullout goes into effect, the City forever forfeits its right to re-enter the Social Security system.

I would appreciate your providing me with a copy of any letter that you send to Commissioner Cardwell rescinding your earlier letter so that I in turn can advise those City employees who contact me, that they need no longer have nightmares on this subject.

Sincerely,

EDWARD I KOCH

SOVIET UNION SHOULD ALLOW ALEXANDER MELAMID AND VITALY KOMAR TO EMIGRATE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 5 minutes.

Mr. BINGHAM. Mr. Speaker, on August 1, 1975, representatives of 35 nations, including the Soviet Union, affixed

their signatures to the Helsinki Final Act. Among other undertakings, the signatories promised to facilitate the contributions in the various fields of culture by the national minorities and to act in conformity with the Universal Declaration of Human Rights and the International Covenant on Civil and Political Rights. These two historic documents guarantee the right of emigration and reentry for the citizens of the signatory nations.

In 1974, while on a trip to the Soviet Union, I went to visit two avant-garde artists, Alexander Melamid and Vitaly Komar. Their art struck me as imaginative and innovative. Working together as a team, their art becomes the substance of their commentary on the Soviet system.

Sadly, in trying to express their art in a free and unhindered manner, the two have run into numerous obstacles and roadblocks. In 1972, as they held an unauthorized art show in a vacant lot, bulldozers arrived to raze their work. This was followed by their dismissal from the Artists Union. After their expulsion from the Artists Union, they joined the Moscow Graphics Association. Recently, after applying for exit visas to Israel, the two were expelled from the association at a meeting where slanderous anti-Semitic remarks were hurled at them—Melamid and Komar are both Jewish.

In spite of the difficulty and danger, these two brave young men managed to have their art work smuggled out of the country by friends from the West. This Sunday, May 15, an art show featuring their work will be opening in New York City. Unfortunately, Melamid and Komar will not be on hand to witness this display of their work. Though they have recently applied for emigration visas, their pleas have been answered with harassment.

This art show in New York City provides the U.S.S.R. with a perfect opportunity to demonstrate to the world that they intend to live up to the spirit of Helsinki, by allowing these two artists to emigrate.

NATIONAL GIFTED AND TALENTED CHILDREN'S WEEK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Hawaii (Mr. AKAKA) is recognized for 5 minutes.

Mr. AKAKA. Mr. Speaker, I am pleased to introduce, along with Congressman BRODHEAD, a joint resolution authorizing and requesting that President Carter issue a proclamation designating the week of October 9–15, 1977, as "National Gifted and Talented Children's Week."

Ironically, America's gifted and talented children have been among the most neglected minority groups. As a former educator, I share this particular interest in talented and gifted children, and would like to share with my distinguished colleagues the problems faced by these children.

The gifted and talented children, by their very nature as gifted individuals, are expected by our society to reach the top of their respected fields. Sadly, however, this is not so. Only last year, less than 4 percent of the gifted and talented children in this country received services commensurate with their needs. This means that over 1.9 million gifted children were unable to achieve their virtually limitless potential. I have stated many times that the most abundant and rich natural resources of all was our youth and yet we find that we are leaving this precious resource untapped.

We are entering a new century and fast-paced era, and it is time that we develop and cultivate the highly creative and talented so that we can deal with our future needs not only in industry but also our social and domestic ills. It is our obligation to ourselves and our Nation to promote and nurture these children and work toward a meaningful plan to identify and cultivate the demonstrated and potential talent existing in all aspects of American life.

Existing programs for the talented and gifted fall mainly in the area of demonstration programs. This is not as strong a commitment as I am sure you will agree that we want or need for our country. We are dealing with the future leaders of our world, and need our assistance now. It is up to us to recognize the need to assist them in fulfilling their needs for advancement within our system. We can ill-afford to weaken our efforts on their behalf, and I am sure you will agree with me that it is time for us to pay particular attention to this particular minority group. I am proud to introduce today, along with Congressman BRODHEAD, this resolution, which will provide the recognition to a group of children who's potential is limitless.

H.J. RES. 458

Joint resolution providing for the designation of the week beginning October 9, 1977, and ending October 15, 1977, as "National Gifted and Talented Children's Week"

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States hereby is authorized and requested to issue a proclamation designating the week beginning October 9, 1977 and ending October 15, 1977, as "National Gifted and Talented Children's Week", and calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

WELFARE: WHAT WE CAN DO TODAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

Mr. VANIK. Mr. Speaker, since coming to office, the administration—like previous administrations—has been studying how to "reform" the Nation's welfare programs. In the last several weeks, President Carter has let it be known that welfare reform is at least 4 years away. In other words, welfare reform will not have as high a priority as energy conservation, tax reform, or Government reorganization.

But even if welfare were the No. 1 priority of the administration, it would take at least 4 years to implement a major set of reforms. Congress would probably take the better part of 2 years to legislate in this controversial and emotional area. Then, it would take at least 2 and possibly 3 years for the various Federal, State, and local administrators to properly gear up for and implement a major series of revisions.

The introduction of major revisions in a social program cannot be rushed. Hopefully, the Congress and the administration will be mindful of the many problems encountered in trying to implement the supplemental security income program in too short a time span. Because we did not allow enough lead time in the Federal takeover of the State programs for the aged, blind, and disabled, hundreds of millions of dollars have been wasted, and tens of thousands of beneficiaries have suffered when their checks were delayed or miscalculated. In view of our experience with SSI, I believe that a broader, more sweeping reform of the welfare "system" would take at least 3 years to implement from the date of enactment.

In the meantime, during the intervening 4 years, what do we do? Do we stay with the present situation of 20 percent case errors in the supplemental security income program, 24 percent case error rates in AFDC, and possibly higher error rates in food stamps and medicaid? Do we continue for another 4 years or more the present welter of regulations and strains in Federal and State relations?

I believe a great deal can and should be done to improve the administration of existing AFDC welfare programs. For many years, HEW has had a program designed to lower welfare error rates and improve welfare administration. Unfortunately, this program, known as quality control, QC, was often unrealistically harsh, imposing impossible standards and threatening drastic reductions in the level of Federal contributions to State AFDC programs. Many of the States viewed the QC program as simply a public relations effort on the part of HEW to blame the States for welfare mismanagement instead of helping revise and improve the welfare system in a cooperative Federal-State partnership.

I believe, however, that a QC program is necessary. Many States did not begin to move to reduce welfare errors until the Federal Government threatened to reduce the Federal share of AFDC payments to the States.

In short, a QC program is necessary—but it must be better than the programs that the Department used prior to last summer. I believe that the outlines of an improved QC program have been developed, and I am today introducing legislation to codify and improve much of the QC program proposed for the AFDC program.

Many of the provisions of this bill

could be handled through the regulation process if the Secretary so chooses. In general, however, I favor the legislative approach so that the States will know for certain that Congress supports efforts to reduce, here and now, the level of errors in our Nation's major welfare program.

The legislation I am introducing, if implemented, would alleviate some of the local welfare costs through more efficient management of the program. It would improve the program nationwide by establishing a rational, planned program for error reduction. In the past, many States have found that the best way to reduce errors was to simplify their programs. Therefore, I believe that pressure to reduce errors can lead to significant program simplification and improvements which can save hundreds of millions of dollars between now and that uncertain day when welfare reform finally arrives.

The purpose of the bill is to clarify some provisions of the AFDC QC program which, up until this time, have been handled through HEW's regulatory process. At present, there is no real QC program in operation. In May 1976, a U.S. District Court in the District of Columbia struck down the financial penalties—fiscal sanctions—HEW had planned to apply to States that had AFDC error rates above certain limits. The Federal judge handing down the decision stated that HEW did have the right to impose financial penalties on the States for errors; however, the rates HEW set were clearly "arbitrary and capricious." I certainly agree with the judge's decision. As testimony before the Ways and Means Oversight Subcommittee last year brought out, HEW's own consultant who helped propose tolerance levels for errors stated that the error rates were not obtainable by all States—particularly the big urban States—under the present welfare system.

As a result of the court decision, HEW sought to develop a new QC program. From May 1976 through last fall, HEW and the New Coalition, a group of public officials representing various levels of State and local government, tried to hammer out a new agreement on QC that could satisfy both sides. Unfortunately, the issue concerning the application of fiscal penalties created an impasse. Basically, many local governments opposed any form of fiscal sanction, while HEW insisted that some form of "stick" was necessary to make the local governments improve their welfare administration.

In September 1976, the former HEW Assistant Secretary for Planning and Evaluation made an offer to the New Coalition that was not judged acceptable by that group. The major points of this offer, which is basically the legislation I am introducing, were:

First. That any sanction should be based on a dollar error rate rather than case error rates;

Second. That the sanction would be applied to States which after 2 years had not reached the median dollar error rates of the January through June 1976 period, and States in which error rates increased;

Third. That nondollar errors would not be counted; and

Fourth. That any proposed sanction could be appealed to the Secretary of HEW on the grounds of mitigating circumstances.

The HEW offer also provided that reviews of negative case actions—that is, those cases in which an applicant is either denied benefits or in case of an applicant receiving benefits, is improperly terminated—would be undertaken to protect beneficiaries.

The bill I am introducing includes many of the provisions in HEW's last offer to the New Coalition along with the financial penalties provision. My feeling is that although the New Coalition's argument against any fiscal sanctions on a State which is making a "good faith effort" to reduce errors has some merit, it would be very, very difficult to enforce. For example, how do we define what constitutes a good faith effort or what constitutes an acceptable plan? Any definition which HEW might come up with could and probably would be challenged in court, resulting in years of uncertainty.

My proposal fills the void left after the May 1976 decision which struck down the existing system of fiscal sanctions. Undoubtedly, many State administrators will not favor such a bill. However, I feel that it would be in the Federal Government's and the beneficiaries' best interest to enact such legislation to serve until President Carter's welfare reform program is passed and implemented—a process which could take 4 or 5 years.

There are major improvements which can be made in the existing welfare programs. They can be made incrementally and gradually, in the traditional American way. We do not have to remain idle on the issue for the next 4 or 5 years. We need not wait for a major reform program. We can begin now to save taxpayer dollars and insure that the right amount of benefits goes to those who are eligible and need the services provided by these welfare programs.

TRIBUTE TO ROBERT F. LARKIN, JR.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. BURKE) is recognized for 5 minutes.

Mr. BURKE of Massachusetts. Mr. Speaker, I would like to submit an article from the Boston Globe, concerning Mr. Robert F. Larkin, Jr., of Needham, Mass., who was elected to the Massachusetts House of Representatives in November. Needham, formerly in the 11th Congressional District, is a lovely town and entitled to the high caliber of service which Representative Larkin provides.

Bob is a former intern in my Washington office where he did an outstanding job. Now, at age 21, he is one of the youngest members of the Massachusetts House.

I am proud of young Representative Larkin and am sure that his is a promising career in public service. The Globe article follows:

TRIBUTE TO ROBERT F. LARKIN, JR.

Even for a Massachusetts politician, Robert Francis Larkin Jr. of Needham has trekked a remarkable distance in political miles, especially for someone 21 years old.

Larkin, a Democrat, won a seat in the state House of Representatives last week, upsetting a veteran Republican Needham selectman, E. Loretta Reynolds, in a race to replace retiring Rep. Gilbert W. Cox Jr. (R-Needham).

More than any of the seven GOP House seats vacated this year, Cox's was considered a sure bet to stay Republican.

Larkin, a senior in economics and political science at Boston College, pursued the "safe Republican" seat with all the finesse one would expect from a person who has been chasing votes and pulling political strings for eight years.

He had been preparing for the race in Needham for at least two years, identifying voters and laying groundwork. He decided to run against Cox about a year after he was elected to the Needham town meeting at the age of 18.

Reynolds, however, was not a contender for the seat until Cox decided to quit the Legislature this summer. Since she was a well known Republican in a Republican stronghold, her late entry was not considered to be a handicap.

Larkin, who still lives with his parents, has been a political achiever since the age of 13, when he was elected to the school government at St. Johns, a private school in McLean, Va.

By the summer of 1970, he had been appointed a page in the U.S. House of Representatives by Speaker of the House John McCormack. In the summer of 1971 he worked for Rep. David Pryor (now governor of Arkansas), doing research for a special committee investigating nursing homes.

Then came two internships in the Washington offices of Rep. James Burke (D-Milton). By 1972, Larkin had mastered the intricacies of getting a job on Capitol Hill, and was again appointed a House page, this time by Speaker of the House Carl Albert.

By then, Larkin's family which has its roots in Massachusetts, was living in Virginia. Larkin entered Boston College after graduating from McLean High (president of student government), and coincidentally, his father was reassigned to Massachusetts by the Department of Defense. The family settled in Needham.

Young Larkin immediately ran for town meeting, was elected, and led a successful campaign against the purchase of a $95,000 fire truck, contending that the old truck was good enough.

The fire truck affair did not endear him to the fire chief, but it did win many new taxpaying friends. It was then that he decided to run for the state House.

Taking a page from a famous Georgians campaign book, Larkin ran against the people in power.

"I personally visited about 4500 homes, and I told people the worst thing about the Massachusetts Legislature is the careless, cavalier attitude of the legislators who have been running things for the past couple of decades," said Larkin. "And I promised people that if they elected me, I'd be back at their door in a year's time so they could tell me how they think I'm doing."

Larkin decided to decline financial help from House Speaker Thomas McGee's Committee to Elect a Democratic House and raised about $3000 himself.

"I plan to just sit back and watch how things are done for a while," said Larkin.

"I'm not unfamiliar with the Legislature, I've worked as a legislative aide for Rep. Michael Connolly (D-Roslindale) but I'm not going to rush into things."

Judging from his responses to a questionnaire from the League of Women Voters before the election, Larkin is expected to be a moderate.

He is opposed to the death penalty and increasing use of nuclear power plants, supports mandatory sentences for violent crimes, and increasing funds for low-income housing.

Larkin, who must finish his last semester at Boston College by attending both early morning and evening classes, said he is thinking about becoming a professional politician.

Larkin is the nephew of Rep. Robert A. Vigneau (D-Burlington).

CLARIFYING THE UNIVERSAL VOTER REGISTRATION BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. THOMPSON) is recognized for 5 minutes.

Mr. THOMPSON. Mr. Speaker, last week there was a brief flurry of press attention given to an internal Justice Department memorandum that raised the spector of increased fraud in our elections if H.R. 5400—the Universal Voter Registration Bill—becomes law.

Today I would like to put to rest the confusion that has arisen as a result of that perhaps well-intentioned, but obviously ill-informed memorandum. In the first place, the author, by his own admission, had not seen a copy of H.R. 5400 at the time he wrote his memorandum. Second, I feel constrained to remind my colleagues that when we seek the views of an administration on an administration bill, we traditionally have sought a coordinated position enunciated at the highest possible level; not the individual views of bureaucrats. We can hardly come to rational judgments on the matters before us if we first must poll the individual views of every member of an executive branch department.

After the Justice Department released the internal memorandum in question to the Senate Rules Committee and the Committee on House Administration last week, Senator CANNON invited Attorney General Bell to provide supplementary testimony on S. 1072 the companion bill to H.R. 5400.

The Attorney General was kind enough to send me a copy of his response to Senator CANNON, and I submit it herewith for the RECORD and commend its contents to my colleagues:

WASHINGTON, D.C., *May 10, 1977.*

Hon. FRANK THOMPSON, JR.,
Chairman, House Administration Committee, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: On May 6, Chairman Cannon of the Senate Rules and Administration Committee wrote to invite me to provide supplementary testimony on behalf of the Department of Justice on S. 1072, the Universal Voter Registration Act of 1977. This bill is, of course, the Senate counterpart to H.R. 5400.

In response to Senator Cannon's letter, I have sent him and the members of his committee a memorandum addressing the remaining questions raised by his committee herewith. A copy of that memorandum is enclosed.

Best regards.

Sincerely,

GRIFFIN B. BELL,
Attorney General.

MEMORANDUM

MAY 10, 1977.

To: Committee on Rules and Administration, United States Senate.

From: Griffin B. Bell, Attorney General.

Subject: S. 1072—The Universal Voter Registration Act of 1977.

THE NEED FOR FEDERAL LEGISLATION

The need for action by Congress to remove barriers to voter participation has been explained in the President's March 22, 1977, message on election reform and in testimony already presented to the Committee. Since 1960, participation in Presidential elections has steadily declined. On November 2, 1976, between 60 and 70 million eligible Americans did not go to the polls. The available evidence indicated that the most significant reasons for this decline are citizen apathy and alienation from our political process. But the evidence also indicates that another major factor is the difficulty of voter registration in most states.

In a 1976 national survey by Peter D. Hart Research Associates, Inc., 21% of the nonvoters explained their lack of participation in past federal elections or in the forthcoming 1976 election by saying the registration rules make it difficult for people to register. Nineteen percent said that making it easier to register would be the one change most likely to cause them to vote in the future. Steven J. Rosenstone and Raymond E. Wolfinger of the University of California at Berkeley prepared a study of the effect of registration laws on voter turnout for the 1976 annual meeting of the American Political Science Association. They found that, "State registration laws reduced turnout in the 1972 presidential election by about ten percentage points. The impact of the laws was heaviest in the South and on less educated people of both races. If all states revised the restrictive aspects of their election codes to make them resemble the more permissive provisions found in some states, the result would be to increase the electorate by about 14 million voters." They also concluded that if every state had a registration deadline of one week before election day instead of the 20 or 30-day periods which are common, this change alone would increase national turnout by about 5 percent.

Variations of election day registration have been used effectively in five states. Minnesota and Wisconsin have systems similar to that in S. 1072 and they ranked first and fourth nationally in 1976 voter turnout. North Dakota has no formal registration and it ranked third. Maine and Oregon allow registration on election day though not at the polls. They ranked fifth and eleventh in 1976.

It seems clear that allowing eligible voters to register at the polls under the system proposed in the legislation now before the Committee will be an effective step toward encouraging greater participation in the democratic process. Certainly other steps have to be taken as well. Voter apathy and alienation will only be reduced if all public officials work to earn the respect of our citizens for this country's institutions of government. Such an effort will necessarily take time. But the structural change toward more open voter registration can be accomplished now by the enactment of S. 1072.

PREVENTION OF FRAUD

S. 1072 contains procedural safeguards against fraud and severe criminal penalties. It provides for criminal enforcement by the Department of Justice and for civil enforcement and administration by the Federal Election Commission. Its companion bill H.R. 5400, has been reported by the House Administration Committee with amendments that include tighter anti-fraud provisions. As Deputy Attorney General Flaherty and I have stated, it will be the policy of the Justice Department to pursue vigorous enforcement of criminal sanctions if this bill becomes law.

The bill includes criminal penalties of five years imprisonment and/or a $10,000 fine for first offenses and ten years imprisonment and/or a $25,000 fine for subsequent convictions. As amended by the House committee, it also provides for civil penalties of up to $5,000 to be sought by the FEC. The FEC is also given authority to seek other civil remedies to prevent fraud and otherwise enforce the law.

The legislation provides for states to require election day registrants to prove their identity and place of residence by approved forms of identification or by the affidavit of a registered voter. This kind of proof is not usually required now under systems of preregistration, including the registration by mail which is used in many states. Under the House amendments, a registered voter could not vouch for the identity and residence of more than five other persons and he would have to be pre-registered at the precinct involved.

The bill also provides for states to require election day registrants to sign an affidavit attesting to their qualifications to vote under the laws of the state. The House committee amendments make such affidavits mandatory and require that they include specific statements as to citizenship and the fact that the registrant has not already voted in the election. The affidavit would list all the qualifications for voting in the state and would contain a warning of the criminal penalties for giving false information. These are, in our judgment, improvements which we commend to the Senate's consideration.

The House committee amendments also require states to audit at least 5 percent of election day registrations and they expand the investigative and civil enforcement powers of the FEC.

In the 1976 Presidential election, over 450,000 voters in Minnesota and 210,000 in Wisconsin registered at the polls on election day. At the same time, about 300,000 North Dakotans voted without registering and numerous citizens in Maine and Oregon registered on election day. No substantial indications of fraud developed.

Some of the fraud which does occur in this country is made possible by inaccurate and outdated registration records. The federal funds available to state and local governments under S. 1072 for modernized election records and better training can be effective in reducing the potential for stolen elections.

The Department of Justice has found that most significant election fraud cases involve election officials. Over the last five years, all 8 of the indictments issued in the Southern District of Texas were against public officials. The same was true of 25 out of 26 indictments in the Eastern District of Louisiana and of 9 out of 10 in the Southern District of West Virginia. In the Northern District of Illinois, 66 out of the 81 indictments were against judges of election and another 10 were against party officials working with them. Of the 125 indictments, 96 convictions resulted. Most of the other cases involved dismissals based on mitigating circumstances. All of this fraud occurred under requirements that voters register prior to election day.

While the illegal casting of ballots, dishonest reporting of results, and other such acts by poll officials and party workers are the most prevalent forms of election fraud, the use of outside individuals to cast ballots under assumed names in various precincts is also not an unknown practice. Pro-

viding false identification and convincing individuals to sign affidavits bearing warnings of stiff criminal penalties would be very difficult to accomplish on a large scale. If poll officials are honest and properly trained, the danger of illegal activity would seem to be minimal. If poll officials are not honest, the danger of corruption will exist regardless of the system of registration which is used.

S. 1072 AND THE VOTING RIGHTS ACT

Under Section 5 of the Voting Rights Act, 42 U.S.C. 1973c (1975 Supp.), covered states and political subdivisions may not effect a change in their voting laws until a federal pre-clearance process has been followed. The alternative used most widely is submission of a change to the Attorney General. The change may be implemented unless, within 60 days, the Attorney General objects to it. The issue, under Section 5, is whether the purpose of effect of the change is racially discriminatory or in violation of the rights of language-minority groups. Contrary to an amendment adopted in the House Administration Committee, we believe that Section 5 should apply to changes made in voting laws in order to comply with S. 1072.

We do not anticipate difficulty in performing this responsibility. The thrust of S. 1072 is toward more open and equal opportunities for voting and is very much in the spirit of the Voting Rights Act. State plans for voter outreach programs would probably be the one result of the legislation requiring the closest scrutiny by the Civil Rights Division. We would expect to cooperate closely with the Federal Election Commission in expediting the review process under Section 5.

POSITION OF THE JUSTICE DEPARTMENT ON S. 1072 AND H.R. 5400

As Deputy Attorney General Flaherty and I have testified before your Committee and the Committee on House Administration, the Department of Justice strongly supports the Universal Voter Registration Act of 1977. We believe that it will help to solve a major problem in our democratic system while also providing safeguards against fraud and irregularities.

While Deputy Attorney General Flaherty did not have an opportunity to review the Criminal Division memorandum of April 1, 1977 prior to his testimony, let me assure you that I reviewed and considered that memorandum in preparation for testifying before the House Administration Committee.

To summarize what I said before the House Administration Committee in testifying on H.R. 5400 on April 6, I feel that no system of voting which is directly open to full and equal participation can be completely foolproof against fraud. Fraud occurs under the present system and some fraud will undoubtedly take place under the Universal Voter Registration Act as well. The question we have to address is where to strike the balance between protecting the system on the one hand and making it open to equal participation on the other. The Administration bill reflects the belief that declining voter participation is a very serious national problem which calls for immediate attention. S. 1072 contains strong safeguards and the amendments in the House referred to earlier provide additional safeguards. Thus, I believe we can safely take this positive step to extend equally to all Americans the right and opportunity to vote.

Nonetheless, Mr. Chairman, I appreciate the opportunity to review and state more fully the views of the Department of Justice in this matter. After careful review by the Criminal and Civil Rights Divisions and the Office of Legal Counsel, I can assure you that the views stated herein are the considered views of the Department of Justice.

SOCIAL SECURITY WAGE BASE INCREASE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

Mr. BEDELL. Mr. Speaker, the President has made his recommendations for insuring the financial soundness of the social security system. My colleague, Mr. WHALEN and I, however, believe there is a better approach to the problem and we have today introduced a bill incorporating this approach.

We believe that the best solution to social security's short-range deficit problem is to raise the wage base on which social security taxes are computed. This is not a radical idea.

When social security first came into existence, 95 percent of covered workers and their employers contributed into the fund on all wages paid. Today this has shrunk to about 85 percent. By gradually bringing the wage base for contributions up to where it originally was, we can meet the present emergency without doing damage to the system.

The legislation we are today introducing would adjust the wage ceiling upward over a 3-year period. The current wage limit is $16,500. Our bill would raise it to $20,000 for 1978, $25,000 for 1979, and $30,000 for 1980. By doing this, the Congressional Research Service estimates that income and outgo for the cash benefits program might be approximately equal if all the additional income from the tax base increase goes to the cash benefits program with the hospital program getting no increased income. In other words, our plan would bring the short-term deficit under control.

There are two parts of the President's plan that strike me as particularly worrisome and I feel that our proposal avoids these. The first is that the President wants to fund the deficit through general revenues. This would change the very nature of social security, turning it into a welfare program rather than an insurance program, the way it is now. The President says that this use of general revenues would only be temporary. Yet if we went through another recession such as the one we have just had, the $14 billion cushion the President would create from general revenues would be used up in about 3 months. I feel that additional borrowing would be requested and once the precedent had been established for using general revenues, it would be easier in the future to continue dipping into the Treasury with different rationales.

The second part of the President's plan that troubles me is his proposal to remove the wage base ceiling for employers. Under his plan, all employers would pay the current payroll tax rate on 100 percent of all salaries. The President would have us believe that businesses would bear this burden without passing it on to the employee and the consumer. I am afraid that these people would ultimately wind up paying even more for social security than the regressive taxes they do now.

I hope, Mr. Speaker, that our plan will receive detailed consideration from this Congress and that we can give our senior citizens—as well as prospective retirees—some assurance that the social security system will be brought under control.

THE BREACH OF THE HELSINKI AGREEMENT BY THE SOVIET UNION

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. BADILLO) is recognized for 5 minutes.

Mr. BADILLO. Mr. Speaker, it is a sad necessity to join with my colleague and friend, Representative DRINAN, to address the continued breach of the Helsinki Agreement by the Soviet Union. For nearly a year, the 35 signatories to the agreement have been bound by a document which declared their mutual "respect for human rights and fundamental freedoms." At that time Leonid Brezhnev himself urged that this agreement be made a "law of international life not to be breached by anyone."

Those accords state that the fundamental human rights will be respected without regard to race, sex, language, or religion. They stress that, in the emigration process, emphasis is to be placed on the reunification of families. They emphasize that travel should be permitted and broadened, and that there should be a broader dissemination of information. And the Soviet Union signed and pledged their cooperation to those principles.

And yet, they continue to violate those rules, and thousands of Jews, and other people who have spoken out, languish in prisons and mental hospitals and camps, under an almost whimsical policy that enables each person to be punished differently, and without any apparent rhyme or reason. Perhaps the best way to describe this is to talk about the prisoner that I have "adopted" through the New York Council on Soviet Jewry:

Alexandr Slinin is a 21-year-old student from Kharkov. After submitting an application for a visa to emigrate to Israel, he was expelled from Kharkov University, and summoned to his local military registration board. Slinin refused to serve in the Soviet Army, knowing that his departure to Israel would be delayed by 7 years. He was sentenced to prison in 1974 for 3 years. Last year, I learned that because literature printed in Yiddish had been found in his cell, he was transferred to a mental hospital. I have heard nothing of him since.

Alexandr Slinin's sentence will be up in June of this year. I stand here this afternoon to let the Soviet authorities, both here and in Moscow, know that I, and now my colleagues in the Congress as well, are aware that the time has come for this young man to regain his freedom and to be allowed to emigrate. If the Soviet Union is at all serious about the Helsinki accords if, indeed, they wish to come to the September meeting on the agreement with a better record than they have shown up until now, then they must begin immediately to end the very visible abuses that continue to occur, and in fact, increase.

The freedom of Alexandr Slinin is a

checkpoint for me. I shall make formal representations to our State Department and to the Embassy of the Soviet Union to ascertain his status. But he is only one, and between now and August, we must demand a flood of releases, and of permissions to emigrate. If we do not see that, I fear the noble principles embodied in the Helsinki Agreement will be torn asunder.

QUESTIONS TO ASK WHEN REVIEWING ARMS SALES

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, in Ruth Sivard's "World Military and Social Expenditures, 1977," she indicates that between 1961 and 1975 the United States has exported $40.9 billion worth of arms, followed, in order of rank, by the Soviet Union, $26.5 billion; France, $3.8 billion; the United Kingdom, $3.2 billion; China, $2.3 billion; West Germany, $1.8 billion; Czechoslovakia, $1.7 billion; Poland, $1.6 billion; Canada, $1.5 billion; and all other major arms exporters, $5.0 billion. Thus in 15 years the major arms exporting states have sold $88.3 billion worth of arms.

It is far from clear that all of these shipments were in the best interests of either the exporting or recipient states and societies. At the present time, the U.S. Government has back orders in the pipeline of almost $32 billion worth of arms orders from other governments. These were commitments made by previous administrations who seemed less concerned than the Carter administration about the possible negative impacts of such arms around the world. Now these back orders are undergoing a review by the Carter administration, as well they should.

I would recommend to any analyst or decisionmaker in either the executive branch or the Congress the following list of questions prepared by Barry R. Schneider, the arms control and military consultant for Members of Congress for Peace Through Law. His paper, entitled "Arms Sales and Arms Grants, Questions and Criteria," provides a checklist of questions that ought to be asked by officials considering whether to approve or disapprove specific arms transfers from the United States to other states. The list is meant to be suggestive and not necessarily exhaustive. It may be of value and interest to our colleagues and others concerned about curbing this wasteful and dangerous traffic in instruments of death and destruction.

Dr. Schneider's checklist follows these remarks:

ARMS SALES AND ARMS GRANTS—QUESTIONS AND CRITERIA

A checklist of questions to be asked by officials considering whether to approve or disapprove specific arms transfers from the United States to other states.

1. Will this arms transfer aid in the direct or indirect defense of the United States in times of conflict or crisis? How, why, or why not?

2. Is this the first time this kind of technology has been introduced into the region? And is this transaction likely to spur or hinder a regional arms race? To what degree?

3. Will this arms transfer increase the number of U.S. technicians and dependents living in the client state? How many and for how long? Does this constitute an involvement that has a high probability of leading to U.S. entanglement in a regional conflict?

4. Is this arms transfer a way of keeping the client state from manufacturing its own nuclear weapons? Has the client expressed this intention or does the client have this capability? Assess the nuclear proliferation ramifications of this arms transfer.

5. What is the overall arms control impact of this arms transfer? Will it thwart or facilitate an arms control negotiation—now or in the near future? Does it stay within the limits set by previous agreements? Does it make future agreements and verification much more difficult?

6. What controls prevent or make illegal these arms from being used against another country, either a neutral, a U.S. ally, or the United States itself? Assess the probability of this occurring.

7. What quid pro quo does the United States get from this arms transfer? Economic? Military? Political? Other? Is it worth what is given? By what criteria?

8. Will the arms transfer give the United States more or less political leverage in the future within the client state? Explain.

9. Will the arms transfer hinder good or better relations with other states?

10. If the U.S. did not sell the requested arms, would or could they be obtained from another national source? If so, how likely is that? If so, what is gained from refusing to grant the arms transaction?

11. Would the arms transfer hinder any serious effort to limit or coordinate overall arms transfers with other arms exporting states? If so, what are the tradeoffs between pursuing this policy rather than a common policy?

12. How does the arms transfer affect U.S. military forces? Will this draw equipment and supplies needed by U.S. forces? Does it decrease the readiness of U.S. forces or allied forces—or does it increase readiness? Will it slow the delivery of the arms to U.S. forces? Will it reduce or increase the cost of the arms to U.S. forces? Will it keep a U.S. production line open and "warm"?

13. Is the recipient an ally? And does the recipient need such assistance to assist the U.S. in its defensive role?

14. Does this arms transfer involve the newest and most sophisticated new U.S. technology? If so, should this be let out of U.S. hands for security reasons? How likely is this equipment to find its way to the Soviets and other potential adversaries if the deal is made? Does this transfer threaten vital U.S. military secrets?

15. Does the arms transfer significantly aid the U.S. balance of payments and balance of trade with other countries? And if so, does this outweight the arms control, security, and political implications of the sale?

16. What is the likely response to this arms transfer by the Soviets and other potential rival states? Is it likely to increase the chances for a matching or overmatching response to the adversaries of the client?

17. What are the human rights implications of this arms transfer? Will these weapons be used for internal suppression of civil liberties and democratic opposition groups? Will such arms infusions put military juntas and dictators more firmly in power?

18. Does the arms transfer drain very scarce resources away from needed economic development projects in the client state? If so, would the client government simply buy the desired military equipment from other sources if denied it by the U.S.? Or does the arms transfer in some way also encourage the economic modernization of the client state as well? Are the skills acquired in using the new arms also transferable to other economic pursuits?

19. Whose idea was this arms transfer? Was it initiated by the efforts of of U.S. weapons industries? Or did it evolve from the genuine needs of the U.S. and the client state? At what level was the sale consumated and why? Have bribery and strictly private profits driven the transaction?

20. Is there any reason why this arms transfer should occur right now? Or should the transaction be delayed pending more information and analysis? What are the advantages and disadvantages of delay? Of immeditate action? And can the arms transfer be cancelled at a later date if that is in the best interest of the U.S.?

21. Does this arms transaction square with U.S. and international law? With all U.S. treaties and executive agreements? And how does the sale or grant affect the moral leadership of the U.S. in the world? What kind of example does it set for others? And how powerful is that example likely to be if we desist?

22. What impact does this sale have on the security of other U.S. allies? On other non-aligned states? And what controls does the U.S. retain over the arms to prevent their being misused against other states?

23. Is the recipient state at peace or at war? Is the U.S. arming both sides of a potential conflict? If so, will this make the future conflict more violent with more damage done to both societies? What other steps is the U.S. taking to prevent such a conflict from erupting other than arms transfers? And how do these arms transfers facilitate or hinder such peace efforts?

24. Does the arms sale or grant increase the possibility of the client developing its own arms industry producing the same kind of arms as those transferred? Is this healthy or a setback to the United States? Will the arms transfer help produce an arms exporting rivalry with the client state? Will it resell or transfer the weapons to third parties? How would this affect U.S. interests?

25. Are these arms transfers necessary "sweeteners" in an overall peace negotiation being carried on by the United States? If so, how necessary?

26. Will this arms transfer meet with the approval of the U.S. Congress and of the U.S. public? If not, should the arms transfer negotiations be terminated before the client state develops a powerful commitment to securing the sale or grant? (A commitment that might lead to retaliation should the client be turned down by the Congress.) Has the Congress been given adequate lead time to consider the arms transfer prior to its developing a momentum of its own?

27. Having answered all of the above questions, is it in the best interests of the United States to approve or to disapprove the arms transfer in question? What are the pros and cons of such an action? What alternative policies would accomplish the same aim? What are their advantages and disadvantages? And which alternative best serves the interests of the United States? By what criteria do you choose? Economic, Military, Political or legal/ethical?

WORLD MILITARY AND SOCIAL EXPENDITURES IN 1976

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, and Members of the House, it is my pleasure to introduce into the RECORD a summary of the material in Ruth Leger Sivard's annual report "World Military and Social Expenditures, 1977."

Mrs. Sivard is an economist who has

long Government experience in the U.S. Arms Control and Disarmament Agency. Since she left the Agency 4 years ago, she has continued her fine work highlighting the misplaced priorities that the world's governments have with respect to military and social expenditures. She points out that in 1976 over $350 billion was spent yearly worldwide on military budgets; this in a world that is too poor, too illiterate, too hungry, ill-housed, in too poor health, and generally lacking in adequate social well-being.

As the president of the MCPL Education Fund, one of the six sponsoring organizations which have donated to Ruth Sivard's work, I take particular pride in seeing that Members of Congress, their staffs, and those who read the CONGRESSIONAL RECORD have ready access to her report. The Members of Congress for Peace through Law Education Fund, along with the Arms Control Association, the Institute for World Order, the Rockefeller Foundation, and the Canadian Peace Research Institute have contributed financial support to "World Military and Social Expenditures, 1977"—WMSE Publications, Box 1003, Leesburg, Va. 22075.

Ruth Sivard reports that military spending went up $50 billion in just the past year, from $300 billion to $350 billion, a mere 5 percent of that amount, $17.5 billion—could correct much of the world's social deficit. With such an amount we could:

First, run a vaccination program that would give protection against infectious diseases to all infants worldwide—$600 million.

Second, run an education program that could extend literacy to all adults by the end of the century—$1.2 billion.

Third, sponsor a preventive and community-oriented training program for a sharp increase in the numbers of medical auxiliaries—$250 million.

Fourth, increase development aid to improve the capacity of the third world to grow its own food and prevent malnutrition—$3 billion.

Fifth, expand a minimum-shelter program, incorporating self-help construction, for the urban poor—$750 million.

Sixth, initiate a supplementary feeding program to insure full development for 200 million malnourished children—$4 billion.

Seven, initiate a program of supplementary feeding for 60 million malnourished pregnant and lactating women to protect their health and reduce infant mortality—$1.5 billion.

Eight, sponsor a major increase in the number of elementary schools worldwide with the addition of 100 million new student places—$3.2 billion.

Ninth, invest in hygenic water supply systems, toward the goal of clean water for all humanity by 1990—$3 billion.

I hope all Members of Congress will take the time to read World Military and Social Expenditures 1977 in its entirety. Copies will be sent to each Member's office.

The summary and priorities sections of Mrs. Sivard's report, and an article about it from the May 9, 1977, edition of the Christian Science Monitor, follow these remarks:

WORLD MILITARY AND SOCIAL EXPENDITURES 1977

(By Ruth Leger Sivard)

SUMMARY

The arms race has become a stampede as the buying fever for newer, more powerful weapons spreads to all parts of the globe. World military spending tops $350 billion yearly. A huge backlog of orders for arms is two to three times the size of present deliveries.

Economic progress is affected on a broad front. The large diversion of resources to nonproductive use impedes growth, fuels inflation, contributes to unemployment, and squanders resources in short supply. The economic burden is exceeded only by the looming threat to world survival. A growing, diffuse stockpile of weapons carries infinitely more potential for catastrophe on a global scale than in any previous period in history.

In the face of faltering economies and socially explosive needs throughout the world, the race for security through arms has an alarming air of unreality. The weapons and strategies elaborated by governments for "defense" are largely irrelevant to the underlying dangers and instabilities of today.

Between the war-oriented and people-oriented, and between the poorer and richer, parts of the world, the gulfs are wider than ever. A poverty of resources for human needs contrasts with the affluence under which military programs operate. The threats that touch people in their daily lives—joblessness, crime, illness, hunger—rank lower in the scale of government priorities than preparations for war. Throughout the world, the poor, the ill-fed, ill-housed, ill-educated steadily increase in numbers. The danger as well as the size of the social deficit grow with neglect.

PRIORITIES 1977

The United States and Soviet Union, first in military power, rank 18th and 33rd among all nations in their infant mortality rates.

The world's military budget equals the annual income of 1,800,000,000 people in the thirty-six poorest nations.

Through public budgets, the world community carries more insurance against deliberate military attack than against illness, disease, and all natural disasters.

The megatonnage of the world's nuclear arsenal, which is still increasing, is now several million times the explosive force of the bomb that destroyed Hiroshima in 1945.

At present levels of military spending, the average person can expect over his lifetime to give up three to four years' income to the arms race.

The world's budget for military research is more than six times the size of its budget for energy research.

The developed nations spend 20 times more for their military programs than for economic assistance to the poorer countries.

The developing nations import arms at a rate of more than $6 billion a year.

In the developing world, 1,400,000,000 people have no safe drinking water, 520,000,000 suffer from malnutrition.

In two days the world spends on arms the equivalent of a year's budget for the United Nations and its specialized agencies.

Military and space research together get more public research funds than all social needs combined.

The cost of one Trident submarine equals the cost of a year's schooling for 16,000,000 children in developing countries.

WORLD-AT-PEACE ARMS COST—$350 BILLION AND GROWING

(By John Dillin)

WASHINGTON.—The world is mostly at peace—but military spending keeps rising.

A new study finds that the world's growing affinity for military muscle cost taxpayers around the globe an "unpredecented' peacetime budget of $350 billion in 1976.

The United States and the Soviet Union—traditional big military spenders—together accounted for some $200 billion of that, or better than half the entire world's spending for weapons, manpower, and arms research.

The study, "World Military and Social Expenditures, 1977," was compiled by Ruth Leger Sivard, former chief economist for the U.S. Arms Control and Disarmament Agency. The study is issued annually and includes the People's Republic of China.

Arms budgets, the report observes, are rising on every continent, with growth especially rapid in developing countries.

One bright spot: Military spending, which took 7 cents out of every dollar of the combined gross national products of the world in 1960, today takes only a nickel out of every dollar. World economies, apparently are growing faster than military spending.

Several organizations sponsored this latest report, including the Rockefeller Foundation, the Arms Control Association, the Institute for World Order, and the Members of Congress for Peace Through Law Education Fund. The Canadian Peace Research Institute-Dundas also shared the costs.

In a foreward, Robert S. McNamara, president of the World Bank and former secretary of defense, warns that excessive military spending can erode security. As military costs grow they can fuel an arms race and drain away vitally needed resources so desperately needed in developing countries.

Mrs. Sivard points to a number of trends in military spending which may bear watching:

Total military costs have continued to grow in spite of brief slowdowns in 1964 and again in 1970–71.

In advanced countries, which include those of North America and Europe, Japan, and the Soviet Union, total military spending has approximately doubled since 1960 in real terms.

In developing countries, which include most of those in South America, Africa, and Asia, military spending during the same period has tripled.

Approximately one-fourth of the developing nations have acquired the ability to assemble various kinds of major weapons systems.

All of these developments have greatly increased the world's war-fighting ability. Total military might, currently includes 22 million regular military personnel, 10 million paramilitary troops, and 25 to 30 million civilians in military-related jobs.

The worldwide arsenal contains 124,000 tanks, 12,400 combat ships, 35,000 combat aircraft, and nuclear weapons with a combined explosive power of 50 billion tons of TNT—or 12 tons for every person on earth. A single nuclear bomb today can deliver a wallop of 25 million tons of TNT. By comparison, a World War II "blockbuster" totaled 10 tons.

Worldwide spending for military research and development has reached $25 billion, and weapons procurement has climbed to $80 billion out of the total $350 billion budget, Mrs. Sivard reports.

Those figures, in fact, appear to be extremely conservative, according to Pentagon specialists.

Research and development spending, for instance, is estimated by U.S. intelligence to be $22 billion a year in the Soviet Union. The United States adds another 11.2 billion to research, if one includes testing and evaluation programs.

Mrs. Sivard also notes that "half a million scientists and engineers throughout the world" are engaged in military research. Pentagon sources say that if one includes those engineers working in U.S. industry, the research and development personnel total for the United States alone rises to more than 500,000. In addition, the Soviets are believed to have as many as 800,000 engineers engaged in various phases of military research.

One encouraging change in emphasis, how-

ever, can be noted in the statistical tables accompanying Mrs. Sivard's study.

In 1960, the world had some 18.5 million men and women in uniform. At the same time, there were 14.6 million teachers. The latest count shows an increase to 22 million soldiers, sailors, and airmen, but an ever larger increase—to 26.2 million in the number of teachers.

THE TURKISH AMBASSADOR REPLIES ON CYPRUS: A DIFFERENCE OF OPINION

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, on April 20 of this year I made a statement, which appeared in the RECORD on page 11470, and I believe it to be correct, concerning the Cyprus situation and President Carter's endorsement of the controversial military bases agreement negotiated with Turkey last year by former Secretary of State Kissinger. The Honorable Melih Esenbel, Ambassador of Turkey, took exception to my comments and asked that I insert his response into the RECORD, which in all fairness I am pleased to do.

In rereading my statement of April 20, I find there are no errors that I am aware of, nor would I wish to repudiate anything I said.

But the most important thing, of course, is the current state of affairs in Cyprus, where the 18 percent Turk-Cypriot minority holds 40 percent of the land and there are 200,000 Greek-Cypriot refugees. I would hope peace and justice would prevail there and both sides would sit down to work out their differences, but in the mean time I could not vote for arms for Turkey while they occupy Cyprus.

The letter to me from Ambassador Esenbel follows:

TURKISH EMBASSY,
Washington, D.C., April 28, 1977.

Hon. EDWARD I. KOCH,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. KOCH: Taking the opportunity of the interest you have shown by inserting a statement in the Congressional Record (April 20) relating to the Athens Junta-Cyprus-Turkey and United States, I feel obliged to bring the following to your attention:

The Athens Junta did indeed succeed in seizing Cyprus, and annexing it to Greece by declaring a "Hellenic Republic of Cyprus" and thereby totally destroying the independence of that Republic, "until" Turkey intervened using its rights and obligations arising from international Treaties deposited with the United Nations. Takeover of the Island failed and Democracy Returned to Greece because, and as a result of, the Treaty based lawful action of Turkey.

As you will see in the attached documents Turkey is a fully functioning Democracy in complete adherence to human rights. The embargo, unprecedented in the history of Alliances, has nothing to do with the human rights issue. Indeed it has been counter-productive in the Turkish-American relations and created numerous complications in Turkish-Greek relations contributing appreciably to the present disturbed atmosphere in the Eastern Mediterranean.

Allegations of expansionism on the part of Turkey is totally unwarranted and utterly misinformed. History shows that since 1821 (Greek independence) Athens has continuously pushed the expansion of its territory at the expense of Turkey; in 1920 by invading Western Anatolia ending with a debacle for Greece; in 1947 by acquisition of the Dodecanese Islands in the Aegean and between 1964–1974 by determined tactics all aiming at annexation of Cyprus. The only war Turkey has fought since the founding of the new Republic was to stop the communist expansionism in Korea.

My country entertains excellent relations with several other totally different regimes all neighboring her except for the only democracy she shares common borders with; and for reasons never of Turkey's making. It is Greece which claims the whole of the Aegean continental shelf, it is again Greece that manipulates a technical traffic control responsibility over the Aegean air space as a right of sovereignty and closes it to all international aviation. I should add to these the militarization of Aegean Islands by Greece with U.S. supplied weapons in contravention of two international treaties.

Selective and punitive outside pressures irrelevant to the real issues involved, have not solved problems, Mr. Congressman, not in the case of Turkey at least.

I trust and address your fairness and hope that you will respond in an even-handed manner by bringing this letter to the attention of the members of the Congress through its insertion in the Record.

Sincerely,

MELIH ESENBEL,
Ambassador of Turkey.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. KETCHUM (at the request of Mr. RHODES), for May 13, 1977, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. CORCORAN of Illinois) to revise and extend their remarks and include extraneous material:)

Mr. CLEVELAND, for 5 minutes, today.
Mr. KEMP, for 15 minutes, today.
Mr. WHALEN, for 5 minutes, today.

(The following Members (at the request of Mr. JENRETTE) to revise and extend their remarks and include extraneous matter:)

Mr. KOCH, for 10 minutes, today.
Mr. BINGHAM, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. AKAKA, for 5 minutes, today.
Mr. VANIK, for 5 minutes, today.
Mr. BURKE of Massachusetts, for 5 minutes, today.
Mr. THOMPSON, for 5 minutes, today.
Mr. BEDELL, for 5 minutes, today.
Mr. BADILLO, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. CORCORAN of Illinois) and to include extraneous matter:)

Mr. GRADISON.
Mr. ASHBROOK in three instances.
Mr. ABDNOR.
Mr. DUNCAN of Tennessee.
Mr. KELLY.
Mr. DERWINSKI in two instances.
Mr. LAGOMARSINO in two instances.
Mr. WALKER.
Mr. ARMSTRONG in two instances.
Mr. KEMP.
Mr. GILMAN.
Mr. MCCLOSKEY.

(The following Members (at the request of Mr. JENRETTE) and to include extraneous matter:)

Mr. STARK.
Mr. PEPPER.
Mr. FORD of Michigan.
Mr. MURTHA in two instances.
Mr. RUSSO.
Mr. EILBERG in three instances.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. MOAKLEY.
Mr. JOHNSON of California.
Mr. ROE in two instances.
Mr. PATTERSON of California in five instances.
Mr. WAXMAN in two instances.
Mr. FOWLER.
Mr. MCCORMACK in two instances.
Mr. MCHUGH.
Mr. VANIK.
Ms. OAKAR.
Mr. SIMON in three instances.
Mr. MARKEY in 10 instances.
Mr. TEAGUE in two instances.
Mr. RICHMOND.
Mr. FISHER.
Mr. CLAY in two instances.
Mr. FRASER.
Mr. DE LA GARZA.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1468. An act to amend the Energy Supply and Environmental Coordination Act of 1974; to the Committee on Interstate and Foreign Commerce.

ADJOURNMENT

Mr. JENRETTE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 15 minutes p.m.), the House adjourned until tomorrow, Friday, May 13, 1977, at 11 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1482. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Greece (Transmittal No. 77–37), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

1483. A letter from the Chairman, Administrative Conference of the United States, transmitting a draft of proposed legislation to amend the Administrative Conference Act

to authorize appropriations for the fiscal year ending September 30, 1979; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. CLAY: Committee on Post Office and Civil Service. H.R. 10. A bill to restore to Federal civilian and Postal Service employees their rights to participate voluntarily, as private citizens, in the political processes of the Nation, to protect such employees from improper political solicitations, and for other purposes; with amendment (Rept. No. 95–292). Referred to the Committee of the Whole House on the State of the Union.

Mr. FOLEY: Committee on Agriculture. S. 955. An act to amend the Federal Crop Insurance Act (Rept. No. 95–293). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 6161. A bill to amend the Clean Air Act, and for other purposes; with amendment (Rept. No. 95–294). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 2501. A bill to provide for the amendment of the public survey records to eliminate a conflict between the official cadastral survey and a private survey of the so-called Wold Tract within the Medicine Bow National Forest, Wyoming; with amendment (Rept. No. 95–295). Referred to the Committee of the Whole House on the State of the Union.

Mr. HARRINGTON: Committee on International Relations. H.R. 6967. A bill to authorize appropriations for the Peace Corps for fiscal year 1978 (Rept. No. 95–296). Referred to the Committee of the Whole House on the State of the Union.

Mr. MURPHY of New York: Committee on Merchant Marine and Fisheries. H.R. 3849. A bill to establish qualifications for individuals appointed to the National Advisory Committee on Oceans and Atmosphere and to authorize appropriations for the committee for fiscal year 1978; with amendment (Rept. No. 95–297). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 5742. A bill to amend the Controlled Substances Act to extend for 3 fiscal years the authorization of appropriations under that act for the expenses of the Department of Justice in carrying out that act (Rept. No. 95–298). Referred to the Committee of the Whole House on the State of the Union.

Mr. JOHNSON of California: Committee on Public Works and Transportation. House Resolution 322. Resolution to study the feasibility of installing solar energy equipment in the House office buildings; with amendment (Rept. No. 95–299). Referred to the House Calendar.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 5885. A bill authorizing additional appropriations for prosecution of projects in certain comprehensive river basin plans for flood control, navigation, and for other purposes; with amendment (Rept. No. 95–300). Referred to the Committee of the Whole House on the State of the Union.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 6010. A bill to amend title XIII of the Federal Aviation Act of 1958 to expand the types of risks which the Secretary of Transportation may insure or reinsure, and for other purposes; with amendment (Rept. No. 95–301). Referred to the Committee of the Whole House on the State of the Union.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 6197. A bill to amend the Disaster Relief Act of 1974 to provide for authorization of appropriations thereunder through fiscal year 1978; with amendment (Rept. No. 95–302). Referred to the Committee of the Whole House on the State of the Union.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 6401. A bill to authorize appropriations for the administration of the Deepwater Port Act of 1974, with amendment (Rept. No. 95–303 pt. I). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ABDNOR (for himself, Mr. BADILLO, Mr. BAUCUS, Mr. CORNWELL, Mr. GOODLING, Mr. JEFFORDS, Mr. KEMP, Mr. MONTGOMERY, Mr. PANETTA, and Mr. SKUBITZ):

H.R. 7127. A bill to amend the Internal Revenue Code of 1954 to deny tax exemption to any otherwise tax-exempt organization which invests in farm real property; to the Committee on Ways and Means.

By Mr. AKAKA:

H.R. 7128. A bill to amend title I of the Omnibus Crime Control and Safe Streets Act of 1968 to authorize programs for the provision of escort services to the elderly in high crime areas, and for other purposes; to the Committee on the Judiciary.

By Mr. ARCHER:

H.R. 7129. A bill to amend the Internal Revenue Code of 1954 to provide a limited exclusion of capital gains realized by taxpayers other than corporations on securities; to the Committee on Ways and Means.

By Mr. ARMSTRONG:

H.R. 7130. A bill to amend the Walsh-Healey Act to permit employment for not in excess of 10 hours in any 1 day or 4 days in any 1 week; to the Committee on Education and Labor.

By Mr. BIAGGI:

H.R. 7131. A bill to amend title XIX of the Social Security Act to provide that an individual who is unable to care for his or her personal needs without assistance shall be eligible as a disabled person (even though employable) for the services of a home health aide under the applicable State plan approved under such title; to the Committee on Interstate and Foreign Commerce.

By Mr. CLAY:

H.R. 7132. A bill to establish an arbitration board to settle disputes between organizations of supervisors and other managerial personnel and the U.S. Postal Service; to the Committee on Post Office and Civil Service.

By Mr. DERRICK (for himself, Mr. AUCOIN, Mr. SCHULZE, Mr. LAGOMARSINO, Ms. HOLTZMAN, Mr. KREBS, Mr. DERWINSKI, Mr. HALL, Mr. LAFALCE, Mr. HANNAFORD, Mr. EILBERG, Mr. COHEN, and Mr. BADILLO):

H.R. 7133. A bill to prohibit the appropriation and expenditure of unvouchered funds (except in the case of intelligence agencies) unless specifically authorized by law, and to provide for reports on and audits of authorized expenditures of unvouchered funds; jointly, to the Committees on Government Operations and Rules.

By Mr. FINDLEY (for himself and Mr. MCCLORY):

H.R. 7134. A bill to authorize the construction of a replacement lock and dam for locks and dam 26, Mississippi River, Alton, Ill., and for other purposes; to the Committee on Public Works and Transportation.

By Mr. FLYNT:

H.R. 7135. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to grant additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. GILMAN:

H.R. 7136. A bill to amend the Internal Revenue Code of 1954 to allow certain low- and middle-income individuals a refundable tax credit for a certain portion of the property taxes paid by them on their principal residences or of the rent they pay for their principal residences; to the Committee on Ways and Means.

By Mr. HARSHA:

H.R. 7137. A bill to amend the Internal Revenue Code of 1954 to exempt certain agricultural aircraft from the aircraft use tax, to provide for the refund of the gasoline tax to the agricultural aircraft operator, and for other purposes; to the Committee on Ways and Means.

By Mr. JONES of Oklahoma (for himself and Mr. KETCHUM):

H.R. 7138. A bill to amend the Internal Revenue Code of 1954 to allow a deduction with respect to the extraction of geothermal energy; to the Committee on Ways and Means.

By Mr. KILDEE:

H.R. 7139. A bill to amend title 18 of the United States Code to revise the law relating to electronic eavesdropping, and for other purposes; to the Committee on the Judiciary.

Mr. LEDERER (for himself, Mr. MOAKLEY, Mr. CLAY, Mr. PHILLIP BURTON, Mr. RANGEL, Mr. CHARLES H. WILSON of California, Mr. MICHAEL O. MYERS, Mr. SCHEUER, Mr. EDWARDS of California, Ms. MIKULSKI, Mr. WALKER, Mr. KOSTMAYER, Mr. EILBERG, Mr. PEASE, Mr. FAUNTROY, and Mr. VENTO):

H.R. 7140. A bill to encourage financial institutions to help meet the credit needs of the communities in which they are chartered, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. LEDERER (for himself, Mr. BROWN of California, Mr. WALGREN, Mr. RODINO, Mrs. COLLINS of Illinois, Mr. BONIOR, Mr. ZEFERETTI, Mr. GEPHARDT, Mr. NIX, Mr. EDGAR, and Mr. KILDEE):

H.R. 7141. A bill to encourage financial institutions to help meet the credit needs of the communities in which they are chartered, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. LEHMAN:

H.R. 7142. A bill to amend title XVIII of the Social Security Act to include, as a home health service, nutritional counseling provided by or under the supervision of a registered dietitian; jointly to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. MCHUGH (for himself, Mr. NOWAK, Mr. LAFALCE, Mr. O'BRIEN, Mr. TSONGAS, Mr. DEVINE, Mr. UDALL, Mr. MILFORD, and Mr. PIKE):

H.R. 7143. A bill to establish a program whereby payments in lieu of taxes may be made with respect to certain real property owned by the U.S. Government but leased by departments or agencies thereof to private persons not for public purposes; to the Committee on Government Operations.

By Mr. METCALFE:

H.R. 7144. A bill to provide for a biennial General Accounting Office audit of the housing programs of the Department of Housing and Urban Development to promote more efficient administration of such programs; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MILLER of California (for himself, Mr. BADILLO, Mr. BEARD of Rhode Island Mr. JOHN L. BURTON, Mr. CARR, Mr. CORNELL, Mr. EILBERG, Mr. FRASER, Mr. LEHMAN, Mr. MCHUGH, Ms. MIKULSKI, Mr. MINETA, Mr. MOAKLEY, Mr. NOLAN, Mr. OTTINGER, Mr. PATTERSON of California, Mr. RICHMOND, Mr. ROYBAL, Mr. VENTO, Mr. CHARLES WILSON of Texas, and Mr. ZEFERETTI):

H.R. 7145. A bill to amend title IV of the Social Security Act to provide improved assistance to children and families in need of service to provide greater accountability for children in foster placement, and to promote greater permanency for children, by requiring each State to have a plan specifically covering foster care and adoption services, and for other purposes; to the Committee on Ways and Means.

By Mr. PEPPER:

H.R. 7146. A bill to amend section 709 of ttile 32, United States Code, to provide increased job protection for certain civilian National Guard technicians, and for other purposes; to the Committee on Armed Services.

By Mr. QUIE:

H.R. 7147. A bill to encourage the establishment of wind erosion control and wildlife habitat areas which meet standards prescribed by the Secretary of Agriculture; to the Committee on Ways and Means.

By Mr. RODINO:

H.R. 7148. A bill to provide for the implementation of treaties for the transfer of offenders to or from foreign countries; to the Committee on the Judiciary.

By Mr. ROE:

H.R. 7149. A bill to establish a Department of Senior Citizens Affairs, and for other purposes; to the Committee on Government Operations.

By Mr. SCHULZE:

H.R. 7150. A bill to provide Federal financial assistance to employers, labor organizations, or consortiums thereof, or other groups or individuals, to establish and operate occupational alcoholism programs for the diagnosis and treatment of alcohol abuse and alcoholism in employed persons, including managerial personnel, and their dependents, and for other purposes; to the Committee on Education and Labor.

By Mr. SIMON:

H.R. 7151. A bill to end the authorization of the Helm Reservoir project, Skillet Fork, Ill.; to the Committee on Public Works and Transportation.

By Mr. SYMMS (for himself, Mr. WALSH, Mr. DORNAN, Mr. MONTGOMERY, Mr. ICHORD, Mr. CRANE, Mr. COLLINS of Texas, and Mr. BADHAM):

H.R. 7152. A bill to repeal the Occupational Safety and Health Act of 1970; to the Committee on Education and Labor.

By Mr. VANIK:

H.R. 7153. A bill to amend title IV of the Social Security Act to promote quality control and the reduction of payment errors in the program of aid to families with dependent children; to the Committee on Ways and Means.

By Mr. BEDELL (for himself, Mr. WHALEN, Mr. BAUCUS, Mr. DELLUMS, Mr. EDGAR, Mr. EILBERG, Mr. HUGHES, Mr. KREBS, Mr. NOLAN, Mr. PEASE, and Mr. SIMON):

H.R. 7154. A bill to amend title II of the Social Security Act, and the Internal Revenue Code of 1954, to increase to $30,000 over a 3-year period (subject to further increases based on rises in reported wage levels) the ceiling on the amount of earnings which may be counted for social security benefit and tax purposes; to the Committee on Ways and Means.

By Mr. JEFFORDS (for himself, Mr. PURSELL, Mr. BEARD of Rhode Island, Mr. BONIOR, Mr. GOODLING, and Mr. TRAXLER):

H.R. 7155. A bill to establish a national system to promote the reuse and recycling of beverage containers; to the Committee on Interstate and Foreign Commerce.

By Mr. KEMP:

H.R. 7156. A bill to preserve the academic freedom and the autonomy of institutions of higher education and to condition the authority of officials of the United States to issue rules, regulations, or orders with respect to institutions of higher education; to the Committee on Education and Labor.

By Mr. KEMP (for himself and Mr. D'AMOURS):

H.R. 7157. A bill to incorporate the National Ski Patrol System, Inc.; to the Committee on the Judiciary.

By Mr. MANN (for himself, Mr. BROYHILL, Mr. HOLLAND, Mr. MARTIN, and Mr. NICHOLS):

H.R. 7158. A bill to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn, or fiber and for other purposes; to the Committee on the Judiciary.

By Mr. MINISH:

H.R. 7159. A bill to amend the Wool Products Labeling Act of 1939 with respect to recycled wool; to the Committee on Interstate and Foreign Commerce.

By Mr. RYAN (for himself, Mr. RINALDO, Mr. WINN, Mr. DOWNEY, Mr. GEPHARDT, Mr. LENT, Mr. DERWINSKI, and Mr. MCDONALD):

H.R. 7160. A bill to amend title XVI of the Social Security Act to provide that an alien may not be paid supplemental security income benefits unless he not only is a permanent resident of the United States but has also continuously resided in the Untied States for at least 1 year; to the Committee on Ways and Means.

By Mr. WHITE:

H.R. 7161. A bill to amend title 10, United States Code to allow nationals, as well as citizens, of the United States to participate in the Junior Reserve Officers' Training Corps program; to the Committee on Armed Services.

By Mr. AKAKA (for himself, and Mr. BRODHEAD):

H.J. Res. 458. Joint resolution providing for the designation of the week beginning October 9, 1977, and ending October 15, 1977, as National Gifted and Talented Children's Week; to the Committee on Post Office and Civil Service.

By Mr. KEMP (for himself, Mr. LEDERER, and Mr. FARY):

H.J. Res. 459. Joint resolution designating the week in each year during which Veterans Day is observed as Love America Week; to the Committee on Post Office and Civil Service.

By Mr. FINDLEY (for himself, Mr. WRIGHT, Mr. ZABLOCKI, Mr. FRASER, Mr. BROOMFIELD, Mr. DIGGS, Mr. DERWINSKI, Mr. NIX, Mr. GILMAN, Mr. YATRON, Mr. HARRINGTON, Mr. RYAN, Mr. SOLARZ, Mrs. MEYNER, Mr. PEASE, Mr. BEILENSON, and Mr. CAVANAUGH):

H.J. Res. 460. Joint resolution relating to the 30th anniversary of the Marshall plan; to the Committee on International Relations.

By Mr. MINETA:

H.J. Res. 461. Joint resolution designating the square dance as the national folk dance of the United States of America; to the Committee on Post Office and Civil Service.

By Ms. OAKAR (for herself, Mr. BARNARD, Mr. APPLEGATE, Mr. ANNUNZIO, Mr. HANNAFORD, Mr. SEIBERLING, and Mr. RONCALIO):

H.J. Res. 462. Joint resolution designating the American rose as the national floral emblem of the United States of America; to the Committee on Post Office and Civil Service.

By Mr. ROSTENKOWSKI (for himself, Mr. BADILLO, Mr. BAUCUS, Mr. BLANCHARD, Mr. COTTER, Mr. DINGELL, Mr. EILBERG, Mr. FARY, Mr. JACOBS, Mr. KOSTMAYER, Mr. LOTT, Mr. MADIGAN, Ms. MIKULSKI, Mr. MIKVA, Mr. MURPHY of Pennsylvania, Mr. NEDZI, Mr. NIX, Mr. OTTINGER, Mr. SIMON, and Mr. WAXMAN):

H.J. Res. 463. Joint resolution relating to the publication of economic and social statistics for Americans of Balto-Slavic origin or descent; jointly to the Committees; on Education and Labor, and Post Office and Civil Service.

By Mr. GLICKMAN:

H. Con. Res. 220. Concurrent resolution requiring the elimination through attrition of operators for automated elevators in the Capitol and its associated buildings; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII,

142. The SPEAKER presented a memorial of the Legislature of the State of Utah, relative to telephone competition and interconnection; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. KETCHUM:

H.R. 7162. A bill for the relief of Stephanie Johnson; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 5959

By Mr. HANNAFORD:

Strike out all after the enacting clause and insert in lieu thereof the following:

That the Renegotiation Act of 1951 (50 App. U.S.C. 1211 *et seq.*) is amended by adding at the end thereof the following new section:

Sec. 205. (a) The provisions of this Act and any recommendations of the President submitted to the Congress pursuant to subsection (b) shall be in effect only when—

(1) the President determines, during a period of national emergency, that having such provisions in effect would be in the best

interest of the United States, and

(2) neither House of the Congress, within sixty days after the date on which the President submits such determination to the Congress in accordance with subsection (b), passes a resolution disapproving of such determination.

(b) Upon making a determination under subsection (a), the President shall—

(1) inform the Congress of such determination, and

(2) recommend to the Congress any amendments to this Act which he determines are necessary during such period of national emergency.

H.R. 6810

By Mr. CORRADA:

Page 26, line 1, strike out "(a)".

Page 26, line 12, strike the comma and insert in lieu thereof a period and a close quotation mark.

Page 26, strike line 13 and everything that follows through page 27, line 18.

At the end of bill, add a new section:

SEC. 8. The Public Works Employment Act of 1976 (42 U.S.C. 6735) is amended by adding at the end thereof the following new section:

"AUTHORIZATION OF APPROPRIATIONS FOR PUERTO RICO, GUAM AND THE VIRGIN ISLANDS

"SEC. 216. (a) IN GENERAL.—There is hereby authorized to be appropriated for each of the five succeeding calendar quarters (beginning with the calendar quarter which begins on July 1, 1977) for the purpose of making payments under this title to Puerto Rico, Guam, American Samoa, and the Virgin Islands, an amount equal to 1 percent of the amount authorized for each such quarter under section 202(b).

"(b) ALLOCATIONS.—

"(1) The Secretary shall allocate from the amount authorized under subsection (a) an amount for the purpose of making payments to such governments equal to the total authorized for the calendar quarter multiplied by the applicable territorial percentage.

"(2) For the purposes of this subsection, the applicable territorial percentage is equal to the quotient resulting from the division of the territorial population by the sum of the territorial population for all territories.

"(3) For purposes of this section—

"(A) the term "territory" means Puerto Rico, Guam, American Samoa and the Virgin Islands.

"(B) the term "territorial population" means the most recent population for each territory as determined by the Bureau of Census.

"(b) the provisions of sections 203(c)(4), 204, 205, 206, 207, 208, 209, 210, 211, 212 and 213 shall apply to the funds authorized under this section.

"(c) PAYMENTS TO LOCAL GOVERNMENTS.—The governments of the territories are authorized to make payments to local governments within their jurisdiction from sums received under this section as they deem appropriate."

SENATE—*Thursday, May 12, 1977*

(Legislative day of Monday, May 9, 1977)

The Senate met at 4 p.m., on the expiration of the recess, and was called to order by Hon. EDWARD ZORINSKY, a Senator from the State of Nebraska.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Eternal God, unto whom in all ages men have lifted up their hearts in prayer, deliver us now from the tumult of the world without, from the drive of daily duties, from slavery to desk pads and appointment calendars, and from the confusion of many voices that we may hear again Thy still small voice, clear and reassuring. Keep us from coldness of heart and indolence of spirit that we may worship while we work and ever seek beauty, goodness, and truth. Brace us for new tasks, equip us for new duties, strengthen us for every fresh adventure and sustain us by Thy grace until evening comes and our work is done. Then in Thy mercy give us a peaceful rest in the knowledge of work well done.

We pray in the Redeemer's name. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., May 12, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. EDWARD ZORINSKY, a Senator from the State of Nebraska, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. ZORINSKY thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Wednesday, May 11, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

UNANIMOUS CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there are two measures on the General Orders Calendar which, according to my marked calendar, are ready for passage by unanimous consent. They are Calendar Order No. 99 and Calendar Order No. 110. If the distinguished minority leader's calendar shows the same, I would ask the clerk to transfer those measures to the Unanimous Consent Calendar.

Mr. BAKER. Mr. President, if the Senator will yield, they are clear on our side, and are approved for that purpose.

The ACTING PRESIDENT pro tempore. They will be so transferred.

Mr. ROBERT C. BYRD. Mr. President, there is one measure on the Unanimous Consent Calendar that was placed there yesterday, and was therefore eligible for passage yesterday. It now being 4 o'clock in the afternoon, I should think that sufficient time would have transpired for any Senator to have noted that measure on the Unanimous Consent Calendar, and so notified the leadership if he wished to have the matter held. Therefore, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 109 on the Unanimous Consent Calendar.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EARTHQUAKE HAZARDS REDUCTION ACT

The Senate proceeded to consider the bill (S. 126) to reduce the hazards of earthquakes, and for other purposes, which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment to strike out all after the enacting clause and insert the following:

That this Act may be cited as the "Earthquake Hazards Reduction Act".

SEC. 2. FINDINGS.

The Congress finds and declares the following:

(1) All 50 States are vulnerable to the hazards of earthquakes, and at least 39 of them are subject to major or moderate seismic risk, including Alaska, California, Hawaii, Illinois, Massachusetts, Missouri, Montana, Nevada, New Jersey, New York, South Carolina, Utah, and Washington. A large portion of the population of the United States lives in areas vulnerable to earthquake hazards.

(2) Earthquakes have caused, and can cause in the future, enormous loss of life, injury, destruction of property, and economic and social disruption. With respect to future earthquakes, such loss, destruction, and disruption can be substantially reduced through the development and implementation of earthquake hazards reduction measures, including (A) improved design and construction methods and practices, (B) land-use controls and redevelopment, (C) prediction techniques and early-warning systems, (D) coordinated emergency preparedness plans, and (E) public education and involvement programs.

(3) An expertly staffed and adequately financed earthquake hazards reduction program, based on Federal, State, local, and private research, planning, decisionmaking, and contributions would reduce the risk of such loss, destruction, and disruption in seismic areas by an amount far greater than the cost of such program.

(4) A well-funded seismological research program in earthquake prediction could provide data adequate for the design, of an operational system that could predict accurately the time, place, magnitude, and physical effects of earthquakes in selected areas of the United States.

(5) An operational earthquake prediction system can produce significant social, economic, legal, and political consequences.

(6) There is a scientific basis for hypothesizing that major earthquakes may be moderated, in at least some seismic areas, by application of the findings of earthquake control and seismological research.

(7) The implementation of earthquake hazards reduction measures would, as an added benefit, also reduce the risk of loss,

destruction, and disruption from other natural hazards and manmade hazards, including hurricanes, tornadoes, accidents, explosions, landslides, building and structural cave-ins, and fires.

(8) Reduction of loss, destruction, and disruption from earthquakes will depend on the actions of individuals and organizations in the private sector and governmental units at Federal, State, and local levels. The current capability to transfer knowledge and information to these sectors is insufficient. Improved mechanisms are needed to translate existing information and research findings into reasonable and usable specifications, criteria, and practices so that individuals, organizations, and governmental units may make informed decisions and take appropriate actions.

(9) Severe earthquakes are a worldwide problem. Since damaging earthquakes occur infrequently in any one nation, international cooperation is desirable for mutual learning from limited experiences.

SEC. 3. PURPOSE.

It is the purpose of the Congress in this Act to reduce the risks of life and property from future earthquakes in the United States through the establishment and maintenance of an effective earthquake hazards reduction program.

SEC. 4. DEFINITIONS.

As used in this Act, unless the context otherwise requires:

(1) The term "includes" and variants thereof should be read as if the phrase "but is not limited to" were also set forth.

(2) The term "program" means the earthquake hazards reduction program established under section 5.

(3) The term "seismic" and variants thereof mean having to do with, or caused by, earthquakes.

(4) The term "State" means each of the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Mariana Islands, and any other territory or possession of the United States.

(5) The term "United States" means, when used in a geographical sense, all of the States.

SEC. 5. NATIONAL EARTHQUAKE HAZARDS REDUCTION PROGRAM.

(a) ESTABLISHED.—The President shall establish and maintain, in accordance with the provisions and policy of this Act, a coordinated earthquake hazards reduction program, which shall—

(1) be designed and administered to achieve the objectives set forth in subsection (c);

(2) involve, where appropriate, each of the agencies listed in subsection (d); and

(3) include each of the elements described in subsection (e), the implementation plan described in subsection (f), and the assistance to the States specified in subsection (g).

(b) DUTIES.—The President shall—

(1) within 30 days after the date of enactment of this Act, designate the Federal department, agency, or entity responsible for the development of the implementation plan described in subsection (f);

(2) within 210 days after such date of enactment, submit to the appropriate authorizing committees of the Congress the implementation plan described in subsection (f); and

(3) by rule, within 300 days after such date of enactment—

(A) designate the Federal department, agency, or interagency group which shall have primary responsibility for the development and implementation of the earthquake hazards reduction program;

(B) assign and specify the role and responsibility of each appropriate Federal department, agency and entity with respect to each object and element of the program;

(C) establish goals, priorities, and target dates for implementation of the program;

(D) provide a method for cooperation and coordination with, and assistance (to the extent of available resources) to, interested governmental entities in all States, particularly those containing areas of high or moderate seismic risk; and

(E) provide for qualified staffing for the program and its components.

(c) OBJECTIVES.—The objectives of the earthquake hazards reduction program shall include—

(1) the development of technologically and economically feasible design and construction methods and procedures to make new and existing structures, in areas of seismic risk, earthquake resistant, giving priority to the development of such methods and procedures for dams, hospitals, schools, public utilities, public safety structures, high occupancy buildings, and other structures which are especially needed in time of disaster;

(2) the implementation in all areas of high or moderate seismic risk, a system (including personnel, technology, and procedures) for predicting damaging earthquakes and for identifying, evaluating, and accurately characterizing seismic hazards;

(3) the development, publication, and promotion, in conjunction with State and local officials and professional organizations, of model codes and other means to coordinate information about seismic risk with land-use policy decisions and building activity;

(4) the development, in areas of seismic risk, of improved understanding of, and capability with respect to, earthquake-related issues, including methods of controlling the risks from earthquakes, planning to prevent such risks, disseminating warnings of earthquakes, organizing emergency services, and planning for reconstruction and redevelopment after an earthquake;

(5) the education of the public, including State and local officials, as to earthquake phenomena, the identification of locations and structures which are especially susceptible to earthquake damage, ways to reduce the adverse consequences of an earthquake, and related matters;

(6) the development of research on—

(A) ways to increase the use of existing scientific and engineering knowledge to mitigate earthquake hazards;

(B) the social, economic, legal, and political consequences of earthquake prediction; and

(C) ways to assure the availability of earthquake insurance or some functional substitute; and

(7) the development of basic and applied research leading to a better understanding of the control or alteration of seismic phenomena.

(d) PARTICIPATION.—In assigning the role and responsibility of Federal departments, agencies, and entities under subsection (b)(3)(B), the President shall, where appropriate, include the United States Geological Survey, the National Science Foundation, the Department of Defense, the Department of Housing and Urban Development, the National Aeronautics and Space Administration, the National Oceanic and Atmospheric Administration, the National Bureau of Standards, the Energy Research and Development Administration, the Nuclear Regulatory Commission, and the National Fire Prevention and Control Administration.

(e) RESEARCH ELEMENTS.—The research elements of the program shall include—

(1) research into the basic causes and mechanisms of earthquakes;

(2) development of methods to predict the time, place, and magnitude of future earthquakes;

(3) development of an understanding of the circumstances in which earthquakes might be artificially induced by the injection of fluids in deep wells, by the impoundment of reservoirs, or by other means;

(4) evaluation of methods that may lead to the development of a capability to modify or control earthquakes in certain regions;

(5) development of information and guidelines for zoning land in light of seismic risk in all parts of the United States and preparation of seismic risk analyses useful for emergency planning and community preparedness;

(6) development of techniques for the delineation and evaluation of the potential effects of earthquakes, and their application on a regional basis;

(7) development of methods for planning, design, construction, rehabilitation, and utilization of manmade works so as to effectively resist the hazards imposed by earthquakes; and

(8) exploration of possible social and economic adjustments that could be made to reduce earthquake vulnerability and to exploit effectively existing and developing earthquake mitigation techniques.

(f) IMPLEMENTATION PLAN.—The President shall develop, through the Federal agency, department, or entity designated under subsection (b)(1) an implementation plan which shall set year-by-year targets through at least 1980, and shall specify the roles for Federal agencies, and recommended appropriate roles for State and local units of government, individuals, and private oragnizations, in carrying out the implementation plan. The plan shall provide for—

(1) the development of measures to be taken with respect to preparing for earthquakes, evaluation of prediction techniques and actual predictions of earthquakes, warning the residents of an area that an earthquake may occur, and ensuring that a comprehensive response is made to the occurrence of an earthquake;

(2) the development of ways for State, county, local, and regional governmental units to use existing and developing knowledge about the regional and local variations of seismic risk in making their land use decisions;

(3) the development and promulgation of specifications, building standards, design criteria, and construction practices to achieve appropriate earthquake resistance for new and existing structures;

(4) An examination of alternative provisions and requirements for reducing earthquake hazards through Federal and federally financed construction, loans, loan guarantees, and licenses;

(5) the determination of the appropriate role for insurance, loan programs, and public and private relief efforts in moderating the impact of earthquakes; and

(6) dissemination, on a timely basis, of—

(A) instrument-derived data of interest to other researchers;

(B) design and analysis data and procedures of interest to the design professions and to the construction industry; and

(C) other information and knowledge of interest to the public to reduce vulnerability to earthquake hazards.

When the implementation plan developed by the President under this section contemplates or proposes specific action to be taken by any Federal agency, department, or entity, and, at the end of the 30-day period beginning on the date the President submits such plan to the appropriate authorizing committees of the Congress any such action has not been initiated, the President shall file with such committees a report explaining, in detail, the reasons why such action has not been initiated.

(g) STATE ASSISTANCE.—In making assistance available to the States under the Disaster Relief Act of 1974 (42 U.S.C. 5121 et seq.), the President may make such assistance available to further the purposes of this Act, including making available to the States

the results of research and other activities conducted under this Act.

(h) PARTICIPATION.—In carrying out the provisions of this section, the President shall provide an opportunity for participation by the appropriate representatives of State and local governments, and by the public, including representatives of business and industry, the design professions, and the research community, in the formulation and implementation of the program.

SEC. 6. ANNUAL REPORT.

The President shall, within ninety days after the end of each fiscal year, submit an annual report to the appropriate authorizing committees in the Congress describing the status of the program, and describing and evaluating progress achieved during the preceding fiscal year in reducing the risks of earthquake hazards. Each such report shall include any recommendations for legislative and other action the President deems necessary and appropriate.

SEC. 7. AUTHORIZATIONS FOR APPROPRIATIONS.

(a) IN GENERAL.—There are authorized to be appropriated to carry out the program (in addition to the authorizations set forth in subsections (b) and (c)), such sums as may be necessary for the fiscal years ending September 30, 1978; September 30, 1979; and September 30, 1980.

(b) GEOLOGICAL SURVEY.—There are authorized to be appropriated to the Secretary of the Interior for purposes for carrying out, through the Director of the United States Geological Survey, the responsibilities that may be assigned to the Director under this Act not to exceed $27,500,000 for the fiscal year ending September 30, 1978; not to exceed $35,000,000 for the fiscal year ending September 30, 1979; and not to exceed $40,000,000 for the fiscal year ending September 30, 1980.

(c) NATIONAL SCIENCE FOUNDATION.—To enable the Foundation to carry out responsibilities that may be assigned to it under this Act, there are authorized to be appropriated to the Foundation not to exceed $27,500,000 for the fiscal year ending September 30, 1978; not to exceed $35,000,000 for the fiscal year ending September 30, 1979; and not to exceed $40,000,000 for the fiscal year ending September 30, 1980.

Mr. CRANSTON. Mr. President, I urge immediate and favorable consideration of S. 126, the Earthquake Hazards Reduction Act.

This bill is similar to S. 1174 which passed the Senate unanimously last year. It differs in two respects. First, the authorization levels are slightly higher than those passed last year reflecting information developed in the meantime by the former Presidential Science Advisor, Dr. H. Guyford Stever. This report, issued in September 1976, recommended substantial increases in funding for the Federal earthquake effort. S. 126 represents the intermediate level recommended in the Stever report: $55 million in fiscal 1978, $70 million in fiscal 1979, and $80 million in fiscal 1980. These funds would be evenly divided between the two principal agencies, the National Science Foundation and the U.S. Geological Survey. The bill also authorizes "such sums as may be necessary," for the other Federal agencies involved in earthquake-related activities.

Second, the bill as reported by the Committee on Commerce, Science, and Transportation includes a provision requested by the administration for the timely development of an "implementation plan." This implementation plan would address the need to apply existing information and new research findings to the decisionmaking process at the Federal, State and local levels. The bill directs that the plan itself be prepared and submitted to the Congress within 6 months of enactment and that it establish year-by-year targets at least through 1985.

Overall, the bill before the Senate today presents a balanced and effective program for the reduction of hazards associated with earthquakes. I am delighted that it enjoyed broad bipartisan support in the Senate.

The threat of future destructive earthquakes is truly a national problem. Certainly, the Pacific Coast States—principally Alaska and California—are especially vulnerable to earthquakes and related disasters. Yet nearly every State in the Nation faces some degree of risk from future earthquakes, and some 70 million people live in the 39 States that are wholly or partly in areas facing a risk of moderate to major damage from future earthquakes. Earthquakes have occurred in our history all over the United States, with major earthquakes in Charleston, S.C., 1886; New Madrid, Mo., 1811–12; Cape Ann, Mass., 1755; Seattle, Wash., 1949; and Hebgen Lake, Mont., 1959; and the terrible Good Friday earthquake in Alaska, 1964.

Also, we must remember that despite a considerable seismic history, the United States has been extraordinarily lucky. Less than 1,200 people have lost their lives in U.S. earthquakes. Throughout history, somewhere in the neighborhood of 74 million people have died in earthquakes. Just last year—a year of extraordinary earthquake destruction worldwide—more than 700,000 people lost their lives, mostly in the July 1976 earthquake which struck a heavily industrialized area of mainland China.

Indeed, the United States today faces the greatest potential danger from earthquakes that we have ever faced before. It is only in the last decade or so that our population has become concentrated in major cities and along our coastal regions, and major construction has occurred on landfill and other unstable soils. Thus, it is only very recently that the potential for great earthquake destruction in this country has existed. Indeed, if the San Andreas Fault were to give us an encore of the 1906 San Francisco earthquake, the deaths could number in the tens of thousands and the property damage could exceed $20 billion. On top of this, we must consider the incalculable losses resulting from the loss of economic and social functioning. Such an earthquake would have enormous repercussions on our national economy and our national psyche.

Recently, many of us have grown concerned about the existence of the so-called "Palmdale bulge"—a substantial land uplift straddling some 100 miles along the southern section of the San Andreas Fault just north of Los Angeles.

If this uplift is a signal that a major earthquake will occur in the near future—as some experts believe—then the legislation before the Senate becomes all the more urgent. Estimates of the potential damage in the Los Angeles area go as high as $25 billion in destroyed property and as many as 12,000 lives lost. Such a catastrophe would certainly have national economic repercussions.

Even if the uplift does not culminate in a destructive earthquake in the near future, it is still in the public interest to establish a well-funded earthquake program so that we can be better prepared for the earthquakes that are inevitably in our future. We know that major destructive earthquakes have struck the United States before—and not just in California—and it is, therefore, logical to assume they will occur again. A major earthquake could strike tomorrow, next year, or 30 years from now. It is irresponsible, in the face of new advances in the sciences of earthquakes and engineering, not to take preventive action now.

Mr. President, I want to commend the members and staff of the Commerce Committee for the expeditious handling of this important legislation. I urge the Senate to approve it.

Mr. STEVENSON. Mr. President, the Subcommittee on Science, Technology and Space of the Committee on Commerce, Science, and Transportation held hearings on this legislation. S. 126 is similar to S. 1174 which was passed by the Senate unanimously last year. The purpose of this legislation is to reduce the risks to life and property from earthquakes.

1976 was one of the most devastating years in terms of damage caused by earthquakes. Damaging earthquakes occurred in Guatemala, Italy, Russia, Indonesia, China, the Philippines, and more recently, in Romania. The Chinese earthquake on July 28, 1976, in Tangshan, was estimated to have caused the loss of approximately 650,000 lives.

The United States has been fortunate compared to these countries, but it is almost a certainty that in the future we will experience a damaging earthquake. At least 39 States are subject to a major or moderate seismic risk. The result of a large earthquake, for example in California, could result in thousands of lives lost, billions of dollars in damage, job losses and destruction of cities.

In hearings on S. 126 this year, both administration and public witnesses testified strongly in favor of this legislation. The President's science adviser, Dr. Frank Press, a world leader in this area, supported the bill with modification made in committee. The committee received a report from the General Accounting Office that was particularly helpful in highlighting the need for a national earthquake program which would identify agency responsibilities, goals, priorities, and target dates for both a research and implementation program.

The bill reported by the committee has three changes from S. 1174, passed by the Senate last year. No national advisory committee is established under the act. Administration witnesses indicated that until they develop an implementation plan and decide how best to organize the various agencies involved with the earthquake issue, the establishment of an advisory committee would be premature.

The second change involves the establishment of an implementation plan. Under this bill the President is required within 6 months to develop an implementation plan. The implementation plan would recommend ways to: improve community preparedness for earthquakes, develop better means to use existing and developing knowledge on seismic risks at the State, county, local, and regional government level, utilize more effectively building standards, design criteria and construction practices, examine various provisions such as construction loans, loan guarantees and licenses to reduce earthquake hazards, determine the role of earthquake insurance and private relief efforts, and disseminate information to the public, researchers and professionals. This plan also would be the basis of reorganization in the executive branch to better deal with earthquake hazards.

The final difference in the bill pertains to the authorization levels provided. As a result of an effort conducted for the President's science adviser, a panel on earthquake prediction and hazard mitigation, chaired by Prof. Nathan M. Newmark of the University of Illinois, submitted a report suggesting funding levels for an expanded earthquake hazard reduction program. The recommendations included options for low, intermediate, and high funding. S. 126 parallels the report's intermediate funding level proposal.

The goals of S. 126 reflect a balanced strategy in dealing with earthquake-related hazards. For example, the prospect of an earthquake prediction capability in the future, perhaps within a decade, is promising. Yet, we should not depend entirely on that possibility. It has been pointed out that we can predict accurately where floods occur, but people still live in flood plains and human and economic losses occur yearly. The capability of humans and their institutions to deal with knowledge is imperfect. It is quite likely that an earthquake prediction capability will produce economic, social, legal, and political consequences. We need to emphasize research on those lines as well. S. 126 is balanced in its emphasis of other necessary measures in addition to earthquake prediction. These measures would include improved engineering and construction, seismic risk analyses for land use decisions, and community preparedness.

Mr. President, I urge my colleagues to support S. 126. I believe it to be a necessary and important piece of legislation. I look forward to working with Senator CRANSTON and others in the Senate as well as in the House in enacting legislation this year. I particularly note the efforts of Senator CRANSTON over a number of years in focusing the attention of the Congress in this important area.

Mr. President, back unanimous consent that a copy of the digest of S. 126 be printed in the RECORD.

There being no objection, the digest was ordered to be printed in the RECORD, as follows:

DIGEST OF S. 126, THE EARTHQUAKE HAZARDS REDUCTION ACT

A. PURPOSE

The purpose of S. 126 is to reduce the risks to the life and property from future earthquakes in the United States through the establishment of a National Earthquake Hazards Reduction Program. $55 million are authorized for FY 78, $70 million for FY 79, and $80 million for FY 80 for specific activities, and such sums as may be necessary for certain general activities.

B. PROVISIONS

S. 126 is divided into six sections as follows:

Section 2 finds that 39 states are wholly or partly areas of high or moderate seismic risks; loss of life or property due to earthquake can be substantially reduced through various measures; an earthquake hazards reduction program that includes certain measures would reduce losses of life and property by an amount far greater than the cost; a research program in earthquake prediction would provide the capability to predict accurately the time, place, magnitude, and physical effects of earthquakes; an earthquake prediction capability can produce unanticipated consequences; earthquake risks possibly can be moderated by earthquake control measures; and severe earthquakes are a world-wide problem.

Section 3 states the purpose of the Act.

Section 4 sets forth definitions of terms.

Section 5 establishes a National Earthquake Hazards Reduction Program. Subsection (a) provides for the establishment and administration of the Program.

Subsection (b) sets forth certain duties for the President in implementing the policy and program under the Act.

Subsection (c) sets forth the objectives of the Program. These include:

1. Develop technologically feasible design and construction methods to make new and existing structures earthquake resistant;

2. Implement a system to predict damaging earthquakes in the areas of high or moderate risk;

3. Develop model codes to coordinate information about seismic risks with land use decisions;

4. Develop a better understanding of earthquake related issues;

5. Educate the public concerning earthquake hazard reduction measures;

6. Undertake research that will lead to a better understanding of ways to use existing knowledge to mitigate earthquake hazards, the social, economic, legal, and political consequences of earthquake prediction, and ways to assure the availability of earthquake insurance; and

7. Improve the understanding of earthquake control;

Subsection (d) specifies those agencies which will be involved in the Program. The two main agencies include the U.S. Geological Survey and the National Science Foundation.

Subsection (e) sets forth the research elements of the Program. Research includes fundamental earthquake studies, earthquake prediction, induced seismicity, earthquake control, land use information, hazards assessment, earthquake engineering, and research for utilization.

Subsection (f) specifies that the President shall prepare an implementation plan with year-by-year targets through 1985. The implementation plan will suggest measures to use effectively existing and new information in decision making, to improve the federal organization, and facilitate state and local government decisionmaking. It also will develop means to involve the public and private sector. Six months are provided for the development of the plan, and it goes into effect 30 days after review by the authorizing committees.

Subsection (g) provides an assistance program to aid the states in implementing the Disaster Relief Act of 1974.

Subsection (h) requires the President to provide an opportunity for participation in the program by appropriate representatives of state and local governments, by the public, by the business community, by the design professions, and the research community.

Section 6 requires the President to submit an annual report to the authorizing committees of the Congress on progress achieved in reducing the risk of earthquake hazards.

Section 7 authorizes appropriations of $55 million, $70 million, and $80 million, for FY 1978, FY 1979, and FY 1980 for specific activities conducted by the U.S. Geological Survey and the National Science Foundation. Such sums as may be necessary, are also authorized for general activities under the Act.

Mr. MAGNUSON. Mr. President, the Committee on Commerce, Science and Transportation has reported out earthquake legislation again this year. S. 126, the Earthquake Hazards Reduction Act, is very similar to S. 1174, which was passed unanimously by the Senate last year. S. 126 represents yet further improvements made to the legislation.

I am in strong support of this legislation, and urge my colleagues to vote in favor of S. 126. It goes without saying that earthquakes are an international and U.S. problem. The damage from earthquakes world-wide last year was major, particularly in China. In the United States last year we were fortunate, yet one cannot expect that the future will be as benign.

In my own State of Washington we have experienced a number of earthquakes. The 1949 and 1965 earthquakes were particularly damaging. The State's entire population resides in areas considered by scientists to be areas of major and moderate seismic risk. The U.S. Geological Survey has estimated the potential damage resulting from an earthquake in the Puget Sound region. Their estimates suggest that an earthquake of 7.5 magnitude on the Richter Scale is a reasonable maximum value for Puget Sound. Should such an earthquake occur, and be centered either where the 1949 or 1965 earthquakes occurred, hundreds of deaths and thousands of injuries could occur. Economic losses in the millions of dollars might result.

I am hopeful that as a result of the program required under S. 126 my State as well as all other States residing over areas of major or moderate seismic risk will be able to prepare more adequately for the potential of damaging earthquakes. Within the next 10 years, scientists indicate there may be a possibility to predict earthquakes. If we could predict an earthquake so that individuals could be warned shortly before the event, this would have great potential for saving human lives and injuries. On the other hand, we need to also make sure that a prediction capability does not result in major economic, legal and social problems.

In addition to earthquake prediction, S. 126 would help develop information on the seismic risk of particular geographical regions. Information on seismic risk could help to decide where to locate vulnerable structures such as dams, hospitals, and schools. It also will be important to build new structures and retrofit existing ones, to make them more earthquake resistant.

I urge my colleagues to support this bill.

Mr. HOLLINGS. Mr. President, again

I rise in support of a much needed piece of legislation to reduce the hazards from future damaging earthquakes. The United States needs to move forward promptly to establish a comprehensive national earthquake research and implementation program. The purpose of S. 126 is to reduce the enormous risks to human life and property from future damaging earthquakes in the United States. I urge my colleagues to support S. 126.

The high incidence of major, damaging earthquakes worldwide over the past year is a vivid reminder of the need to act promptly. Last year was the worst year in lost lives in more than four centuries, with greater than 700,000 deaths. It is only a matter of time before the United States experiences another damaging earthquake. Economic and human losses are a distinct reality we must face.

Over the past several years since I have been involved with earthquake legislation, one thing I learned is that the risks from earthquakes are not just a local problem, occurring in such States as California and Alaska. Although the west coast experiences earthquakes more frequently, the east coast and Midwest are not immune from damaging earthquakes. For example, in my State of South Carolina we have an earthquake history. In 1886 we experienced a major earthquake in the Charleston area. The estimated damage from that earthquake some 90 years ago was $23,000,000. Few buildings in that city escaped damage, and many were totally destroyed.

I would like to share a personal experience with my colleagues. Last year I visited the People's Republic of China. While in Peking last November, we felt an earthquake firsthand. This was not the magnitude of earthquake that occurred in Tang-shan that killed 650,000 people. Nevertheless, we were evacuated from the hotel. It is interesting to compare how the Chinese people deal with earthquakes, and how their efforts appear to be much greater than what we are doing in the United States. My understanding is that more than 10,000 professionals and 100,000 amateur workers are involved in their earthquake monitoring and detection program.

It is high time to move forward with a U.S. program. S. 126 is the culmination of efforts starting in the 92d Congress. The bill would provide for research to develop an earthquake prediction capability and to learn how to deal socially and politically with earthquake prediction. S. 126 would provide information to help build buildings better, would provide individuals with information as to where active faults are—for example, this information could help us in the siting of nuclear powerplants, and would provide a public information and education activity to increase community preparedness. The President is held accountable for the entire program since it will involve numerous agencies.

I would like to note and commend the leadership exerted by Senator CRANSTON over the years in behalf of this legislation. His efforts have helped in a critical way to produce this important legislation. The administration is supporting this legislation this year, and I look forward to working with them.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–130), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the Earthquake Hazards Reduction Act is to reduce the risks to life and property from future earthquakes in the United States. Future earthquakes can cause enormous loss of life, injury, destruction of property, and economic and social disruption. Such loss and disruption could be substantially reduced by a national earthquake hazards reduction program.

BRIEF DESCRIPTION

The bill would establish a national earthquake hazards reduction program, under the direction of the President, to minimize the loss and disruption resulting from future earthquakes. Future earthquakes in the United States are likely to be more destructive than past ones because of population growth and concentration. The program has several objectives: the development of technologically and economically feasible design and construction methods to make new and existing structures earthquake resistant; the implementation of a system to predict earthquakes in areas of high or moderate seismic risk; the development of model codes and other means to make information about seismic risk available for consideration in land-use and building decisions; the improvement of the understanding of earthquake related issues; the education of the public concerning earthquake hazard reduction measures; the development of research leading to better ways to use existing scientific and engineering knowledge, better understanding of the social, economic, legal, and political consequences of earthquake prediction, and development of ways to assure the availability of earthquake insurance or some functional substitute; and the development of an improved understanding of earthquake control or alteration.

The President will be responsible for the program and for maintaining an effective multiorganizational response necessary to meet the objectives of the act. The program calls for cooperation among a number of Federal agencies, including the U.S. Geological Survey and the National Science Foundation. The President would be required to report to the Congress annually on progress achieved in the program.

The program would include four general elements: a research element, an implementation plan, provision of State assistance, and an opportunity for participation. The research part of the program deals with fundamental earthquake studies, earthquake prediction, induced seismicity, earthquake control, seismic risk analysis for land-use consideration, hazards assessment, earthquake engineering, and research to explore possible social and economic adjustments to reduce earthquake vulnerability.

The implementation plan addresses the need to apply existing information and new research findings to decisionmaking at the Federal, State, and local level. An implementation plan will be prepared within 6 months which shall set year-by-year targets through at least 1985, specify roles for Federal agencies and recommend appropriate roles for State and local units of government, individuals, and private organizations. The plan will address what measures can be taken to prepare better for earthquakes, how existing and developing knowledge of seismic risk can be taken into account, how building and construction practices for new and existing structures can take into account seismic risks, how earthquake hazards can be reduced through loans, loan guarantees and licenses, how insurance can be used, and how improved dissemination of information and knowledge of interest to the public can be made more effective.

The State assistance part of the program allows for assistance to be made available to the States under the Disaster Relief Act of 1974. The participation part of the program provides that the President shall provide an opportunity for participation to wide sectors of the population in the formulation and implementation of the national earthquake hazards reduction program.

This bill contains authorizations for appriations totaling $55 million, $70 million, and $80 million over a 3-year period for the U.S. Geological Survey and National Science Foundation to undertake specific activities. In addition, there are authorized to be appropriated such sums as may be necessary for other agencies involved with the program.

BACKGROUND

Earthquakes can devastate cities, with heavy loss of life and infliction of injury. These earthquakes occur with alarming regularity. 1976 was one of the most devastating years in terms of damage caused by earthquakes—the worst year in more than 400 years in terms of lives lost and damage caused. Damaging earthquakes occurred in Guatemala, Italy, Russia, Indonesia, China, and the Philippines. In 1977, a damaging earthquake struck Rumania and Iran. The Chinese earthquake centered in Tang-shan, July 28, 1976, was estimated to have caused the loss of approximately 650,000 lives. 1976 was, however, not a year of more than average number of earthquakes. The long-term average of earthquake frequency suggests that 18 earthquakes of magnitude 7 or larger occur each year. Last year's number approached this. The high casualty figures that resulted thus can be attributed to the centering of these earthquakes in areas of major population, rather than to a higher number of earthquakes occurring.

Major earthquakes have shaken the United States many times. The popular conception that earthquakes in the United States occur predominantly on the west coast is not completely accurate. Major earthquakes in the United States include: the 1971 San Fernando, Calif., earthquake; the 1964 "Good Friday" earthquake in Alaska; the 1959 earthquake which struck Hebgen Lake, Mont.; the 1949 and 1965 earthquakes which hit near Seattle, Wash.; the 1906 earthquake and fire which destroyed San Francisco, Calif.; the 1886 earthquake which rocked Charleston, S.C.; the 1857 Fort Tejon, Calif., earthquake; a series of earthquakes which struck New Madrid, Mo., in the winter of 1811–12; and the 1755 earthquake which struck Cape Ann, Mass Less destructive earthquakes dating back to the 16th and 17th centuries have struck these and other areas of the United States with greater frequency. Compared to other seismically vulnerable regions such as Japan, China, the Middle East, and India, the history of destructive earthquakes in the United States is quite brief.

The United States has been extraordinarily lucky to date. The growth of population and the development of large cities in the United States are such recent phenomena that only within the last 100 years has the potential for great earthquake destruction in the country existed. The United States has experienced several "great" earthquakes which resulted in 1,600 deaths and associated property damage estimated at more than $1.8 billion (see tables 1 and 2).

Total	1,878.0

*These damage estimates are at the time of the earthquake. They do not include the effects of inflation. They are not estimates of the likely damage if a similar earthquake occurred today.

Damage can also occur indirectly from earthquakes through seismic waves or tsunamis. Tsunamis are waves which move at velocities of 300 to 400 mph, and may be many miles long in deep ocean water. Approaching the water at a low speed, the wave may reach a height of 50 feet. The casualties and damage in the United States resulting from tsunamis is provided in table 3.

The United States was fortunate because the biggest earthquakes known to have struck the United States occurred in the last century when our population was relatively small and widely dispersed. Those major earthquakes that have occurred since, have, for the most part struck the less populated areas of the Nation.

An analysis of the seismic risk map of the United States shows a wide distribution of moderate and major seismic risk areas. Such maps are based on the known distribution of past damaging earthquakes, evidence of strain release, and consideration of major geologic structures and provinces believed to be associated with earthquake activity. They are not based, however, on the frequency of earthquake activity.

Table 4 provides a tabulation of the approximate U.S. population in each zone of earthquake risk. It should be noted that some 70 million people live in the 39 States which are wholly or partly in zone 2 (risk of moderate damage) or zone 3 (risk of major damage) or both.

TABLE 3.—CASUALTIES AND DAMAGE IN THE UNITED STATES FROM TSUNAMIS[1]

Year	Dead	Injured	Estimated damage (thousands)	Area
1906			$5	Hawaii.
1917			(2)	American Samoa.
1918			100	Hawaii.
1918	40		250	Puerto Rico.
1922			50	Hawaii, California, American Samoa.
1923	1		4,000	Hawaii.
1933			200	Do.
1946	173	163	25,000	Hawaii, Alaska, west coast.
1952			1,200	Midway Island, Hawaii.
1958	2		50	Alaska.
1957			4,000	Hawaii, west coast.
1960	61	282	25,500	Hawaii, west coast, American Samoa.
1964	122	200	104,000	Alaska, west coast, Hawaii.
1965			10	Alaska.
1975			2,000	Hawaii.

[1] These figures are the lives lost at the time of the tsunami and do not reflect the likely loss of life if a similar earthquake and tsunami were to occur today.

[2] Damage reported, but no estimates available.

TABLE 4.—U.S. POPULATION RESIDENT IN VARIOUS EARTHQUAKE RISK ZONES

	Estimated population at risk	Percent of total U.S. population	Number of affected States
Seismic risk zone:			
Zone 0 (low)	16,717,000	8	5
Zone 1	115,091,000	57	42
Zone 2	40,472,000	20	39
Zone 3 (high)	30,943,000	15	21
Total	203,223,000		[1] 51

[1] Including the District of Columbia.

While it is almost certain that future damaging earthquakes will occur, an earthquake of damaging intensity is a relatively rare event at any given site. Thus, assessing the future risk of the potential event for a specific community is difficult. There is a relatively low property loss average per year for the Nation as a whole; indeed, the loss per year from earthquakes since 1900 has averaged more than $26 million per year. However, damage estimates for a single reoccurrence of the 1906 San Francisco or the 1811–12 New Madrid earthquakes measure in the tens of billions of dollars.

A study of the earthquake problem performed under contract with the National Science Foundation, developed two alternative methods of estimating future risk: an annualized loss estimate, and a sudden loss estimate. The annualized loss estimates are based on the expected probability of a seismic event of a specific intensity per year. Tables 5 and 6 present the annualized loss estimates for the United States as a whole and for four regions of the United States.

TABLE 5.—ANNUALIZED LOSSES TO STRUCTURES, U.S. TOTALS[1]

National year	Millions of 1970 dollars: At risk	Millions of 1970 dollars: loss	At risk lost (percent)
1970	1,616,114.80	631.22	0.03905
1980	2,322,156.60	832.07	.03583
1990	3,149,514.00	1,044.41	.03316
2000	4,098,186.90	1,318.50	.03217

2000	935,317	.00709	66.3
West (including California):			
1970	338,782	.13639	462.1
1980	497,437	.12390	616.3
1990	85,755	.11441	784.6
2000	903,736	.11004	994.5

It is interesting to note that while the expected value of annual loss increases from $631 million in 1970 to $1.3 billion in the year 2000, the annual percent risk loss de-

creases slightly over the same period. This reduction in risk loss results from the assumption that new and improved construction will gradually replace the older, more hazardous structures. The total annualized loss estimates of table 5 amount to an estimated total loss of $30 billion for the entire United States as a result of earthquakes occurring between 1970 and the year 2000. The western region of the United States can expect $22.5 billion of this total damage, or about 15 percent of the cumulative estimated annualized loss.

The sudden loss estimates are based upon two specific events: the 1906 San Francisco earthquake and the 1811–12 New Madrid earthquakes. These two events are generally characterized as the representative major destructive events which may reoccur in the United States and for which there is adequate intensity data. Table 7 presents the damage that can be expected to occur if the hypothetical events were to occur in 1970, 1980, 1990, and the year 2000.

Although these figures are estimates, it is nevertheless clear that future earthquakes pose a serious hazard—in economic and human terms.

TABLE 7.—LOSSES DUE TO THE REOCCURRENCE OF THE NEW MADRID AND SAN FRANCISCO EARTHQUAKES

[Amounts in millions of 1970 dollars]

National year	Value at risk in area MMI≥6	Population at risk in area MMI≥6	Loss in value	Total value at risk lost (percent)
San Francisco scenario:				
1970	76,488.44	7,795,137	10,242.63	13.39108
1980	113,348.00	9,252,058	13,720.72	12.10495
1990	157,317.87	10,708,978	17,553.36	11.15789
2000	208,398.04	12,165,899	20,839.80	10.69175
New Madrid scenario:				
1970	118,131.08	19,525,116	3,063.47	2.59328
1980	165,543.01	21,683,916	3,876.41	2.35163
1990	220,154.64	23,842,716	4,683.37	2.12731
2000	281,965.99	26,001,515	5,760.40	2.04294

Within the last 15 years, scientists have made great advances in understanding the geologic processes responsible for earthquakes. Scientists have formulated a theory that describes the earth as comprised of three layers: the lithosphere, which includes the crust and the upper mantle; the asthenosphere, which extends from the base of the lithosphere to a depth of several hundred miles; and the mesosphere, which makes up the lower remaining portion of the mantle. According to this theory, the Earth's crust is actually composed of huge, shifting plates, each 30 to 90 miles thick. These vast plates of the outer crust move against one another as a result of thermal convection in the earth's hot interior. As a result of friction between plate movements, stress builds up in the earth and rocks. An earthquake occurs when the stress reaches sufficient magnitude that fracturing occurs and energy is released.

Geophysically, there are several widely used measurements to describe an earthquake. One is the Richter magnitude. Using techniques developed by Dr. Charles Richter of the California Institute of Technology, seismologists can assign an earthquake a magnitude—a numerical value that identifies the energy released by a particular earthquake. The Richter magnitude can be misinterpreted, however. Though the numbers are arranged arithmetically, every step up the scale represents a logarithmic increase in energy. For example, an eathquake of magnitude 5 releases 30 times as much energy as an earthquake of magnitude 4, and an earthquake of magnitude 6 is 30 times greater than one of magnitude 5. A simple way to distinguish among earthquakes is to define a great earthquake as a Richter magnitude of 7.7 or above; a major earthquake as magnitude 7.0 to 7.7; and a moderate earthquake as magnitude 6.0 to 6.9.

Another measure of earthquakes—the intensity scale—was developed as a qualitative measure of earthquake effects. The measure of intensity relates to ground vibration and structural damage. The intensity scale in common usage is the Modified Mercalli Intensity Scale. These qualitative assessments are assigned roman numerals from I to XII with XII being the highest damage. Unlike the magnitude of an earthquake, the intensity varies generally with distance and depends upon the nature of the local ground condition and the types of structures located there. In general, alluvial valleys, soft sediments, and areas of uncompacted fill will magnify ground shaking and will register higher intensities than adjacent areas of solid rock.

Within the past 3 years, a series of developments in the United States and elsewhere suggests that recent theories about earthquakes are helping to produce a capability to predict earthquakes. There have been dramatic instances where scientists in the United States and China predicted earthquakes. On August 2, 1973, seismologists from Lamont Doherty Geological Observatory predicted that an earthquake would occur in the Blue Mountain Lakes region in New York. The next day an earthquake occurred. On November 27, 1974, geologists from the U.S. Geological Survey's National Center for Earthquake Research in California predicted that an earthquake would take place near Hollister, Calif., within days. The next day an earthquake occurred.

At 7:36 p.m. on February 4, 1975, an earthquake of 7.3 magnitude occurred in the Haicheng-Yingkou region of China. Several hundred thousand people live in that area. About 6 hours before the destructive earthquake began, officials warned the people and evacuated most of the towns and cities. The Chinese earthquake prediction and subsequent warning saved approximately 10,000 lives.

The earthquake prediction program of the People's Republic of China is extensive and includes more than 10,000 professionals and thousands of amateur workers. Extensive earthquake prediction programs also exist in the Soviet Union and Japan.

Earthquake prediction—the prediction of the time, place, and location of future earthquakes—is today as much art form as science. Nevertheless, there are some who believe that developing theories and observations of precursory events suggest that an accurate prediction capability in certain geographic areas of the United States is possible within the next decade.

The recent interest in an earthquake prediction capability for the United States has emerged in a cautious manner. The recent study by the Panel on the Public Policy Implications of Earthquake Prediction of the National Academy of Sciences[1] represents the attitude that a prediction capability has disadvantages as well as advantages. Scientifically founded predictions leading to public warnings, would have definite economic, legal, and political consequences. The report notes, "Earthquake prediction is a new and unstudied experience, and analogies to better understood disaster warning situations are often imperfect * * *. Under the worst combination of an inaccurate prediction and an ill-conceived public response, the prediction and quake together might even be more costly than an unpredicted quake would have been. But it is our considered judgment that earthquake prediction can be a means for substantially reducing the losses from earthquakes if appropriate social, economic, engineering, and legal actions are taken prior to the quake."

Beyond earthquake prediction, scientists see some potential in the area of earthquake modification and control. By accidents, scientists discovered that earthquakes could be deliberately initiated or mitigated. In 1966, small earthquakes occurred when lethal wastes produced from the Rocky Mountain Arsenal near Grand Junction, Colo., were pumped into the ground. In 1972, the Chevron Co., with U.S. Geological Survey scientists, set off some small quakes when they injected water under pressure into oil wells (a technique used to recover more oil). When the water was pumped out, the earthquake activity ceased. Nevertheless, a technical capability in earthquake modification is still years into the future.

During the past year a step has been taken to further the U.S. capability in earthquake hazards reduction. In a study requested by the President's Science Adviser, a panel on earthquake prediction and hazard mitigation developed a national research plan. The research plan contained proposals in six areas: fundamental earthquake studies, prediction, induced seismicity, hazards assessment, engineering, and research utilization. Funding options were proposed at three levels—low, intermediate, and high. All of these levels were higher than funding levels in past years. The administration has submitted a budget request for fiscal year 1978 consistent with the panels intermediate level proposal.

LEGISLATIVE HISTORY

S. 126 was introduced on January 10, 1977, by Senator Cranston and cosponsored by Senators Hayakawa, Hollings, Magnuson, DeConcini, Gravel, Hansen, Hatfield, Huddleston, Humphrey, Stevens, Thurmond, and Young. It was referred to the Committee on Commerce, Science and Transportation.

The Committee on Commerce was concerned with means to reduce the risk of earthquake hazards since the 92d Congress. On May 16, 1972, hearings were conducted by the committee to consider S. 3173, S. 3392, and S. 3584, bills dealing with earthquake hazard mitigation, and to investigate the adequacy of the Federal response to the February 9, 1971 earthquake which struck San Fernando, Calif. Two bills were subsequently introduced in 1973 by Senator Cranston (S. 1473 and S. 1474), and one by Senator Hollings (S. 1444). Two days of hearings were held on April 26 and 27, 1973, on these bills.

S. 1174 was introduced on March 13, 1975, by Senator Cranston and cosponsored by Senators Hollings, Eagleton, Gravel, Hartke, Hatfield, Humphrey, Javits, Kennedy, McGee, Moss, Stevens, and Tunney. On February 19, 1976, hearings were held on S. 1174.

[1] "Earthquake Prediction and Public Policy," report of the Panel on the Public Policy Implications of Earthquake Prediction, National Research Council (National Academy of Sciences, Washington, D.C.), 1975.

Based on the hearings and comments received, improvements were made to the bill. S. 1174 was reported by the Committee on May 4, 1976. A report was filed May 13, 1976 (Senate Report No. 94–862), by the Committee. The Committee on Labor and Public Welfare to whom the bill was also referred was discharged from further consideration of this bill on May 17, 1976. On May 24, 1976, the Senate passed S. 1174 unanimously.

On April 19, 1977, hearings were held on S. 126. Based on the hearings and comments received, improvements were made to the bill. The version of S. 126 as reported by the Committee on May 5, 1977 is an amended version of the bill.

NEEDS

Earthquakes occur with frequent regularity in the United States. More than 70 million people live in areas of high and moderate seismic risk. Earthquakes have caused and will continue to cause loss of human life, injury, property damage, and social and economic disruption. The risks from future earthquakes will be higher than in the past when the U.S. population was much smaller and more dispersed. Yet no comprehensive national policy and coordinated program exists to reduce the hazards and risks from future damaging earthquakes.

(1) A NATIONAL EARTHQUAKE HAZARD REDUCTION POLICY AND COORDINATED PROGRAM

Federal efforts to deal with earthquake hazards can be found in a number of agencies. Each agency seeks to develop a capability corresponding to its particular institutional mission. A comprehensive policy and community of purpose among individual programs and efforts, does not exist.

No agency or unit has been delegated responsibility for implementing a unified national policy.

(2) RESEARCH AND IMPLEMENTATION SUPPORTING A NATIONAL EARTHQUAKE HAZARD REDUCTION PROGRAM

A prerequisite to any effective decisions and efforts to reduce risks from future damaging earthquakes is development of our research and knowledge base. Federal, State, and local officials, as well as private organizations and interested individuals, need the best possible information on the most effective means to mitigate the hazards of future earthquakes. Earthquakes-related research activities in various Federal agencies have not been supported at levels commensurate with the problems posed by earthquakes and the scientific opportunities that are available. A balanced research program in the physical and social sciences, and engineering is necessary. Furthermore, it is vital that existing and future research findings be utilized. Research findings must be made available to interested and affected user groups so that they may make appropriate decisions.

(3) PUBLIC EDUCATION AND INVOLVEMENT

The use of information and development of an effective program to reduce earthquake hazards must be accomplished at the State, local, and individual level. Yet, the great majority of individuals in this country do not know a great deal about earthquakes and what can be done to minimize risks. Should an earthquake prediction capability become available, for example, its effectiveness and wise utilization would depend greatly on public knowledge and sensitivity to the issues. Moreover, various means already exist to minimize future losses and disruption from earthquakes, but are not used.

MEETING THE NEEDS

(1) S. 126 ESTABLISHES A NATIONAL EARTHQUAKE HAZARDS REDUCTION PROGRAM WITH SPECIFIC OBJECTIVES TO BE ACHIEVED UNDER THE RESPONSIBILITY OF THE PRESIDENT

In view of the need for policy direction and the development and implementation of a comprehensive program to reduce the hazards from earthquakes, this bill sets forth certain findings and policy objectives. The bill recognizes that in order to reduce future human losses, injury, economic damage, and social and economic disruption, a far ranging, balanced, and comprehensive national program is necessary.

The Committee believes that many agencies should be involved in this program, including: the U.S. Geological Survey, the National Science Foundation, the Department of Defense, the Department of Housing and Urban Development, the National Aeronautics and Space Administration, the National Oceanic and Atmospheric Administration, the National Bureau of Standards, the Energy Research and Development Administration, the Nuclear Regulatory Commission, and the National Fire Prevention and Control Administration.

The Committee believes that the President is the individual most capable of coordinating these agencies' efforts and requires that he determine appropriate lead and interagency mechanisms to meet the objectives of the bill. The Committee further believes that the various agencies should actively seek the cooperation of States and their political subdivisions, private organizations, and interested individuals, in the development and implementation of the national program.

The bill provides that Congress shall be made aware of progress achieved in reducing the hazards from earthquakes. An annual report shall be prepared and submitted to the Congress by the President.

For general implementation of duties under S. 126, the President is authorized to expend such sums as may be necessary for each of the fiscal years 1978, 1979, and 1980. This general authorization is to enable agencies other than the U.S. Geological Survey and National Science Foundation and States to participate in the national program as the President recommends.

(2) S. 126 SPECIFIES CERTAIN RESEARCH AND IMPLEMENTATION ACTIVITIES THAT SHALL BE UNDERTAKEN

Recent developments in earthquake prediction suggest that this capability may be used as an additional means for reducing losses from future earthquakes. The science of earthquake prediction could be developed over the next 10 years into an operational capability. S. 126 directs the President to undertake research to develop such a prediction capability in certain areas of the United States. Recognizing that an earthquake prediction technology will produce economic, legal, and social consequences, research to provide information on the nontechnical aspects and implications of earthquake prediction are also specified.

S. 126 provides for other research activities, such as development of further understanding of earthquake modification and control measures, earthquake engineering research, the development of improved design and construction standards, and development of model building codes. S. 126 also directs that ways to increase community preparedness with respect to earthquakes be developed.

To provide for effective implementation and delivery of the research conducted under the program, S. 126 provides that the President shall prepare an implementation plan with year-by-year targets. The plan would provide for measures to increase community preparedness, enable State, county, local and regional government units to use earthquake-related information in their land use decisions, promote improved building standards and construction practices, examination of the role of loan programs, licenses, insurance and relief programs, and dissemination of information. Six months is allowed for preparation of the plan.

For the research elements under S. 126, there are authorized to be appropriated $55, $70, and $80 million for each of the fiscal years 1978, 1979, and 1980.

(3) PUBLIC EDUCATION INVOLVEMENT, AND STATE ASSISTANCE

S. 126 provides for an information dissemination and education program. Such a program is intended to provide other Federal agencies, State and local government officials, and other interested persons with information developed and gathered under the various Federal research activities. The transfer of information and implementation of research fundings will be a necessary component of the national earthquake reduction program.

S. 126 provides that the President shall allow for participation in the national research and implementation program by State and local government officials, the public, business and industry, the design professions and the research community.

S. 126 also provides for an assistance program to the States in carrying out their responsibilities under the Disaster Relief Act of 1974.

ESTIMATED COSTS

In accordance with section 252(a) of the Legislative Reorganization Act of 1970 (2 U.S.C. 190(j)), the Committee estimates the cost of the proposed legislation for which appropriations are authorized will be as follows:

[In millions of dollars]

	Fiscal year—		
	1978	1979	1980
General	(1)	(1)	(1)
To the Secretary of Interior	27.5	35	40
To the National Science Foundation	27.5	35	40

[1] Such sums as may be necessary.

REGULATORY IMPACT STATEMENT

The bill S. 126 provides for the establishment of a national earthquake hazards reduction program to ensure the coordinated development and utilization of scientific and technological knowledge to reduce the hazards resulting from earthquakes. The bill states several objectives of the program, directs the President to involve several Federal agencies in the program, lists various aspects of research that shall be included in the program, directs the President to involve the States in the development of an implementation plan, and provides that, in making grants to States under the Disaster Relief Act of 1974, the President may make grants for the purposes of S. 126.

Because this bill does not regulate private business activity, or any other private activity, the Committee concludes that the implementation of this bill will have no impact on the personal privacy of any individual or business. No records will be required to be kept by any individual or business, nor will there be any reports that need to be filed as a result of S. 126 becoming law.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I reserve the remainder of my time.

The ACTING PRESIDENT pro tempore. The Senator from Tennessee.

Mr. BAKER. Mr. President, I have no

requests for my time or requirement for it. I yield it back.

Mr. ROBERT C. BYRD. I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Delaware is recognized for not to exceed 15 minutes.

U.S. POLICY TOWARD CUBA

Mr. ROTH. Mr. President, I am deeply concerned about recent developments in our policies toward Cuba. The administration and the Senate Foreign Relations Committee are making unilateral concessions to Cuba at the same time Cuba has become a greater threat to American interests than ever before. It is time for the President to talk tough with Cuba.

In the early 1960's, the United States broke off diplomatic relations with the Castro regime and applied a trade embargo on that country, in conjunction with our Latin American allies. This policy expressed our disapproval of a regime that was not only brutal and inhumane at home, but was also a major threat to world peace and its Latin American neighbors. Cuba's willingness to serve as a Soviet missile base in 1962 resulted in the only face-to-face nuclear confrontation between the United States and the Soviet Union.

Cuba's regime has not changed. The same man who summarily executed Cubans and Americans upon taking control is still the head of that government. Cuba still has thousands of political prisoners. Hundreds of individuals with claims to American citizenship have not been allowed to leave. And while Cuban efforts to export revolution have been largely frustrated in Latin America, their mercenaries and advisers have become the cutting edge of Soviet imperialism throughout Africa. The Cubans have not only established one Marxist government in Angola, but they are found directly or indirectly assisting Marxist governments and rebels throughout the continent. On his recent trip through Africa, Premier Castro said nothing to suggest Cuba would reverse its African policies.

In contrast to the policies pursued by President Kennedy and his successors through President Ford, the new administration has been openly encouraging discussion of economic and diplomatic ties with Cuba. Discussions recently took place on fishing zones and "a wide range" of other issues. There have reportedly been discussions within the administration on the establishment of "interests sections" in Washington and Havana to handle direct transactions. Similar interests sections were used by the United States and Egypt when the two countries did not have formal diplomatic relations and for all intents and purposes constituted embassies by another name.

Yesterday, the Senate Foreign Relations Committee approved a proposal to partially restore trade relations. According to the New York Times story, Senator McGOVERN argued that allowing Cuba to export food to the United States—which was not adopted—would have been a hardheaded business proposition that possibly could contribute to an improvement in political relations between the two countries. I agree with Senator STONE, who fought any concession, arguing that unilateral concessions to Cuba would be regarded as a sign of weakness and would throw away valuable bargaining leverage. I will work for reversal of the Foreign Relations Committee concession on the floor.

The Department of State completely copped out, saying that it neither supported nor opposed the proposed partial lifting of the economic boycott.

It is high time for the administration to put an end to this confusion and make a tough, clear statement of U.S. policy toward Cuba. In my judgment, that statement should make it very clear that the United States opposes Cuba's activities in Africa, that it abhores Cuba's internal regime and supports human rights in Cuba, and that it stands firmly behind those American citizens whose assets were nationalized without compensation by the Castro regime.

It should also be made clear that the United States has no great benefits to gain from economic or diplomatic ties with Cuba, and that we do not intend to make any concessions to Cuba except in exchange for some very concrete and substantial Cuban concessions on matters of importance to us. This is what I would call a hard-headed approach.

At the present time, the lack of U.S. international leadership has cast doubts about this country's commitment to freedom. As King Hassan of Morocco said of U.S. African policy in a recent interview with Newsweek magazine:

> . . . There is no policy, but a series of discordant voices from high officials. You Americans conquered space but you are abandoning your place on earth. . . . You no longer seem able to distinguish between friend and foe. . . . We are not telling America to intervene, but to back your friends working in the interests of the Western world with assistance, economic and military, and diplomatic clout.

Our present policies toward a country that has been most active in exporting Communist revolution appear to border on appeasement. No wonder the world doubts us.

Mr. President, I yield back the remainder of my time.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, are there any further orders for the recognition of Senators?

The ACTING PRESIDENT pro tempore. There are none.

AMENDMENT OF THE STANDING RULES OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, I ask that the Senate resume consideration of the motion to proceed to the consideration of the resolution (S. Res. 5).

The ACTING PRESIDENT pro tempore. The clerk will state the pending question.

The legislative clerk read as follows:

> Motion to proceed to the consideration of the resolution (S. Res. 5) to amend the standing rules of the Senate.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess awaiting the call of the Chair.

There being no objection, at 4:14 p.m., the Senate took a recess, subject to the call of the Chair.

The Senate reassembled at 5:50 p.m. when called to order by the Presiding Officer (Mr. ALLEN).

Mr. ROBERT C. BYRD. Mr. President, on behalf of myself, Mr. CRANSTON, Mr. ALLEN, and Mr. HELMS, I am authorized by the distinguished chairman of the Committee on Rules and Administration, Mr. CANNON, to modify Senate Resolution 5 as follows, and I send the modification to the desk and I ask unanimous consent that Senate Resolution 5, as modified, be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution will be modified as requested by the distinguished majority leader.

Mr. ROBERT C. BYRD. I thank the Chair.

The modification is as follows:

In lieu of the language proposed to be inserted by the committee amendment, insert the following:

"That (a) line 5 of the first paragraph of paragraph 2 of rule XXII of the Standing Rules of the Senate is amended by striking out "or the unfinished business," and in the line above inserting "or" before the words "other matter pending before the Senate," and lines 6 and 7 of the second paragraph of paragraph 2 is amended by striking out ", or the unfinished business,".

"(b) After the second paragraph of paragraph 2 of rule XXII of the Standing Rules of the Senate add a new paragraph as follows: "After fifty hours (or period reduced on motion) of consideration of such measure, motion, or other matter, subsequent to invoking cloture, the Presiding Officer shall direct the clerk to call the roll to ascertain the presence of a quorum. Thereafter, a Senator who has not used or yielded 30 minutes is entitled to use only such additional time as will bring his aggregate time on the proposition up to 30 minutes. Any amendment qualified under this rule may be called up before final action is taken on the measure, motion, or matter. After the elapse of 24 hours of consideration, the remaining time may be reduced to a minimum of ten hours by a nondebatable motion agreed to by a two-thirds vote of the Members duly chosen and sworn; however, only one motion to reduce time may be made in any one calendar day. During the fifty hours (or reduced period) of consideration, Senators may yield all or part of their thirty minutes to another Senator, provided, however, that in no event may a Senator be yielded more than an aggregate of thirty minutes.

(c) The last paragraph of paragraph 2 of rule XXII of the Standing Rules of the Senate is amended by striking out the first sentence and inserting in lieu thereof the following: "After cloture has been invoked each Senator shall be entitled to speak for one-half hour on the measure, motion, or other matter pending before the Senate, the amendments thereto, and motions affecting the same, and it shall be the duty of the Presiding Officer to keep the time of each Senator who speaks.".

(d) After the last paragraph of paragraph 2 of rule XXII of the Standing Rules of the Senate, insert the following new paragraph: "No such cloture motion may be presented with respect to any measure, motion (except a motion to proceed to the consideration of any measure or other matter), or other matter pending before the Senate unless 24 hours have elapsed since the Senate began consideration of such measure, motion, or other matter.

SEC. 2. Paragraph 1 of rule III of the Standing Rules of the Senate is amended by striking out all after the words "unless by unanimous consent" and inserting in lieu thereof the following: "or on motion decided without debate. Motions to correct the Journal shall be privileged, shall be confined to an accurate description of the proceedings of the preceding day, and debate thereon shall be limited to twenty minutes to be equally divided and controlled between the mover thereof and the Majority Leader or his designee.".

SEC. 3. Rule XV of the Standing Rules of the Senate is amended by adding at the end thereof the following new paragraph:

"3. The demand for the reading of an amendment when presented to the Senate for consideration, including House amendments, may be waived on motion decided without debate when the proposed amendment has been identified by the clerk and is available to all Members at their desks in printed form.".

SEC. 4. Paragraph 1 of rule XXVII of the Standing Rules of the Senate is amended by adding at the end thereof the following: "The demand for the reading of a conference report when presented may be waived on motion decided without debate when the report is available to all Members at their desks in printed form.".

Mr. STEVENS. Mr. President, the modified version of Senate Resolution 5 will be submitted to the Republican conference tomorrow. It is our hope that we will be authorized to add our names as cosponsors, and I am sure at the appropriate time, if that is possible, the majority leader will consent.

Mr. ROBERT C. BYRD. Exactly, yes, and I thank the distinguished minority whip for his statement.

TIME LIMITATION AGREEMENT—SENATE CONCURRENT RESOLUTION 19

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a time limitation on the congressional budget resolution, Senate Concurrent Resolution 19, of 1 hour, to be equally divided between Mr. MUSKIE and Mr. BELLMON, at the conclusion of which a vote occur on the adoption of the conference report.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, there is one nomination on the Executive Calendar that has been cleared for action on both sides of the aisle.

I ask unanimous consent that the Senate go into executive session to consider the nomination of Manuel D. Plotkin, of Illinois, to be Director of the Census.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

DEPARTMENT OF COMMERCE

The legislative clerk read the nomination of Manuel D. Plotkin, of Illinois, to be Director of the Census.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I hold in my hand two reports of nominations that have been reported today, one being the nomination of David V. Vrooman, of South Dakota, to be U.S. attorney for the District of South Dakota. This nomination has been reported by the Committee on the Judiciary. Mr. ABOUREZK has asked that the nomination be taken up today. It is cleared on both sides of the aisle.

I ask unanimous consent that the Senate proceed to the consideration of the nomination.

The PRESIDING OFFICER. The nomination will be stated.

DEPARTMENT OF JUSTICE

The assistant legislative clerk read the nomination of David V. Vrooman, of South Dakota, to be U.S. Attorney for the District of South Dakota.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, the second nomination which has been reported today is that of Leslie Jay Goldman, of Illinois, to be an Assistant Administrator of the Federal Energy Administration.

The chairman of the committee (Mr. JACKSON) has asked that this nomination be confirmed today. It is my understanding there is no objection on either side of the aisle.

I, therefore, ask unanimous consent that the Senate proceed to the consideration of that nomination.

The PRESIDING OFFICER. The nomination will be stated.

FEDERAL ENERGY ADMINISTRATION

The legislative clerk read the nomination of Leslie Jay Goldman, of Illinois, to be an Assistant Administrator of the Federal Energy Administration.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be notified of the confirmation of the nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business with statements therein limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

There will be a period for the transaction of routine morning business with statements by Senators limited to 5 minutes each.

Is there morning business?

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

S. 1503—REIMBURSEMENT FOR BUSINESSES AFFECTED BY BAN ON TRIS

Mr. THURMOND. Mr. President, I rise today to introduce legislation which would provide direct financial reimbursement for those businesses adversely affected by the Consumer Product Safety Commission's recent ban on the fire-retardant chemical known as TRIS.

Mr. President, by way of background, under the authority of the Flammable Fabrics Act, the Department of Commerce issued regulations in 1971 and again in 1974 imposing stringent standards for flammability of children's sleepwear. Notwithstanding the expressed reservations of industry representatives regarding potential health hazards, the sudden imposition of those standards necessitated the rapid development and use of flame-retardant chemicals. TRIS became the most widely used such flame-retardant. However, a new test for mutagenicity was developed in 1976 and indicated that TRIS might be toxic. Accordingly, the Consumer Product Safety Commission on April 7, 1977, banned the sale of all children's wearing apparel containing TRIS and has ordered the producers of such wearing apparel to "repurchase" it from retailers and consumers.

The Commission's "repurchase" order will cost the producers of children's apparel and the flame-retardant materials from which it is made approximately $200 million. In the apparel manufacturing industry alone, it will mean bankruptcy for many of the roughly 100 companies which produce childrens sleepwear, and many of that industry's 25,000 employees will lose their jobs. Most other firms will suffer severe financial impairment and will be forced to lay off employees. Because the manufacturers involved have

acted in good faith to meet the flammability standards mandated by the Federal Government, it is unfair to require them to bear the financial loss caused by this bureaucratic mistake.

This legislation would confer jurisdiction on the U.S. Court of Claims to determine the dollar value and render judgment for losses sustained by producers, processors, manufacturers, distributors, or dealers, or other persons, as a result of actions taken by the Federal Government under the Hazardous Substances Act relating to the ban on apparel, fabric, yarn or fiber containing TRIS. Lost profits would not be included. There would be a 2-year statute of limitations as provided in the Tort Claims Act.

The imposition of the repurchase obligation has already caused suppliers and financial institutions to deny apparel manufacturers the credit essential to purchase fabric for use in their fall line of apparel. To date, at least nine apparel manufacturing firms, accounting for approximately 2,000 jobs, are threatened with bankruptcy. Unless financial institutions and suppliers are reassured at an early date that apparel manufacturers will be able to meet the repurchase obligation, many more such firms will be forced out of business.

Mr. President, the inequity involved here is readily apparent. Confidence in Government regulation must be restored in the American business community. I hope and believe that this proposal is one way to re-instill this confidence, and ask my colleagues for their support.

The following Senators have joined me as cosponsors of this measure: The Senator from South Carolina (Mr. HOLLINGS), the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. HELMS), and the Senators from Georgia (Mr. TALMADGE and Mr. NUNN).

Mr. President, I send the bill to the desk and ask that it be printed in the RECORD following my remarks and appropriately referred to the Committee on the Judiciary.

The PRESIDING OFFICER (Mr. SASSER). By unanimous consent, the bill will be received and referred to the Committee on the Judiciary, and, without objection, the bill will be printed in the RECORD.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, would the bill be referred to the Committee on the Judiciary in any event?

The PRESIDING OFFICER. The Chair has not seen the bill.

Mr. THURMOND. Mr. President, I do not think there would be any question about that, because the committee would have to determine that it goes to the Court of Claims.

Mr. ROBERT C. BYRD. Then is would go to Judiciary anyway?

Mr. THURMOND. Yes.

Mr. ROBERT C. BYRD. Very well; I have no objection.

The bill (S. 1503) is as follows:

S. 1503

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Court of Claims shall have jurisdiction to render judgment upon any claim for losses sustained by any producer, processor, manufacturer, distributor, dealer or other person as a result of the actions taken by the United States under the Federal Hazardous Substances Act on April 8, 1977, and thereafter relating to the ban on apparel, fabric, yarn, or fiber containing Tris (2, 3-dibromoprophyl) phosphate. Such court determine the amount of direct and indirect loss, but not including lost profits, resulting to any producer, processor, manufacturers, distributor, dealer or other person from said actions by the United States and render judgment in favor of such claimant and against the United States in the amount determined. Payment of such judgments shall be in the same manner as in the case of claims over which such court otherwise has jurisdiction as provided by law. Suits under this Act must be instituted within two years after enactment hereof.

Mr. HELMS. Mr. President, I join with the able Senator from South Carolina in the cosponsorship of this measure. As he has indicated, the bureaucratic mixup involving TRIS will destroy thousands of jobs in a number of States, including my own State of North Carolina. Two weeks ago, the Consumer Products Safety Commission ruled that TRIS may cause cancer, and banned its use. Furthermore, the Commission ruled that the cutters and sewers of children's sleepwear had to buy back all sleepwear treated with TRIS.

Let two or three things be absolutely clear, Mr. President, in terms of the Federal bureaucracy and the way it operates.

First, the sleepwear industry, the sewers, did not order TRIS to be put into the cloth to be used in the production of pajamas, nightgowns, and so forth. The sleepwear industry did not manufacture TRIS. The sleepwear industry did not manufacture the cloth. This was totally beyond the control of the industry.

The bureaucrats moved in; they demanded this, and as a result, if information available to me is correct, and I believe it is, at least 30 factories in North Carolina will have to close because of this bureaucratic mixup, and at least 30,000 jobs will be lost.

So the measure that the able Senator from South Carolina has introduced on behalf of himself, the Senator from North Carolina, and others involves just simple equity. The Federal Government made another mistake. The bureaucracy moved in without knowing what it was doing; and it is not satisfactory to the Senator from North Carolina for the bureaucracy to say, "Well, we are sorry about that. Too bad it is going to cost 30,000 jobs. Too bad that 30 plants in North Carolina are going to have to close."

This bill, as I say, would just provide simple equity. It ought to be passed, and ought to be passed quickly. I commend the able Senator from North Carolina for its introduction, and I am pleased to join in its cosponsorship.

Mr. THURMOND. Mr. President, I thank the able Senator from North Carolina for those remarks and for his fine cooperation in this matter. The distinguished Senator from North Carolina has many textile plants in his State that would be seriously affected. He always looks out for the people of his State, and I am not surprised that he has joined as a cosponsor here. That would be characteristic of him, because he is always on the ball and looks after his constituents in a very able manner.

Mr. HELMS. I thank the distinguished Senator from South Carolina.

Mr. President, I yield back the remainder of my time.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess awaiting the call of the Chair.

The PRESIDING OFFICER. Without objection, it is so ordered.

Thereupon, at 6:07 p.m., the Senate took a recess, subject to the call of the Chair.

The Senate reassembled at 6:10 p.m., when called to order by the Presiding Officer (Mr. SASSER).

ORDER FOR RECESS UNTIL 9:45 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 9:45 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR HEINZ TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the two leaders or their designees have been recognized under the standing order tomorrow, Mr. HEINZ be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO CONSIDER CONFERENCE REPORT ON FIRST CONGRESSIONAL BUDGET RESOLUTION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that following the recognition of Mr. HEINZ and the consummation of the order previously entered for his recognition tomorrow, the Senate proceed to the consideration of the conference report on the First Congressional Budget Resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR NO ROLLCALL VOTES PERTAINING TO CONGRESSIONAL BUDGET RESOLUTION TO OCCUR BEORE 12 O'CLOCK NOON

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that if there is any rollcall vote ordered on the adoption of the Congressional Budget Resolution tomorrow, or in relation thereto, such rollcall vote not occur before the hour of 12 o'clock noon.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGE FROM THE HOUSE

At 4:05 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its clerks, announced that the House agrees to the amendment of the Senate to the bill (H.R. 4975) to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for biomedical research and related programs, with an amendment; that the House insists upon its amendment and requests a conference with the Senate on the disagreeing votes of the two Houses thereon; and that Mr. STAGGERS, Mr. ROGERS, Mr. SATTERFIELD, Mr. CARTER, and Mr. BROYHILL were appointed managers of the conference on the part of the House.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC–1316. A letter from the Assistant Secretary of Defense transmitting, pursuant to law, a report of the value of property, supplies, and commodities provided by the Berlin Magistrate, and under the German Offset Agreement, for the quarter January 1, 1977 through March 3, 1977; to the Committee on Appropriations.

EC–1317. A letter from the Secretary of the Navy transmitting, pursuant to law, a draft of proposed legislation to amend section 6015 of title 10, United States Code, to permit the Secretary of the Navy to prescribe the kind of military duty to which women members of the naval service may be assigned (with accompanying papers); to the Committee on Armed Services.

EC–1318. A letter from the Chief of Staff of the Defense Mapping Agency transmitting, for the information of the Senate, an announcement of plans to study the feasibility of combining the DMA Hydrographic Center and the DMA Topographic Center (with accompanying papers); to the Committee on Armed Services.

EC–1319. A letter from the Deputy Administrator of the General Services Administration transmitting a draft of proposed legislation to amend the Defense Production Act of 1950, as amended (with accompanying papers); to the Committee on Banking, Housing and Urban Affairs.

EC–1320 A letter from the Controller of the Energy Research and Development Administration transmitting, for the information of the Senate, copies of the ERDA's fiscal year 1976 financial statements for the Uranium Enrichment Services Activity (with an accompanying report); to the Committee on Energy and Natural Resources.

EC–1321. A letter from the Assistant Secretary of the Interior transmitting, pursuant to law, a proposed contract with Longyear Company, Minneapolis, Minnesota, for a research project entitled "Retractable Bit System" (with accompanying papers); to the Committee on Energy and Natural Resources.

EC–1322. A letter from the Assistant Secretary of the Interior transmitting, pursuant to law, a proposed contract with Fluor Utah, Incorporated, San Mateo, California, for a research project entitled "Optimal Dragline Operating Techniques" (with accompanying papers); to the Committee on Energy and Natural Resources.

EC–1323. A letter from the Deputy Administrator of the General Services Administration transmitting, pursuant to law, a prospectus proposing extension of General Services Administration's lease agreement covering space in the Hill Building, Anchorage, Alaska (with an accompanying report); to the Committee on Environment and Public Works.

EC–1324. A letter from the Acting National Director of the Federal Mediation and Conciliation Service transmitting, pursuant to law, a copy of the 29th annual report of the Federal Mediation and Conciliation Service for the fiscal year and transition period ending September 30, 1976 (with an accompanying report); to the Committee on Human Resources.

EC–1325. A letter from the Administrator of the Federal Energy Administration transmitting, pursuant to law, a report on the administration of the Freedom of Information Act for the calendar year 1976 (with an accompanying report); to the Committee on the Judiciary.

EC–1326. A letter from the Chairman of the Administrative Conference of the United States transmitting a draft of proposed legislation to amend the Administrative Conference Act (with accompanying papers); to the Committee on the Judiciary.

FIRST CONCURRENT RESOLUTION ON THE BUDGET, 1978—CONFERENCE REPORT SUBMITTED DURING RECESS (REPT. NO. 95–134)

Under authority of May 11, 1977, Mr. MUSKIE, from the committee of conference, submitted a report on the disagreeing votes of the two Houses on the amendment of the House to the concurrent resolution (S. Con. Res. 19) setting forth the congressional budget for the U.S. Government for the fiscal year 1978 (and revising the congressional budget for fiscal year 1977), which was ordered to be printed.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary:

Without amendment:

S. Res. 170. An original resolution authorizing additional expenditures by the Committee on the Judiciary for inquiries and investigations. Referred to the Committee on Rules and Administration.

By Mr. HASKELL, from the Select Committee on Small Business:

Without amendment:

S. Res. 171. An original resolution waiving the provisions of section 402(a) of the Congressional Budget Act of 1974 with respect to S. 1305. Referred to the Committee on the Budget.

By Mr. ROTH, from the Committee on Governmental Affairs:

With amendments:

S. 904. A bill to provide for the efficient and regular distribution of current information on Federal domestic assistance programs (Rept. No. 95–135).

By Mr. EASTLAND, from the Committee on the Judiciary:

Without amendment:

S. 837. A bill granting the consent of Congress to the Mississippi-Louisiana Bridge Construction Compact (Rept. No. 95–136).

S.J. Res. 24. A joint resolution to authorize and request the President to issue annually a proclamation designating the first Sunday of September after Labor Day of each year as "National Grandparents Day" (Rept. No. 95–137).

By Mr. NELSON, from the Select Committee on Small Business:

With an amendment:

S. 1305. A bill to amend the Small Business Act to authorize the making of economic injury disaster loans in certain extraordinary circumstances without a disaster declaration, and for other purposes (Rept. No. 95–138).

By Mr. ROBERT C. BYRD, from the Committee on Rules and Administration:

S. Res. 5, as modified. A resolution to amend the Standing Rules of the Senate.

By Mr. PROXMIRE, from the Committee on Banking, Housing and Urban Affairs:

Without amendment:

S. 425. A bill to authorize the President of the United States to present on behalf of the Congress a special struck gold medal to Lt. Gen. Ira C. Eaker, U.S. Air Force, retired (Rept. No. 95–139).

By Mr. PELL, from the Committee on Human Resources:

With amendments:

S. 701. A bill to provide Federal financial assistance to educational institutions in order to assist such institutions to meet the emergency caused by the high costs of fuel and fuel shortages and harsh weather conditions, and for other purposes (Rept. No. 95–141).

H.R. 3437. An act to make certain technical and miscellaneous amendments to provisions relating to vocational education contained in the Education Amendments of 1976 (Rept. No. 95–142).

With an amendment:

S. 602. A bill to extend and revise the Library Services and Construction Act, and for other purposes (Rept. No. 95–143).

By Mr. RANDOLPH, from the Committee on Human Resources:

Without amendment:

S. 469. A bill to establish a commission to study proposals for establishing the National Academy of Peace and Conflict Resolution (Rept. No. 95–140).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. SPARKMAN, from the Committee on Foreign Relations:

Ralph Anthony Dungan, of New Jersey, to be Executive Director of the Inter-American Development Bank for a term of 3 years.

Eugene Jay Finkel, of the District of Columbia, to be Alternate Executive Director of the Inter-American Development Bank.

Lester E. Edmond, of Florida, to be U.S. Director of the Asian Development Bank.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

POLITICAL CONTRIBUTIONS STATEMENT

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Lester Elliot Edmond.

Post: Executive Director to Asian Development Bank.

Nominated: May 3, 1977.

Contributions, amount, date and donee:

1. Self: Lester E. Edmond, none.

2. Spouse: Shom A. Edmond, none.

3. Children and Spouses:

Lester E. Jr. (Edmond), none.

Ellen Randi Edmond, none.

John Andrew Edmond, none.

4. Parents: David Edmond, none; Ella Edmond, none.

5. Grandparents: Deceased.

6. Brothers and Spouses: No brothers.

7. Sisters and Spouses: No sisters.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

By Mr. EASTLAND, from the Committee on the Judiciary:

Anthony G. Dirienzo, Jr., of Connecticut, to be U.S. marshal for the district of Connecticut.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. JACKSON, from the Committee on Energy and Natural Resources:

Leslie Jay Goldman, of Illinois, to be an Asistant Administrator of the Federal Energy Administration.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. JACKSON. Mr. President, the Committee on Energy and Natural Resources has reported favorably the nomination of Leslie J. Goldman to be Assistant Administrator of the Federal Energy Administration.

Mr. Goldman appeared before the committee at a hearing last Wednesday. I ask unanimous consent that his statement to the committee be printed in the RECORD at this point.

In accordance with the committee's rules, Mr. Goldman submitted a sworn financial statement to the committee. I ask unanimous consent that this statement also be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT BY LESLIE J. GOLDMAN, NOMINEE TO BE ASSISTANT ADMINISTRATOR FOR ENERGY RESOURCE DEVELOPMENT, FEDERAL ENERGY ADMINISTRATION

Mr. Chairman and Members of the Committee, I am deeply honored to return to the Senate this morning and appear before this Committee as the nominee for Assistant Administrator for Energy Resource Development of the Federal Energy Administration.

After working here for seven years, and being away for only a few months, it feels good to be back.

This is a particularly exciting homecoming for me, because it is a particularly exciting time in the evolution of the nation's national energy policy. We face a serious and worsening energy problem, with the time for decisive action already overdue. If working in the legislative branch on energy problems over the last several years has taught me anything, it is the importance of cooperation between the Executive and the Congress in the process that leads to enactment of meaningful energy legislation.

I look forward to the challenge of contributing to that process in an area that, to date, has not received the attention it deserves—the area of energy resource development.

If conservation is the cornerstone of the President's National Energy Plan, I believe resource development is its foundation. Maintaining oil and gas production, substantially increasing use of coal, developing renewable resources like solar and maintaining adequate and efficient electrical capacity are all major priorities of the National Energy Plan.

They are also major responsibilities of the Assistant Administrator for Energy Resource Development.

I believe the coal conversion program can be made to work; that solar energy can soon find its way into the "Yellow Pages" and the "Sears" catalogue; that oil and gas production incentives can be increased without hurting the economy; and that the reliability and safety of electrical power generation can be improved.

In short, I think the President's goals are attainable, and am hopeful that the Administration and the Congress can work together to finally implement a comprehensive program that will get the job done.

If the Committee and Senate should so choose, I would be honored to have the opportunity to play a role in that historic process.

[U.S. Senate, Committee on Interior and Insular Affairs, Washington, D.C.]

INFORMATION REQUESTED OF PRESIDENTIAL NOMINEES

Rule 9 of the Rules of the U.S. Senate Committee on Interior and Insular Affairs requires that each Presidential nominee considered by the Committee shall submit a financial statement sworn to by the nominee as to its completeness and accuracy. Under the rule all such statements must be made public by the Committee unless the Committee in executive session determines that special circumstances necessitate a full or partial exception to this requirement. Rule 9 also provides that at any hearing to confirm a Presidential nomination, the testimony of the nominee and, at the request of any member, any other witness shall be under oath.

In order to assist the Committee in its consideration of nominations, each nominee is requested to complete the attached Financial Statement and Statement For Completion By Presidential Nominees.

The original and twenty (20) copies of the requested information should be made available to Honorable Henry M. Jackson, Chairman, Committee on Interior and Insular Affairs, U.S. Senate, Washington, D.C. 20510 (Attn: Staff Director) as soon as possible.

FINANCIAL STATEMENT OF LESLIE J. GOLDMAN

Provide a complete, current financial net worth statement which itemizes in detail all assets (including bank accounts, real estate, securities, trusts, investments, and other financial holdings) and all liabilities (including debts, mortgages, loans, and other financial obligations) of yourself, your spouse, and other immediate members of your household.

ASSETS

Cash on hand and in banks, $9,300.

Accounts and notes receivable: due from relatives and friends, $2,000.

Real estate interests, including mortgages—add schedule, $130,000.

Personal property, $14,500.

Life insurance—cash value, $500.

Other assets—itemize: one-half interest in store (KiteSite), $20,000.

Total assets, $176,300.

LIABILITIES

Real estate mortgages payable—add schedule, $53,000.

Total liabilities, $53,000.

Net worth, $123,300.

SCHEDULE FOR ASSETS

Real estate:

Home, 718 Fourth Street, SE., D.C., $85,000.

One-half interest rental property, 720 Fourth Street, SE., D.C., $45,000.

Total, $130,000.

SCHEDULE FOR LIABILITIES

Real estate mortgages payable:

Mortgage on home—Dominion National Bank, Falls Church, Virginia, $26,000.

Mortgage on Rental Property—Metropolis Federal Savings, Washington, D.C., $27,000.

Total, $53,000.

1. List sources, amounts and dates of all anticipated receipts from deferred income arrangements, stock options, uncompleted contracts and other future benefits which you expect to derive from previous business relationships, professional services and firm memberships or from former employers, clients, and customers—

The Kite Site, 1075 Wisconsin Ave., Washington, D.C.

Partner, one-half owner (Retail sales of kites from around the world).

Initial investment: $6,000. Opened in June, 1976. First 6 months share of profits: $600.

Goldman-Humphries, 718 Fourth Street, S.E., Washington, D.C. 20003.

Partnership (own one-half interest in rental house at 720 Fourth Street, S.E.).

Initial investment: $37,500. Purchased, August, 1976.

2. Are any assets pledged? None.

3. Are you currently a party to any legal action? None.

4. Have you ever declared bankruptcy? None.

STATEMENT FOR COMPLETION BY PRESIDENTIAL NOMINEES

Name: Leslie J. Goldman.

Position to which nominated: Assistant Administrator, FEA.

Date of nomination: April 7, 1977.

Date of birth: April 22, 1945.

Place of birth: Chicago, Illinois.

Marital status: Married.

Full name of spouse: Sue Ann.

Name and ages of children: None.

Education:

Institution—University of Michigan, Ann Arbor, Michigan.

Dates attended—1963–1970.

Degrees received and dates of degrees—Honors, B/A English, 1967; Juris Doctor, 1970.

Honors and awards: List below all scholarships, fellowships, honorary degrees, military medals, honorary society, memberships, and any other special recognition for outstanding service or achievement—

Graduated from University of Michigan with B.A. in Honors English (1 of 17 in school); Angell Scholarship Recipient, University of Michigan, 1965, 66, 67, 68. Fisher Body Craftsmen Guild, National Styling Scholarship Award, Summer 1964, $1,000.

Memberships: List below all memberships and offices held in professional, fraternal, business, scholarly, civic, charitable and other organizations—

Organization: Illinois Bar.

Office held (if any): Member.

Dates: 1970 to present.

Employment record: List below all positions held since college, including the title and description of job, name of employer, location, and dates—

February 16, 1977 to present, Dr. James Schlesinger, OEOB, Energy Advisor.

April 28, 1970 to February 16, 1977, Sen. Adlai E. Stevenson, U.S. Senate, Special Counsel.

May 25, 1970 to November 7, 1970, Ross, Hardies, O'Keefe, Lawyer, Babcock & Parsons, 121 Michigan Avenue, Chicago, Illinois.

November 1969 to May 1970, The Research Group, Lawyer, Ann Arbor, Michigan.

May 1968 to September 1968, Arnstein, Gluck, Summer Intern, Weisenfeld and Minow, 120 South LaSalle, Chicago, Illinois.

Summers, 1964 to 1968, Avis Rent-A-Car, O'Hare International Airport, Chicago, Illinois, Assistant to Airport Manager.

Government experience: List any experience in or direct association with Federal, State, or local governments, including any advisory, consultative, honorary or other part-time service or positions—

Special Counsel to U.S. Senator Adlai E. Stevenson, 1970 to 1977.

Duties: I. Director of State Projects. Developed the grant serving and state information systems that helped the State of Illinois improve its per capita rank for all federal expenditures from 48 in 1970 when Senator Stevenson was elected to 39 in 1976—the fastest rate of increase of any state in the Union.

II. Counsel to the Oil & Natural Gas Production & Distribution Subcommittee of the Senate Commerce Committee, Sen. Adlai E. Stevenson, Subcommittee Chairman.

Qualifications: State fully your qualifications to serve in the position to which you have been named—(attach sheet).

Future employment relationships:

1. Indicate whether you will sever all connections with your present employer, business firm, association or organization if you are confirmed by the Senate—No. Hopefully will continue to work with Dr. Schlesinger.

2. As far as can be foreseen, state whether you have any plans after completing government service to resume employment, affiliation or practice with your current or any previous employer, business firm, association or organization—No.

3. Has anybody made you a commitment to a job after you leave government?—No.

4. Do you expect to serve the full term for which you have been appointed?—Yes.

Potential conflicts of interest:

1. Describe any financial arrangements or deferred compensation agreements or other continuing dealings with business associates, clients or customers who will be affected by policies which you will influence in the position to which you have been nominated—None.

2. List any investments, obligations, liabilities, or other relationships which might involve potential conflicts of interest with the position to which you have been nominated—None.

3. Describe any business relationship, dealing or financial transaction (other than taxpaying) which you have had during the last 10 years with the Federal Government, whether for yourself or relatives, on behalf of a client, or acting as an agent, that might in any way constitute or result in a possible conflict of interest with the position to which you have been nominated—None.

4. List and describe any lobbying activity during the past 10 years in which you have engaged for the purpose of directly or indirectly influencing the passage, defeat or modification of any legislation at the national level of government or for the purpose of affecting the administration and execution of national law or public policy—As Senator Adlai Stevenson's Special Counsel, I have participated and worked on both the passage and administration of every major piece of energy legislation, from the perspective of a legislative staffer, over the last five years.

5. Explain how you will resolve any potential conflict of interest that may be disclosed by your responses to the above items—Not Applicable.

LESLIE J. GOLDMAN'S QUALIFICATIONS TO SERVE AS ASSISTANT ADMINISTRATOR FOR ENERGY RESOURCE DEVELOPMENT

I believe I am qualified to serve as Assistant Administrator of the Federal Energy Administration for Resource Development by virtue of my intimate involvement in the development and oversight of resource-related legislation and programs in the United States Congress over the last four years.

As counsel to Senator Adlai E. Stevenson's Special Subcommittee on Oil and Natural Gas Production and Distribution of the Senate Commerce Committee, from its inception in 1973 until earlier this year, I participated in developing, drafting, and staffing members of the Subcommittee during Senate floor action associated with major legislation involving oil, natural gas, nuclear power and conservation programs. In addition, I have also followed and participated in the development of energy legislation involving coal as well as research and development of new, alternative energy technologies. Most recently, I helped draft the Emergency Natural Gas Act passed and successfully implemented earlier this year.

In the course of my activities on the Oil and Natural Gas Subcommittee, I worked closely with the staff, and often Members, of the Senate Interior Committee, now the Committee on Energy and Natural Resources, and the House Committee on Interstate and Foreign Commerce, Subcommittee on Energy and Power.

Based on my substantive experience and the working relationships developed over the years with many of the Members and staff who will be playing a major role in the development and review of future energy legislation, I believe I am uniquely qualified to execute the responsibilities of Assistant Administrator for Energy Resource Development.

I believe the invisible yet worsening energy crisis is one of the most serious threats facing the Nation today. The time is growing late for comprehensive action—action which includes positive programs for developing the Nation's conventional and unconventional energy resources. I think I can make a contribution toward getting that job done as Assistant Administrator for Energy Resource Development at the Federal Energy Administration.

By Mr. ABOUREZK, from the Committee on the Judiciary:

David V. Vroom, of South Dakota, to be U.S. attorney for the district of South Dakota.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. METCALF:

S. 1500. A bill to designate certain lands in the State of Alaska as units of the National Park, National Wildlife Refuge, National Wild and Scenic Rivers, and National Wilderness Preservation Systems, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. GARN:

S. 1501. A bill to amend the Truth in Lending Act; to the Committee on Banking, Housing and Urban Affairs.

By Mr. STEVENS:

S. 1502. A bill to amend title 18, United States Code, to make a crime the willful destruction of any interstate pipeline system; to the Committee on the Judiciary.

By Mr. THURMOND (for himself, Mr. HOLLINGS, Mr. EASTLAND, Mr. HELMS, and Mr. TALMADGE):

S. 1503. A bill to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn or fiber and for other purposes; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. METCALF:

S. 1500. A bill to designate certain lands in the State of Alaska as units of the National Park, National Wildlife Refuge, National Wild and Scenic Rivers, and National Wilderness Preservation Systems, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. METCALF. Mr. President, it is with particular pleasure that I send to the desk for introduction the Alaska National Interest Lands Conservation Act. I am especially pleased because this proposal to more than double our National Park and Wildlife Refuge Systems is one of our Nation's most challenging opportunities. When completed, it will go down in history as one of our Nation's greatest conservation achievement. Moreover, this is a one-time opportunity. It will not wait for us while we dally. It is our Nation's last chance to take bold and imaginative action to protect our most spectacular scenic wildlife and wilderness resources. I daresay that the Members of this body will not cast a more important conservation vote than the one on this bill.

COMPANION TO H.R. 39

This bill is the Senate companion to H.R. 39, introduced in the other body by my good friend and colleague, MORRIS UDALL, the chairman of the House Interior and Insular Affairs Committee. I commend Congressman UDALL and his coleader JOHN SEIBERLING, the chairman of the Subcommittee on General Oversight and Alaska Lands, for their inspired leadership. H.R. 39 now has more than 80 House sponsors and is presently the subject of continuing hearings. Their leadership is most encouraging, for to capture the potential of this opportunity will require a monumental effort.

It is essential, however, to have an early start in both Houses of Congress, as well as strong leadership from the administration. I have talked to the chairman of the Energy and Natural Resources Committee, and he has pledged that our committee will move ahead quickly with hearings this year, and a field trip this summer to Alaska.

NATIONAL PARK AND WILDLIFE REFUGE SYSTEMS

It was our Nation in 1872 that pioneered the national park concept with the establishment of Yellowstone National Park. This idea of national parks, conceived around a campfire by a group of distinguished citizens who were awed by what they had seen in the Yellowstone area, has developed into a National Park System of over 300 units, and spread to many foreign nations.

It was also our Nation in 1903 which initiated the National Wildlife Refuge System, when President Theodore Roosevelt established by Executive order the first Federal wildlife sanctuary, Pelican Island. From such a modest beginning,

the National Wildlife Refuge System has developed into mankind's most significant wildlife habitat management program. It is only appropriate that our Nation once again should take the initiative to achieve the imaginative potential that lies before us in Alaska.

WHOLE ECOSYSTEM—NATIONAL PARKS AND WILDLIFE REFUGES

Alaska presents us with the opportunity to more than do again what it has taken us over 100 years to do in other States: Triple the size of the National Park System and more than double the area of the National Wildlife Refuge System. Increasingly, the National Parks and Wildlife Refuge issues coming before us possess severe management problems.

I recall the effective leadership of our late distinguished colleague, the honorable Paul Douglas, who fought so courageously for the establishment of the Indiana Dunes National Lakeshore. After years of diligent labor, a park was established, which, due to its small size, proved to be unmanageable. So again after several years of labor, and endless hearings and markups, Congress added land to this park last year. And now I understand that even this may be inadequate.

The saddest thing is that back in the 1920's, Congress had the opportunity to create an unequaled national park in this area, as proposed and championed by the first director of the National Park Service, Stephen Mather.

There is a unique opportunity, available only in Alaska, to protect coherent ecological units. Ecosystems are open-ended units, seldom amenable to total protection. But to a remarkable degree, it is possible to encompass entire watersheds of large rivers, entire home ranges of many animal species, and entire physiographic units such as the foothill zones of the Lake Clark and Gates of the Arctic proposals.

The object is to enclose tracts internally related in character—such as watersheds—and extensive enough to provide sufficient area and sufficient habitat diversity to assure the long-term survival of all its components. The primary goal is to establish such units so that most of the organisms within it, as well as their interrelationships, can live on indefinitely, with minimal direct or indirect disturbance from the developmental activities of man. Will we use this opportunity, or fail in our leadership responsibility—in which case the next generation may say of us, "If only they would have acted on their vision?" This is what was more nearly done in Yellowstone, which most closely approaches the ecosystem ideal. When it was established, it was inaccessible and very distant from where most Americans lived. Now, today, this park supports more than 2 million visitors annually.

In contrast to the Indiana Dunes National Lakeshore situation, the proposals in my bill contain whole watersheds and ecosystems which will not possess the management problems which we have experienced with the Indiana Dunes. Nor will these areas have the problems experienced with the Redwood National Park which we are now having to expand at tremendous cost, nor with the necessity of establishing the Big Cypress Swamp National Preserve to safeguard Everglades National Park's water supply. Furthermore, this bill is consistent with the decision of Congress in the last session to stop dual administration of a single area by more than one Federal agency. We seek to have cooperation, not competition, between agencies.

THE DIVISION OF ALASKA

Once all of Alaska was federally owned, but we are presently divesting much of this land. When Congress created the State of Alaska in 1958, the act provided the State with the right to carve out 104 million acres to establish a land base. But then Alaska Natives said that they owned Alaska by aboriginal right, and that when the United States purchased Alaska from Russia, our country acquired sovereignty, but not land ownership.

Later, oil was discovered on State-selected lands on the North Slope, and the conflict over Alaska lands became intense. A freeze was put on all land disposal by the Secretary of the Interior, pending resolution of Native claims. Then another voice began to be heard clearly: that of the national interest to protect the nationally significant, scenic, wildlife, and wilderness values of Alaska's Federal land for all the shareholders—the American people.

Thus, when Congress settled the Native claims with the passage of the Alaska Native Claims Settlement Act, provision was made for the Congress to set aside lands in the national interest as national parks, wildlife refuges, forests, and wild and scenic rivers by December of 1978. We directed the Secretary of Interior to make recommendations to the Congress for additions to these four systems. The Secretary submitted his recommendations by the deadline of December 1973, providing us a basic, yet minimum, plan.

PROHIBIT NEW MINING CLAIMS

Last Congress, we were distressed to learn that in several units of the National Park System strip mining was occurring. We further learned after investigation that even more units were open to location under the mining laws. To stop the unfortunate destruction and devastation of such famous areas as Death Valley National Monument and Mt. McKinley National Park, we passed the National Park Mining Act, which closed all units of the National Park System to location and significantly restricted mining operations on existing claims.

We should not allow any mining to be pursued in the national park, national preserves, wildlife refuges, or wild and scenic river proposals of this bill. We must learn from our mistake of once having allowed units of the National Park System to be open and then having to fight to save the vital natural heritage that most Americans assumed was safe.

As chairman of the Public Lands and Resources Subcommittee, which has responsibility for the mining law, I intend to be particularly diligent in prohibiting mining in these areas. Further, I intend to suggest to this Congress that we address the mining laws and that they be reformed generally outside parks and refuges and rivers on the public domain forests.

WILDERNESS

The land reserves which we are proposing in this measure are intended to be wilderness parks, wilderness refuges, and wilderness rivers. These areas are far too sensitive ecologically to withstand much development. We can be assured that the values we know in these fragile areas today will be protected for future generations by designating them as wilderness. Yes, we do want to have visitor facilities, and yes, the management agencies will need administrative sites. I hereby request that the Administration, with all the expertise of the National Park Service, and Fish and Wildlife Service, and the Bureau of Outdoor Recreation come forward and tell us at hearings what areas ought to be left out of the wilderness designation for visitor facilities and administrative sites.

There can be no question as to whether these lands in Alaska are suitable for wilderness. They are as unaltered and wild as any you will find in our Nation. What we must avoid is the kind of overdevelopment exemplified by Yosemite Valley.

SOUTHEAST ALASKA

America's largest National Forest is the Tongass of Southeast Alaska. Its wilderness resources command our recognition as superlatives lost long ago in other national forests. The 800-year-old virgin forest ecosystem, undisturbed coastal beaches and cliffs, rich estuaries, millions of waterfowl, and abundant bald eagle, pine marten, timber wolf, brown bear, trumpeter swan, and humpback whale are attributes of the Tongass not found in lower 48 national forests. If the Congress does not act soon to review the wilderness potential of this unique forest, it will be too late. The Forest Service has already committed most of the commercial timber to clearcut logging in 50-year timber sales contracts. The Forest Service's recent Tongass land use plan appears to have as its primary goal the commitment of millions of acres of de facto wilderness to development without a wilderness review.

The plight of the Tongass can be depicted by simply remarking that while its wilderness resources are in many ways the finest in the National Forest System, the Government's record of wilderness preservation there has been one of the sorriest in the Nation. Unlike other Western forests, no primitive areas were designated within the Tongass. Not 1 acre has received Wilderness Act protection.

In order to reverse the indiscriminate destruction of the Tongass, I am proposing today that the best wilderness potential areas of the Tongrass be considered by the Congress for wilderness and wilderness study designation. These areas have been carefully selected for their prime wildlife, fisheries, and scenic values.

Citizens of southeast Alaska came before the Senate last year to apprise us of the desperate need for congressional review of the situation in the Tongass. They told the Senate committees of the many proposals for protection of Tongass For-

est wilderness values that have been consistently ignored by the Forest Service for the past 15 years.

At that time, wilderness proposals were not appropriate in the context of the forestry management practices we had under study. But I pledged then that I would see the wilderness of the Tongass and the Chugach National Forests be considered subsequently. Today, I am fulfilling that pledge; this bill will get the wilderness review process underway.

FIFTH SYSTEM

Mr. President, there have been suggestions that a "new" system of cooperative land management is needed for Alaska's national interest lands. This idea is sometimes called "the fifth system." In essence, it says that most of the national interest lands should not go into the four national conservation systems, but instead be placed under an appointed Federal-State commission empowered to classify the lands for a variety of uses, several of which are incompatible with the standards we have set for national parks, wildlife refuges, and wild and scenic rivers.

Opponents contend that a new system is unnecessary because the existing Federal land management systems are sufficiently flexible to accommodate various uses and the National Park Wildlife Refuge, and Wild and Scenic Rivers Systems can best protect the fragile fish, wildlife, ecological, geological, archaeological, and scenic resources of the national interest lands. The existing systems, they maintain, have evolved to a point where they can deal with different circumstances requiring innovative approaches.

Hearings on the national interest lands will help to sharpen this debate. I personally have long been wary of schemes which would place effective control over Federal lands in the hands of States or special interest groups. The burden of proof in this regard will be on proponents of a "fifth system" to show that the current systems are inadequate to the task. I do not think the case can be made.

An example of the flexibility of the National Park System, is the creation of the national preserve category. Congress has established two preserves to date. This bill envisions three more in Alaska, in those cases where we have lands of unquestioned national park caliber, but in which there appears to be no need to discontinue sport hunting—as would be the case if we made the same lands national parks. Under no circumstances are the preserves to be opened to new mining or mineral leasing or any other noncompatible use.

Future disposition and management of the national interest lands in Alaska provide an excellent opportunity to adapt to that great land the institutions which we have so painstakingly developed over the decades to preserve America's wild heritage. I urge my colleagues to read this bill carefully and offer their suggestions for improvements—and ultimately their support.

By Mr. GARN:

S. 1501. A bill to amend the Truth in Lending Act; to the Committee on Banking, Housing, and Urban Affairs.

Mr. GARN. Mr. President, today I am introducing an expanded and refined version of the Truth in Lending Simplification Act, which Senator TOWER and I introduced in the last session of Congress, to bring the consumer more meaningful credit cost disclosures and to relieve business of an unreasonable compliance and paperwork burden placed upon it by the complexities of the Truth in Lending Act and Regulation Z.

The Truth in Lending Act, although eminently well-intentioned, has spawned a regulatory nightmare.

The consumer is not receiving in a clear and timely fashion disclosures which will enable him to intelligently shop for credit.

Small business is stifled with burdensome regulations, nuisance lawsuits and wasteful paperwork.

The Federal court system is swamped with nonproductive small claims litigation.

The American taxpayer is forced to shoulder the burden of a vast and costly bureaucracy established to write, interpret and reinterpret truth in lending regulations.

THE SOURCE OF THE PROBLEM IS NOT DIFFICULT TO FIND

Some find the source of the problem in Congress' initial failure to have a clearly defined purpose in mind when it drafted the original act. As one commentator has pointed out, the congressional emphasis was shifted from disclosure of cost of credit to emphasis on selectively disclosing some of the underlying terms of the credit transactions. The original legislative philosophy was a functional one—that the consumer would get disclosures and use them to decide on credit transactions. The revised philosophy calls for a disclosure of all relative information. This led to the assertion that such items as default and acceleration charges must be disclosed generating much of the confusion and litigation.

In addition, as the various bills progressed along the legislative labyrinth, additional consumer protective devices such as the right to rescission, were attached to the disclosure provisions. This shift from credit cost disclosure to credit term disclosure made compliance many times more difficult since disclosure was not limited to the basic numbers which are the essence of all consumer credit transactions, but extended to many of the operative contractual terms of the transactions. The disclosure of contract terms is difficult because term disclosure lacks the precision of meaning that characterizes numerical categories. This is compounded by the interplay of State law which has forced creditors into using rather lengthy and complex contracts. In this situation, creditors have never been able to determine with certainty what needs to be disclosed and how the disclosure should be made. Compliance is subject to the vicissitudes of numerous courts and regulatory agencies interpreting the law and regulations.

A contributing factor to this predicament is the attempt through the Truth in Lending Act to regulate business practices in a very complex industry. Although considerable benefit has been derived from standardization of credit cost terms such as the annual percentage rate, practices from industry to industry and State to State differ largely due to different State laws. This makes it next to impossible to standardize disclosure forms to make them uniform and meaningful to the consumer.

Let us turn for a moment to some of the specific problem areas.

THE CLUTTERED DISCLOSURE STATEMENT

The typical installment sales contract is almost 2 feet in length and contains more than 30 different disclosure items. It includes not only such shopping items as cash price, downpayment, finance charge and annual percentage rate but also a long list of terms which are agreed to and disclosed in the written contract. These include default charges, a description of security interest, a description of insurance, notice that the holder takes the contract subject to all claims which may be asserted against the seller, and numerous disclosures required under State laws. Although it can be argued that most of these items are important to the consumer in one way or another, they are all disclosed in the contract itself and they have little value in credit shopping.

What scant evidence there is available tends to show that the Truth in Lending Act is not highly successful in increasing the consumer's awareness of credit costs. The National Commission on Consumer Finance reported in December of 1972, that although the awareness of the annual percentage rate increased significantly in the 15 months following the effective date of the Truth in Lending Act, a substantial portion of consumers, particularly consumers in the low-income high-risk area remain unaware of the annual percentage rate they have been charged.

Undoubtedly a contributing factor to the lack of awareness of credit costs has been that the stringent requirements of the Truth in Lending Act have dried up credit advertising. Under our market system, truthful advertising provides the best shopping aid for consumers. This suggests that a modification of the advertising provisions of the Truth in Lending Act should be undertaken. In doing this, the gains made under the Truth in Lending Act's requirements for a standardization of the advertising of the annual percentage rate should not be lost. This is one of the areas that is addressed in our Truth in Lending Simplification Act.

The clutter on the disclosure statement may be another reason why consumers have little awareness of credit costs. One study conducted in connection with consumer behavior in grocery shopping in-

dicates that there are finite limits to the ability of human beings to assimilate and process information during any given unit of time and that once these limits are surpassed, behavior tends to become confused and dysfunctional. The researchers concluded that in consumer product labeling, there are limits to the consumer's ability to accommodate substantial amounts of the package information within a limited time span. (Jacoby, Speller, and Berning, "Brand Choice Behavior as a Function of Information Load: Replication and Extension," Journal of Consumer Research, pp. 33–42, June 1974.)

Applying this behavioral reaction to credit cost disclosures, it follows that the proliferation of informational disclosure statements confuses rather than informs the consumer. The obvious solution, which is the approach taken in our bill, is to drastically cut this information to highlight essential credit shopping data.

Some will argue that by deleting credit term information, the consumer will be denied vital information. However sincere these arguments are, they are the same ones which brought on the present problem. If any progress is to be made toward simplification, most of the credit term items will have to be eliminated from the disclosure statement. The consumer will still have them disclosed in the credit contract itself.

The Truth in Lending Simplification Act we are introducing today attacks this problem in section 9 by deleting from the disclosure in open-end credit plans charges not related to the finance charge and credit costs. Section 10 would eliminate disclosure, default and late payments on the disclosure statement. The requirement that the details of the security interest be disclosed is modified by section 11. Most of these items are disclosed in the contract signed by the consumer and none are generally used in shopping for credit.

LACK OF CLARITY IN THE LAW

The Truth in Lending Act is so perplexing that the courts and Federal Reserve disagree on its interpretation. For example, the district court for the northern district of Georgia held that a "loan fee" charge by a lender which was spread over the life of the loan should be disclosed as "prepaid finance charge" while the Federal Reserve Board was ruling that such a charge should be stated as a "finance charge." *Grubb* v. *Oliver Enterprises, Inc.*, 358 F. Supp. 970 (N.D. Ga 1972)

The courts have split on the issue of whether a finance charge which consists solely of one element—interest or time price differential—must be identified in terms of that element.

There has been general confusion reflected in the conflicting opinions of the courts and the staff of the Federal Reserve Board and the differences in the act and the regulations as to the sufficiency of security interests disclosures. Decisions on this question reflect a wide spectrum of opinion. At the very least, a mere recital in a retail installment contract that a security interest is retained falls short of satisfying the disclosure requirements. *McDonald* v. *Savoy*, 501 S.W. 2d 400 (Tex. Civ. App. 1973). On the other hand, some courts have attempted to circumscribe the lengths to which creditors must go to adequately describe security interests by the vague guideline that "the lender need not give the consumer a short course in commercial transaction." *Burrell* v. *City, Inc.*, CCH Consumer Credit Guide section 98, 764 (N.D. Ga., 1974). The variety of opinions that fall between the two perimeters noted above fail to provide creditors with any forewarning as to whether their description of the applicable security interest will pass muster.

Courts have differed on the issue of whether the disclosure of the creditors standard acceleration clause is a default charge which should appear on the front or the back of the contract. Since all that is at stake here is whether certain words must appear on the front or the back of the contract form, creditors have little incentive to violate the law. Generally Federal Reserve Board staff opinions and most judicial decisions have held that the acceleration clause is not a "delinquency charge." However, a few judges have taken a different view of the complex issue and have imposed penalties on creditors for interpreting the law in the same manner as the Federal Reserve Board.

The confusion that surrounds the Truth in Lending Act can also be seen in an attempt to define the scope of its coverage. Prof. Jonathan M. Landers, visiting scholar of the American Bar Foundation, described the intricacies of the coverage provisions as follows:

> It is difficult to study the intricate coverage provisions of the Truth in Lending Act without thinking that there must be a better way to decide questions of coverage. And, in fact, the act has left so many uncertainties that this alone may have worked a vast expansion of coverage in the form of compliance by persons who are unsure and are unwilling to assume the risks of noncompliance. While one can criticize the foregoing analysis as overtechnical and nit-picking, criticism should be directed mainly against the Congress that has made it necessary rather than the attorney attempting to decipher the statute to make it understandable.
>
> It might be expected, in the light of this uncertainty, that the Federal Reserve Board would move aggressively to provide clear guidelines as to coverage. In fact, the board has not generally done so but instead has left the task largely to the staff, which has responded in the form of opinion letters directed to individual fact situations. It is not clear why the board has not acted. Perhaps it reflects a reluctance to add another level of technicality. A less complimentary explanation is to recall the board's often-expressed disinclination to administer TIL and its view that TIL administration is less important than the other tasks it has been assigned. Perhaps the reluctance is simply an unwillingness to identify a set of good guys who would be exempt and bad guys who would not.
>
> But after all that is said and done, it is hard to find any justification for a policy which still leaves unsettled such major areas of coverage as assignment transactions, discount for prepayment transactions, magazine subscriptions, sales of homes with broker assistance in financing, and the others discussed here. These are not arcane examples dredged up from the periphery of a complex regulatory scheme but typical transactions engaged in regularly by hundreds of thousands (or millions) of consumers. It is unfair to the consumers who may be entitled to disclosure and to the creditors who must either incur the additional expense of unnecessary disclosure or risk the consequences of an erroneous decision on coverage that the board has not attempted to do better. (Landers, The Scope of Coverage of the Truth in Lending Act, 1976, A.B.F. Res. J. 365, 686–7)

To bring clarity to the Act, our bill defines the term agricultural credit and eliminates it from coverage. In section 3 the definition of open-end credit is clarified to permit the verification of credit information. Section 4 makes clear that notary fees and fees paid by the creditor which are absorbed as overhead need not be included in the finance charge. Section 10 consolidates and simplifies the disclosure of the amount financed in closed-end credit.

THE PAPERWORK BURDEN

The disclosure and notification requirements of the Truth in Lending Act have put an intolerable paperwork burden upon creditors, particularly small retailers. Frequent changes in the law and regulations and differing interpretations by the courts or the Federal Reserve Board staff have forced creditors to frequently throw away forms and print new ones at a great cost. Our bill attacks this problem in a number of ways. First and most important, it would simplify the act's disclosure requirements, thus eliminating the confusion which has generated the different court and staff interpretations. Second, it would diminish the frequency of notice requirements. For example, section 9 would require notice of billing error rights be given once rather than twice a year. Finally, section 6 would restrict form changes to once a year and provide a 9-month leadtime.

THE LAWYERS PARADISE AND JUDGES INFERNO

One of the most shocking aspects of the Truth in Lending Act is the ever-growing burden being placed upon the Federal court system by the multiplicity of suits based on nonwillful technical violations of the act. We received shocking evidence in March of 1976 before the Senate Consumer Affairs Subcommittee establishing that litigation based on the punitive damage provision of the Truth in Lending Act is seriously encumbering the work of the Federal courts in certain sections of the country. Former Federal bankruptcy judge, W. Homer Drake, Jr., filed a statement with the subcommittee warning that the huge volume of truth-in-lending cases in north Georgia is putting a "tremendous new burden on district judges and bankruptcy judges." In the same theme, former District Judge Sidney O. Smith, Jr., gave the subcommittee the following penetrating analysis of the problem:

> My experience with the present enforcement procedures in the truth in lending area raises two basic concerns: (1) that the flood of private cases in the United States District Courts is substantially overburdening the federal judiciary system which is already being taxed beyond its capacities; and (2) that

the present means of enforcement of the objectives of the Act—to provide meaningful disclosure of credit terms—are not necessarily being accomplished by the present mode of enforcement.

This litigation serves no useful purpose unless one considers the extraction of attorney fees from the public a beneficial endeavor.

The litigation has not clarified the law.

Nor has it brought consumers more meaningful disclosures.

Testimony before the subcommittee last year tended to establish that plaintiffs in truth in lending litigation have not shopped for credit nor compared credit terms available to them. The typical plaintiff read the disclosure only after consulting a lawyer on other matters and was motivated to file suit by consideration other than to obtain meaningful information on credit costs.

For example, in *Dorothy Baker et al.*, v. *Pattison Pontiac Company, Inc. et al.*, C.A. No. 71-2019 (E.D. La.) the plaintiff, Mr. Orth, testified that he was not aware that he was bringing a class action suit for violations of the Truth in Lending Act. He stated in depositions that his wife was merely complaining about a car they had bought which did not work and they went to the attorney to get their money back. The interview with the attorney resulted in a class action suit against the finance company for alleged violations of the Truth in Lending Act. This case was dismissed after the defendant had expended large sums for defense of the claim.

In depositions in the case of *Morris J. Moody, et al.*, v. *Leson Chevrolet, Inc., et al.*, C.A. No. 71-2736 (E.D. La.) the plaintiff stated that he had not shopped for credit nor compared credit terms. After purchasing a car, he was talking with a friend who told him about a lawyer who could get some money for him if he would consult him concerning his finance contract. His motivation in filing the suit was pecuniary. This case was settled for $600 after substantial expenditures by the creditor in legal fees.

The Moody case apparently inspired other litigation in the New Orleans area. For example, in *Curtis Benn et al.* v. *Leson Chevrolet Company, Inc.*, C.A. No. 72-271 (E.D. La.) plaintiff Benn had talked to plaintiff Moody about the possibility of financial gain in truth in lending litigation. Ironically, it was not until 5 months after the suit was filed that the plaintiff was aware that he was involved in litigation. Again the Curtis Benn suit was settled for $650 after large defense fees were incurred.

Our bill attacks this problem by simplifying the act to make compliance less difficult and in section 12 by relieving liability where the failure to disclosure is not material to the consumer's awareness of the cost of credit.

Mr. President, the following section-by-section analysis gives in greater detail the provisions and purposes of the bill:

SECTION-BY-SECTION ANALYSIS

SEC. 1. The Act is cited as the Truth in Lending Simplification Act of 1976.

SEC. 2. Exempt agricultural credit.—Would amend sections 103(h) and 104(1) of the Truth in Lending Act to exempt all agricultural credit; would also repeal the current provision which exempts only those agricultural credit transactions in excess of $25,000. The Federal Reserve Board has recommended consideration of excluding coverage of agricultural credit because the coverage of such credit has numerous complexities in Regulation Z. In some instances it has delayed loan transactions for farmers who do not feel they need the disclosures. There is a question whether an Act designed to protect consumers should include a type of credit that is related primarily to business or commercial activity. A number of farm organizations support this exemption.

A new section 103(u) defining "agricultural purpose" is added to precisely delimit the coverage of the Act. The problem is that many credit transactions by persons who are engaged in the occupation of farming are neither clearly agricultural nor clearly personal in nature. Because of this lack of clear distinction, the Act has provided that agricultural credit transactions involving $25,000 shall not be covered by the Act.

A more pragmatic approach is taken in section 2 by clearly excluding from coverage credit extended primarily for agricultural purposes. Thus, credit extended to a family farm for vehicles or other articles which will incidentally be used for family purposes, but primarily used for agricultural purposes would be excluded from coverage. This puts the farmer in the same status as the individual owning and operating a family business. In close cases the creditor could obtain from the borrower a statement that the purpose of the loan fell within one of the exempt categories.

The section also amends section 104 of the Act to exempt Farm Credit System loans. The Farm Credit institutions are farmer-owned entities which operate under the supervision of the Farm Credit Administration for the benefit of their owner-borrowers to whom they extend credit generally at below the market rate. For the most part, the credit transactions of the System involve extensions of credit for business purposes in financing an ongoing farming operation and not consumer loans intended to be covered by the Act. There is no evidence that the law has caused the level of charges to be reduced to Farm Credit borrowers or has caused them to seek other financing as a result of the disclosures. The paper requirements resulting from the Truth in Lending Act are burdensome and create delays in loan closings. Compliance is particularly difficult for the System members because most loans are made with a frequently fluctuating variable rate which cannot be accurately reflected in the disclosure statement.

Sec. 3. Open end credit definition.—Would amend the definition of "open end credit plan" in section 103(i) specifically to permit creditors to reverify credit information from time to time. In many cases, creditors need to update credit information in connection with existing accounts, as, for example, in connection with additional purchases or other extensons of credit which would exceed a previously established credit limit. This amendment is necessary to resolve a conflict in the interpretation given this subsection by two of the Federal enforcement authorities. The Federal Reserve Board, in a staff opinion letter, has held that reverification is permissible; the Federal Trade Commission has held that it is not.

Sec. 4. Elimination of itemized charges.—Would amend section 106(d) to delete the requirement for the itemization of certain charges if they are to be excluded from the finance charge. Such itemization is not necessary for the protection of the consumer because these costs are not directly related to the lender's charge for credit and in most instances are not substantial in relationship to the overall transaction. In home mortgage loans where the charges may be substantial, their disclosure is required under the Real Estate Settlement Procedures Act.

Section 106(d)(1) has been further amended to eliminate the requirement that "official fees" be prescribed by law in order to be excluded from the finance charge. The phrase "be prescribed by law" has generated confusion as to when notary fees may be excluded from the finance charge. The removal of this phrase should make clear that when "official fees," such as notary fees, are actually paid to public officials in connection with a security interest and there are no kick backs of such fees, the item need not be included in the computation of finance charges. This follows the pattern set in section 106(e)(4) which specifically excludes notary fees from computation of finance charges where a security interest is taken in real property.

An additional subsection has been added to section 106 to the effect that fees or charges (such as finder's fees, credit report fees, etc.), which are actually paid by the creditor and absorbed as a part of the creditor's overhead, need not be considered as components of the finance charges, and need not be disclosed to the consumer. This amendment confirms various opinions issued by the Federal Reserve Board Staff to the effect that fees or charges, which would otherwise be included in the finance charge under section 106(a), need not be included and disclosed as finance charge components where such charges or fees are paid by the creditor and absorbed as a part of the creditor's overhead and are not passed on directly or indirectly to the consumer through an increase in the rate of interest. This has been a great source of confusion and wasteful litigation.

Sec. 5. Timing of annual report.—Would amend section 114 of the Truth in Lending Act, section 707 of the Equal Credit Opportunity Act and section 18(f)(5) of the Federal Trade Commission Act to permit the Board to submit the Annual Report required by those acts at the same time as components of the Board's Annual Report. The Federal Reserve Board, which has recommended this amendment, feels that there are no benefits produced by these fragmented reports and duplication of effort would be avoided.

Sec. 6. Annual forms revision.—Would amend section 122 of the Act to restrict the effective date of any statutory amendment to the Act or implementing amendment or interpretation requiring a change in a disclosure form to October 1 of the following year. The purpose of this amendment is to limit form changes to once a year and to give lead-time for necessary printing and programing. Safeguards are incorporated into the provision to permit the Board to shorten the length of time for creditors to make such adjustments when such is necessary to prevent unfair or deceptive disclosure practices.

During the past few years, creditors have been required to destroy large volumes of unused credit application and disclosure forms due to changes mandated by court decisions and federal and state laws and regulations. The expense incurred in constantly revising forms is wasteful and ultimately must be borne by consumers. This amendment is designed to eliminate much of this waste.

Sec. 7. Right of rescission.—Would amend section 125(e) so that the right of rescission granted by the Truth in Lending Act would not apply to credit contracts involving a security interest in a vacant lot. The substance of this amendment is based on a Federal Reserve Board recommendation in which the Board said it felt that the right of rescission should not continue to be applicable to vacant lot purchase transactions other than those covered under the Inter-

state Land Sales Full Disclosure Act. The basic objective of section 125 of the Truth in Lending Act is to give a consumer sufficient time in which to consider the important act of pledging his or her residence as security for a loan. The mere purchase of a vacant lot or the pledging of the lot as security for a loan should not need the extraordinary privilege of the right of rescission. The difficulty under the current provisions of section 125 is that the general rule creating the right of rescission in subsection (a) refers to "residence," and the exception to the general rule for first purchase money security interests in subsection (e) refers to "dwelling." The Board recommendation would change subsection (a) to refer to "dwelling," whereas this amendment changes subsection (e) to refer to "residence." Thus the objective of the Board is accomplished while at the same time not effectively voiding the provisions in millions of existing open end credit contracts which renounce any security interest in the customer's "residence." Were those renunciation provisions effectively voided by changing the Act to refer to "dwelling," the consumer-obligors on those millions of open end credit accounts might find future transactions subject to a three-day delay in performance pending expiration of the right of rescission.

To correct inequities flowing from the holding in *Gerasta v. Hibernia National Bank*, 411 F. Supp. 176 (E.D. La. 1975), this provision also amends section 125(f) of the Act to require as a condition of exercising the right to rescind after the initial three day waiting period, the obligor must tender the property, principal amount of the loan or other consideration received from the creditor. The provision further amends the Act to add a new definition of "material disclosure" to make clear that the right to rescind does not continue beyond the initial three day period simply because the creditor made a technical violation of the Truth in Lending Act that does not affect the obligor's awareness of the cost of credit. In addition, the creditor would be given 20 days within which to respond to the obligor's notice of rescission.

In *Gerasta v. Hibernia National Bank*, 411 F. Supp. 176 (E.D. La. 1975), the court held that where a creditor fails to respond to a subsequent notice of rescission by a borrowing consumer and fails to return all previously paid finance charges and closing costs, and fails to cancel its security interest on the borrower's residence, within ten days following the receipt of such a subsequent notice of rescission, the creditor forfeits any right to collect the proceeds of such a loan.

The problem is simply that a creditor has no way of knowing, upon receipt of a subsequent notice of rescission after the three-day right to rescission period has expired, whether or not the borrower has the right to rescind such a credit transaction. The creditor is faced with the alternative of refunding previously paid finance charges and other charges and cancelling its security interest, or of contesting the borrower's right to rescind, in which case the creditor faces the additional penalty of forfeiting the entire proceeds of such a loan.

In addition, it is questionable whether the "effects of rescission" provisions of section 125(b) of the Act were ever intended to apply to a situation in which a borrower seeks to rescind a consumer credit transaction after the three-day right of rescission period has expired due to a technical truth-in-lending disclosure violation at the time the loan was consummated. The legislative history of section 125(b) of the Act indicates that this section was intended to apply to consumer credit sales situations in which the borrower seeks to rescind within the three-day right of rescission period, where the creditor actually provides goods or services to the borrower incident to improvements on the borrower's residence. The section was intended to cure consumer abuses in the aluminum siding industry and there is no evidence that it was ever intended to apply to direct consumer loans between banks or other financial institutions and borrowing consumers for home improvement or second mortgage purposes.

The amendment attempts to avoid the inequities which have resulted under the *Gerasta* and related decsions by requiring the obligor, seeking to rescind a consumer real estate transaction after the three day statutory right of rescission, to tender the unpaid principal balance under such an indebtedness to the creditor as a condition of rescission. This follows the remedy forged by the United States 9th Circuit Court of Appeals in *Palmer v. Wilson*, et. al., 502 F. 2d 860 (9th Cir. 1974).

Sec. 8. Voluntary periodic statement.—Would delete the requirement of section 126 that creditors who chose to send periodic billing statements in connection with credit other than open end include notices of certain charges. Th Board recommends this deletion since such periodic statements are not uniformly required for all extensions of credit other than open end and the rule would impose an unfair burden on those creditors who do send such payment reminders. Periodic credit cost disclosure is of no benefit to the consumer in closed-end credit contracts because there is no new credit contracts to be made as in open-end credit arrangements.

Sec. 9. Open end credit.—Subsection 9(a) would delete section 127(a)(5) permitting disclosure of the "average effective rate of return." This provision contains a complicated formula taking up an entire section of Regulation Z which sets out the requirements with respect to such optional disclosures. It is not being used and the Board has recommended its deletion.

The subsection also deletes section 127(a)(6) requiring the disclosure of the conditions under which any other charges may be imposed. These disclosures are not material for the purpose of comparing credit costs and the provision is a source of confusion.

Subsection 9(b) revises section 127(7) of the Act to provide that the creditor need merely give the consumer notice that a security interest is or may be taken in connection with an open end credit plan. Notice that the conditions and description of a security interest does nothing to enhance the consumer's ability to shop for credit and adds to the clutter of the disclosure statement.

Other consumer protection interests are served by the notice that a security interest is or may be retained because under state law the consumer is given a complete description of the security interest when he signs the credit contract.

Subsection 9(c) would change the requirement under section 127(a)(8) (redesignated as paragraph (6) regarding the furnishing of the statement of billing error rights. As currently written, the law requires the statement to be mailed at semiannual intervals, and this amendment reduces the frequency to annual intervals. Based on a study prepared for the Federal Reserve Bank of Atlanta by Georgia Tech Research Institute in 1971 there were outstanding approximately 330 million credit card accounts. Add to this number the number of other types of open end credit accounts (e.g., bank overdraft plan), and the aggregate is in the range of 360 million accounts. The savings involved in eliminating one semiannual mailing run into many millions of dollars with no substantial detriment to consumers because consumers would still receive the statement when opening new accounts and annually thereafter. An additional point that might be made is that consumers commonly hold a number of different credit cards. For example, a study of consumers having department store credit accounts showed that about 30 percent had less than five credit cards; 45 percent 5–9 cards; 20 percent, 10–14 cards; and over 5 percent, 15 or more cards. (Robert P. Shay and William C. Dundelberg, Retail Credit Card Use in New York. New York: Graduate School of Business, Columbia University, 1975, p. 22) Thus, under the present system about 20 percent of this sample group received 20 to 28 notices per annum (which they probably throw away).

Subsection 9(d) permits creditors who cannot identify each transaction on the periodic billing statement to disclose the other required information and treat any inquiry for clarification as a "billing error" under the Fair Credit Billing Act. Literally thousands of creditors, either because of size or diversity of goods and services handled, are unable to identify each transaction. This amendment permits them to supply all of the other required information and protects consumers by requiring those creditors to handle any inquiry as a billing error.

Sec. 10. Closed end credit disclosures.—Would amend sections 106, 107, 128 and 129 to permit in long-term installment and mortgage loan contract disclosures, reasonable tolerances in the computation and reporting of the number of payments, the finance charge and the annual percentage rate.

In many long-term credit contracts and in those where there are variables that are not predictable, it is not possible to calculate and disclose with absolute mathematical accuracy items such as the number of payments and the amount of the periodic payment. For example, to accurately disclose these items on a $30,000, 9 APR loan payable in 360 months the monthly payments would have to be $241.386785. Since payments of less than a penny cannot be made under our payments system, this figure is rounded off resulting in a technical error. This amendment together with the addition to section 103 of the definition of the term "material disclosure" should make clear that Congress does not intend to require creditors to slavishly adhere to technical requirements which are not meaningful to the consumer.

The section also eliminates the requirements both under open and closed end credit plans that default, late or delinquency charges be disclosed. Although the Board had recommended merely the deletion of disclosure of default charges, the amendment deletes the entire provision. There has been a large volume of litigation as to what constitutes a default, delinquency, or a late payment. Given the vagaries of the English language, it is doubtful that the deletion of the requirement of the disclosure of default charges would cure the problem. Certainly, a "default" could be considered a "delinquency" thus leaving it to creditors to litigate the same kinds of issues as under the present provisions.

Moreover, it is doubtful that such late payment and delinquency charges should be disclosed at all, especially when they are regulated by state statute. Consumers do not expect to become delinquent when they enter credit contracts, and default and late payment information is thus of marginal use in the credit decision. Moreover, these matters tend to be regulated by statutes with all creditors imposing the same charges. There is no indication of bargaining on late payment or delinquency charges. The fact that consumers do not consider this information as pertinent to the credit decision is especially important since a full and accurate statement of such charges introduces additional complexity and length to the truth in lending statement and detracts

from the value of the other disclosures. Finally, such charges are generally included in the credit contract, and thus, the issue is not really disclosure as such but whether the disclosures should be on the truth in lending statement.

For purposes of simplification and clarity, the section consolidates paragraphs (1), (2) and (3) of section 129(a) requiring disclosure of the amount of credit actually paid out including other charges which are not part of the finance charge but are part of the credit extended. The consolidated language is taken from section 226.8 (d)(1) for Regulation Z implementing these paragraphs. This consolidation is intended to remove the ambiguities in section 129(a) (1), (2) and (3) and reconcile conflicting interpretations made by the courts and the Board.

Sec. 11. Disclosure of type of security interest.—Would delete the requirements in sections 128 and 129 for a disclosure in closed end credit of a detailed description of a security interest and permit either an identification of the property in which a security interest is taken or a reference to such an identification on an accompanying statement delivered to the obligor.

This amendment should go a long way in removing the clutter on the disclosure statement without diminishing consumer protection. In the consumer credit contract and accompanying papers signed by the consumer, full details of the security interest are given the consumer. The details of the security interest are of no benefit to the consumer for credit shopping purposes and the cumbersone disclosure requirements merely add to the burden of compliance.

Sec. 12. No liability for substantial compliance.—Would amend section 130 to provide that a creditor may not be held liable under the civil penalty section for truth in lending disclosure violations where the failure to disclose was not material to the consumer's awareness of the cost of credit. It is presumed that necessary disclosure is made when, where required by the Act, there has been disclosed the annual percentage rate, the finance charge or method of determining the balance upon which a finance charge will be imposed and the amount of the finance charge, the amount to be financed, the total payments, the number and amount of payments, and the due dates.

Citing the present volume of litigation due to the complexity of the Truth in Lending Act and regulations, the Board recommended that Congress study the possibility of limiting civil penalties to violations involving the misstatement of credit terms which would interfere with the consumer's ability to make meaningful comparisons of credit costs. The items included in this amendment are the ones which are basic to the consumer's understanding of credit costs. The disclosure of other items, such as late payments, the identity of the security interest and the right to rescission, are not included because they are not pertinent to the credit shopping function. This is the category which has cluttered the disclosure statement and is the primary source of confusion and litigation.

Sec. 13. Advertising of credit terms.—Would rewrite section 143 of the Act to permit creditors offering open end credit to advertise only the periodic rate and the annual percentage rate. This would be consistent with the requirement now applicable to advertising of closed end credit. Where terms other than rates are advertised, then there must be stated only the periodic payment, the method of computing the finance charges, the periodic rate and the annual percentage rate. This would be consistent with the requirement now applicable to advertising of closed end credit.

Section 144 is amended by deleting the requirement that in closed end credit advertising there be disclosed the cash price or the amount of the loan and the downpayment.

The amendment also has the effect of deleting specific authority for the Board to require other or additional information in advertisements for open end credit plans. This is not intended to prohibit the Board from using its general authority to interpret what is included in the requirements that remain, but simply to prohibit the Board from exercising a legislative function of adding additional requirements.

This simplification approach to credit advertising generally follows the recommendations of the National Commission on Consumer Finance. The Commission observed that although an important benefit of disclosure legislation has been the elimination of misleading rate advertising—discount, add-on, percent per month, and so on—the complexities of the Act seem to have discouraged advertising. Some feel that the truth in lending disclosure at the time of the transactions came too late to permit comparative shopping. The purpose of these amendments is to encourage informative advertising to provide a better mechanism for comparison shopping and a competitive market to bring rates down.

Sec. 14. Correction of billing errors.—Would delete paragraph (3) of section 161 (b)(3) of the Act, treating the non-acceptance or non-delivery of goods or services as a billing error. The non-delivery or non-acceptance of goods or services is more in the nature of a dispute as to the value, quantity or quality of goods or services obtained than a matter of billing error. Congress has determined that such disputes, which involve only the customer and the merchant and as to which only they have information, should be handled under section 170 of the Act rather than under section 161. Section 161 simply is not designed to deal with disputes concerning non-delivery and non-acceptance, and the inclusion of subsection (b)(3) within the definition had led to considerable confusion as to whether a particular dispute regarding non-delivery or non-acceptance can give rise to a billing error claim under section 161, a customer dispute under section 170, or both. The Board has been forced to attempt to draw a distinction between the two provisions (see footnote 1 to section 226.2(j)(3) of Regulation Z), and this matter has also been discussed in a subsequent Staff letter (Staff Letter No. 965, dated December 3, 1975, 5 CCH Consumer Credit Guide, Para. 31304).

The amendment eliminates this overlap, with its resultant confusion and potential double liability, by limiting the billing error provision to those situations that truly are billing errors, such as accounting and computational errors and other questions as to the accuracy of the statement prepared by the creditor. Disputes between the merchant and the cardholder with respect to the delivery and quality of goods or services should be left to section 170.

The section would also amend section 161 (b) of the Act to limit the Board's discretion to define a "billing error." The amendment incorporates into the Act the current provision in Regulation Z defining as a billing error the failure to send the periodic statement to the latest address of a customer. However, in view of the civil and criminal sanctions Congress, not the Board, should prescribe which acts or practices constitute a violation. If the Board in the future should find other acts or practices which should be prohibited, it is always able to recommend to Congress appropriate changes in the statute. Here again, it is not the intention to restrict the Board's general interpretative authority to clarify the provisions of the Act or Regulation Z.

This amendment would also make explicit what is now implicit in the Act: during the dispute resolution procedure, a creditor may continue to send periodic billing statements which show the amount in dispute together with all finance charges thereon, provided that the creditor complies with the dispute resolution procedure and credits the customer with all amounts found to have been in error, together with all finance charges thereon.

Sec. 15. Relation to state law.—Would amend section 111 of the Truth in Lending Act to establish a general principle of allowing only state laws that are identical to the federal law. An exception is created for more protective state laws, similar to the "greater protection" standards of sections 171 and 186 which are being superseded. This exception applies only where an application made by the state or local subdivision is approved by the Board under the following conditions:

(i) compliance would not violate the Act; (ii) state law provides significantly higher degree of protection, practices are not adequately regulated by the Act and it does not unduly burden interstate commerce. In granting an exemption the Board shall consider feasibility and cost of compliance, probability that other States will apply for an exemption, and the need for national uniformity.

This amendment is modeled after the Consumer Product Safety Act and is offered for the purpose of comment to focus Congress' attention on one of the most complex issues in truth in lending simplification. My personal preference would be to leave consumer credit protection to the states and have no federal preemption. However, the federal government has moved into this area creating a multitude of contradictions. One commentator sized up the problem in this manner:

"At present, the Act contains three separate provisions dealing with preemption. Section 11 establishes a general principle applicable to the Act as a whole, which preempts state credit disclosure laws to the extent that they are 'inconsistent' with the Act. Section 171 sets forth a similar principle applicable only to Chapter 4. 'Credit Billing,' but additionally directs that no state law shall be deemed inconsistent if it provides greater protection to consumers. Section 186, which is applicable only to Chapter 5, 'Consumer Leasing,' is identical substantively to Section 171.

"We believe that the existing standard of 'inconsistency' to determine preemption is an unworkable one and that a different standard is needed urgently. Creditors and consumers alike are confused in attempting to determine whether state law, federal law, or both are applicable to a particular consumer credit problem. The 'inconsistent law' test invites constant disputes as to whether a state law is in fact inconsistent with federal law. The greater protection standard of Sections 181 and 186 is difficult to apply, as was pointed out by Governor Jackson of the Board in his testimony before the House Consumer Affairs Subcommittee on February 9, 1977. Often there is no way to determine whether a particular provision of standard law offers 'greater protection.' The state provision may be more advantageous to consumers than the federal provision in one respect but disadvantageous in others. This problem is compounded when an attempt is made to judge whether it is the aggregate of the detailed provisions of any particular statute that is to be compared, or whether each specific provision is to be compared separately and a hybrid set of rules, consisting of some details from state law and some from Federal law, is to be fashioned.

"The legislative process has as a goal the production of well integrated, coherent and internally consistent principles. The latter technique described above, which would pull details from disparate statutes and attempt

to force them to function as a single set of integrated principles, is destructive of that goal. Such a technique further renders negative the negotiation and the trade-off that are accomplished in the legislative process as workable legislation based on compromise is produced. Consumer rights and creditor responsibilities are interrelated and wise policy making requires a careful balancing between the two. A carefully balanced federal bill can become lopsided immediately if additional state obligations are superimposed on the federal provisions. The effects of imbalance are great indeed, when one appreciates that the credit-granting industry is price regulated and statutes not carefully integrated will have economic effects in some respects aggravated in comparison to other industries. The effect of the present principles governing the relationship of federal to state law is even more serious under the Equal Credit Opportunity Act, which adopted the scheme of the Truth in Lending Act, in part because of a misconception by Congress regarding the viability of the scheme. See S. Rept. No. 94-589, 94th Cong., 2nd Sess. 12 (1976).

"In addition to those problems, the present law creates confusion, uncertainty, and burdens for the increasing number of multi-state creditors who must contend with a variety of differing state and local laws. The solution should be federal preemption in those areas where the federal government has already legislated in a comprehensive and highly detailed way and occupies the field. Such is the general rule of law in the United States, as articulated just this week again by the United States Supreme Court in the case of *Jones* v. *Rath Packing Company*, in which certain labelling laws of the State of California were held to have been preempted by the Federal Fair Packaging and Labelling Act. Unfortunately, the concept of preemption of state law typically raises the spectre of the removal from the states of the power to insure a free market economy and a consequent increase in regulation of business. With regard to the Consumer Credit Protection Act, it is *the absence of preemption* that increases the regulation of business. Once the federal government has thoroughly occupied a field, as it has in the Fair Credit Billing Act, Truth in Lending Act and the Equal Credit Opportunity Act, the only remaining question is whether state authorities will be able to impose additional and more restrictive rules, which are added to the federal rule. States have no ability to reduce the amount of regulation, only to increase it."

Federal intrusion into this area traditionally reserved to the states is one of the primary causes of the complexities in consumer credit protection law. Until Congress faces its responsibility of addressing this matter in a rational manner, little can be achieved in forms simplification. Section 15 is offered as one suggested approach to the problem.

Mr. President, I am pleased that the chairman of the Senate Consumer Affairs Subcommittee is contemplating hearings on truth in lending simplification. This matter deserves the highest priority. Both the consumer and the small businessman deserve better than Congress gave them in the Truth in Lending Act.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1501

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Truth in Lending Simplification Act of 1977".

EXEMPT AGRICULTURAL CREDIT

SEC. 2. (a) Section 103(h) of the Truth in Lending Act (15 U.S.C. 1602(h)) is amended to read as follows:

"(h) The adjective 'consumer', used with reference to a credit transaction, characterizes the transaction as one in which the party to whom credit is offered or extended is a natural person, and the money, property, or services which are the subject of the transaction are primarily for personal, family, or household purposes.".

(b) Section 103 of such Act (15 U.S.C. 1602) is amended by adding at the end thereof a new subsection as follows:

"(u) The term 'agricultural purposes' includes loans and leases related to the production, harvest, exhibition, marketing, transportation, processing, or manufacture for agricultural products by a natural person who cultivates, plants, propagates or nurtures those agricultural products, including but not limited to the acquisition of farm land, real property with a farm residence and personal property and services used primarily in farming, and the term 'agricultural products' includes agricultural, horticultural, viticulture, and dairy products, livestock, wildlife, poultry, bees, forest products, fish and shellfish, and any products thereof, including processed and manufactured products, and any and all products raised or produced on farms and any processed or manufactured products thereof.".

(c) Section 104 of such Act (15 U.S.C. 1603) is amended by adding at the end thereof the following:

"(6) Credit transactions of borrower-owned Federal instrumentalities which extend credit under the supervision of an agency of the United States.".

(d) Section 104(1) of such Act (15 U.S.C. 1603(1)) is amended to read as follows:

"(1) Credit transactions involving extensions of credit for business, commercial, or agricultural purposes, or to government or governmental agencies or instrumentalities, or to organizations.".

(e) Section 104(5) of such Act (15 U.S.C. 1603(5)) is repealed.

OPEN END CREDIT DEFINITION

SEC. 3. Section 103(1) of the Truth in Lending Act (15 U.S.C. 1602(1)) is amended by adding at the end thereof the following: "A credit plan which otherwise meets this definition is an open-end credit plan if credit information is verified from time to time.".

ELIMINATION OF ITEMIZED CHARGES

SEC. 4. (a) Section 106(d) of the Truth in Lending Act (15 U.S.C. 1605(d)) is amended to read as follows:

"(d) The following items shall not be included in the computation of the finance charge with respect to any transaction:

"(1) Fees and charges which actually are or will be paid to public officials for determining the existence of or for perfecting or releasing or satisfying any security related to the credit transaction.

"(2) The premium payable for any insurance in lieu of perfecting any security interest otherwise required by the creditor in connection with the transaction, if the premium does not exceed the fees and charges described in paragraph (1) which would otherwise be payable.

"(3) Taxes.

"(4) Any other type of charge which is not for credit and the exclusion of which from the finance charge is approved by the Board by regulation.".

(b) Section 106 of such Act (15 U.S.C. 1605) is amended by adding at the end thereof a new subsection as follows:

"(f) Fees or charges paid by the creditor and absorbed as a part of the creditor's overhead are not part of the finance charge and need not be disclosed."

TIMING OF ANNUAL REPORT

SEC. 5. (a) Section 114 of the Truth in Lending Act (15 U.S.C. 1613) is amended by striking out "Not later than January 3 of" and "after 1969,", and by capitalizing "each" the first time it appears in such section.

(b) Section 18(f)(5) of the Federal Trade Commission Act (15 U.S.C. 58a(f)(5)) is amended by striking out "not later than March 15 of each year".

(c) Section 707 of the Equal Credit Opportunity Act (15 U.S.C. 1691f) is amended by striking out "Not later than February 1 of" and "after 1976," and by capitalizing "each" the first time it appears in such section.

ANNUAL FORMS REVISION

SEC. 6. Section 122 of the Truth in Lending Act (15 U.S.C. 132) is amended by adding at the end thereof a new subsection as follows:

"(c) Any statutory amendment to the Truth in Lending Act, any regulation of the Board, or any amendment or interpretation thereof, requiring any disclosure different from that previously required by this chapter, chapter 4, or chapter 5, shall have an effective date of October 1 of the calendar year following the year of enactment or promulgation, except that the Board may take interim action by regulation, amendment, or interpretation to lengthen the period of time permitted for creditors to adjust their forms to accommodate new requirements at its discretion or shorten the length of time for creditors to make such adjustments when it makes a specific finding that such is necessary to prevent unfair or deceptive disclosure practices. Notwithstanding the foregoing, any creditor may comply with any such new disclosure requirements prior to the effective date of the requirements.".

RIGHT OF RESCISSION

SEC. 7. (a) Section 125(b) of the Truth in Lending Act (15 U.S.C. 1635(b)) is amended by striking out "ten" in the second and final sentences and inserting in lieu thereof "twenty".

(b) Section 125(e) of such Act (15 U.S.C. 1635(e)) is amended to read as follows:

"(e) This section does not apply to the creation or retention of a first lien against any real property which is used or expected to be used as the residence of the person to whom credit is extended to finance the acquisition of that property or to a consumer credit transaction in which an agency of a State is the obligor.".

(c) Section 125(f) of such Act (15 U.S.C. 1635(f)) is amended by adding at the end thereof the following: "Notwithstanding any other provision of this section, when an obligor exercises a right to rescind after midnight of the third business day following the consummation of the transaction, as a condition of the exercise of that right, the obligor shall, at the time the creditor is notified of the exercise of the right to rescind, tender the property, principal amount of loan, or other consideration received from the creditor. If return of the property in kind would be impracticable or inequitable, the obligor shall tender its reasonable value. Tender shall be made at the location of the property or at the residence of the obligor, at the option of the obligor. If the creditor does not take possession of the property within twenty days after tender by the obligor, ownership of the property vests in the obligor without obligation on his part to pay for it.".

(d) Section 103 of such Act (15 U.S.C. 1602), as amended by section 2(b), is amended by adding at the end thereof the following:

"(v) The term 'material disclosures' means the creditor has disclosed, as required by

this chapter, the annual percentage rate, the finance charge or method of determining the balance upon which a finance charge will be imposed and the amount of the finance charge, whichever is applicable, the amount to be financed, the total of payments, the number and amount of payments, and the due dates or periods of payments scheduled to repay the indebtedness. Any mathematical computation which is made with reasonable accuracy, as defined by the Board, is in compliance with this title.".

VOLUNTARY PERIODIC STATEMENTS

SEC. 8. Chapter 2 of the Truth in Lending Act (15 U.S.C. 1631–1645) is amended by striking out section 126 (15 U.S.C. 1636).

OPEN END CREDIT DISCLOSURES

SEC. 9. (a) Section 127(a) of the Truth in Lending Act (15 U.S.C. 1637(a)) is amended by striking out paragraphs (5) and (6) and by redesignating paragraphs (7) and (8) as paragraphs (5) and (6), respectively.

(b) Redesignated paragraph (5) of section 127(a) of such Act (15 U.S.C. 1637(a)) is amended to read as follows:

"(5) Where a security interest may be retained or acquired in any property to secure the payment of any credit extended under the plan, a statement that a security interest is or may be taken under the open end credit plan."

(c) Redesignated paragraph (6) of section 127(a) of such Act (15 U.S.C. 1637(a)) is amended by striking out "each of two billing cycles per year, at semi-annual intervals" and inserting in lieu thereof "one billing cycle per calendar year, at intervals of not less than six months or more than 18 months".

(d) Section 127(b)(2) of such Act (15 U.S.C. 1637(b)(2)) is amended to read as follows:

"(2) The amount and date of each extension of credit during the period and a brief identification, on or accompanying the statement, of each extension of credit sufficient to enable the obligor either to identify the transaction or to relate it to copies of sales vouchers or similar instruments previously furnished, except that a creditor's failure to disclose such identification in accordance with this paragraph shall not be deemed a failure to comply with this chapter or this title if (A) the creditor maintains procedures reasonably adapted to procure and provide such identification; and (B) the creditor responds to and treats any inquiry for clarification in accordance with section 161 of this title.".

CLOSED END CREDIT DISCLOSURES

SEC. 10. (a) Section 128(a)(8) of the Truth in Lending Act (15 U.S.C. 1638(a)(8)) is amended by inserting before the period at the end thereof a comma and the following: "except that for transactions payable in more than 120 installments, all of which are substantially equal and in connection with which a creditor determines the finance charge by the application of a periodic rate to the unpaid balances of the amount financed, the number of payments shall be disclosed with an accuracy which is within a tolerance of 1 per centum more or less than the actual number of installments necessary to pay in full the extension of credit in accordance with its terms".

(b) Section 128(a) of the Truth in Lending Act (15 U.S.C. 1638(a)) is amended by striking out paragraph (9) and by redesignating paragraph (10) as paragraph (9).

(c) Section 129(a) of such Act (15 U.S.C. 1639(a)) is amended by striking paragraphs (1), (2), and (7) and redesignating paragraphs (3), (4), (5), (6), and (8) as paragraphs (1), (2), (3), (4), and (5), respectively. Redesignated paragraph (1) is amended to read as follows:

"(1) The amount of credit which will be paid to the customer or for his account or to another person on his behalf, including all charges, individually itemized, which are included in the amount of credit extended but which are not part of the finance charge, using the term 'amount financed'.".

(d) Redesignated paragraph (4) of section 129(a) of such Act (15 U.S.C. 1639(a)(4)) is amended by inserting before the period at the end thereof a comma and adding the following: "except that for transactions payable in more than 120 installments, all of which are substantially equal and in connection with which a creditor determines the finance charge by the application of a periodic rate to the unpaid balances of the amount financed, the number of payments shall be disclosed with an accuracy which is within a tolerance of 1 per centum more or less than the actual number of installments necessary to pay in full the extension of credit in accordance with its terms".

(e) Section 106 of such Act (15 U.S.C. 1606) is amended by adding at the end thereof a new subsection as follows:

"(g) For transactions payable in more than 120 installments, all of which are substantially equal and in connection with which a creditor determines the finance charge by the application of a periodic rate to the unpaid balances of the amount financed, the amount of the finance charge shall be disclosed with an accuracy which is within a tolerance of 1 per centum more or less than the amount financed.".

(f) Section 107(c) of such Act (15 U.S.C. 1607(c)) is amended to read of follows:

"(c) The annual percentage rate may be rounded to the nearest quarter of 1 per centum or, if not rounded, shall be disclosed with an accuracy which is within a tolerance of one eighth of one per centum more or less than the rate determined in accordance with subsection (a)(1)(A), except that the Board may allow a greater tolerance to simplify compliance where irregular payments are involved.".

DISCLOSURE OF TYPE OF SECURITY INTEREST

SEC. 11. (a) Redesignated paragraph (9) of section 128(a) of the Truth in Lending Act (15 U.S.C. 1638(a)(9)) is amended to read as follows:

"(9) A clear identification of any property in which a security interest may or is intended to be retained or acquired by the creditor in connection with the extension of credit or reference to such an identification on an accompanying statement delivered to the obligor.".

(b) Redesignated paragraph (5) of section 129(a) of such Act (15 U.S.C. 1936(a)(5)) is amended to read as follows:

"(7) A clear identification of any property in which a security interest may or is intended to be retained or acquired by the creditor in connection with the extension of credit or reference to such an identification on an accompanying statement delivered to the obligor,".

NO LIABILITY FOR SUBSTANTIAL COMPLIANCE

SEC. 12. Section 130 of the Truth in Lending Act (15 U.S.C. 1640) is amended by adding at the end thereof a new subsection as follows:

"(i) A creditor may not be held liable in any action brought under this section for a violation of the disclosure requirements of sections 127, 128, or 129 where the failure to disclose was not material to the obligor's awareness of the cost of credit. There shall be a presumption that material disclosures necessary for the obligor's awareness of the cost of credit have been made when the creditor discloses, as required by this chapter, the annual percentage rate, the finance charge or method of determining the balance upon which a finance charge will be imposed and the amount of the finance charge, whichever is applicable, the amount to be financed, the total of payments, the number and amount of payments, and the due dates or periods of payments scheduled to repay the indebtedness. Any mathematical computation which is made with reasonable accuracy, as determined by the Board, is in compliance with this title.".

ADVERTISING OF CREDIT TERMS

SEC. 13. (a) Section 143 of the Truth in Lending Act (15 U.S.C. 1663) is amended to read as follows:

"§ 143. Advertising of open end credit plans

"(a) No advertisement to aid, promote, or assist directly or indirectly the extension of consumer credit under an open end credit plan may set forth any of the specific terms of that plan unless the periodic and annual percentage rates are clearly and conspicuously set forth.

"(b) Where terms other than rates are advertised, only the following terms must be stated:

"(1) The minimum periodic payment required and the method of determining any larger required periodic payment.

"(2) The method of determining the balance upon which a finance change may be imposed.

"(3) The periodic rate.

"(4) The annual percentage rate.".

(b) Section 144(d) of such Act (15 U.S.C. 1664(d)) is amended by striking out paragraphs (1) and (2) and redesignating paragraphs (3) and (4) as paragraphs (1) and (2), respectively.

CORRECTION OF BILLING ERRORS

SEC. 14. (a) Section 161(b) of the Truth in Lending Act (15 U.S.C. 1666(b)) is amended by striking out paragraph (3) and redesignating paragraphs (4), (5), and (6) as paragraphs (3), (4), and (5) respectively.

(b) Redesignated paragraph (5) of section 161(b) of such Act (15 U.S.C. 1666(b)(5)) is amended to read as follows:

"(5) failure to transmit the statement required under section 127(b) of this Act to the last address of the obligor which has been disclosed to the creditor, unless that address was furnished less than twenty days before the end of the billing cycle for which the statement is required.".

(c) Section 161(c) of such Act (15 U.S.C. 1666(c)) is amended by inserting after "account" the first time it is used a comma and the following: "which may include finance charges on amounts in dispute,".

RELATION TO STATE LAWS

SEC. 15. (a) Section 111 (a) through (c) of the Truth in Lending Act (15 U.S.C. 1610) is amended to read as follows:

"(a) Except as provided in subsection (b)—

"(1) if an act or practice is prohibited by this title or any action taken pursuant to authority thereunder, no State or political subdivision of a State may establish or continue in effect any law, regulation, or rule permitting such act or practice;

"(2) if an act or practice is regulated, restrained, or otherwise limited by this title or any action taken pursuant to authority thereunder, no State or political subdivision of a State may establish or continue in effect any law, regulation, or rule which regulates, restrains, or otherwise limits such act or practice unless such State law, regulation, or rule imposes requirements identical to the requirements of this title;

"(3) if an act or practice is unregulated, unrestrained or otherwise permitted by this title or any action taken pursuant to authority thereunder, no State or political subdivision of a State may establish or continue in effect any law, regulation, or rule which prohibits, regulates, restains, or otherwise limits such act or practice; and

"(4) if forms, notices, disclosures, record-keeping, or reporting requirements are required by this title or any action taken pursuant to authority thereunder, no State or

political subdivision of a State may establish or continue in effect any law, regulation, or rule with respect to forms, notices, disclosures, recordkeeping or reporting requirements within the scope of this title unless such State law, regulation, or rule imposes requirements identical to the requirements of this title or any action taken pursuant to authority thereunder.

"(b) Upon application of a State or political subdivision of a State, the Board may, by regulation promulgated in accordance with subsection (c), exempt from subsection (a), under such conditions as may be prescribed in such regulation, a law, regulation, or rule of a State or political subdivision if—

"(1) compliance with the requirement would not cause the act, practice, form, notice, disclosure or other action to be in violation of the applicable requirement described in subsection (a), and

"(2) the State or political subdivision requirement or prohibition (A) provides a significantly higher degree of protection against acts or practices prohibited by this title than do the requirements or prohibitions described in subsection (a), (B) is justified by the acts or practices occurring in the State which are not adequately regulated by this title and (C) does not unduly burden interstate commerce.

In determining the effect of a State or political subdivision requirement on interstate commerce, the Board shall consider and make appropriate findings on the technological and economic feasibility of complying with such requirement, the cost of complying with such requirement, the probability of other States or political subdivisions applying for an exemption under this pargraph for a similar requirement, and the need for a national, uniform requirement under this title.

"(c) A regulation under subsection (b) granting an exemption for a requirement of a State or political subdivision of a State may be promulgated by the Board only after it has provided in accordance with section 553 (b) of title 5, United States Code, notice with respect to the promulgation of the regulation and has provided opportunity for presentation or relevant data, views, and arguments respecting its promulgation.".

(b) Sections 171 (a) and (b) and 186 of such Act (15 U.S.C. 1666j (a) and (b) and 1667e) are repealed.

By Mr. STEVENS:

S. 1502. A bill to amend title 18, United States Code, to make a crime the willful destruction of any interstate pipeline system; to the Committee on the Judiciary.

Mr. STEVENS. Mr. President, today I am introducing legislation that would amend title 18 of the United States Code to prohibit the willful injury or destruction or any attempt to injure or destroy an interstate pipeline system. This legislation complements the bill regarding the Trans-Alaska Pipeline System introduced yesterday by my good friend, Senator JAMES EASTLAND of Mississippi. I cosponsored that legislation along with Senator STROM THURMOND of South Carolina and will remain a cosponsor of that bill.

My bill expands the coverage of Senator EASTLAND's bill to include any interstate pipeline system. My major concern is that no specific pipeline system be singled out for unique treatment. Rather, we need to insure the safety of all interstate pipeline systems which transport oil and gas in the United States.

Later this year Congress will consider the recommendation of the President concerning the route chosen to transport natural gas from the North Slope of Alaska to the south 48. My bill would cover that pipeline for the distance which it is located within the United States, the Trans-Alaska Pipeline System, and all other interstate pipeline systems located within the United States. In this way, the necessity to pass further legislation to cover a pipeline transporting natural gas from Alaska and any new pipelines can be avoided.

While I remain a cosponsor of Senator EASTLAND's legislation, I am concerned that the bill could be construed to single out the citizens of my State as those most likely to interfere with the Trans-Alaska Pipeline System. As you know, the TAPS line is located solely within the State of Alaska, and I want to avoid any implication that only Alaskans might tamper with that pipeline system. Instead, I propose a piece of general legislation that would cover all interstate pipeline systems.

There is no question in my mind that the Trans-Alaska Pipeline System is an interstate pipeline system. The oil travels in interstate commerce from the moment it enters the pipeline. Consequently, my bill would cover the TAPS line.

However, there has been some question raised that the TAPS line is an intrastate pipeline, because it is located solely within the State of Alaska. Therefore, some clarification, similar to that in Senator EASTLAND's bill might be a welcome addition to my legislation to insure that no misunderstanding exists. For this reason, I state that my bill compliments Senator EASTLAND's legislation, and it might be appropriate for these two bills to be combined into one piece of legislation prior to final consideration by the Senate.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1502

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, (a) title 18, United States Code, is amended by adding immediately after chapter 67 the following new chapter:

"Chapter 68—INTERSTATE PIPELINES SYSTEMS

"Sec.
"1401. Definition.
"1402. Destruction of interstate pipeline system.

"§ 1401. Definition.

"As used in this chapter, the term 'interstate pipeline system' means any pipeline system used in the transportation of gas or oil in interstate commerce.

"§ 1402. Destruction of interstate pipeline system.

"Whoever willfully injures or destroys, or attempts to injure or destroy, any interstate pipeline system shall be fined not more than $5,000 or imprisoned not more than 15 years, or both.".

(b) The table of chapters of part I of title 18, United States Code, is amended by inserting immediately after the item relating to chapter 67 the following:

"68. Interstate pipeline systems..... 1401".

ADDITIONAL COSPONSORS

S. 77

At the request of Mr. MATHIAS, the Senator from Vermont (Mr. LEAHY), the Senator from Florida (Mr. STONE), and the Senator from Vermont (Mr. STAFFORD) were added as cosponsors of S. 77, to amend the Social Security Act.

S. 143

At the request of Mr. TALMADGE, the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of S. 143, relating to fraudulent activities under the medicare and medicaid programs.

S. 527

At the request of Mr. NELSON, the Senator from Michigan (Mr. RIEGLE) and the Senator from Hawaii (Mr. MATSUNAGA) were added as cosponsors of S. 527, a bill to amend the Small Business Act by authorizing the Small Business Administration to furnish reinsurance for property liability insurers for small business concerns which would not otherwise be able to obtain product liability insurance on reasonable terms, and for other purposes.

S. 961

At the request of Mr. CRANSTON, the Senator from Minnesota (Mr. ANDERSON) was added as a cosponsor of S. 961, to extend the Child Abuse Prevention and Treatment Act.

S. 1011

At the request of Mr. ROTH, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 1011, a bill to amend title 18, United States Code, to prohibit the sexual exploitation of children and the transportation in interstate or foreign commerce of photographs or films depicting such exploitation.

S. 1040

At the request of Mr. ROTH, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 1040, a bill to amend the Child Abuse Prevention and Treatment Act to prohibit the sexual exploitation of children and the transportation and dissemination of photographs or films depicting such exploitation.

S. 1328

At the request of Mr. ROBERT C. BYRD (for Mr. HATHAWAY), the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 1328, the Career Education Implementation Incentive Act of 1977.

S. 1385

At the request of Mr. HELMS, the Senator from North Dakota (Mr. YOUNG) was added as a cosponsor of S. 1385, to amend title XVIII of the Social Security Act.

S. 1405

At the request of Senator MCINTYRE, the Senator from South Carolina (Mr. THURMOND), was added as a cosponsor of S. 1405, the Customs Paperwork Simplification Act.

S. 1446

At the request of Mr. THURMOND, the Senator from Utah (Mr. HATCH), the Senator from Vermont (Mr. LEAHY), and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors of

S. 1464, to require a health warning on bottles containing alcoholic beverages.

S. 1495

At the request of Mr. PACKWOOD, the Senator from New York (Mr. MOYNIHAN), the Senator from Oregon (Mr. HATFIELD), and the Senator from California (Mr. HAYAKAWA) were added as cosponsors of S. 1495, to authorize the Secretary of Transportation to make grants for the construction of bikeways.

SENATE RESOLUTION 5

At the request of Mr. ROBERT C. BYRD, the Senator from California (Mr. CRANSTON), the Senator from Alabama (Mr. ALLEN), and the Senator from North Carolina (Mr. HELMS) were added as cosponsors of Senate Resolution 5, to amend the Standing Rules of the Senate.

SENATE RESOLUTION 153

At the request of Mr. METCALF, the Senator from Maine (Mr. MUSKIE) and the Senator from New Hampshire (Mr. DURKIN) were added as cosponsors of Senate Resolution 153, relating to radio and television coverage of Senate proceedings.

SENATE RESOLUTION 166

At the request of Mr. ROBERT C. BYRD (for Mr. CULVER), the Senator from Minnesota (Mr. ANDERSON), the Senator from Michigan (Mr. RIEGLE), the Senator from Indiana (Mr. LUGAR), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Arizona (Mr. DECONCINI), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Ohio (Mr. METZENBAUM), the Senator from New Mexico (Mr. SCHMITT), the Senator from Nebraska (Mr. ZORINSKY), the Senator from Montana (Mr. MELCHER), the Senator from Tennessee (Mr. SASSER), the Senator from Kansas (Mr. DOLE), the Senator from California (Mr. CRANSTON), the Senator from Utah (Mr. GARN), the Senator from Vermont (Mr. LEAHY), the Senator from North Carolina (Mr. MORGAN), the Senator from Pennsylvania (Mr. SCHWEIKER), the Senator from Alaska (Mr. GRAVEL), the Senator from Florida (Mr. CHILES), the Senator from South Dakota (Mr. ABOUREZK), the Senator from Connecticut (Mr. WEICKER), the Senator from New Mexico (Mr. DOMENICI), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Colorado (Mr. HASKELL), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Colorado (Mr. HART), and the Senator from Illinois (Mr. PERCY) were added as cosponsors of Senate Resolution 166, to provide for the reorganization of administrative services of the Senate.

SENATE RESOLUTION 170—ORIGINAL RESOLUTION REPORTED AUTHORIZING ADDITIONAL COMMITTEE EXPENDITURES

(Referred to the Committee on Rules and Administration.)

Mr. EASTLAND, from the Committee on the Judiciary, reported the following resolution:

S. RES. 170

Resolved, That, in holding hearings, reporting such hearings, and making investigations as authorized by sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction under rule XXV of the Standing Rules of the Senate so far as applicable, the Committee on the Judiciary, or any subcommittee thereof, is authorized from July 1, 1977, through February 28, 1978, for the purposes stated and within the limitations imposed by the following sections, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services or personnel of any such department or agency.

SEC. 2. The Committee on the Judiciary, or any subcommittee thereof, is authorized from July 1, 1977, through February 28, 1978, to expend not to exceed $3,229,693 to examine, investigate, and make a complete study of any and all matters pertaining to each of the subjects set forth below in succeeding sections of this resolution, said funds to be allocated to the respective specific inquiries and to the procurement of the services of individual consultants or organizations thereof (as authorized by section 202(1) of the Legislative Reorganization Act of 1946, as amended) in accordance with such succeeding sections of this resolution.

SEC. 3. Not to exceed $337,000 shall be available for a study or investigation of administrative practice and procedure, of which amount not to exceed $9,664 may be expended for the procurement of individual consultants or organizations thereof.

SEC. 4. Not to exceed $540,000 shall be available for a study or investigation of antitrust and monopoly, of which amount not to exceed $8,000 may be expended for the procurement of individual consultants or organizations thereof.

SEC. 5. Not to exceed $227,320 shall be available for a study or investigation of citizen and shareholder rights and interests, of which amount not to exceed $2,664 may be expended for the procurement of individual consultants or organizations thereof.

SEC. 6. Not to exceed $492,600 shall be available for a study or investigation of the constitution, of which amount not to exceed $10,000 may be expended for the procurement of individual consultants or organizations thereof.

SEC. 7. Not to exceed $420,000 shall be available for a study or investigation of criminal laws and procedures.

SEC. 8. Not to exceed $284,600 shall be available for a study or investigation of immigration.

SEC. 9. Not to exceed $240,073 shall be available for a study or investigation of improvements in judicial machinery, of which amount not to exceed $10,000 may be expended for the procurement of individual consultants or organizations thereof.

SEC. 10. Not to exceed $332,100 shall be available for a study or investigation of juvenile delinquency, of which amount not to exceed $9,333 may be expended for the procurement of individual consultants or organizations thereof.

SEC. 11. Not to exceed $160,000 shall be available for a study or investigation of penitentiaries and corrections, of which amount not to exceed $6,667 may be expended for the procurement of individual consultants or organizations thereof.

SEC. 12. Not to exceed $196,000 shall be available for a study or investigation of separation of powers between the executive, judicial, and legislative branches of Government.

SEC. 13. The committee shall report its findings, together with such recommendations for legislation as it deems advisable with respect to each study or investigation for which expenditure is authorized by this resolution, to the Senate at the earliest practicable date, but not later than February 28, 1978.

SEC. 14. Expenses of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

SENATE RESOLUTION 171—ORIGINAL RESOLUTION REPORTED RELATING TO THE CONSIDERATION OF S. 1305

(Referred to the Committee on the Budget.)

Mr. HASKELL, from the Select Committee on Small Business, reported the following original resolution:

S. RES. 171

Resolved, That the provisions of section 402(a) of the Congressional Budget Act of 1974 are waived with respect to S. 1305, a bill to reform disaster relief procedures in the Small Business Administration.

SENATE RESOLUTION 172—SUBMISSION OF A RESOLUTION RELATING TO VALUE ENGINEERING

(Referred to the Committee on Governmental Affairs.)

Mr. RANDOLPH submitted the following resolution:

Whereas, it is recognized that Value Engineering is a proven method to conserve energy, improve services, save money or otherwise generally control the expenditure of construction resources by means of budgeted, organized, multidisciplined and function-oriented team review, and

Whereas, the Value Engineering methodology is applicable wherever there is a function to be performed and a means to measure it, and

Whereas, the preponderance of testimony before committees of Congress has shown that Value Engineering saves at least five dollars for each Value Engineering dollar spent, and

Whereas, the General Accounting Office has recommended the use of Value Engineering be expanded in Federal construction, and

Whereas, the Corps of Engineers in the past ten years has, by the use of Value Engineering, saved $200 million in construction costs for an expenditure of $10 million, and

Whereas, the first four years of Value Engineering application in the General Services Administration has saved $12.84 for each dollar spent, and

Whereas, Value Engineering has been successfully applied in private industry to generate additional profits and better products and services,

Therefore, Be it resolved that it is the sense of the Senate that all Federal departments and agencies, in order to achieve maximum efficiency and economy, shall utilize, where possible, Value Engineering in carrying out their functions and administering their programs as part of their affirmative efforts for cost reduction.

Mr. RANDOLPH. Mr. President, I am today submitting a resolution stating the sense of the Senate on the importance of value engineering as a cost-reduction tool. Billions of dollars are expended by the Federal Government each year for construction of worthwhile projects for all Americans. Institution of value engineering practices will result in substan-

tial cost reductions in those agencies employing this engineering cost-control procedure.

One of the strongest links of our past with our present is the American commitment to building. We have led the way not only in the amounts of our construction, but also in developing new techniques. In many respects, Americans had to be builders to survive.

Engineers contribute a necessary and important role in developing the projects which provide ultimate benefit to all Americans. Without this vital function, we could have no construction program which is so important for future growth.

With inflation forcing construction costs up at a rapid rate, we must undertake every opportunity to reduce the cost of each project. Value engineering is one technique which can have significant impact.

Like most other activities in our country, construction is a pluralistic endeavor with involvement by both the private and public sectors. The nature of our political system gives to the Federal Government a substantial involvement in construction, one which greatly influences activities throughout the economy.

With our construction dollars buying less, alternative engineering methods which reduce project costs must be encouraged. Congress should take every opportunity to reduce costs on Federal and federally assisted construction projects. This technique has proven its effectiveness and should be implemented on all Federal construction projects.

The facts prove that value engineering can successfully reduce costs when employed. One large Federal-aid highway contract reduced cost $500,000 on the fencing through value engineering. This technique is currently being used by the Federal Highway Administration and the Army Corps of Engineers whose programs are under the Public Works Committee's jurisdiction. The interest of the Environmental Protection Agency in this tool is growing as evidenced by its cosponsorship of a conference on value engineering in St. Louis last November.

So long as we are a changing and developing Nation committed to improved standards of living, I do not see how we can reduce our commitment to essential construction programs. There are many who say that the emphasis on growth during our two centuries as an independent Nation has been harmful. I do not agree. I fully recognize that there have been undesirable side effects of our determination to build. Without that determination, however, our country and its benefits would not exist today.

I also believe that Federal involvement is so well established that it must be a permanent feature of construction in our country. Federal programs will not be static in the years ahead. We must examine the needs of our country and respond to them. We must have reasoned involvement in the segments of our society.

Value engineering will not solve all the problems with construction costs; however, it is the most effective technique available for identifying and eliminating unnecessary costs. I strongly urge that my colleagues give careful consideration to this important tool which works effectively for our valuable construction program.

NOTICES OF HEARINGS

SUBCOMMITTEE ON TAXATION AND DEBT MANAGEMENT

Mr. HARRY F. BYRD, JR. Mr. President, the Subcommittee on Taxation and Debt Management will hold hearings on May 19, 1977, on S. 1471, a bill to provide a tax credit for contributions to candidates for the U.S. Senate.

The hearings will begin at 9:30 a.m. in room 2221, Dirksen Senate Office Building.

S. 1471, introduced by Senator BOB PACKWOOD of Oregon, provides for a tax credit for contributions to candidates for the U.S. Senate to 75 percent of the contribution made with a maximum of $100 in the case of individual taxpayers and $200 in the case of married couples filing joint returns. This bill contrasts with other legislation designed to provide public financing for political campaigns and a prohibition on private contributions.

Witnesses desiring to testify during this hearing must submit their requests to Michael Stern, Staff Director, Committee on Finance, 2227 Dirksen Senate Office Building, Washington, D.C. 20510, not later than 12 noon, Friday, May 13, 1977. Witnesses will be notified as soon as possible after this cutoff date as to whether they are scheduled to appear. If for some reason the witness is unable to appear as scheduled, he may file a written statement for the record of the hearing in lieu of a personal appearance.

All witnesses who have a common position or with the same general interest are urged to consolidate their testimony and designate a single spokesman to present their common viewpoint orally to the committee. This procedure will enable the committee to receive a wider expression of views than it might otherwise obtain. All witnesses should exert a maximum effort, taking into account the limited advance notice, to consolidate and coordinate their statements.

The Joint Committee on Taxation has estimated the revenue cost of S. 1471 to be $16.5 million for each calendar year. On a 2-year basis, the cost is estimated to be $33 million. The Joint Committee on Taxation will submit to the subcommittee an analysis of the proposal. Department of Treasury comments are encouraged.

FEDERAL NATIONAL MORTGAGE ASSOCIATION CHARTER ACT

Mr. PROXMIRE. Mr. President, I announce that the Committee on Banking, Housing, and Urban Affairs will hold a 1-day hearing, on Tuesday, June 7, 1977, on S. 1397, a bill to amend the Federal National Mortgage Association Charter Act to increase the size of the board of directors, and for other purposes.

The hearing will begin at 10 a.m. and will be held in room 5302, Dirksen Senate Office Building.

ADDITIONAL STATEMENTS

JUPITER ORBITER PROBE

Mr. STEVENSON. Mr. President, there is much interest in a Jupiter Orbiter Probe mission proposed by NASA in its fiscal year 1978 budget request. Recently NASA issued a brief description of that mission. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the description was ordered to be printed in the RECORD, as follows:

JUPITER ORBITER PROBE

WHAT IS JOP?

Jupiter Orbiter Probe (JOP) is a sophisticated space mission being proposed by NASA to explore Jupiter and its system of moons. Jupiter, the largest planet, contains more matter than all the other planets combined, and it holds many clues to the origin and evolution of the solar system. To understand the solar system, we need to understand Jupiter: to probe its atmosphere, to map its magnetic field and radiation belts, and to examine the huge satellites that orbit it.

The JOP spacecraft incorporates three concepts into a single mission. First, there is an entry probe that will plunge deep into the planet's atmosphere, measuring the chemistry and structure as it descends. Second, there is an orbiting spacecraft that will explore near-Jupiter space for 20 months after the probe is released. This orbiter combines unique aspects of the Pioneer, Mariner, Voyager, and Comsat spacecraft, with a spinning section optimized for study of Jupiter's magnetosphere and radiation belts and a stabilized section from which high-resolution photography and remote sensing observations can be made of Jupiter and its satellites.

JOP is to be launched in December 1981/January 1982, and it is the first planetary mission to take advantage of the Space Transportation System. The Shuttle capability, combined with an unusually favorable launch opportunity, allows this comprehensive combined probe-and-orbiter mission to be carried out with a single launch. The probe will enter Jupiter's dense atmosphere in November 1984, and the orbiter will remain active around the planet until mid-1986. JOP will be the first entry probe of an outer planet and the first outer planet orbiter.

WHY JUPITER?

The giant planet Jupiter, like its namesake the King of the Roman gods, dominates the planetary system. Its diameter is ten times that of Earth, and it contains more matter than all of the other planets put together. With its retinue of 13 moons, four of which are as large as planets, Jupiter is actually the center of a miniature solar system like the Sun and planets. In any program of planetary exploration, study of the Jovian system is of paramount interest for understanding the origin and evolution of the solar system.

In spite of its great size, Jupiter is a mysterious world. Like Saturn, it is a giant globe of gas with no apparent solid surface. Jupiter, composed largely of hydrogen and helium, is the planet that best represents the original star-stuff from which Sun and all planets were formed; a probe of the atmosphere of Jupiter will tell us much about the Sun as well as the planetary system.

Jupiter provides a miniature—but uniquely accessible—laboratory for study of phenomena of wide-ranging astrophysical interest. Like a star, it has its own internal energy source, radiating twice as much energy as it

receives from the Sun. Like the mysterious pulsars, it is surrounded by a vast, rapidly spinning magnetosphere and by belts of high-energy particles, making it a major source of several types of radio radiation. Jupiter's atmosphere is driven by the same forces that act on the atmosphere of Earth, but on a much larger scale—major cyclones like the Great Red Spot are thousands of miles across and persist for centuries, and Jupiter's atmosphere contains multiple cloud layers, each with its own temperature and chemical composition.

The four large Galilean satellites of Jupiter—Io, Europe, Ganymede, and Callisto—also provide a varied and fascinating microcosm of unique worlds. Some are composed largely of rock, some of ice, some of liquid water. Their surfaces probably run the gamut from lunar-like cratered plains to salt-covered beds of extinct seas to exotic landforms created out of ice and mud. In an ice-and-water dominated regime, familiar geologic processes will take place thousands of times faster than on a rocky planet, and totally unfamiliar geologic forms are expected as well. The satellites also react in unique ways with the Jovian energetic particles; in the case of Io, bombardment of the surface by a lethal hail of radiation releases sodium and creates a tenuous metallic atmosphere.

Until recently our knowledge of Jupiter was in only a rudimentary stage. Ground-based studies by optical, infrared, and radio astronomy defined the most basic properties of the planet and its satellites and hinted at the unique scientific potential of the Jovian system. Our first close-up look, provided by the two appropriately-named Pioneer spacecraft in 1973 and 1974, began to reveal the complexity of the atmosphere and the extent and strength of the magnetosphere. Without the detailed knowledge of the intensity of the radiation environment provided by Pioneers 10 and 11, we would be unable to effectively engineer spacecraft for subsequent flights to Jupiter. Following the Pioneer flybys, we will launch this year two sophisticated Voyager spacecraft to the outer planets. These spacecraft will fly past Jupiter and provide a more comprehensive reconnaissance of the planet, its satellites, and its environment, before continuing on to Saturn and beyond.

Unquestionably the next step in the exploration of the Jovian system is to probe the atmosphere, making direct measurements for the first time beneath the clouds of a giant planet, and to make extensive observations of the planet, its satellites, and its magnetosphere from a long-lived orbiting spacecraft. These are the goals of the JOP mission.

THE JOP MISSION

By the mid-summer of 1984, while still millions of miles from Jupiter, the JOP cameras will already be making extensive observations, studying features too small to see from Earth. The spacecraft will release its atmospheric entry probe toward Jupiter approximately 55 days prior to entry, after which it will change its own direction, enabling it to miss the planet safely. The probe will continue on course and enter the Jovian atmosphere just south of the equator. As the probe descends through the atmosphere, it will relay back to the orbiter a continuous flow of data on temperature, pressure, visible and infrared radiation. Specialized instruments on board the probe will measure the chemical composition of the atmosphere with an accuracy never before possible. The probe will operate to the bottom of the water clouds, where the pressure is more than 10 times the pressure on Earth. Rocket engines will then slow the orbiter, placing it in a long orbit around Jupiter. The dangerous radiation areas close to the planet will be avoided by performing a second rocket burn. A five-month first orbit will gather data through Jupiter's magnetosphere and beyond its outer edge on the dawn side. Also, the orbiter cameras will record changes in the atmospheric storm patterns and the Great Red Spot.

Using relatively little rocket fuel, space navigators will employ the free gravitational pull of Jupiter's large moon to steer the orbiter to regions around the planet that would otherwise be inaccessible. By repeated close encounters with Ganymede and Callisto, the orbiter will move its apojove, or farthest point in the orbit, around into the tail area of the magnetosphere. Here, magnetic field lines stretch into space and charged particles move into and out of the trapped radiation belts. The cumulative effect of many measurements made during close encounters of Ganymede and Callisto will be to assemble a knowledge of these two satellites as comprehensive as that obtained for Mars by the Mariner 9 Orbiter in 1971/72. Finally, after all the major mission objectives have been accomplished, the option will exist to lower the orbiter into the intense radiation near the planet to study closely the other two major moons, Io and Europa.

The JOP spacecraft will be a cooperative effort of a well-proven NASA/Industry Team. In addition, a significant international contribution is expected involving the Federal Republic of Germany. Within NASA, the Jet Propulsion Laboratory will have overall mission responsibility, while Ames Research Center will be responsible for the entry probe. McDonnell-Douglas and Hughes Aircraft are conducting design studies of the probe, and one of these companies will be selected for development and fabrication of the flight hardware. There is a reasonable likelihood that the Federal Republic of Germany will provide the orbit capture propulsion system, as well as participate in the scientific investigations, thus advancing the international aspects of our planetary exploration program.

WHY NOW?

There are a number of compelling reasons why JOP should be a new start in FY 1978.

1. In a balanced plan of exploration of the solar system, the time is ripe for detailed studies of Jupiter and its satellites. To understand the origin and evolution of the solar system, we need to understand the Jovian system. Exploration of Jupiter and the other outer planets is a necessary complement to the more detailed and extensive studies being carried out of Mars, Venus, and the Moon. The JOP mission has received the full endorsement of the National Academy of Sciences and of the science community. The Space Science Board has stated that exploration of Jupiter and reconnaissance of Uranus should be the major objectives in exploring the outer solar system during the next decade.

2. Any delay in implementing the JOP mission will result in deteriorating launch opportunities. The intricate economics and the scientific constraints controlling spacecraft launches tell us that it is not practical to fly planetary missions any time we wish. To do so would require launch vehicles that would dwarf even the giant Apollo Saturn V rocket system. We are compelled, therefore, to seek opportunities when launch energy requirements are at a minimum—a condition dictated by the geometry of the solar system and the highly involved inter-relationships of the planets. Although opportunities for Jupiter launch occur every 13 months, the nature of the elliptical orbits of Earth and Jupiter cause launch energy requirements to vary significantly from one opportunity to another. The proposed December 1981/January 1982 launch date for JOP takes full advantage of the best Jupiter opportunity that will exist during the remainder of this century. A delay of even 13 months would make it impossible to carry out the full range of orbiter and probe investigations being planned for this mission. The next feasible launch would be in 1987, but even this is significantly inferior to the 1981/82 opportunity.

3. The spacecraft technology is available now. The JOP mission can be meaningfully planned based on results of Pioneers 10 and 11, and it can take maximum advantage of the probe technology being developed for the Pioneer Venus mission to be launched in 1978 and of the stabilized outer-planet Voyager spacecraft to be launched this year. In turn, the development of both probe and orbiter for JOP will provide the required basis for additional missions to Saturn, Titan, Uranus, and Neptune during the rest of the century.

4. The required cadre of strong technical competence is now available within NASA and its contractor establishment. Deferring the outer planets program to the next favorable launch opportunity would result in loss of expertise gained from the Pioneer and Voyager missions and would probably force the disbanding of the NASA/Industry Team that has developed the unique technology required.

ORGANIZED LABOR FINANCIAL CONTRIBUTIONS TO CONGRESSIONAL CANDIDATES IN THE 1976 CAMPAIGNS

Mr. GOLDWATER. Mr. President, on several occasions prior to the 1976 election I placed in the RECORD items that clearly revealed the tremendous effort being exerted by labor unions to influence the U.S. Congress. While sanctimonious critics of the political process find much wrong with contributions which come from people in business, it is curious to me that very seldom do they point their finger at big labor and question what the unions expect to get from all this expenditure of money. In fact, information about labor donations rarely shows up in the national media.

To help correct this distorted picture, I believe it is appropriate to call attention to a just released compilation of financial contributions given by labor organizations to candidates for the U.S. Senate and House of Representatives in the 1976 campaigns. The total of these political donations is a minimum of $10,588,555.74. These amounts include direct, "in kind," and independent contributions as reported to the Federal Election Commission. They are minimum expenditures, since it appears all reporting requirements are not being fulfilled by many labor committees.

Some of the wide public that reads the RECORD will find it interesting that the following figures show that Democrats received more than 30 times more financial support from organized labor than Republicans did. Democrats received $10,208,015 and Republicans $380,540. In other words, Democrats got 96.5 percent of labor contributions in 1976.

Mr. President, the detailed list of contributions was compiled by the Americans for Constitutional Action from official public files of the Federal Election Commission. Because of its important bearing on the public's right to know, I ask unanimous consent that the complete breakdown of organized labor's political expenditures in the 1976 elections be printed in the RECORD.

There being no objection, the breakdown was ordered to be printed in the RECORD, as follows:

LABOR'S POLITICAL EXPENDITURES TO CONGRESSIONAL CANDIDATES

SENATE

Organized labor's financial support to individual Senatorial candidates in the 1976 elections:

William Green (D-Pa.)	$245,480.40
John Tunney (D-Calif.)	230,488.46
Daniel Moynihan (D-N.Y.)*	222,046.89
Vance Hartke (D-Ind.)	210,754.09
Harrison Williams (D-N.J.)*	205,008.10
Howard Metzenbaum (D-Ohio)*	197,669.05
James O'Hara (D-Mich.) lost primary	196,883.95
Paul Sarbanes (D-Md.)*	169,500.22
Frank Moss (D-Utah)	145,546.35
James Sasser (D-Tenn.)	138,839.29
Donald Riegle (D-Mich.)*	138,046.61
Hubert Humphrey (D-Minn.)*	125,321.13
Elmo Zumwalt (D-Va.)	121,255.61
Joseph Montoya (D-N.M.)	101,425.32
Dennis DeConcini (D-Ariz.)*	92,717.25
John Melcher (D-Mont.)*	83,236.57
Edmund Muskie (D-Me.)*	77,321.24
Edward Kennedy (D-Mass.)*	76,901.24
Spark Matsunaga (D-Hawaii)*	75,300.00
Lloyd Bentsen (D-Tex.)*	64,160.00
Gale McGee (D-Wyo.)	63,672.74
Howard Cannon (D-Nev.)*	61,197.52
Tom Maloney (D-Del.)	58,519.14
James Symington (D-Mo.) lost primary	58,314.00
Robert Byrd (D-W. Va.)*	49,866.57
Bella Abzug (D-N.Y.) lost primary	46,257.07
Ed Zorinsky (D-Neb.)*	45,970.00
James Stanton (D-Ohio) lost primary	42,487.05
Peter Peyser (R-N.Y.) lost primary	41,868.23
Quentin Burdick (D-N.D.)*	41,009.31
Warren Hearnes (D-Mo.)	37,486.34
Robert Stafford (R-Vt.)*	35 976.48
Lowell Weicker (R-Conn.)*	27,478.33
J. Glenn Beall (R-Md.)	26,450.00
Richard Lorber (D-R.I.)	22,061.12
Gloria Schaffer (D-Conn.)	19,503.25
Robert Taft (R-Ohio)	18,972.40
Paul O'Dwyer (D-N.Y.) lost primary	18,000.00
John Heinz (R-Pa.)*	14,398.81
Thomas Salmon (D-Vt.)	12,300.00
Jeanett Reibman (D-Pa.) lost primary	10,465.00
Patsy Mink (D-Hawaii) lost primary	7,700.00
Henry Jackson (D-Wash.)*	4,099.21
John Chafee (R-R.I.)*	3,300.00
Philip Hayes (D-Ind.) lost primary	3,050.00
Orrin Hatch (R-Utah)	3,000.00
Jack Carlson (R-Utah) lost primary	2,500.00
Philip Noel (D-R.I.) lost primary	2,375.00
Jerry Litton (D-Mo.) died	1,800.00
William Proxmire (D.-Wis.)*	1,524.86
John Hawkins (D-R.I.) lost primary	1,165.72
William Roth (R-Del)*	1,050.00
Ramsey Clark (D-N.Y.) lost primary	1,000.00
S. I. Hayakawa (R-Calif.)*	1,000.00
Tom Hayden (D-Calif.) lost primary	1,000.00
Alan Steelman (R-Tex.)	1,000.00
Frederick Lagone (D-Mass.) lost primary	750.00
Bill Brock (R-Tenn.)	500.00
Marvin Esch (R-Mich.)	500.00
Carolyn Warner (D-Ariz.) lost primary	500.00
John McCollister (R-Neb.)	400.00
Robert Abrams (D-N.Y.) dropped out	300.00
John Danforth (R-Mo.)*	$200.00
Harrison Schmitt (R-N.M.)*	200.00
Hess Dyas (D-Neb.) lost primary	100.00
Paul Goulding (D-R.I.) lost primary	100.00
Charles Ross (R-Vt.) lost primary	50.00

*Indicates winner.

Anyone not listed did not report receiving any Labor support.

HOUSE OF REPRESENTATIVES

Organized labor's financial support to individual Congressional candidates in the 1976 elections:

Democrats

Stan Lundine (N.Y. 39th)*	$106,535.93
Lloyd Meeds (Wash. 2nd)*	67,723.97
Jim Mattox (Texas 5th)*	66,250.47
Thomas O'Neill, Jr. (Mass. 8th)*	65,527.75
Bob Gammage (Texas 22nd)*	64,225.50
Martin Russo (Ill. 3rd)*	58,337.95
Tom Ashley (Ohio 9th)*	56,396.79
Robert Young (Mo. 2nd)*	56,071.55
Michael Blouin (Iowa 2nd)*	54,480.22
Pat Schroeder (Colo. 1st)*	53,288.90
John Dent (Pa. 21st)*	52,885.50
Floyd Fithian (Ind. 2nd)*	51,789.65
Jim Lloyd (Calif. 35th)*	51,417.65
Richard Vander Veen (Mich. 5th)	50,464.86
Mark Hannaford (Calif. 34th)*	50,063.88
Tim Wirth (Colo. 2nd)*	49,504.30
Edward Mezvinsky (Iowa 1st)	49,458.97
Bob Carr (Mich. 6th)*	48,204.56
Alvin Baldus (Wis. 3rd)*	47,789.12
Francine Ryan (Ohio 12th)	47,529.21
Leon Panetta (Calif. 16th)*	45,451.46
Leo Zeferetti (N.Y. 15th)*	44,510.90
Gladys Spellman (Md. 5th)*	43,229.51
Richard Nolan (Minn. 6th)*	43,049.44
Martha Keys (Kan. 2nd)*	42,484.41
Jerry Patterson (Calif. 38th)*	42,463.89
Robert Cornell (Wis. 8th)*	42,389.87
Norman Mineta (Calif. 13th)*	42,149.86
Robert Edgar (Pa. 7th)*	41,816.23
Tom Downey (N.Y. 2nd)*	41,726.70
Bob Traxler (Mich. 8th)*	41,437.85
Charlie Friedman (Fla. 12th)	41,384.61
James Florio (N.J. 1st)*	41,341.41
Lanny Davis (Md. 8th)	40,970.24
Bruce Vento (Minn. 4th)*	40,919.10
Abner Mikva (Ill. 10th)*	40,867.29
Bob Eckhardt (Texas 8th)*	40,640.00
Toby Moffett (Conn. 6th)*	40,623.47

FINANCIAL STATEMENT OF SENATOR GARN

Mr. GARN. Mr. President, I have long believed that persons elected to public office have an obligation to disclose to their constituents information describing their personal financial position. I believe that the voters of Utah have a right to know where any potential conflict of interest may exist as a result of the sources of income of their Senator, and so I am pleased to submit this statement and ask unanimous consent that it be printed in the RECORD.

There being no objection, the financial statement was ordered to be printed in the RECORD, as follows:

1976 PERSONAL FINANCIAL STATEMENT: SENATOR JAKE GARN

1976 gross income	$71,934
U.S. Senate Salary	44,600
Utah Air National Guard	2,790
Honoraria	23,650
Interest	894
Taxes paid	22,018
Federal income taxes	12,552
Social security tax (Self-employment honoraria)	1,209
Utah State income taxes	2,331
Real estate, personal property and other taxes	5,926
Total assets	232,500
Estimated market value, acquired and mortgage:	
Home in McLean Va., $125,000, 1975	79,500
Home in Salt Lake City, Utah, $41,000, 1976	13,500
Land, 40 acres, Cache County, Utah, $16,000, 1966	------
Land, 3 acres, Wasatch County, Utah, $25,500, 1975	------
Cabin, Wasatch County, Utah, $25,000, 1968	4,600
Total liabilities	97,600
Estimated net worth	134,900

I own no stock or bonds or any interest in any business or partnership.

NOTICE OF A DETERMINATION BY THE SELECT COMMITTEE ON ETHICS UNDER RULE 43, PARAGRAPH 4, PERMITTING ACCEPTANCE OF A GIFT OF EDUCATIONAL TRAVEL FROM A FOREIGN NATIONAL

Mr. STEVENSON. Mr. President, it is required by paragraph 4 of rule XLIII that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee received a request for a determination under rule 43 on behalf of staff economist Ms. Sarah Jackson from Representative RICHARD BOLLING, chairman of the Joint Economic Committee. On the basis of the facts stated in his letter of May 4, the select committee, polled on May 11, 1977, determined that the participaion of Ms. Jackson in educational and fact-finding travel in seven European countries May 14–June 17, 1977, at the expense of the European community's visitors' program to study coordination of national energy policies of member states, is in the interest of the Senate and the United States. The proposed itinerary includes: departure from Washington, D.C., May 14 for Brussels; travel in Belgium, West Germany, Denmark, the Netherlands, Belgium, France, and Great Britain, May 15–June 16; and Washington, D.C., June 17.

THE NEED FOR MORE DEBATE ON OUR POLICY TOWARD ZAIRE

Mr. HASKELL. Mr. President, recent events in Zaire have been the subject of a good deal of very healthy public discussion. In my opinion we need a good deal more such debate before Congress authorizes any sizeable amount of assistance—either military or economic—to Zaire. That debate should focus not only on the nature and ramifications of the present conflict in Shaba Province, but also on the basic principles and assumptions which underlie U.S. policy toward this central African nation. There are a number of factors which make continued support for the regime of General Mobutu a highly dubious proposition.

Gerald Bender, of the University of California at San Diego, wrote in the Los Angeles Times of late March that on grounds of respect for human rights, political reliability, competence as a military or economic leader, respect for private property, or the development of the urban and urban areas of his country, it is difficult to justify continued military aid to Mobutu.

Prof. Stephen R. Weissman, of the University of Texas at Dallas, a Zaire expert, testified on April 28, before the Subcommittee on Africa of the House International Relations Committee, "that American policy in Zaire is in danger of reenacting the Ethiopian syndrome" that is, continuing American identification with a government increasingly perceived by its own people to be repressive, dictatorial and corrupt, followed by the overthrow of that government and the emergence of a successor regime deeply suspicious of or hostile to the United States.

"The likely result," Professor Weissman asserts, of continued American and Western limited military, political, and economic support to the Mobutu regime "will be a near-term political collapse" of Mobutu "followed by the emergence of a turbulent, leftist, anti-American government, and increased polarization and danger of proxy war in Central and Southern Africa."

A far preferable course, he argues, is for the United States "to scale down assistance and to minimize our association with one of Africa's weakest and most oppressive regimes," while commencing negotiations with the Soviet Union on arms limitation in central Africa, and formulating an African policy that emphasizes a multilateral approach to Third World problems.

If Professor Weissman is correct in his analysis of the prospects for the continued viability of the Mobutu regime, further financial and political support for that regime is indeed of questionable wis-

dom. Certainly Weissman is supported in that analysis by other commentators of note. Those views deserve our very careful consideration. I ask unanimous consent that "Zaire: Is there Any Rationale for U.S. Intervention," by Gerald J. Bender, and "Our Man Mobutu," by Roger Morris from the New Republic of May 7, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ZAIRE: IS THERE ANY RATIONALE FOR U.S. INTERVENTION?

(By Gerald J. Bender)

The recent attack on Zaire by Katangan soldiers from their exile bases in Angola forces President Carter to make some hasty, but vital, decisions on Africa before his Administration has even finished formulating its new African policy.

For more than a decade, the United States has considered President Mobutu Sese Seko to be its strongest ally in Africa, and to assure his continued rule, has sent Zaire considerable military and financial assistance—$500 millio of it between 1960 and 1973. The $80 million in military aid to Zaire in 1976 was half of all such assistance in sub-Saharan Africa. American investment in Zaire of just under $1 billion is exceeded in Africa only by investments in South Africa and Nigeria. The CIA maintains its largest African station in Zaire.

If the Carter Administration uncritically follows past policy toward Zaire, therefore, we can expect further U.S. assistance for the beleaguered country beyond the $2 million worth of supplies flown in during the first week of the conflict. And if the United States continues to blame Angola for the invasion, we can expect a further deterioration in Angolan-American relations—which had been warming since Carter's inauguration to the point that U.S. recognition of the regime of President Agostinho Neto appeared almost certain by mid-1977. The immediate question, then, is how critically will President Carter study the situation in Zaire, and question past assumptions and policies before further committing the United States in Zaire's internal war.

An assessment of the situation in Zaire must start by answering some basic questions: Who are the Katangan soldiers who invaded the country? Should they be defined by their source of arms, ethnic organs, ideology of the country (Angola) which provided sanctuary, their goals, or by their potential threat to Mobutu? What is the internal situation in Shaba Province where the former Katangan gendarmes originated and where they now confront the Zaire army? Finally, how useful are ideological labels in helping Americans to understand whether the United States should become further embroiled in another internal African conflict?

The present attack by the Katangans marks the fifth remarkable chapter in the saga of these well-trained soldiers who have now fought for no less than five causes in the last decade and a half. They were organized in 1960 as the military arm of their leader and fellow Lunda, Moise Tshombe. Trained by white mercenaries, financed by Belgian mining interests, and armed by a variety of Western sources, they proved to be a formidable fighting force for Tshombe in his attempt to have copper-rich Katanga (now called Shaba) secede from the rest of the country.

After Tshombe's defeat in 1963, most of the Katangan gendarmes filed into Angola, but many returned the following year when the mercurial Tshombe became prime minister. Tshombe immediately integrated his former militia into the country's national army—the same army against which it had fought earlier. Following Tshombe's ouster and Mobutu's assumption of power in 1965, however, the Katangan units in the Congo army rebelled and made their way back to Angola. The Portuguese agreed to give them sanctuary on the condition that they assist in the fight against Angolan nationalists inside the colony. According to some Portuguese officers, the Katangans were the most effective of the African soldiers in their army during the decade of fighting preceding the Portuguese coup in April, 1974. Ironically, the nationalist group most subject to attacks by the former gendarmes was the MPLA—the group now ruling Angola and whom the U.S. government is accusing of providing logistical support for the Katangans.

During the Angolan civil war the Katangans were once again called upon to offer their fighting skills as the price of protection: The question was which of the three nationalist movements to join. The FNLA, with its umbilical attachment to Mobutu, was automatically viewed as an enemy; and when UNITA began to cozy up to Mobutu and the FNLA in mid-1975, the MPLA became the natural ally of the Katangans. They eventually made an important contribution to the MPLA's forces in eastern Angola and were especially critical in taking and holding the important city of Luso along the Benguela Railway.

In the closing months of the war, the Nigerian monthly, Afriscope, asked Neto about Zairean interference in Angolan affairs (which included sending over 5,000 Zairean troops into the Angolan battle as part of the FNLA). Neto responded: "Mobutu seems to forget that we have in Angola a large number of Zairean (Katangan) refugees hostile to his regime and open to suggestions of unfriendly action against his regime. But we have never thought of manipulating such groups because we consider such an action an interference in Zaire's internal affairs."

After the fighting ended in February 1976, Neto and Mobutu signed an accord normalizing relations between their countries. Zaire promised to cease all support of the FNLA and FLEC (Front for the Liberation of the Enclave of Cabinda) and to expel the leaders and troops of these movements from the country; Angola promised not to intervene in Zairean affairs. Moreover, President Neto was reported also to have agreed to the return of the exiled Katangans to whom Mobutu promised amnesty (but who, according to most observers, almost certainly faced imprisonment or death).

Since the 1976 accord, Mobutu's continued support for the FNLA and Cabindan separatists in their infiltration into Angola has caused considerable problems for Angola. In addition, Mobutu has allowed some of his own soldiers to accompany FNLA guerrillas into Angola as late as the end of 1976.

Given Zaire's open violation of the accord, the Neto regime undoubtedly felt justified in giving the green light to the Katangans, who certainly preferred returning home on the offensive against Mobutu's fragile army to continued exile in a remote part of Angola or even the possibility of being delivered into their enemy's grasp as part of some future accord between Angola and Zaire.

On the other hand, there is no question that the Angolan government would not have had an easy time "delivering" the Katangans to Mobutu or even restraining them from attacking, once they decided they had a chance for victory. In addition, they represented a potential threat to the MPLA if they decided to turn their military prowess against the Neto regime. In short, the Katangan soldiers' action not only rids the Angolan government of a sticky internal problem, but more important, momentarily solves the infiltration problem it faced from Zaire. Above all, it forces Mobutu to channel his military equipment and soldiers away from the FNLA and FLEC and into the battle against the Katangans.

It is highly unlikely that the Katangans or anybody who may have advised them believed that the former gendarmes could march over 1,500 miles to the capital, Kinshasa, and depose Mobutu. But they could deliver a severe, if not fatal, blow to the Mobutu regime by simply holding key areas in Shaba. Shaba is indispensable to Zaire because its copper mines provide 65% to 75% of the nation's foreign exchange earnings. Zaire provides 67% of the world's cobalt, 7% of its copper and a third of the world's industrial diamonds, and most of this mineral wealth is located in Shaba, now under attack.

One reason why the Katangans may have been encouraged to attack at this time is that, according to informed sources, there were almost no government forces in Shaba, and those who were there were viewed by the local people more as thieves than as protectors of the public order. Irregular government payments to its soldiers help explain the years of unimpeded bullying and robbing of Zaireans by the army and police. The result is that today the Zaire national army is distinguished far more for its harassment rather than protection of Zaire citizens. The humiliating defeats which Mobutu's troops suffered in Angola during the civil war there not only further demoralized the Zairean army but confirmed what Washington officials had been whispering for years—that the Zairean armed forces are still poorly organized, badly equipped, undisciplined, and ineffective in battle. Even the large injection of Chinese arms and training since 1973 apparently has not improved the performance of the Zairean army.

There are other reasons for the Katangans to have believed that they would receive support in Shaba. Most of the Katangan soldiers belong to the Lunda-Chokwe ethnic group, the predominant group in Shaba Province. Mobutu, hoping to neutralize this ethnic factor, flew to Shaba for a day where he met with the Lunda mwata yamvo (Lunda paramount chief), David Tshombe—a brother of the late Moise Tshombe. Nevertheless, early reports on the fighting indicate that the Katangans have been greeted as "liberators" in some of the areas they have occupied.

Deterioration of living and economic conditions in Shaba in recent years probably engendered considerable resentment against the Mobutu regime among the local inhabitants. The people of the province used to buy most of their essential products from Angola—for instance, salt, sugar, cooking oil, kerosene, vegetables, tea, cloth and soap. Since the Angolan civil war, however, these products are no longer available across the border.

In 1974 the Zaire government took over most small businesses and plantations without compensating the previous owners. The spoils were generally divided among party leaders loyal to Mobutu, many of whom simply sold the merchandise and pocketed the money without reordering or paying outstanding bills. The result was a severe shortage of goods. The situation became so desperate that this past October Mobutu invited the businessmen whose property and business had been expropriated to return to them to run their former enterprises.

Public services in Shaba have deteriorated drastically; spiraling inflation has placed nearly all available products out of reach for most people in Shaba; corruption has reached such proportions that few residents respect or are loyal to the regime in Kinshasa.

Mobutu has managed to keep the lid on this smoldering pot through repression. His regime has frequently been cited by Amnesty International for gross violations of human rights. More recently, a report on human rights released by the State Department lists

allegations of brutal treatment of political prisoners, extended incarceration without trial, "and even death of prisoners under interrogation." Mobutu thus epitomizes the very type of leader whom Carter has criticized before the United Nations and elsewhere for violations of human rights—at a time when the President himself has called commitments to such dictators into question.

It will be extremely difficult for the Carter Administration to rationalize further aid to Mobutu on any grounds which reflect on his leadership of Zaire. His record after a dozen years in office is replete with failure and incompetence. In addition to violations of human rights, Mobutu has been unable to forge a responsible and effective military. Economic and living conditions in both the rural and urban areas have steadily declined; his general mismanagement of the economy has left the country almost $2 billion in debt. And it will be difficult to argue that Mobutu at least shares American values for the respect of private property, after his wholesale expropriation of farms and small businesses without compensation, which ironically goes well beyond anything in Marxist Angola.

Finally, it will not be easy for the Carter Administration to justify further aid to Mobutu on the grounds of his political reliability. The substantial past U.S. military and financial assistance, heavy American investments, or even the well-established CIA links to Mobutu should not obscure the fact that Mobutu is highly unreliable politically. In early 1975, Mobutu surprised many by leading the attack in the Organization of African Unity against Henry Kissinger and his newly appointed assistant secretary of state, Nathaniel Davis. In June 1975, he expelled the U.S. ambassador, accusing him of intervening in Zaire's internal affairs. Some Zaire officers were even arrested as part of the alleged American plot. In addition, since 1973 Mobutu has developed close relations with China, which predictably has supported him verbally (and perhaps materially during the present crisis).

This past December, a Zairean delegation spent 10 days in Moscow, and signed an accord with the Russians which established the principles for future economic, scientific, technical and cultural cooperation. Commercial accords were also signed, as well as an agreement on maritime navigation.

In view of all this, can any Administration spokesman confidently predict that Mobutu will not attack American policies and interests in Africa again in the future or ultimately discard the United States as an ally in favor of China or even the Soviet Union?

If the United States cannot convincingly justify military aid to Mobutu on the grounds of his respect for human rights, political reliability, competence as a military leader, ability to manage his country's economy, respect for private property or the development of the urban and rural areas of his country, are there any other grounds which could be advanced? Statements by State Department spokesmen pointing to Angola's culpability for logistical support and possible training of the Katangans suggest that the Administration may be seeking to establish a principle based on the fact that the invasion originated outside of the country. But this would be a dangerous principle for the United States to adopt in Africa.

Today, 19 nations in Africa offer sanctuary to political refugees from neighboring countries. Most of these refugees entertain hopes of returning home, and many are preparing to do this militarily. The Ford and Carter administrations have remained silent on attacks against the Neto regime by Angolans based in Zaire. How would the United States react if Ugandans based in Tanzania successfully invaded their country and deposed Idi Amin? Would the invasion be condemned and President Julius Nyerere's regime criticized for offering the Ugandans logistical support for the attack—as Tanzania has done in the past? Is the United States prepared to establish a principle which would force us publicly to attack Zambia's respected President Kenneth Kaunda—considered to be one of the best U.S. allies in Africa—for the logistical support and sanctuary he provides to Zimbabwean refugees and troops who are launching raids into Rhodesia? The Carter Administration will have trouble justifying further military aid to Zaire based on any principle which establishes a precedent for providing military assistance to regimes in Africa attacked by their own citizens from neighboring countries.

Nor will it be easy to rationalize further U.S. aid based on U.S. opposition to the ideology or political orientations of the invading Katangans. They have embraced such a wide variety of political causes during the past decade and a half in order to survive that nobody can confidently predict what ideology, if any, they may hold today or will hold tomorrow. If the superpowers have learned anything during the past two decades about Africa, it should be the hazard of deducing the political ideology of any country or exile movement from the national origin of the arms they may employ at a given time. The Katangans epitomize this lesson.

If President Carter truly seeks to establish a new American approach to foreign policy, he will have to demonstrate in Zaire that he is prepared to question past policies and assumptions.

It should be clear that the present conflict has a variety of causes, most of them deeply rooted in local, and not international, affairs. The United States must eschew the propensity to apply inappropriate labels such as "pro-Communist" or "pro-West" in this struggle if we hope to avoid another unnecessary setback of the kind suffered in Angola.

We should have learned from the Angolan debacle how quickly a local African conflict can escalate into an international crisis when the Soviet Union and the United States (in conjunction with China) choose opposite sides. There is no clear "Soviet" side in this internal war, unless we define any force against Mobutu as ipso facto "pro-Soviet." Surely, the Katangans are no more "pro-Soviet" today than they were "pro-Portuguese" yesterday.

In the meantime, Zairean airstrikes on Angola this past week threaten to widen the struggle. If Mobutu continues to attack Angola with the same intensity, and if the United States agrees to send Mobutu the arms he has requested, it is entirely possible that the United States and the Soviet Union could end up fighting a second proxy war in central Africa. The prospects for U.S. success in such a confrontation appear to be no better than they were in 1975.

OUR MAN MOBUTU

(By Roger Morris)

At the close of an obscure and otherwise customarily dull congressional hearing last week, a State Department aide startled the lone remaining senator, Dick Clark, Democrat of Iowa, with an interesting little revelation. By the way, the official added almost as an afterthought, the Carter administration wanted Congress to approve $30 million worth of M-60 tanks and armored personnel carriers for the regime of Zaire's President Mobutu Sese Seko, who already is getting $13 million in special "non-lethal" U.S. aid to wage a shadowy guerrilla war in the country's copper-rich Shaba Province.

Amid the controversy (and some incredulity) that followed, President Carter himself retreated to equivocation, by saying it was "highly unlikely" he would approve the tank deal. But the incident remained an apt reminder of the larger historical folly of American policy toward Zaire, and of the hypocrisy of the new administration in resting its ostensibly *new* African diplomacy on our old friend Mobutu. Since 1962 Washington has poured $350 million in public economic and military aid into the large central African state, while the CIA has paid more than $150 million in covert money directly to General Mobutu.

What is the monument to our patronage? Potentially one of the richest countries in Africa, with vast natural resources, for a decade one of the chief aid recipients in Africa, Zaire remains an unrelieved calamity of poverty and exploitation. Between 1960 and 1970 it recorded almost no tangible economic growth. In 1973 the UN chose Zaire, for all its mineral wealth, as one of the truly destitute nations of the third world.

The plight of the average Zairean, of course, is not readily visible in the person of General Mobutu, who personally pockets Western corporate kickbacks as well as the CIA money, whose family controls a private monopoly over the nation's huge and still untapped diamond deposits, and whose ethnic-tribal dictatorship simply murders or imprisons internal critics. Now in conspicuous disarray fighting in Shaba, Mobutu's army, trained and armed by the USA, is a vivid emblem of the regime's squalor. Diplomatic folklore brims with stories of this force *manque*, as when a multi-million-dollar U.S. paratroop training program in the 1960s climaxed with a demonstration for VIPs in which the elite brigade took off to stage their drop, only to discover over the site that they had forgotten their chutes. But the latest "Congo follies," as they are known in the State Department's more cynical precincts, are not so comic-opera amusing. While Mobutu's corruption and Zaire's poverty deepened, the army was purged of all but the general's regional and tribal serfs, whose continuing loyalty in an officially bankrupt government was purchased by periodic authorized episodes of plunder and looting, mainly at the expense of traditional tribal rivals. Many observers worry that if Mobutu does manage to subdue the Shaba rebellion, with U.S. and French aid, the sequel will be a brutal episode of repression and conceivably even genocide among local tribes suspected of sympathy for the invaders.

As it is, the army frequently takes matters into its own hands. Uniformed Zairean troops actually broke into the U.S. Consulate in Lubumbashi on July 4, 1976, and, presumably in their own celebration of the American bicentennial, lifted $10,000 in local currency. The Ford administration buried official reports of the incident. The Lubumbashi caper drew only a tame protest from Washington at the time. A generation of money and careers invested in Zaire (much as in Vietnam) has spawned an officialdom in State and the Pentagon who instinctively look the other way when Mobutu & Co. savage their own people, or dip into the petty cash of U.S. consulates. But Washington's devotion is not only a matter of bureaucratic indulgence. The CIA needs to show both the Russians and rival U.S. agencies that it can still "run" a decent little operation (and keep its client in power), after the 1975–76 debacle in neighboring Angola. And beyond the intelligence game, there are powerful American economic interests, beginning with the Chase Manhattan Bank, who wish to keep Mobutu atop the mess, if only because a successor regime might naturally repudiate the hundreds of millions in international debts (the exact figure is a guarded corporate and official secret) incurred by Zaire over the past decade. So CIA clandestine subsidies are painstakingly laundered, then spent hiring mercenaries to shore up Mobutu's combat-shy veterans; corporate pressure mounts on the State Department for more military aid; and

officials who talk about the large and small scandals of the policy are openly fearful of career reprisals if their dissent becomes known within the government. In miniature—and with all the obvious differences in time and place—it is uncomfortably reminiscent of Southeast Asia. With nervous chuckles, officials refer to Kinshasa as "Saigon *noire*."

The M-60 backtracking suggests that the administration probably is not going to wade much deeper into the Zaire swamp. But the more important point is that the U.S. has no good reason to go on supporting the Mobutu regime at all. Whoever the Shaba invaders may be (the evidence is that they are mostly embittered Zaireans Mobutu and the CIA sent into Angola in 1975), however they are backed (probably by the Soviets and Cubans as well as Mobutu opponents in Zaire), whatever their goals (probably the overthrow of Mobutu), they are exploiting an authentic popular agony in Zaire that will explode later if not now. Once again, by sheer inertia, we are on a losing side with neither principle nor national interest to justify the sacrifice. Jimmy Carter should stop a good deal more than a few symbolic tanks.

ARIZONA LEGISLATURE URGES MAINTAINING CLOSE TIES WITH THE REPUBLIC OF CHINA

Mr. GOLDWATER. Mr. President, last week a new national public opinion survey found that Americans are stronger than ever in their support of preserving official diplomatic relations between the United States and the Republic of China on Taiwan. Today I have received fresh confirmation of this fact from Arizona. It is in the form of a House concurrent memorial approved by both Houses of the Arizona State Legislature.

The memorial is an eloquent testimony to the deep-rooted friendship of the American people with the free Chinese of the Republic of China. It expresses the clear will of the American people to maintain and develop closer ties between ourselves and the government and people of the Chinese on Taiwan.

Mr. President, I ask unanimous consent that the memorial of the 33d Legislature of the State of Arizona be printed in the RECORD.

There being no objection, the memorial was ordered to be printed in the RECORD, as follows:

HOUSE CONCURRENT MEMORIAL 2005

A concurrent memorial urging the President and Congress of the United States to maintain close diplomatic relations with the Republic of China

Whereas, the United States of America is on the threshold of a new administration with fresh objectives and new people in the positions being vacated by the former administration; and

Whereas, the State of Arizona has in the past, on more than one occasion projected to the former administration, its position on what it feels the relationship should be between these two great countries; and

Whereas, the Thirty-third Legislature of the State of Arizona would like to make known to our leaders its sentiments on foreign policy that it believes are just and deserved with the Republic of China; and

Whereas, the Republic of China has been a continuous and faithful ally of the United States, supplying both moral and economic support to the benefit of both nations, has made every effort to develop a free enterprise-based democratic form of government and has pledged its human and economic resources to the defense of free people everywhere; and

Whereas, the cultural interchange between the Republic of China and the United States has benefited both nations.

Wherefore, your memorialist, the House of Representatives of the State of Arizona, the Senate concurring, prays:

1. That the President and Congress of the United States make every effort to develop better social and economic relations with the Republic of China.

2. That the President and Congress of the United States do not in any way detract from our diplomatic relations with the Republic of China and not concentrate any major efforts on development of any temporary and precarious relations with the People's Republic of China.

3. That the Secretary of State of the State of Arizona, transmit copies of this Memorial to the President of the United States, the President of the United States Senate, the Speaker of the House of Representatives of the United States and to each Member of the Arizona Congressional Delegation.

HANDICAPPED PEOPLE STRUGGLE FOR THEIR RIGHTS

Mr. HASKELL. Mr. President, the May 9 Washington Post contains an article by Myra MacPherson which deserves the widest possible readership. Ms. MacPherson discusses the growing political consciousness of this Nation's some 36 million handicapped people.

For years handicapped people have been barred from buildings by physical barriers, and barred from education and employment by the barriers of prejudice and pity. They are now demanding the same rights and opportunities which the nondisabled have always taken for granted. Putting self-pity and reticence behind them, people with various kinds of disabilities are proving that they can participate in society as productive individuals in many aspects of life. But regardless of the degree to which any handicapped person may be able to become self-supporting, all must be given the opportunity to develop their capacities to the maximum extent.

A major problem remains the attitude of the majority of citizens who are not disabled, and whose unease with handicapped people is readily apparent whenever a handicapped person is in their midst. Those attitudes will have to change. As Frank Bowe, director of the American Coalition of Citizens With Disabilities, has said:

We are always defined in terms of what we cannot do. I want to help others to see us as people—not as crutches and wheelchairs and canes.

In signing regulations recently implementing section 504 of the Rehabilitation Act of 1973, Secretary Califano signaled the commitment of the present administration to making it possible for handicapped people to take their rightful place in our society. Those regulations will require many changes.

I am hopeful these regulations will be a catalyst toward equally significant changes in attitudes toward the handicapped, so that no disabled person is automatically cast into a specific category, his or her whole life to be dictated by that categorization.

Myra MacPherson's excellent article provides an insight into the lives and problems of handicapped people in this country. I highly recommend it to my colleagues, and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 9, 1977]

NEWLY MILITANT DISABLED WAGING WAR ON DISCRIMINATION

(By Myra MacPherson)

Frank Bowe is talking on the telephone about his concern for the disabled. After 20 minutes, the person on the other end haltingly asks Bowe if he has a disability.

"Yes," he replies, "I am deaf."

Stumbling with surprise, the other person says, "Oh, you must mean partially deaf." "No," answers Bowe, "totally deaf."

Bowe explains that an aide is listening on an extension, translating the conversation in sign language so rapidly there is barely a pause between a question and Bowe's response.

Bowe, a psychologist, is asked if he has experienced job discrimination.

"Yes," he says with a laugh. "I was told I couldn't hold a job because I wouldn't be able to use the phone."

Hale Zukas has cerebral palsy so severe that he is immobile in a wheelchair, his useless hands tied in a brace. He can only make guttural sounds. Someone mentions cerebral palsy in Zukas' presence and there is an urgency to the sounds he makes to attract attention. With a pointer attached to the special helmet he wears, Zukas points to a board clipped to his wheelchair. On the board are the key words and the alphabet.

Zukas rapidly taps out his message—people wrongly believe that "all c.p.'s (cerebral palsied) are mentally retarded." Zukas has a bachelor's degree in math and a master's in Russian.

Sigi Shapiro was a normal baby. She was almost 3 when she got pneumonia and was placed in isolation in a hospital. A doctor went on vacation and forgot to lessen her medication. Shapiro literally was overdosed on antibiotics, shot into her right hip. When her father came to visit, she could no longer stand. The hospital's verdict: she had somehow contracted polio while in isolation with pneumonia. The father did not sue. Neither did Shapiro years later when the Philadelphia school board refused to certify her to teach in public schools because she was in a wheelchair.

"I let them discriminate against me," says Shapiro. "I wasn't aware then."

These three people are among America's new militants—the blind, crippled, deaf, mentally retarded; victims of war, of automobile wrecks and disease, and accidents of births.

Last month, after years of being carefully hidden in homes and institutions, hundreds of disabled militants like Bowe and Zukas and Shapiro suddenly marched into peoples' consciousness—picketing in wheel chairs and on crutches, singing the song of the 1960s civil rights marches, "We Shall Overcome." They fought for and got a tough regulation from the Department of Health, Education and Welfare enforcing a four-year-old law forbidding discrimination against the handicapped.

"Hopefully the era of 'Tiny Tim' is gone forever," says Denning Gearhart, who moves in a motorized wheelchair. "We've been too used to sitting on Bob Cratchit's shoulders, saying, 'God Bless Us Every One,' instead of saying, 'Dammit, I am as qualified as the next person.'"

Gearhart's speech is slurred by the damage done to his nervous system by cerebral palsy. "When I was 30 days old, they no-

ticed I was acting weird. The doctor said I was spastic and retarded and my parents should take out a long-term life insurance policy and forget about me. One night recently I saw a man on TV who had been in an institution for the retarded for 25 years. He wasn't retarded. His speech patterns and expressions were mine—I could have been looking at myself." Gearhart, 25, will graduate in June from the University of Pennsylvania law school.

The number of handicapped Americans—an estimated 36 million or nearly one out of six—shocks many, a testimonial to just how hidden they have been. This does not include an additional 10 million alcoholics and 1½ million drug addicts.

The phrase "handicapped" takes in a vast variety of disabilities. The most obvious are the blind, deaf, crippled. New HEW regulations could include someone with a limp or severe facial scar, if the person was discriminated against because either condition was an obstacle to being hired. It includes such diseases and conditions as speech impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, alcoholics, drug addicts, heart disease, diabetes, mental retardation, emotional illness, learning disabilities such as dyslexia. Moreover, people who have been misclassified as mentally retarded or discriminated against because of histories of mental illness, heart disease or cancer are classified as handicapped.

The disabled leaders borrowed from the 1960s civil rights marches and began fighting for their rights. A collection of 45 organizations representing 5 million individuals, the American Coalition of Citizens with Disabilities (ACCD), was formed three years ago. Frank Bowe is the director.

One grim reason for their strength today is that more and more Americans are becoming eligible to join this minority. Modern medicine is saving those who used to die—from strokes, automobile accidents, cancer, war wounds—and they are often being saved only to be shunned by society.

Used to being treated like first class citizens in their "former life" they are now "fighting for their rights," says Max Cleland, the Veterans Administration director. Cleland lost both legs and an arm in Vietnam. "In World War II, guys injured as badly as I was, died. Vietnam sent some 400,000 disabled veterans back to this country, and they're no shrinking violets. They're going to fight for jobs. Around 30 to 50 per cent of all disabled vets are unemployed."

One protest group included a young woman who injured her spine in a diving accident and a 29-year-old man, Ralf Hotchkiss, who broke his neck in a motorcycle accident 10 years ago. "I was pretty dense about the handicapped until this happened to me," he said. An engineer, Hotchkiss has testified on the Hill for the need to revamp buses to make them accessible to the handicapped, and now he designs motorized "hot rod wheelchairs."

Statistics on the handicapped are proffered, by militants and bureaucrats alike, with the caveat that they are vague and that much is unknown.

They show, however, that millions are undereducated, underemployed and overlooked. In one 1972 survey, 15½ million people of working age listed themselves as disabled. The actual number is considered much higher because many, such as those with a history of mental problems or epilepsy, were reluctant to list themselves as disabled.

Of that 15½ million, only 43 per cent were working—compared to 74 per cent of the nondisabled. Only 14 per cent of some 7.7 million severely disabled were employed. One quarter of the disabled had family incomes below the poverty level, compared to 10 per cent of the non-disabled surveyed. According to one 1970 census study, 52 per cent of the disabled who worked made $2,000 a year or less.

"There's an awful lot of typecasting in hiring the handicapped," said one HEW official. "Deaf people 'belong' in the linotype printing field, the blind 'belong' in photo darkrooms, the severely handicapped or retarded in sheltered workshops, for example."

Not all handicapped can become productive, but disabled militants say society would save billions in welfare and institutional costs if the handicapped were better educated, given better jobs, taught how to live alone. For example, Hale Zukas, so severely palsied, now lives alone in Berkeley, Calif., and can afford to hire someone to attend to his needs through a California independent-living fund. This is far less costly than the estimated $15,000 per year for care in a California institution.

Last year, $8 billion was paid out in Social Security to 2,670,000 disabled. Nearly $3½ billion more was paid to 2,115,000 blind and disabled in supplemental security income.

The new HEW regulation provides that handicapped children can no longer be segregated in public schools but must be integrated into regular classrooms to the "maximum extent possible," and that every handicapped child—no matter the nature or severity of the handicap—will be entitled to free public education.

There are 8 million handicapped children, aged 1 to 21; 5½ million are school age. One million are receiving no education and only 3 million of them are receiving appropriate educational services, says Bob Herman of the Bureau of the Education of the Handicapped. He elaborates:

"Only a fraction of the kids who graduate who could work are finding work. The problem is they're not getting decent vocational training. You go into a vocational education workshop and ask why they don't take the educable retarded or someone with a physical handicap and they say, 'it's too dangerous. He could get his tie caught in a lathe.' So you ask, 'Why don't you take the tie off?' They don't have any good answers because they don't want to change. With the new regulation, the burden has shifted to those schools. All too many of these kids have been left to make bird houses in sheltered workshops."

Some universities were adapting to the handicapped before the HEW regulation made it mandatory. At Michigan State University, for example, volunteer readers work with the blind on campus, elevators have the floor numbers marked in braille, ramps are numerous, some telephones and drinking fountains are at wheelchair height.

As disabled students become more a part of campus life, their humor often inspires able-bodied friends. MSU tells a story about a blind former graduate student, Win Smith, who was so adept he could walk across campus without a cane or guide dog. When an awed Jesus Freak asked him how he could step over curbs without tripping, Smith solemnly replied, "The Lord took away my sight—and replaced it with radar in my toes." "Praise the Lord," said the Jesus Freak.

For millions of other students the stories are different. Daniel Yohalem, a lawyer for the Children's Defense Fund ticks off some cases:

A Georgia high school football hero, paralyzed in a game, is in an institution because his school refuses to widen doors, provide ramps and special transportation for him to attend classes.

An 11th grade girl in Mississippi made it through the 10th grade until her multiple sclerosis became so severe that she required a wheelchair. Now she is at home receiving no education. The school refuses to rearrange classes so that she could attend school.

A 6-year-old boy in rural Louisiana attended kindergarten last year but the school provided no remedial help, braille or special services. His parents were forced to send him to an institution for the blind 35 miles away. The school refused to pay for his transportation. His older brother now drives him. The mother has no idea what will happen when the older boy goes off to college next year.

Once out of school, many disabled find themselves locked in a vicious circle. Available jobs pay little. Since a paraplegic estimates he would need $12,000 a year just to be able to afford the medical benefits he now gets through Medicare, many feel they can't afford to work.

Another major problem is that many cannot ride on buses. "What's the good of a job if you can't get to it?" they ask.

There are sometimes surprises when the handicapped do get hired. The Civil Service Commission surveyed 397 handicapped who constitute the traditionally hardest to place in jobs—more than a third were deaf or had severe hearing losses and most of the deaf were also mute. Many were blind or amputees. Four out of five required no job restructuring at all, and work site modifications, such as installing ramps, were minimal. In another study, the handicapped were absent less than the able-bodied.

Changing attitudes, in fact, may be far more difficult than changing architecture. Fear and revulsion toward the handicapped, as Max Cleland says, is "primeval."

Frank Bowe became deaf after a bout with measles when he was 3. He remembers losing a balloon in a park and not being able to hear himself cry. "I was crying out my frustrations in a world gone silent."

Today, he says, "the problem is not so much with us—but with the people who are not disabled. We are always defined in terms of what we cannot do. We are determined to change those attitudes. I want to help others to see us as people—not as crutches and wheelchairs and canes."

SENATOR CHURCH DELIVERS IMPORTANT ADDRESS ON NUCLEAR NONPROLIFERATION

Mr. STONE. Mr. President, I have had the opportunity to read a speech recently given by our distinguished colleague, Senator FRANK CHURCH, of Idaho, concerning this country's policy on nonproliferation of nuclear weapons. It is one of the best discussions of the opportunities and perils associated with the international development of nuclear energy technology which I have read. The speech to which I refer was delivered on May 2, 1977, in Cambridge, Mass., as part of the World Change and World Security Lecture Series.

Senator CHURCH's speech, already inserted in the CONGRESSIONAL RECORD for May 10, 1977, calls for an understanding of the realities of world energy resources as the United States develops its policies on nuclear energy and nonproliferation of nuclear weapons. In this connection he emphasizes that many countries are not as fortunate as the United States in having abundant fossil energy resources and are compelled to turn to nuclear energy as an alternative to increasing dependence on imported oil and gas. He correctly states:

The breeder program is the only technology now on the horizon which holds out the promise of relieving Europe and Japan of an unremitting dependence upon foreign-held fuel supplies.

Senator CHURCH also wisely suggests that, in developing our policy to curb proliferation of nuclear weapons, we should concentrate not on "the futile attempt to contain the flow of nuclear technology and try instead to channel it in direc-

tions that will provide adequate supplies of energy while minimizing the potential for making nuclear weapons."

Mr. President, inasmuch as the Congress will have to address the very complex and important issues associated with nuclear policy over the years to come, I want to urge my colleagues in the Senate and in the House of Representatives to take the time to read Senator CHURCH's thoughtful speech. It is based upon careful analysis and reflects a thorough understanding of this very important area of public policy.

NORTH CAROLINA SYMPHONY AT KENNEDY CENTER, APRIL 28

Mr. HELMS. Mr. President, I take pleasure to advise my colleagues that the North Carolina Symphony will perform in Kennedy Center on April 28, 1978. Presently designed a "major symphony orchestra," this orchestra was, I believe, the first State-supported symphony orchestra in the United States.

More important, it was the first of a number of initiatives our people have taken in their determination to bring the enriching and ennobling gift of the arts to every Tar Heel. Some of these are: the first State-supported Museum of Art; the first State-supported School for the Performing Arts; a State opera; and a State library system, which, through a sophisticated electronic interchange, provides the smallest rural public library access to the millions of volumes in the State system.

Now the chairman for the National Endowment for the Arts has written that the Southeastern Center for Contemporary Art has recently opened in Winston-Salem.

SECCA, as it is commonly called, is symbolic of a remarkable partnership between business and the arts in our State: It is located in the former home of the late textile manufacturer and art collector, James G. Hanes, who left his home together with a substantial endowment to provide a permanent showcase for the finest in southeastern visual arts.

An even more remarkable indication of the commitment of North Carolina's leadership to the development of the arts is the creation of "Ampersand, Inc."

Mr. President, unfortunately, the arts are rarely self-supporting. Equally unfortunately, the best artists are rarely the best fund raisers. So this unique corporation was organized.

It is, I suspect, the brainchild of a dynamic young Tar Heel named Philip Hanes, who, in addition to being the chief executive officers of Hanes Dye and Finishing Co., is a member of the boards of Kennedy Center, the National Council for Arts and Education, and the National Collection of Fine Arts.

Ampersand is a subsidiary of Hanes Dye and Finishing Co., but is not designed to make a profit. Rather, working through a board composed of leaders of our business community, it is dedicated to fundraising for a number of cultural entities. It locates and pursues grants and donations from corporations, foundations, and other public and private sources for clients such as the Winston-Salem Arts Council, Historic Old Salem, the Moravian Music Foundation, the North Carolina Dance Theatre, and the North Carolina School of the Arts. The result is a freedom for the leaders of creative and cultural organizations such as these to do their jobs without the demanding burden of forever having to raise money.

Ampersand also has raised funds for the Southeastern Center for Contemporary Art.

One result of this unique partnership for business and culture is shown in a letter from Nancy Hanks, chairman of the National Endowment. I ask unanimous consent that her letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL ENDOWMENT FOR THE ARTS,
Washington, D.C., April 7, 1977.

Hon. JESSE A. HELMS,
United States Senate,
Washington, D.C.

DEAR SENATOR HELMS: This past weekend I had the pleasure of attending the opening in Winston-Salem of the "Southeast 7" Exhibition of the first artists awarded Regional Fellowships.

The occasion was memorable for a number of reasons. It is the first time that the Arts Endowment has joined with a regional arts organization to co-sponsor fellowships for area artists. The event was held in the beautiful new home of the Southeastern Center for Contemporary Art (SECCA)—a center that has an excellent reputation and is making Winston-Salem known as a home for the arts.

Nearly 200 prominent artists, museum officials, patrons and collectors, and news media flew in from all across the country for the occasion. Phil and Joan Hanes were responsible for organizing and planning this wonderful opening.

Indeed the exhibition was a great day for Winston-Salem and for the State. Governor and Mrs. James B. Hunt joined the out-of-state guests and SECCA officials in honoring the award-winning artists: Clifford Earl, Virginia (sculptor); Frank Faulkner, North Carolina (painter); Marcia Isaacson, Florida (printmaker); Richard Kevorkian, Virginia (painter); Geoffrey Naylor, Florida (sculptor); Jerry Noe, North Carolina (sculptor); and Wayen Timm, Florida (painter).

The competition attracted more than 1,000 applications from artists in 11 states and was co-sponsored by the Endowment as a pilot project.

The enthusiasm of artists, visitors, reporters, state and local officials and members of SECCA was overwhelming. Everyone agreed that the artists are excellent and their work most worthy of national recognition. Although our visit was very brief, there was a universal consensus that the exhibition at SECCA is due to have a long-range beneficial effect—one that will likely be emulated by regional arts groups in other parts of the country.

It is a showcase for the best of southeastern art, a center for promotion of artistic works from the region, and a focal point for cultural interest both for new business prospects and visitors to the state.

We at the Endowment are highly gratified by the marvelous success of SECCA and its fellowship program, and want you to know how well its success reflects on the State of North Carolina.

Sincerely,

NANCY HANKS,
Chairman.

SPECIAL SHOWING OF "HARLAN COUNTY, U.S.A." FOR MEMBERS AND STAFF

Mr. HASKELL. Mr. President, on Monday Representative PAUL SIMON of Illinois, Representative CARL D. PERKINS of Kentucky, chairman of the Committee on Education and Labor, and I circulated a letter inviting our colleagues and their staff members to a special showing of the Academy Award-winning documentary, "Harlan County, U.S.A."

I want simply to underscore that invitation with these brief remarks. The film will be shown Monday, May 16, at 5 p.m. in room 2175 of the Rayburn House Office Building, the Education and Labor Committee hearing room.

I hope that a number of Sentaors and staffers will be able to join us to view this significant film. Produced and directed by Barbara Kopple, "Harlan County, U.S.A." is a powerful and moving depiction of events in Harlan County, Ky. It provides a tremendous insight into what the lives of coal miners can be like. As the Congress moves to consider important legislation regarding black lung disease and mine safety, I think it is important that as many people as possible have a chance to gain that insight.

PROPOSED ARMS SALES

Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask unanimous consent to have printed in the RECORD the notification I have just received.

There being no objection, the notification was ordered to be printed in the RECORD, as follows:

DEFENSE SECURITY ASSISTANCE AGENCY AND DEPUTY ASSISTANT SECRETARY (SECURITY ASSISTANCE), OASD/SA,
Washington, D.C., May 11, 1977.

In reply refer to: I-11205/76ct

HON. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 77-38, concerning the Department of the Navy's proposed Letter

of Offer to Spain for major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $23.6 million and support costs of $3.8 million for a total estimated cost of $27.4 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

H. M. FISH,
Lieutenant General, USAF.

TRANSMITTAL NO. 77-38—NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Spain.

(ii) Total Estimated Value:

	Million
Major defense equipment *------	$23.6
Other ----------	3.8
Total ----------	$27.4

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Five (5) AV-8A Harrier aircraft and support.

(iv) Military Department: Navy.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid:

a. Hawker Siddeley Ltd, Dunsfold, England.

b. Componia Aeronauticos Esponola SA, Antonio Maura 8, Madrid 8, Spain.

c. Two and one-half percent of the Hawker Siddeley involvement at the time of delivery of the aircraft.

d. Five (5) AV-8A Harrier aircraft.

e. The information contained in paragraph (v) consists of proprietary data within the meaning of 18 U.S.C. 1905, and, accordingly may not be disclosed except pursuant to the provisions of the code.

(vi) Date Report Delivered to Congress: May 11, 1977.

FOREIGN AID: ONE HAND SLAPS, ONE PATS

Mr. ABOUREZK. Mr. President, we in the Senate are soon going to have the opportunity to consider several foreign aid bills, including one to increase U.S. participation in multilateral lending institutions. Along with establishing levels of participation, there are going to be some very important human rights considerations in this bill. An article recently appeared in the Los Angeles Times regarding loans from these international financial institutions to countries having gross violations of human rights. The article is relevant to what we are going to have to consider in the bill and what our commitment to human rights is going to be. Therefore, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Los Angeles Times, March 17, 1977]

FOREIGN AID: ONE HAND SLAPS, ONE PATS—A U.S. PROGRAM ENDS IN ARGENTINA AND URUGUAY, BUT OTHER CASH CONTINUES

(By William Goodfellow and James Morrell)

As part of its controversial human-rights campaign, the Carter Administration recently reduced military assistance to Argentina and Uruguay. Not surprisingly, the military rulers of both nations were so affronted that they told the United States not to bother sending any more aid at all.

That would appear to end the American assistance program in both South American countries. But appearances are often deceptive.

The United States actually dispenses aid to the Third World through 15 separate channels. Only four of these—the Military Assistance Program, the Agency for International Development, the Food for Peace Program and the Peace Corps—are subject to direct congressional scrutiny and approval. The U.S. State Department lumps these programs together under the heading of "foreign assistance," and it is only money from that category that Argentina and Uruguay have spurned.

Meanwhile, cash continues to flow to both countries through the 11 government corporations and international financial institutions that make up the rest of America's foreign-aid program. Each of these agencies constitutes a separate revolving fund that Congress, from time to time, replenishes. With minor exceptions, however, the agencies are not required to tell Congress where they intend to distribute the money. Moreover, the only formal restrictions on their allocations are rather general guidelines contained in the legislation that created them.

Thus, while President Carter was busily slashing military aid to Argentina and Uruguay, three of these international financial institutions were actually increasing the flow of cash to the two dictatorships:

The International Bank for Reconstruction and Development (the so-called World Bank) had not lent money to Argentina for 5½ years. Last fall, however, it sent $115 million, and now $390 million more is on the way. Question: Who contributes one out of every four dollars the bank dispenses? Answer: We do.

The Inter-American Development Bank lent $198 million to Argentina during the last half of 1976, and plans to send $253 million more in the near future. Question: Who contributes the lion's share of the bank's capital? Answer: We do—specifically, 52%.

The International Monetary Fund provided Argentina with $315 million in fiscal 1976, more than it allocated to any other country in the Third World. Question: Who is the fund's largest contributor? Answer: You guessed it—the United States.

In fact, during fiscal 1976, Argentina received $518.5 million in aid, only 7% of which was U.S. "foreign assistance." Meanwhile, Uruguay was the recipient of $4.2 million under the same heading and, even though that aid has now been terminated, it will still receive $74 million in loans from the Inter-American Bank and $30 million from the World Bank.

While such loans obviously undermine the Carter Administration's budding campaign for human rights abroad, their most serious consequences are far more subtle. Indeed, it may be that the lending policies of the various international financial institutions actually encourage the spread of authoritarian government.

Officials of these agencies claim that loans are made on the basis of a nation's objective "creditworthiness." In practice, this means that the banks have a marked preference for governments willing to implement tough austerity programs, to hold down labor unrest and to throw their countries wide open to foreign investments.

This is why both the World Bank and the Inter-American Bank, which refused to lend to Salvador Allende's Chile, more recently have found the country's new military rulers altogether creditworthy. By the same token, the Philippines has become four times more creditworthy since President Ferdinand Marcos imposed martial law. And there is Indonesia, which, though increasingly authoritarian, is seven times more creditworthy than it was five years ago, despite the near bankruptcy of its state oil company.

The implications of all this are not entirely lost on Congress, some of whose members have taken steps to make human-rights issues a consideration in international loans. Last spring, Rep. Thom Harkin (D-Iowa) pushed through such an amendment to the Inter-American Bank's replenishment bill. It requires the American director on the bank's board to oppose any loan to countries that "engage in a consistent pattern of gross violation of internationally recognized human rights," unless such a loan "directly benefits the needy."

As a result, last June the U.S. director voted against a $21 million industrial credit for Chile, but in December assented to a potable water project loan designed to help the poor. However, during the past six months the same director has voted for two industrial loans for Argentina totaling $138 million, although no evidence was offered that they directly benefit the masses.

Despite congressional misgivings about international lending to repressive regimes, and despite its own reluctance to give military aid to such governments, the Carter Administration is seeking a whopping $3.2 billion in new appropriations for the various international banks, up from $745 million for the current fiscal year.

Rep. Harkin plans to offer human-rights amendments to the replenishment bills for the World Bank, the Asian Development Bank and the International Monetary Fund, and many observers believe that they will pass. The Administration, however, has yet to take a position on the amendments.

Certainly the unpleasant prospect of a No vote by the U.S. director to the Inter-American Bank, and the embarrassment it would bring to Argentina's military rulers, should have some impact on that country's human-rights infringement. Moreover, the possibility that Canada and a few of the bank's new European members might join the U.S. director in opposing loans to Argentina and Uruguay must frighten their rulers, given their dependence on multilateral loans.

Whether or not Carter will use the leverage provided by the Harkin amendment remains to be seen. But it may well be the best measure yet of the importance that this Administration really places on human rights.

SMALL BUSINESS

Mr. HASKELL. Mr. President, the distinguished Senator from Wisconsin (Mr. NELSON) has long been a forceful spokesman for the needs of the Nation's independent businesses. Under his chairmanship, the Senate Small Business Committee has highlighted the needs for legislative action to correct the pattern of official neglect affecting small business. Recently, Senator NELSON has been discussing American small business in the broad context of our social goals. He has stressed the need for a governmentwide approach to small business problems if our goals of free entry into the marketplace and a competitive economy are to be maintained.

Mr. President, in view of the Senate's recent passage of Senate Resolution 105, with its broad mandate for Federal action to insure the survival of small business, I think it would be appropriate to consider some of Senator NELSON's seasoned insights on small business. In a recent speech to a small business association in Wisconsin, he set forth those views quite persuasively. I ask unanimous consent that the speech be printed in the RECORD.

There being no objection, the speech

was ordered to be printed in the RECORD, as follows:

SPEECH BY SENATOR GAYLORD NELSON

1976 was a big year for this country. We had the satisfying experience of celebrating our 200th birthday. However, this nation wasn't born in a day or a year or a decade.

Next winter, for example, we'll observe the 200th anniversary of the Continental Army's encampment at Valley Forge.

Three years from now, we'll celebrate the 200th anniversary of John Paul Jones' victory that helped establish the U. S. Navy.

In five years, we'll mark the 200th anniversary of Washington's victory over Cornwallis at Yorktown.

Seven years from now, we'll observe the 200th anniversary of Washington's farewell to his officers at Fraunces Tavern.

And in eleven years, we'll begin the most important bicentennial of all. We'll honor the patriots who came together in Philadelphia and drafted our Constitution, which, with its Bill of Rights, was ratified two years later.

America had giant-sized heroes in that era. Washington, Franklin, Jefferson, Madison. What advice would men like that give us now?

Do we need adjustments in the way our government operates? Should we strike out on new paths?

Recently John D. Rockefeller, III, eloquently stated what I believe to be a simple truth: He said—"We are in the early stages of a revolution of fulfillment, not of overthrow, a revolution designed to bring to fruition the great ideals and values upon which this nation was founded."

To achieve that "revolution of fulfillment," our first job is to restore confidence. Today, too many people believe that business is inherently bad, that government cares for little but its own preservation, that education has failed, and that religion is irrelevant.

Public skepticism about these institutions is closely tied to public awareness of the difficult problems we face. Monumental problems of unemployment, inflation, tax inequities, discrimination and crime are so much a part of our lives that some of us doubt our capacity to resolve them.

As we reflect on our problems, though, surely we must realize that what we face today is no more difficult than the prospect of creating a whole new nation from a loose federation of orphan colonies in a wilderness. It's no more difficult today than it was then—if we can summon the courage and imagination of that era.

We've got to encourage the people in this society who seek the opportunity to set forth on their own, the people who want to build their own independent careers, the people whose lives show the kind of courage and imagination our nation needs to maintain its vigour and diversity and ever broaden the opportunity for fresh initiatives and new ideas.

Thomas Jefferson singled out the self-reliant farmer-businessman, whom he saw as staking his future on the community while also expressing willingness to act independently.

A generation later, that famous French observer of American life, Alexis de Tocqueville, praised America's imaginativeness. Not its major canals and trunpikes, mind you, but "the multitude of small undertakings."

Those "small undertakings," and those independent entrepreneurs behind them, have been the heart and soul of this country's economy, society, and democratic political system from the beginning and we must make sure they retain that vital role. Indeed, many studies have shown that independent inventors (including inventor-entrepreneurs) and small technologically-based companies are responsible for a major percentage of the important inventions and innovations of this century.

The mercury dry cells in our electronic watches, the air conditioners in our homes, the power steering in our automobiles, our modern jet engines and rockets, the FM circuits and vacuum tubes in our stereos and television sets, the photocopying machines in our offices, and the list goes on—all were the work of individual entrepreneurs and small business.

The point is that independent inventors and small firms are responsible for an important part of our inventive progress, a far larger percentage than their relatively small investment in research and development would suggest.

It goes without saying, of course, that the United States could not depend solely on the innovative contributions of small firms. The large firms are indispensable to technological and economic progress. From a number of different points of view, however, it is clear that a unique cost-benefit opportunity develops when we encourage independent investors, inventors, manufacturers, retailers, distributors, and small technologically-based industries. The long and short of it is this: the cost of such special incentives to them is likely to be low. The benefits are likely to be high. There's a common-sense reason for this. Small businesses are more flexible, more responsive to ideas put forward by individuals, more oriented toward face-to-face contacts with customers, and more capable of reacting swiftly to changing market demands.

Admiral Rickover, the father of the nuclear submarine, said in a speech in 1975 that he prefers to deal with small firms, finding that

". . . small and medium-sized companies take a more responsible view toward their contractual obligations than the large ones.

". . . they are also better able to perform a back-up role of providing new and alternative products when larger ones fail to do so."

Mr. Kenneth Gay, a vice president of Rockwell International, praised small business as Rockwell's most willing partners. It is the owner-managed enterprises which are the most responsive to Rockwell's needs.

It is they who innovate. They deliver on time, and they take total responsibility for their product.

Small business indeed represents the cutting edge of a free and competitive system.

But the role of small business does not end in the marketplace. Just as leaders like Jefferson predicted, the American social structure has been profoundly affected by small business.

The opportunity to engage in a small business permitted waves of immigrants to win security, self-respect, self-sustenance, and often wealth. This spirit of private enterprise infused and strengthened our nation's democratic processes.

Such eminent scholars as C. Wright Mills, Walter Goldschmidt, Kurt Mayer, and Jon Udell have documented that in communities where small businesses are the major employers, the quality of life is measurably higher than in similar cities where large corporations are the predominant employers. These researchers found that infant mortality was lower; the percentage of home ownership and church membership was higher, and there were better community facilities, such as streets, sewers, and trash disposal. For example, one study disclosed that a community situated near small family farms in California had twice as many newspapers, more independent enterprises, higher incomes and better schools than a city of similar size surrounded by large agri-business, industrial-style farming.

Professor Udell's research showed that corporate gifts to charities slowed down 50% among 30 merger-acquired corporations in Milwaukee compared to a group of 30 locally-owned independent corporations. About three-quarters of the merged companies stopped using local banks, accountants, lawyers and local sources of supplies.

Thus, when we examine the evidence of these carefully controlled studies, we find again that conglomerate, absentee-owned businesses systematically undermine local self-sufficiency and vitality. The very quality of life changes when ownership leaves the community.

In an area of giant cities, giant impersonal bureaucracies and giant corporations, the opportunities to enter and build one's own business and to pass it along to one's heirs becomes increasingly more precious. It directly affects the viability of smaller cities and towns across the country.

A structure of laws and taxes which preserves a climate for the dynamism and community orientation of independent business is vital to the American way of life.

The ultimate contribution of small business, however, may well be personal—as a channel for satisfying deeply-felt human needs like job satisfaction, motivation, pride in craftsmanship, individual freedom, and the discipline of competition.

We have only to note a press report last year stating that Harvard Business School graduates increasingly looked to association with medium-sized and smaller companies, despite the acknowledged blandishments of the established national and international giants.

But to start a small business and to stay in business in America's third century may be more difficult than in its first two.

And these are some of the problems we're trying to deal with in the Congress. The Senate Small Business Committee held 107 days of hearings during the last two sessions of Congress. Through your efforts, and the efforts of hundreds of other business groups throughout the country, we were granted authority in 1975 to initiate legislation. Now, in 1977, we have been made an independent committee. We expect to hold at least 140 days of hearings during the current 95th Congress. Our public hearings have brought home to us dramatic changes which have taken place during our own lifetimes—how increasingly difficult it has become to found a business, much less to make it profitable and to sustain it for any length of time.

There are, of course, many definitions of what a small business is. But statistics like "numbers of employees" and "dollar revenues" do not go to the heart of the matter. When we talk about independent enterprise, small business, we are really concerned about qualities like independence, local ownership and control and community orientation.

When we look at the American business scene, we see that there are only 3,000 U.S. corporations listed on the stock exchanges and about 3,000 more which are big enough to have their stock traded nationally over the counter. A large portion of the remainder of the 13.3 million U.S. businesses which file tax returns would probably be considered small or independent firms by most thoughtful people.

Yet, we have found that America's small business community is in much more difficult circumstances than our larger corporations. The independent owner-managed enterprises are so sorely beset with serious trouble that the health and vigor of our entire American economic system is threatened.

Consider the family farm. A century ago, a family could own a prime farm merely by living on it and working it. During the last 30 years, the number of farm families has been cut in half from 5.9 million in 1945 to 2.8 million in 1975.

In 1960, an average farm could be bought for $51,000; today, it takes $171,000.

The money market, too, is becoming increasingly elusive.

In 1969, there were 698 public stock issues by companies with a net worth of less than $5 million; in 1975, there were only three.

Witnesses before our Committee in 1975 stated that usually 10 to 15 promising high-technology companies had been launched every year by venture capital organizations. They feared that conditions will now make it impossible to raise the necessary new equity money to do the same in the future. The statistics bear them out.

Not all the hurdles that new businesses face result from problems of management. I'm sure I don't have to remind anyone in this room that some of the biggest roadblocks of all are created by the Federal Government, State government and local government. Let's look briefly at three of those roadblocks—taxes, paperwork, and government regulations.

Taxes. Independent business has traditionally contended with a tax system that gives the best breaks to big corporations. We're grappling with a situation in which medium-sized companies often pay the 48% maximum while the 100 or so largest corporations pay about half that. So here's what we're trying to do to help.

Recent legislation has been successful in substantially reducing corporate tax rates and in doubling the amount of used machinery eligible for the investment credit to $100,000. This can produce maximum tax savings of $12,000 a year for 1975, 1976, and 1977 for a company earning $50,000.

A study done by our Committee indicates that as many as one million jobs may have been retained in the small business sector as a direct result of this modest tax rate reduction.

The interactions of taxes and employment go beyond direct employment taxes. For example, a 1967 study published by the U.S. Department of Commerce indicated that rapidly growing businesses produce jobs at a far higher rate than the general economy.

This is backed by a recent Sloan Institute study which shows that dynamic young businesses may be among the most promising sources for increased employment in the economy.

Such studies reemphasize the necessity for a rational overall tax structure which encourage the birth and growth of new, dynamic businesses. One form of encouragement we're considering now is depreciation speedups for smaller firms.

Last year we got several reforms including reform of the estate and gift taxes for the first time since 1942. Largely because of our Committee's work in this area, it will be possible by 1981 for a business person to transfer $425,000 to a spouse, or $175,000 to buy other heirs free of federal estate taxes. This will allow many farms and small businesses to remain in the family rather than having to be sold to pay death taxes.

PAPERWORK

Independent business must struggle with a government-spawned paper-burden that is out of control. It imposes a $40 billion yearly cost on the economy, more than half of which is borne by small business. Unnecessary forms must be filed with information that no one can possibly utilize.

Redundant forms, with different agencies asking the same questions over and over again, are wasting your time and wasting everyone's tax dollars. So we've begun encouraging agencies to exchange information, and we're telling the administrators of these agencies to cut down on the forms—or to eliminate them completely—from the very beginning.

Let me give you an example. The IRS 941 employment form now has to be filed every three months. Congress has finally gotten the IRS to reduce the filings to one a year, starting in 1978. This will do away with a stack of papers over two miles high and will save million of dollars for businessmen.

Another problem is verbose regulations.

The Small Business Committee found, for example, that one 16-page report on pensions could be reduced easily to 5½ pages. And after hearings, it was.

To attack the paperwork problem on a government-wide basis, the Committee spearheaded the creation of the Federal Commission on Paperwork. Some citizens may be amused by the need for such a group, but not small business people. They grasp at any hint of aid to halt the blizzard of paperwork now burying them. To cut down on paperwork before it's even dreamed up, our Committee urged, and the Administration approved, the creation of Small Business Advisory Committees to IRS and the Treasury, and a small business task group on the new Pension Reform Act. These bodies now give smaller firms a stronger and continuing voice in the decisions on policy, forms, and technical matters.

This matter of getting a voice in decision-making leads to the problem of government over-regulation.

The Internal Revenue Service regulations alone take up two feet of shelf space. The initial Occupational Safety and Health Act manual which was distributed to small firms contained 330 pages of detailed regulations. In dealing with these regulations, administrators have made no distinction between the legal and technical resources of General Motors and those of the average small business.

In order to evaluate these questions to national prominence the Senate has requested that President Carter call a White House Conference on Small Business early in this new Presidential term.

It has been 21 years since such a conference was last held. A new conference world encourage the best minds in many disciplines to focus upon identifying and analyzing the difficulties of independent businesses—the problems of competition, regulation, taxation and the like. The mission of the conference would include making specific and comprehensive recommendations. If you agree, you ought to tell President Carter. If he reads his mail the way the Senate read its mail on the need to retain an independent Small Business Committee, he will respond.

We're at pretty much of a turning point now.

Kurt Mayer wrote of the small entreprenuer that: His elbowroom is being narrowed down; his chance to exercise initiative, courage, and energy which are the characteristics of true "enterprise" are diminishing. The small man's enterprise is being increasingly frustrated.

The Washington Post concurred, saying that ". . . perhaps (these) are not the burning issues of the day. But to ignore them is to risk losing not only an increasing number of small businesses but also the human value that prompt men and women to enter the marketplace as independents."

In my view, it is urgent that we address ourselves in a systematic manner to these questions of survival of the private enterprise system and the continued viability of small business. Otherwise, everything in this country will end up being run by a few giant conglomerates in a huge megalopolis.

There should be no question that small business issues are fundamental to traditional American values and to how we view ourselves as a nation.

In the words of Milton Stewart, President of the National Small Business Association, and along with your own association, the Independent Business Association of Wisconsin, the backbone of COSIBA (Council of Small and Independent Business Associations):

"We hope that the 95th Congress will go down in history as the "Small Business Congress." We hope that the depth and range of actions which it takes to stimulate the compensatory expansion of the independent sector of the economy will earn that title for it.

"President Carter has made it a goal of his Administration that small business would expand more than either big business or government.

"For that reason, we look forward to four of the most constructive and cooperative years of Executive-Congressional small business legislation."

We hope that this is the "catch-up Congress" and the "catch-up Presidency" for small business.

The White House Conference on Small Business which I have recommended could be a point of departure for the needed changes. I think we can all agree that we have an important new matter of concern to America. This new issue—the health of independent small business—involves vital economic, social, sociological and philosophic questions.

It involves questions of economy of scale.

It involves the basic issue of preserving opportunities for free choice and individual self-expression.

And as far as our family farmer-businessman is concerned, there is involved the great question of stewardship of our land. Should the man who tills the soil and produces the food and fiber own the land? Or should absentee corporate giants own the land and hired hands till the soil, and manage that vital resource?

The whole matter gets down to this question: What is our view of ourselves and our future as a people?

We have not addressed ourselves to these issues in any thoughtful, persistent, creative fashion. We have assumed that because the country is big and the economy is big that bigness per se is a virtue in and of itself. We're learning the hard way that too much bigness is bad for the economy and bad for the free enterprise system. The largé conglomerates that absorb independent businesses and engage in predatory competitive practices simply do not serve our best interests.

We should not let these unchecked forces guide our destiny.

We should depend instead on our Constitution and our proven economic, legal, and political systems. We should be watchful and critical of our leaders, because men and women are fallible. We should place our reliance on the processes of democracy, the common law, and free private enterprise which have nurtured and sustained a society which is admired throughout the world. These institutions represent the best distillation of many generations of human experience, and as such, they transcend individual imperfections. They will grow as we grow because they contain mechanisms by which we can modify them to meet changing conditions while retaining what we truly value.

There is a chance of dramatically changing national policy and the economic and political climate in favor of smaller and independent enterprise. If we demonstrate sufficient commitment to accomplish this, independent enterprises can once aagin offer the dynamism most needed now—the courage and imagination to build the society Americans of the future will trust, respect and defend because it is their society and they are a part of it.

THE GENOCIDE CONVENTION NEEDS U.S. RATIFICATION

Mr. PROXMIRE. Mr. President, I urge ratification of the Genocide Treaty. I do so because ratification of the treaty is

in the best interests of the United States and the entire world body of nations.

The Genocide Convention outlaws the mass destruction of any group of people based on ethnic, racial, or religious grounds. It would make the commission of such an atrocious act an international crime.

We in the Senate must ratify this treaty because it represents our most fundamental freedoms—the right to one's own life. Yet the Genocide Treaty also represents an attempt by the world's nations to protect the rights of all people, no matter where those people are. Without our support as the world's foremost Nation and symbol of human liberties, the Genocide Treaty cannot exert its full impact on the international scene.

There are those critics of the Genocide Convention who will contend that our ratification of the treaty will do no good whatsoever. According to those critics, the treaty will always be ignored whenever it is beneficial for an individual nation to do so. Why should we ratify a treaty that will do no good, they ask?

The fallacy of this argument is obvious to everyone, for if we followed its logical conclusion we would have no laws on the books at all.

Mr. President, we must ratify the Genocide Treaty. As former U.N. Ambassador Arthur Goldberg told the Conference of United Nations Representatives in 1967:

> If the conventions fail to gain the adherence of the nation that was born proclaiming "certain unalienable rights" as the birthright of "all men," then why should other nations take these instruments seriously?

Let us ratify the Genocide Convention immediately.

CRAIG AIR FORCE BASE, ALA.

Mr. ALLEN. Mr. President, the Department of the Air Force, after more than a year of study and restudy, last month made firm its decision to close Craig Air Force Base at Selma, Ala. This base, which is a primary training base for Air Force pilots, has a proud history stretching through the past 37 years, during which it has provided training for tens of thousands of American and Allied pilots during World War II, during the Korean War, and during the Vietnam war. Now, after all of those years of close and friendly relationship between the military and civilian communities surrounding the base, Craig is to be closed later this year, threatening economic disaster to Dallas County, Selma, and other communities.

On April 21, 1977, the senate of the State of Alabama considered and approved passage of Senate Resolution 309 deploring the closing of Craig Air Force Base and urging the President to use the full power of the Federal Government to prevent or alleviate economic disaster in Dallas County.

Mr. President, I ask unanimous consent that Resolution 309 of the senate of Alabama be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION 309

Whereas, the closing of Craig Air Force Base will mean an economic depression of $55 million in the Selma area, according to Air Force estimates; and

Whereas, the loss of Craig will cost approximately 2,000 jobs, raising unemployment in the Selma area by 10 to 20 percent; and

Whereas, by closing Craig Air Force Base, President Carter will apparently cause an economic disaster in Dallas County, Alabama; now therefore,

Be it resolved by the Legislature of Alabama, both Houses thereof concurring, That we deplore the closing of Craig Air Force Base by President Carter, and urge him to use the full power of the federal government to prevent or alleviate economic disaster in Dallas County, Alabama.

Be it further resolved, That a copy of this resolution be sent to President Carter and each member of the Alabama Congressional Delegation.

USAF IN ALASKA

Mr. STEVENS. Mr. President, I would like to share with my colleagues an article which appeared in the April issue of Air Force magazine entitled "USAF in Alaska."

This article emphasizes the strategic importance of my State. Fifty-six miles from the Soviet Union, Alaska is closer to the Soviet Union and to Chinese territory than any other part of the United States. Because of its strategic location, an adequate Alaskan defense is basic and essential to our whole system of defense.

I welcome this opportunity to commend the men and women of the U.S. Air Force in Alaska for the excellent job they have done carrying out their military operations in search and rescue coordination.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

USAF IN ALASKA

(By Allan R. Scholin)

There are about 12,000 Air Force people stationed in Alaska on tours of from one to three years, depending on whether they're at a remote site or on a major base. Because that is a comparatively small percentage of Air Force people, many officers and airmen may never have a chance to serve in our forty-ninth state.

To those who haven't been there, Alaska conjures up images of silent glaciers, vast snowfields, Eskimos in igloos chewing whale blubber, and, more recently, shadowy figures stringing a pipeline across a dark and frigid wasteland.

If you scrub the igloos, which we're told even Eskimos don't build anymore, Alaska is like that, in part. But Alaska is far too vast to be categorized in a few phrases, and those who have been there find it contagious.

The magnificent view of Mt. McKinley and its neighboring peaks bathed in the afternoon sun, the lights of Anchorage twinkling bright in a field of snow at the end of a lonely night flight, a row of parked aircraft shrouded in ice fog, the squeak of boots on hard-packed snow, the cheery warmth of the dining hall at Eielson AFB—these are among hundreds of images that remain sharply etched in memory long after a visitor has departed. And they are all a part of Alaska's haunting appeal.

You'll find homesteaders on Alaskan air bases as elsewhere in the U.S. and abroad SSgt. Gil Brisson has spent six years at Eielson—long enough to become a walking encyclopedia on the base and the region. Capt. Hank Alau, a navigator in SAC's 6th Strategic Wing at Eielson, is a native Hawaiian, from Maui. He prefers Alaska because, he says, there's room to stretch and breathe. How right he is. The state averages one inhabitant per eight square miles. He also likes to hunt and fish—but that's true of ninety-five percent of Alaskans, whether they come from Hawaii or Hoboken. That, incidentally, is another characteristic of Alaskans. Just about all of them come from somewhere else.

Here, then, are some sketches of Air Force operations in Alaska, and how Air Force people help preserve the peace and security of the nation and the free world.

THE UNITS AND THEIR JOBS

Air defense is the primary mission of the Alaskan Air Command (AAC), providing, as the command boasts, "Top Cover for America."

Lt. Gen. Marion L. Boswell is the AAC Commander, with headquarters at Elmendorf AFB, just outside Anchorage. He is concurrently Commander of NORADs Alaskan Region. And he is the coordinating authority for all joint military administrative and logistical matters in Alaska, giving him supervision over the Army's 172d Infantry Brigade and the Navy's sea patrol base at Adak in the Aleutians.

The AAC operates three air bases—Elmendorf, Eielson, and Shemya—and shares facilities on two FAA-operated airports at Galena and King Salmon. It has thirteen aircraft control and warning squadrons, including six surveillance stations, five surveillance and ground-controlled intercept (GCI) stations, and two intermediate regional control centers.

AAC's 21st Composite Wing at Elmendorf is the command's principal flying unit. It is made up of the air base group at Elmendorf, the 43d Tactical Fighter Squadron, and the 5041st Tactical Operations Squadron.

The twenty-six F-4E Phantoms of the 43d TFS are AAC's interceptor force. From headquarters at Elemendorf, flights of F-4s regularly rotate to forward air bases at Eielson, King Salmon, Galena, and Shemya. From these bases they can be scrambled to intercept bogies under direction of one of the five GCI sites. The Phantoms also perform the corollary mission of close support for the 172d Infantry Brigade, whose elements are stationed at Fort Richardson near Anchorage and Fort Wainwright, Fairbanks.

The Wing's 5041st Tactical Operations Squadron at Eielson operates T-33s that are used primarily to simulate enemy aircraft, checking the alertness of detection and intercept systems of the air defense net.

AAC's other flying unit is the 5010th Combat Support Group at Eielson. Under it is the 25th Tactical Support Squadron, equipped with O-2 Skymasters to perform forward air control missions for the Army.

While the AAC is the principal Air Force command operating in the state, it is not the only one. The Strategic Air Command's 6th Strategic Wing flies KC-135 tankers and RC-135 reconnaissance planes from Eielson AFB, near Fairbanks in central Alaska, and from Shemya AFB, almost at the tip of the Aleutian chain, 1,500 miles from Anchorage.

The Military Airlift Command provides the 17th Tactical Airlift Squadron and 71st Aerospace Rescue and Recovery Squadron, both headquartered at Elmendorf and under General Boswell's operational control. C-130 Hercules transports of the 17th TAS fly resupply missions to remote stations, each of which has an airstrip, usually gravel-topped, at least 3,500 feet long. Bulk supplies, including fuel, are shipped to most stations under Navy auspices in Operation Cool Barge during the summer when for a few weeks the shorelines are free of ice.

The 71st Aerospace Rescue and Recovery Squadron is equipped with Sikorsky HH-3s and HC-130 search and tanker escorts.

They're based at Elmendorf, but range throughout the state and surrounding waters on rescue missions under direction of AAC's Rescue Coordination Center (RCC).

The Air Guard's 176th Tactical Airlift Group, with MAC as its gaining command, operates eight C–130s. They support the Army National Guard, fly emergency civil relief missions, and back up MAC's C–130s in resupply runs.

Among other agencies and commands that operate in the Alaska Air Command area are the Air Force Communications Service and Defense Communications Agency. In addition, the USAF Security Service has people around, doing what Security Service people do, and the Air Training Command runs the Arctic Survival School at Eielson.

Search and rescue is an unending task in a state with few roads and 400 times as many private planes per capita as the national average.

No one knows how many airplanes and pilots there really are in Alaska. In the more remote areas—of which there are plenty—people learn to fly without bothering to apply for licenses, and a substantial number of airplanes may also be unlicensed.

Private pilots often don't bother to file flight plans, even when the weather is marginal. This creates an air safety problem that would be far more serious if there weren't so much wide open airspace.

Even so, accidents are frequent. And when crashes occur the aircraft, if not their victims, often remain where they fall. The country is too rugged and roadless to make retrieval practical.

In the RCC at Elmendorf, a large state map on one wall bristles with more than a thousand pins locating sites of crashed airplanes that have not been recovered. Maj. Rufus Clark, one of six USAF officers who share the task of operating the RCC twenty-four hours a day, explained that the map helps avoid a lot of wasted effort.

"These crashed aircraft are reported again and again by pilots, especially if they're not familiar with the locale," he said. "Because of the normally cold weather and low humidity, many planes that crashed years ago still look shiny and new. Without this map and our file of carefully plotted coordinates, we'd be calling out rescue people needlessly time after time."

As it is, the RCC relies on a wide network to help in search and rescue operations, using facilities of the AAC, FAA, Army, Navy, Coast Guard, Army and Air National Guard, and Civil Air Patrol (CAP).

Alaska's CAP has units throughout the state with 1,300 members. They include 562 pilots, of whom 263 own their own planes. The CAP flies two-thirds of all rescue missions and leads CAP units of all other states in people found, assisted, and saved.

Not all rescue operations are related to downed aircraft. The RCC and its participating elements are active in the MAST—Military Assistance to Safety and Traffic—program, and are often called on to fly sick and injured patients to hospitals. They have also helped to pluck stranded climbers off the slopes of Mt. McKinley—all compliments of Uncle Sam.

THE AIR DEFENSE NET

Tin City Air Force Station is the U.S. military installation closest to the Soviet Union. Located on Seward Peninsula near the tip of Cape Prince of Wales that juts into the Bering Strait, Tin City AFS is barely fifty miles from the northeastern tip of Siberia at Mys Dezhneva.

Tin City is a NORAD surveillance station, home of the 710th Aircraft Control and Warning Squadron, with a radar site perched atop a 2,275-foot mountain connected to a base camp below by a 7,200-foot-long tramway, reputedly the longest in North America. A total of 105 people is assigned to Tin City, which derives its name from tin mines nearby.

Five other NORAD surveillance stations in western Alaska, each close to the shore of the Arctic Ocean or the Bering Strait, provide overlapping cones of coverage to produce a composite picture of air activity to the north, west, and south of Alaska.

Even more lonely than Tin City's contingent, perhaps, are the 103 members of the 711th AC&W Squadron who operate a surveillance station at Cape Lisburne, the northwesternmost point on the North American mainland. It is 170 miles north of the Arctic Circle, and from December 4 to January 8 each winter the sun doesn't rise there at all.

Paradoxically, military personnel at these remote sites are encouraged to wear summer uniforms the year around. Facilities are available to launder wash-and-wear clothing, but clothes to be dry-cleaned must be flown to Elmendorf, and it can take weeks to get them back.

Women airmen are currently stationed at six remote sites. By September, however, they will be gone from all but Galena, King Salmon, and Shemya. The restriction doesn't apply to women officers who at present are stationed at Shemya, Murphy Dome, Fort Yukon, and Campion.

Like other remote stations, Cape Lisburne has a base exchange, a theater showing free—if old—movies, a gym with basketball court, a two-lane bowling alley, hobby shops, recreation hall, off-duty education program, and officers' and NCO clubs. During the winter months, weekly telephone bowling matches between remote stations are a favorite diversion, and competition is fierce to qualify for, and remain, a member of each station's five-man "intercollegiate" team.

The forward surveillance stations are tied in to one of two regional control centers—in the north at Murphy Dome, near Fairbanks, and in the south at King Salmon, on the mainland end of the Aleutians.

Under the Murphy Dome Center are the stations at Tin City, Cape Lisburne, and midway between them at Kotzebue, plus three GCI sites, providing intercept control as well as surveillance, at Campion, Indian Mountain, and Fort Yukon.

King Salmon's control center handles five sites—three surveillance stations at Cape Newenham, Cold Bay, and Cape Romanzof, and two GCI sites at Sparrevohn and Tatalina.

Two other NORAD sites in Alaska are less concerned with tracking aircraft than with intercontinental ballistic missiles. The older of the two is at Clear, eighty miles southwest of Fairbanks. It is the western anchor of the Ballistic Missile Early Warning System (BMEWS) that also includes stations in Greenland and at Fylingdales Moor, England.

Three antennas at Clear are each 400 feet wide and 165 feet high, designed to detect the launch of a Soviet ballistic missile and predict its trajectory in time to provide about twenty-five minutes' warning to its intended target. There's also a tracking radar to determine the trajectory of satellites and other objects in earth orbit.

A new long-range radar at Shemya is a phased-array system. Called Cobra Dane, it is housed in a building 100 feet high with a slanted wall in which are imbedded 15,000 transmitting and receiving elements. Instead of rotating, the signals are steered electronically, covering a 120-degree sweep in milliseconds and enabling the system to track 200 space objects simultaneously. Cobra Dane is a second-generation version of the phased-array radar that has been operating at Eglin AFB, Fla., since 1968.

The information produced by all these systems is displayed at the Alaskan NORAD Region Control Center at Elmendorf, and is simultaneously relayed to the NORAD headquarters control center in Cheyenne Mountain at Colorado Springs, Colo.

Soviet military aircraft show up often on radar screens at Murphy Dome and King Salmon. During our visit to Murphy Dome, Maj. Fred Dorr, operations chief, pointed out blips of Soviet planes flying within their own borders to and from such forward bases on the Chukotskiy peninsula as Lavrentiya, Provideniya, and Mys Shmidta.

But almost daily, one or more Soviet aircraft move out over the Bering Sea, traveling southeast below St. Lawrence Island, down toward the Aleutian chain. Numerous Soviet fishing trawlers work those waters and presumably the planes warn them of ice formations.

Back at Elmendorf, Col. A. D. Thomas, AAC Director of Intelligence, described how the command's F–4s regularly check on Soviet patrol planes flying in international waters.

"We have two intercept lines," he said. "One is the DEWIZ—Distant Early Warning Identification Zone—and when Soviet aircraft penetrate that line, which they're free to do since they're over international waters, we scramble our Phantoms to look them over, which we're free to do as well.

"The second intercept line is our ADIZ—Air Defense Identification Zone. When a bogey penetrates that line, he'd better be friendly, for otherwise we would force him to land or, if necessary, we'd shoot him down."

Each time AAC F–4s meet Soviet patrol craft, the crew takes a picture of the Soviet plane.

"We find the same types of planes each time," said Colonel Thomas, pointing to enlarged photos on his office wall. "They even carry the same tail numbers."

Contrary to reports by columnist Jack Anderson, Colonel Thomas said AAC's surveillance radars and interceptors have turned up no evidence of MiG–25 Foxbats operating over or near Alaskan skies. Nor have they seen any supersonic Backfire bombers.

"The most modern aircraft operating in our area is the Tu–16 Badger," he said. (The Badger is a twin-jet roughly comparable in performance to USAF's long-retired Boeing B–47.) "We also see the turboprop-powered Tu–95 Bear with its counterrotating props, and occasionally the An–24 Coke medium transport."

A Coke was responsible for the most excitement AAC's radar scanners have experienced in recent years when one landed on U.S.-owned St. Lawrence Island with engine trouble. Its passengers were scientists and meteorologists studying ice-clogged waterways. AAC technicians helped the Russians repair their engine, and the Coke returned to its Siberian base.

Colonel Thomas denied that AAC aircraft seek to test Soviet air defenses by flying a course that would carry them toward Siberia, then turning back at the last possible moment.

"We don't test the Soviet interception capability," he declared. "There are those who do, but not us. We're concerned only with the defense of Alaska."

He acknowledged, however, that the Soviets occasionally make such feints, and as soon as F–4s scramble to intercept them, reverse course to avoid contact.

SAC IN ALASKA

SAC is the only other Air Force command flying aircraft beyond state lines in Alaska. Its 6th Strategic Wing operates KC–135 tankers that rotate to Eielson on sixty-day tours, and RC–135 reconnaissance craft whose crews perform three-year tours at Eielson, but spend about two weeks in every five on temporary duty flying from Shemya.

The tankers refuel the 43d Fighter Squadron's F–4s and SAC's RC–135s, and deploy to Shemya on occasion to refuel RC–135s, F–4s, and other military aircraft flying to and from the Far East. The RC–135s' operations are kept under wraps, beyond the acknowledged fact that they perform a variety of intelligence-gathering tasks.

SAC's RC–135s also draw interceptor escorts now and then, usually MiG–19s or –21s that come up from Petropavlovsk, on the Kamchatka peninsula, about 650 miles due west of Shemya. The photos they take of the RC–135s probably decorate the walls of Soviet intelligence offices at their air force regional headquarters in Magadan or Okhotsk.

SOVIET PILOTS KNOW THE TERRITORY—OR USED TO

A lot of Soviet aviators have flown over Alaska. They've landed and taken off from Eielson, Cold Bay, Galena, and other airstrips in the state. Most of them are probably retired by now. Those bases during World War II were vital way stations in ferrying U.S.-built fighter planes to the U.S.S.R.

Eielson, in fact, was built originally to handle the backlog of Soviet-destined aircraft held up in Alaska awaiting favorable flying weather. At that time Eielson was known as Mile 26, its distance from Fairbanks, and was a satellite of Ladd Field at Fairbanks. In 1960, Ladd, its runways too short for the big jets, was turned over to the Army and renamed Fort Wainwright.

ARCTIC SURVIVAL SCHOOL

Also at Eielson is the Air Training Command's Arctic Survival School. The "cool school," oldest continuous survival school operated by USAF, is one of three detachments of ATC's 3636th Combat Crew Training Wing at Fairchild AFB, Wash., others being the Water Survival School at Homestead AFB, Fla., and the Desert Survival School at Nellis AFB, Nev.

One of the cool school's instructors, rounding out his third year at Eielson, is SSgt. Bill Joiner, ATC's Outstanding Airman of the Year for 1974.

Each year, some 700 students complete the five-day course, which includes forty-eight hours in the field where they must build their own shelter, forage for food, and learn how to signal their position to search aircraft. Students include aircrew members, security police, and others whose duties might subject them to extended exposure. The school laboratory exhibit and museum, assembled over the seventeen years it has been at Eielson, is one of the base's more popular attractions.

Instructors from the school have assisted Alyeska, the Alaska pipeline company, in setting up survival programs for its people, and they are called on frequently to address civic and social groups in the Fairbanks area.

GUARDING THE FRONTIER

Anthropologists are generally agreed that Alaska's original settlers came from Asia, crossing the Bering Strait into Alaska. Some remained, others continued south. There is evidence that the Athabaskan Indians in Alaska's interior are closely related to the Apaches of Arizona.

In the years before World War II and the ensuing cold war, inhabitants of Alaska and neighboring Siberia moved freely back and forth across the Strait. Ben Eielson, the pioneer Alaskan pilot for whom Eielson AFB is named, crashed into a Siberian hillside in November 1929 while attempting to bring food to the crew of an ice-locked ship off the Siberian coast. It took three months for a joint US-Russian search team to find the wreckage of his plane.

If such traffic is still going on, it is on a far smaller scale. The Eskimo villages that dot the coastine are close-knit communities where visitors are readily spotted. The Eskimo Scouts, that unique organization of the Alaska National Guard, are the "Royal Mounties" of the region, and, unless the strangers can prove they're on legitimate business, they're hustled back across the Strait or turned over to higher authority.

It isn't likely that Soviet forces would try to invade Alaska via the Bering Strait. But if the Soviets were to launch an attack on the US by missiles and long-range aircraft, many of them would pass over of near Alaska. Thus, radar stations for air defense and ballistic missile early warning are vital military installations. They could be important enemy targets. If they should suddenly be silenced, defenses would be seriously crippled.

Also vulnerable is the Alaskan pipeline, stretching 800 miles from Prudhoe Bay on the North Slope to Valdez on Prince William Sound, south of Anchorage. Since the North Slope in full production is expected to provide ten percent or more of the nation's oil supply, pipeline sabotage is no small threat.

The Joint Chiefs of Staff have plans, which are exercised regularly, for the rapid reinforcement of Alaskan defenses. Any incursion would trigger an immediate response, initially by forces within the state, but swiftly augmented by ground, air, and naval forces earmarked and trained for speedy response.

CROSSROADS OF THE WORLD

Many Americans think of Alaska as a remote, vast, cold region having little in common with the rest of the continental US. Alaskans, on the other hand, consider themselves pretty much in the center of the northern hemisphere. Anchorage is closer to the major cities of Europe and Asia than are San Francisco, Chicago, Atlanta, or New Orleans. Passenger and cargo aircraft of many nations fly to and from Anchorage International Airport, bound for destinations across the top of the world.

"He who holds Alaska will hold the world," predicted Brig. Gen. Billy Mitchell to the House Military Affairs Committee half a century ago.

In the age of missiles and spaceflight, Alaska may no longer be the keystone of global strategy as Mitchell envisioned it for the air age. But, in addition to its valuable natural resources, its location, nose to nose with the USSR, is reason enough for maintaining alert forces there to guarantee its inviolability.

UAW'S WOODCOCK CALLED "A TOUGH ACT TO FOLLOW"

Mr. RIEGLE. Mr. President, next week in Los Angeles, one of America's great labor leaders steps down from the presidency of the United Auto Workers. He is expected to be offered a high position in the Carter administration, so in no sense will the end of his office with the UAW mark the retirement of Leonard Woodcock.

The Detroit Free Press labor writer, Ralpr Orr, has composed a moving profile of Mr. Woodcock, which reaches beyond the usual summary of accomplishments and talks about the man behind the job. Many readers of the CONGRESSIONAL RECORD will want to know what makes this man tick, and I believe that Ralph Orr's article about Woodcock provides a personal side to this man whose work has been so important to the people of Michigan and, indeed, of the Nation and the world.

The UAW is a very special kind of labor organization and it has produced very special leaders. None of them more so than Leonard Woodcock, who served in the shadows of the late Walter Reuther, but who when he came to power himself put his own unique stamp on the union and the industry which the UAW represents in collective bargaining.

I ask unanimous consent that the Detroit Free Press story on UAW President Leonard Woodcock be printed in the RECORD.

There being no objection, the story was ordered to be printed in the RECORD, as follows:

WOODCOCK—"A TOUGH ACT TO FOLLOW"

(By Ralph Orr)

When Leonard Woodcock took over the United Auto Workers seven years ago, the shoes he was filling belonged to a near-legend, his union was in debt, and his membership wasn't at all sure how it would do without the guiding hand of Walter P. Reuther.

Next month, Leonard Woodcock will retire, at 66, too old to run again for the presidency of the UAW. The doubts and the debts are history. For Woodcock and 1.4 million UAW members, the years of his presidency have been vintage.

That certainly will be the appraisal of historians. It already is the verdict of his peers in labor.

Auto company negotiators won't miss him, but he has their respect, and even Woodcock's detractors, who see him as aloof and abstracted, have trouble faulting his stewardship.

The bargaining table successes he engineered were in some cases remarkable. And under his presidency, the UAW maintained an unswerving commitment to social change.

He capped his 40-year career by leading President Carter's mission to Vietnam to seek out missing Americans and clear the way for normalizing U.S. relations with Hanoi. Carter has called the mission an unqualified success.

And now it seems certain that Carter next month will name Woodcock as the American envoy to Peking.

"IT IS NEVER EASY TO FOLLOW A LEGEND"

They have not been seven easy years for Leonard Woodcock. It is never easy to follow a legend.

That was his role when Reuther, the UAW's flamboyant, assertive unquestioned leader for 24 years, plunged to his death in a plane crash in May 1970.

Reuther was more than an agile negotiator. He was a phasemaking national figure with a remedy for every national malignancy. He walked with Martin Luther King and talked with Lyndon Johnson.

He was the architect of the unique philosophy that responsible unionism also demands a commitment to the fight for social and economic reform.

His own members lined up for his autograph. And when he died, some said the UAW never would be the same.

"His passing inevitably will make a different kind of union out of the UAW," said one of Detroit's foremost labor experts, "less single-minded, less disciplined."

Seven years have proven the expert wrong. Those seven years have been unkind, too, to those who said that a Woodcock UAW would turn right, to bread-and-butter unionism.

It was a strange prediction about a one-time socialist, a hawk-turned-dove on Vietnam, a man who only two months before Reuther died had raged at UAW conference delegates for foot-dragging on a civil-rights resolution calling for equal promotional opportunities.

Seven years may not be long enough to give the luster of legend to one's achievements.

This may be especially true of one as reserved and enigmatic and sometimes peevish as Woodcock.

There is much that is not generally known about Woodcock, for he flaunts little.

"HE WORE A PATH IN THE SKIES * * *"

His own members have no idea how many times he has gone before Congress and other groups backing causes and legislation that would benefit them—subjects that ranged

from national health insurance to power press hazards, from nuclear testing to noise in the work place.

"He wore a path in the skies between here and Washington," said his long-time secretary, Mrs. Mary Wensel. "He belongs to more than one million-mile club."

Woodcock had labored in Reuther's shadow as an assistant, as a regional director and for 15 years as vice-president. He scored some notable gains in those years, but seldom made the headlines.

Yet it was alien to him to preface a remark with, "As I told the House Labor Committee last week . . . ," as Reuther might have done.

Similarly, few people know how many times Woodcock, unlike Reuther, toured the plants where his constituents worked, shaking hands, asking how things were going, observing line speeds and work standards.

He could talk their language because he was no stranger to the shops; there were those years in the 1930s when he toiled as a machine assembler and punch press operator.

Yet Woodcock never talked about the tours. There was no hype, there were no entourages, no unseemly photos showing him in goggles and holding a welder's gun.

But there are Woodcock anecdotes, cherished by the tellers. There was the time in 1971, for example, when he had a date to tour the Long Manufacturing Co. plant in Birmingham, and a rickety bridge over a culvert gave way under his car.

"I went out and hailed this beat-up old pickup truck to take him to the plant," recalled Joe Loesche, UAW security chief, who was accompanying Woodcock.

"The last I saw of Leonard he was bouncing up and down on this washboard road that was under construction."

A banner over the plant gate read, "Welcome Leonard Woodcock." A plant official who was there with his own welcome saw the truck and said to Woodcock, sitting inside with typical straight-backed reserve, "We know the UAW is in an austerity program, Leonard, but after all . . . ."

Some months earlier, Woodcock and Loesche were in Atlanta, where they walked with the Rev. Ralph Abernathy, the civil rights leader, in the "march against oppression."

"It was a five-mile march. We were tired and we were thirsty when it was over," Loesche recalled.

"All we thought about all the way to the airport was the cold beer we were going to get before we got on the plane. When we got there, the restaurant people were on strike. You know Leonard. No way was he going to cross a picket line."

So Loesche and the newly-installed president of the UAW who prefers Scotch to beer and can put it away when he wants to unwind—slaked their thirst at a water fountain.

The trip to Atlanta was intended as a signal that the UAW was not about to revert to nuts-and-bolts unionism.

Earlier that day, Woodcock had attended General Motors' annual stockholders meeting, wearing a "Tame GM" button and talking about corporate responsibility.

Four months later, 40,000 GM employes were on the picket lines and GM was shut down from coast to coast. The 67-day strike in 1970 was the costliest in history.

THE MOST PRODUCTIVE IN UAW HISTORY

It was the first of three rounds of auto bargaining under Woodcock, rounds that were to prove the most productive in the UAW's 41-year history.

The gains ranged from an unlimited cost-of-living allowance (COLA) to dental care, from a sound early-retirement plan to a qualified right to refuse overtime work.

"We did exceptionally well in all three rounds. There were innovative breakthroughs. It is a tough act to follow," said Woodcock's heir-apparent, vice-president Douglas Fraser.

Auto workers also paid a price each round. There was a week-long strike at Chrysler Corp. in 1973 and the month-long walkout at Ford Motor Co. last year.

Industry negotiators concede that the GM strike of 1970, when the hang-up was the ceiling on COLA, probably was inevitable.

But privately they question the necessity for the '73 and '76 stoppages and complain that sometimes Woodcock was not "readable."

"Walter (Reuther) would tell you why he couldn't buy your offer. Then he would toss off hints about compromise," said one company bargainer.

"But Leonard would say 'no.' then just sit there."

Woodcock's aides agree that this sometimes was his style. "Sometimes he wasn't ready to react or didn't know how to react and was thinking it over," one associate said.

On the other hand, the associate went on, the icy silence may have been a bargaining stratagem—as his temper outbursts sometimes were.

When Woodcock blew a gasket, company men never were sure if the eruption was tactical or visceral.

"But what the hell's the difference if he flipped his lid or sat like Buddha?" the associate asked. "You can't knock the results."

Yet there are none among his peers ready to call Woodcock strike-happy or insensitive to the trauma which a strike generates.

Woodcock agonized over the 1970 strike ("He was a lonely man then," said one staffer) and lashed out angrily at critics who said the strike was unnecessary or part of some ingenious charade.

"If the bastards only knew how many nights I couldn't sleep with 400,000 people on the sidewalk and the holidays coming," he once told a Free Press reporter.

AN ALBATROSS OR TWO ON HIS SHOULDERS

The COLA limitation that triggered the GM strike was a part of the Reuther "legacy," Reuther having gambled and bargained away unlimited COLA in the 1967 Ford talks to win important gains.

Rampant inflation turned it into a bad gamble that cost auto workers millions in COLA payments until Woodcock removed the ceiling.

Another Reuther albatross hung on Woodcock's shoulders was the state of UAW finances.

Reuther's obsession with the UAW education center at Black Lake, which eventually cost $23 million, and his penchant for paying cash, had left the UAW general fund indebted to the strike fund for $13 million.

The GM strike cost the UAW more than $160 million and left the auto workers with their property mortgaged and more than $81 million in debts.

Woodcock, who attended the Walsh Institute of Accountancy in Detroit until the Depression forced him to drop out, began tightening the belt—starting with 125 staff layoffs.

The UAW newspaper was bobbed to eight pages. It was decreed that all plane trips would be taken tourist class. In one symbolic move, he ordered the telephone removed from the UAW Buick that had been Reuther's, saving $50 a month.

Today there is $32 million in the general fund, $162.5 million in the strike fund and a net UAW worth of $246 million.

Woodcock credits UAW Secretary-Treasurer Emil Mazey for his role in the union's fiscal comeback.

In fact, he has been generous with his praise for others in the UAW hierarchy and skilled staff technicians.

WOODCOCK: SOMETIMES, ICY SILENCE

"HE NEVER PULLED RANK ON US"

The Woodcock years have not been a one-man show. Decisions were board decisions, the risks were shared risks. "He never pulled rank on us," Fraser said.

A staff assistant once called Woodcock "our cerebral man."

Although in a head-to-head interview Woodcock is direct, candid and capable of droll humor, some newsmen have cast him as moody, brooding, even reclusive and a loner. That image isn't totally accurate. There are his plant tours and local union functions he makes.

He is sometimes seen dining alone downtown or poking the produce at the A & P store in Lafayette Park, near his 22d-floor apartment, where he cooks his own breakfast and does his own dishes.

Woodcock is a tough administrator who works steadily in his office for long hours and doesn't want to be bothered with trivia.

"In some ways, he's hard to work for," said one staffer. "But if you do your job, you've got no problems."

But his associates say that away from Solidarity House, he bends and is one of the gang.

One staff member recalled a day during the 1967 long-hours bargaining when Woodcock, his staff and the UAW bargaining committee took a break at Tiger Stadium.

"We sat out in the right field bleachers drinking beer and eating hot dogs and had a helluva time," he said.

During two of the biggest crises of his life however, Woodcock did go it alone. The most recent was in Hanoi, when he feared the mission was faltering.

He chose to ignore the trappings and the diplomatic posturing to go one-on-one with Phan Hien, Vietnam deputy foreign minister and, like Woodcock, a skilled negotiator.

If they closed the door on the Woodcock mission, the UAW president told Phan Hien, it might be 10 or 12 years before American negotiators came back.

Woodcock said Phen Hien heard him out and replied: "You will not be disappointed with us."

Seven years earlier, during the bleakest hour of the GM strike, Woodcock had gone to the 14th-floor suite of James Roche, then board chairman.

Woodcock ticked off the minimum ingredients needed for agreement and spoke of the obvious bitter consequences of a prolonged strike with Christmas approaching.

Roche listened politely. It was the turning point, Woodcock said later. In six days there was a settlement.

"THE PRESSURE WAS ON AND I DIDN'T EXPECT HIM"

His tough bargaining stands, his sometimes stoic ways have led some to label Woodcock cold and calculating.

UAW people reject the notion. One of his assistants, Don Ephlin, erupts at the suggestion.

"My son died during the 1970 strike. He was 16," Ephlin said. "Leonard called while I was at the funeral home, but I knew that they were into the all-nighters, that the pressure was on, and I didn't expect him.

"All of a sudden he walked in and gave me a big bear hug. My God, there he was, with the whole staff."

Those who call him calculating also fault Woodcock for bending UAW principles in the interest of expediency.

They talk about UAW lobbying for the B–1 bomber, about touting temporary import quotas during the auto industry slump in contravention of UAW free-trade policies, about abandoning the Sierra Club and

Ralph Nader, about "shilling" for the auto industry for a pause on emission standards.

That was not compromise, but pragmatism, the UAW claims.

Impossible emission standards, when the nation should be concentrating on fuel economy, Woodcock said, translated into the endangering of his members' jobs—and his first duty is to them.

"It's just crap, this talk that the industry has me in its pocket," he said when the liberals took after him.

Still, there are those who sneer and write off the UAW as buttondown unionism with overtones of phony intellectualism.

"They think they're hot . . . because they can pronounce all those big words," a lesser Teamster once said.

The critics talk about too much clubbiness, about the dinners the UAW brass attends in company with industry moguls, and they find that sinister.

It is no different, the sharpshooters say, than Teamster Frank Fitzsimmons playing golf with trucking executives or Steelworker I. W. Abel sipping cocktails in Pittsburgh's Duquesne Club with steel executives.

There is a corollary thesis of the critics about the high-sounding UAW principles and the union's paranoia about corruption.

It is all part of an elaborate sham, they go on, a drawing of the drapes to hide the fact that the UAW has been cuckolded by big interests that call the shots.

The thesis infuriates the UAW leadership.

"Maybe another union, but by God, not this one," one high-ranking officer countered.

"Look at the record. The only paid holiday our people don't have is Groundhog Day. We serve them, we work at it and we do it well."

DESPITE STATUS, HE REMAINS UNASSUMING

Once offered ambassadorships by President Kennedy, considered by George McGovern as a running mate, offered a cabinet post by Carter, Woodstock is still unassuming.

He stands in the cafeteria line at Black Lake and union affairs, rejects suggestions that he sit down and be served.

He spurns the VIP blandishments of stewardesses who recognize him and offer him a freebie first-class seat, remaining in the tourist section with the peasants.

"I'm not looking for any enduring monuments," he once told the Free Press.

A voracious reader, he switches from English history and The Economist to the comics and the baseball standings.

Twice hospitalized by tuberculosis, he drives himself at a punishing pace, at a time when, as a lame duck, he could be a rocking-chair president.

A few days after the 26,000-mile round-trip flight to Hanoi, he jetted 9,000 miles to Barcelona to advise Spanish unionists emerging from 40 years of fascist oppression, pushing his dream of world labor solidarity.

Woodcock is amicably separated from his wife, Loula, and his three children are grown.

"He has time that some of us don't. Maybe he's a workaholic because he gets lonely," a fellow officer said. "But he drives himself. My God, he never misses a local-union mortgage burning."

"I didn't run for re-election in 1974 because I wanted to coast," Woodcock once said in an interview.

Fraser summed up the Woodcock era: "People visualized a turn to the right when Walter died. It never happened. It was a change in style, not philosophy. The seven years were damned good years."

In fact, the measure of history probably will be that they were spectacular years, a judgment that already would have been made if Woodcock had Reuther's flair and public-relations consciousness.

THE MOTIVATIONS OF THE WOODCOCK YEARS

Two motivations dominated the Woodcock years, practicality and the never forgotten obligation to the men and women the UAW served—and the two are related.

It was practical, the leadership felt, to support temporary import quotas during the recession, ideological contradiction or not, to give the industry time to gear up for small-car production.

Jobs were at stake. UAW jobs.

Shortly after Woodcock was sworn in, job alienation and the "blue collar blues" surfaced as the "in" socio-industrial maladies.

Woodcock resented that, considering it the fantasy of "elitists," not just because it reflected on the union, but because it cast his members as mindless robots.

And, being practical and having talked to workers, he knew that some of the remedies being proposed by the academicians never would work.

There were other ways to go at it—like early retirement, voluntary overtime, a Christmas sabbatical, more paid days off and tighter health-and-safety standards.

Yet in serving, the leaders seldom forgot that they were elected to lead. In 1972 Woodcock endorsed cross-district busing—when 74 percent of his members opposed it.

The UAW has won a new standing in Congress. There is Federal legislation on matters like pension reform, that bears the clear UAW imprint.

For all of Woodcock's low-register manner, the UAW remains a union apart, and it will not change with the elevation of Douglas Fraser to the presidency.

The ultimate accolade came from a clutch of Cadillac workers pulling on their Stroh's in Bab's Bar in southwest Detroit, leathery guys often unimpressed by officialdom.

The others nodded when one of them said, "Woodcock, he done a damned good job for us."

FINANCIAL STATEMENT OF SENATOR HASKELL

Mr. HASKELL. Mr. President, in accordance with my usual practice, I ask unanimous consent that a copy of my 1977 Federal income tax return and a personal financial statement as of April 21, 1977, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NET WORTH AS OF APRIL 21, 1977

Provide a complete, current financial net worth statement which itemizes in detail all assets (including bank accounts, real estate, securities, trusts, investments, and other financial holdings) all liabilities (including debts, mortgages, loans, and other financial obligations) of yourself, your spouse, and other immediate members of your household. Where values are other than current market value state the basis. In the case of real estate, mineral leases and similar interests specify nature and location.

ASSETS

Cash on hand and in banks: $175.03.

U.S. Government securities—add schedule: [1] $65,796.00.

Listed securities—add schedule: [2] $20,937.50.

Unlisted securities—add schedule: [3] $24,694.44.

Real estate owned—add schedule: [4] $255,900.00.

Real estate mortgages receivable: [5] $16,374.00.

Autos and other personal property: $10,000.00.

Cash value—life insurance: $14,000.00.

Other assets—itemize:

Civil Service Retirement Account: $15,056.95.

Remainder Interest in Trust: [6] $48,662.27.

Limited Partnership Interests: [7] $13,200.00.

Miscellaneous: [8] $1,000.00.

Total assets: $485,796.19.

CONTINGENT LIABILITIES

As endorser, comaker or guarantor: None.

On leases or contracts: None.

Legal Claims: None.

Provision for Federal Income Tax: None.

Other special debt: None.

LIABILITIES

Notes payable to banks—secured: None.

Notes payable to banks—unsecured. None.

Notes payable to relatives: None.

Notes payable to others: None.

Accounts and bills due: None.

Unpaid income tax: None.

Other unpaid tax and interest: None.

Real estate mortgages payable—add schedule: None.

Chattel mortgages and other liens payable: None.

Loan on VA Insurance: $5,000.00.

Total liabilities: $5,000.00.

GENERAL INFORMATION

Are any assets pledged? (Add schedule.): No.

Are you defendant in any suits or legal actions?: No.

Have you ever taken bankruptcy?: No.

1. 10 U.S. Treasury Notes due 5/15/77; 15 U.S. Bonds due 3/31/77; 15 U.S. Bonds due 8/15/84; 25 Treasury Notes due 11/15/81; all at market value.

2. 1,000 shares Continental Materials and 1,750 shares Terra Chemicals at market value.

3. 56 shares Sheridan Savings and Loan at book value; 3,558 shares Hazen Research, Inc., at appraised value.

4. 31988 Acres unimproved real estate in Boulder County, Colorado, at appraised value December 31, 1973.

5. Secured by First Deed of Trust; appraised value November 1975; face value $24,066.00.

6. Remainder interest in trust established for mother:

TRUST ASSETS

200 shs. Bank of New York at 36.875	$7,375.00
100 shs. Cyprus Mines at 25.25	2,525.00
150 shs. Amer. Electric Power at 24.875	3,731.25
400 shs. Hercules, Inc. at 24.125	9,650.00
200 shs. Shell Oil at 71.875	14,375.00
250 shs. Utah Power at 44.00	11,000.00
	48,656.25
10,000 Philadelphia Electric Bond at 101.75	10,175.00
Value of Trust at .82715	58,831.25
Value of remainder interest	48,662.27

7. At investment cost. Partnerships own miscellaneous non-productive mining interests in Arizona and Montana. One property may be of value. The General Partner has informed the Limited Partners that a discovery has been made and sufficient mineralization exists to pay the retained royalty. The corporations owning the operating interests in the property apparently disagree, since no announcement to shareholders of any discovery, as required by SEC rules, has been made.

8. Valuation arbitrary. Undivided interest in federal oil and gas leases—income 1973 ($423.00), 1974 (—0—), 1975 ($438.00) and 1976 ($438.67).

U.S. INDIVIDUAL INCOME TAX RETURN, 1976

9. Wages, salaries, tips, and other employee compensation (see statement 1): $44,600.

10a. Dividends: $2,125; 10b. less exclusion: $100; balance; 10c: $2,025.

11. Interest income: $5,901.
12. Income other than wages, dividends, and interest (from line 37): $2,071.
13. Total (add lines 9, 10c, 11 and 12): $54,597.
14. Adjustments to income (such as moving expenses etc. from line 42): $3,952.
15a. Subtract line 14 from line 13: $50,645.
c. Adjusted gross income. Subtract line 15b from line 15a, then complete Part III: $50,645.
16. Tax, check if from Schedule D: $16,016.
17a. Multiply $35.00 by the number of exemptions on line 6d: $35.
b. Enter 2 percent of line 47 but not more than $180 ($90 if box 3 is checked): $180.
17c. $180.
18. Balance. Subtract line 17c from line 16 and enter difference (but not less than zero): $15,836.
20. Balance. Subtract line 19 from line 18 and enter difference (but not less than zero): $15,836.
21. Other taxes (from line 62): $122.
22. Total (add lines 20 and 21): $15,958.
23a. Total Federal income tax withheld: $14,036.
b. 1976 estimated tax payments: $2,000.
24. Total (add lines 23a through e): $16,036.
26. If line 24 is larger than line 22, enter amount overpaid: $78.

INCOME OTHER THAN WAGES, DIVIDENDS AND INTEREST

30a. Net gain or (loss) from sale or exchange of capital assets (attach Schedule D): $1,511.
32a. Pensions, annuities, rents royalties, partnerships, estates or trusts, etc. (attach Schedule E): —$1,490.
36. Other (state nature and source—see page 11 of instructions) (see statement 2): $2,050.
37. Total (add lines 29 through 36). Enter here and on line 12: $2,071.

ADJUSTMENTS TO INCOME

39. Employee business expense (attach Form 2106): $3,952.
42. Total (add lines 38 through 41). Enter here and on line 14: $3,952.

TAX COMPUTATION

43. Adjusted gross income (from line 15c). If you have unearned income and can be claimed as a dependent on your parent's return, check here and see page 9 of Instructions: $50,645.
44a. If you itemize deductions, check here, and enter total from Schedule A, line 40, and attach Schedule A: $6,802.
45. Subtract line 44 from line 43 and enter difference (but not less than zero): $43 843.
46. Multiply total number of exemptions claimed on line 6f by $750: $750.
47. Taxable income. Subtract line 46 from line 45 and enter difference (but not less than zero): $43,093.

OTHER TAXES

53. Self-employment tax (attach Schedule SE): $122.
62. Total (add lines 55 through 61). Enter here and on line 21: $122.

SCHEDULES A AND B—ITEMIZED DEDUCTIONS AND DIVIDEND AND INTEREST INCOME

Schedule A—Itemized deductions

Medical and Dental Expenses (not compensated by insurance or otherwise) (See page 13 of Instructions.)
1. One half (but not more than $150) of insurance premiums for medical care. (Be sure to include in line 10 below): 150.
4. Subtract line 3 from line 2. Enter difference (if less than zero, enter zero): 0.
5. Enter balance of insurance premiums for medical care not entered on line 1: 370.
6. Enter other medical and dental expenses: a. Doctors, dentists, nurses, etc.: 355.
7. Total (add lines 4 through 6c): 725.
8. Enter 3% of line 15c, Form 1040: 1,519.
9. Subtract line 8 from line 7 (if less than zero, enter zero): 0.
10. Total (add lines 1 and 9). Enter here and on line 34: 150.

Taxes (See page 13 of Instructions.)
11. State and local income: 1,482.
12. Real estate: 124.
13. State and local gasoline (see gas tax tables): 31.
14. General sales (see sales tax tables): 410.
17. Total (add lines 11 through 16). Enter here and on line 35: 2,047.

Contributions (See page 15 of Instructions for examples.)
21 (a). Cash contributions for which you have receipts, cancelled checks or other written evidence: 558.
24. Total contributions (add lines 21a through 23). Enter here and on line 37: 558.

Miscellaneous Deductions (See page 15 of Instructions.)
32. Other (itemize) tax preparation fees: 400.
Political contributions: 100.
Form 2106 attached: 3,547.
33. Total (add lines 30 through 32). Enter here and on line 39: 4,047.

Summary of itemized deductions

34. Total medical and dental—line 10: 150.
35. Total taxes—line 17: 2,047.
37. Total contributions—line 24: 558.
39. Total miscellaneous—line 33: 4,047.
40. Total deductions (add lines 34 through 39). Enter here and on Form 1040, line 44: 6,802.

Dividend Income

1. Gross dividends (including capital gain distributions) and other distributions on stock. (List payers and amounts—write (H), (W), (J), for stock held by husband, wife, or jointly)
Sheridan Savings & Loan Association: 34.
Hazen Research, Inc.: 778.
2. Total of line 1: 2,125.
Terra Chemicals: 1,313.
6. Dividends before exclusion (subtract line 5 from line 2). Enter here and on Form 1040, line 10a: 2,125.

Part II Interest Income

7. Interest includes earnings from savings and loan associations, mutual savings banks, cooperative banks, and credit unions as well as interest on bank deposits, bonds, tax refunds, etc. Interest also includes original issue discount on bonds and other evidences of indebtedness (see page 16 of Instructions). (List payers and amounts)
Interest on U.S. obligations: 4493.
Mountain Valley Associates note: 1,408.
8. Total interest income. Enter here and on Form 1040, line 11:5,901.

CAPITAL GAINS AND LOSSES

Long-term capital gains and losses—assets held more than 6 months

6. 595.69 Sh. Mile High stock: 73—32376; 408; 959: —551.
442 Sh. Hazen Research stock: 73—92876; 3,271; 855: 2,416.
Mountain Valley Assoc. note—installment sale: 71—92876; 2,458; 764: 1,694.
9. Enter your share of net long-term gain or (loss) from partnerships and fiduciaries: —536.
11. Net gain or (loss), combine lines 6 through 10: 3,023.
13. Net long-term gain or (loss), combine lines 11 and 12: 3,023.

Summary of Parts I and II

14. Combine lines 5 and 13, and enter the net gain or (loss) here: 3,023.
15. If line 14 shows a gain—(a) Enter 50% of line 13 or 50% of line 14, whichever is smaller (see Part IV for computation of alternative tax). Enter zero if there is a loss or no entry on line 13: 1,512.
(b) Subtract line 15a from line 14. Enter here and on Form 1040, line 30A: 1,511.

Computation of alternative tax

17. Enter amount from Form 1040, line 47: 43,093.
18. Enter amount from line 15a (or Form 4798, Part IV, line 8(a)): 1,512.
19. Subtract line 18 from line 17 (if line 18 exceeds line 17, do not complete the rest of this part. The Alternative Tax will not benefit you): 41,581.
24. Subtract line 23 from line 22: 0.
25. Tax on amounts on line 19 *; 15,260.
26. Enter 50% of line 18 but not more than $12,500 ($6,250 if married filing separately): 756.
27. Alternative Tax—add lines 24, 25, and 26. If smaller than the tax figured on the amount on Form 1040, line 47, enter this alternative tax on Form 1040, line 16. Also check the Schedule D box on Form 1040, line 16: 16,016.
* If the amount on which the tax is to be computed is $20,000 or less use the Tax Table; if more than $20,000 use Tax Rate Schedule X, Y, or Z.

SUPPLEMENTAL INCOME SCHEDULE

Rent and royalty income

See statement 4.
(c) Total amount of royalties: 449.
(d) Depreciation (explain below) or depletion (attach computation): 99.
(e) Other expenses (Repairs, etc.—explain below): 350.
10. Total rent and royalty income (add lines 7, 8, and 9): 350.

Income or losses from partnerships, estates or trusts, small business corporations

See statement 3.
(d) Income or (loss): —1,840.
12. Income or (loss). Total of column (d) less total of column (e): —1,840.
13. Total (add lines 5, 10, and 12). Enter here and on Form 1040, line 32A: —1,490.

COMPUTATION OF SOCIAL SECURITY SELF-EMPLOYMENT TAX

Computation of net earnings from nonfarm self-employment

5(b) Partnerships, joint ventures, etc. (other than farming): —511.
(e) Other: See statement 2: 2,050.
6. Total (add lines 5a through e): 1,539.
8. Adjusted net earnings or (loss) from nonfarm self-employment (line 6, as adjusted by line 7): 1,539.

Nonfarm Optional Method

9(a) Maximum amount reportable, under both optional methods combined (farm and nonfarm): $1,600.

Computation of Social Security Self-Employment Tax

12(b) From nonfarm (from line 8, or line 11 if you elect to use the Nonfarm Optional Method): 1,539.
13. Total net earnings or (loss) from self-employment reported on line 12. (If line 13 is less than $400, you are not subject to self-employment tax. Do not fill in rest of schedule.): 1,539.
14. The largest amount of combined wages and self-employment earnings subject to social security or railroad retirement taxes for 1976 is $15,300.
16. Balance (subtract line 15c from line 14): 15,300.
17. Self-employment income—line 13 or 16, whichever is smaller: 1,539.
18. Self-employment tax. (If line 17 is $15,300.00, enter $1,208.70; if less, multiply the amount on line 17 by .079.) Enter here and on Form 1040, line 58: 122.

EMPLOYEE BUSINESS EXPENSES

1. (d). Other (specify) see statement 5: 11,605.

4. Employee expenses other than traveling, transportation, and outside salesperson's expenses to the extent of reimbursement: 11,-133.

5. Total of lines 1, 2, 3, and 4: 22,738.

6. Less: Employer's payments for above expenses (other than amounts included on Form W-2): 18,786.

7. Excess expenses (line 5 less line 6). Enter here and include on Form 1040, line 39: 3,-952.

Employee Business Expenses Which Are Deductible If You Itemize Deductions on Schedule A (Form 1040)

1. Business expenses other than those included above (specify) see statement 6: 3,-547.

1976 FEDERAL INCOME TAX STATEMENTS

Statement 1—Wages, salaries, tips, etc.
Employers name and address: U.S. Senate, Washington, D.C.
Income tax withheld: 14,036.
Wages, salaries, tips, etc.: 44,600.
FICA: None.
Statement 2—Miscellaneous income; Honoraria, net of agency fee of $250:
Subject to SE tax: 2,050.
Other taxable income: None.
Total taxable income: 2,050.
Statement 3—Partnership income; High Hopes, Ltd., 84-611488; Canus, Ltd., 84-0583390; Sucan Ltd., 86-6059772:
Subject to SE tax: —111 and —400. Total: —511.
Other taxable income: —1,329. Total: —1,329.
Total taxable income: —111, —1,329, and —400. Total —1,840.
Statement 4—Income from rents and royalties:
Gross royalties: 449.

EXPENSES

Depletion: 99.
Net income:350.
Statement 5—Other employee business expenses:
Washington, D.C. living expenses per public law 471 82d Congress: 3,000.
Fares, meals, lodging and other travel expenses: 8,605.
Total other travel expense: 11,605.
Statement 6—Employee itemized business expenses:
Constituent communication: 621.
Entertainment: 427.
Dues: 240.
Issues poll: 1,950.
Miscellaneous: 309.
Total employee business expense: 3,547.

COMMUNITY REINVESTMENT ACT OF 1977

Mr. MORGAN. Mr. President, on Tuesday of this week the Senate Banking Committee voted to report out the housing omnibus bill, with amendments, including S. 406, the Community Reinvestment Act of 1977. This part of the bill would require an ongoing assessment of a financial institution's community credit effectiveness. A motion on my part to reconsider this unnecessary and burdensome bill was defeated by a tie vote in the committee. Now I hope that my colleagues in the Senate will support my amendment to delete title V.

Although I support the intent of the bill to insure greater credit availability for the inner cities, I feel that the bill as reported out will not only add a tremendous amount of paperwork for our already overburdened financial institutions but will also have the adverse effect of causing a reduction in credit availability in these areas which we are trying so desperately to revitalize.

First I feel that the bill is unnecessary. The Federal supervisory agencies are presently considering the "convenience and needs" test when granting new charters, mergers, et cetera. The Acting Chairman of the Home Loan Bank Board, Mr. Garth Marston, testified before the Senate Banking Committee on March 24, 1977 that pursuant to the statutory requirements in section (5)(a) of the Homeowners Loan Act, the Board issues charters for Federal associations "giving primary consideration to the best practices of local mutual thrift and home financing institutions. In connection with such charter applications the Board considers three criteria: First, the necessity for the proposed association in the community to be served; second, the reasonable probability of usefulness and success of the proposed association; and third, the question of whether the charter may be granted without undue injury to properly conducted existing local thrift and home finance institutions."

In regard to bank charters, title 12 of the United States Code Annotated, section 1816 enumerates the factors to be considered in issuing certificates to do business for federally chartered banks. It states:

The factors to be enumerated in the certificate required under Section 1814 of this Title and to be considered by the Board of Directors under Section 1815 of this Title shall be the following: the financial history and condition of the bank, the adequacy of its capital structure, its future earnings prospects, the general character of its management, the convenience and needs of the community to be served by the bank and whether or not its corporate powers are consistent with the purses of this chapter.

What this means is that the supervisory agencies are already considering the credit "needs" of a community in granting or denying charter applications, and thus the Community Reinvestment Act adds nothing other than additional paperwork to existing law.

The bill reported out by the Banking Committee would require the bank examiners to assess the institution's record of meeting the credit needs of its primary service area, and I would contend, Mr. President, that this assessment can only be based on additional paperwork and bureaucracy.

During the markup, an amendment was offered and was presented as a creative measure to reduce the paperwork burden required by the legislation initially introduced. However, I contend that we must stop and ask the question: "What are the examiners going to base their assessment of the credit needs of a community on if not additional records and reports to be maintained by the financial institutions?"

Section 6 of the act as reported would require the appropriate Federal financial supervisory agencies to promulgate regulations to carry out the purposes of this act. I would submit that by regulation we are allowing the Federal supervisory agencies to accomplish the very paperwork nightmare of which the overwhelming majority of the witness at our hearing warned.

As I travel throughout the State of North Carolina, I am confronted over and over again with the comment that we are paperworking the business of this country to death. I am sure that my colleagues here in the Senate are receiving this same reaction throughout the country. Although the intent of our legislation is a worthy one, I once again state that we must look to see what the ultimate effect of this legislation will be. And I contend, Mr. President, that the ultimate effect might well be a reduction in credit availability in these blighted areas.

During the hearings before the Banking Committee, we heard testimony relating how a group of financial institutions in Philadelphia joined together to form the Philadelphia Mortgage Plan to help meet the credit needs of the inner city. I suggest to my colleagues that this same type of concerted effort is being made by concerned financial institutions throughout the country. I believe that initiatives like the one in Philadelphia are the way in which we must deal with the financial problems of the inner city—not additional legislation and paperwork as this bill would require.

In conclusion I would like to say that I believe that we acted in haste in adopting this measure in the Banking Committee and in so doing have created the possibility of another paperwork nightmare which may in fact work to counteract the very noble intent of the legislation.

PHILLIP RUNKEL SUPPORTER OF CLOSE UP

Mr. RIEGLE. Mr. President, it has come to my attention that the third and final group of students from the Grand Rapids/Kent County area are in Washington participating in the 1977 Close Up program. Close Up is a nonpartisan forum for the involvement of youth in Government. At the end of this week over 1,600 students and teachers from the Grand Rapids area will have participated in this program over the past 3 years.

It is sad that one of the principal Grand Rapids supporters of Close Up was unable to participate this year. Mr. Phillip Runkel, superintendent of the Grand Rapids public schools, has lent his efforts toward making it possible for hundreds of students to have the opportunity to come to Washington, D.C., on this program. His enthusiasm and energy have motivated students and teachers alike to become actively involved in our governmental process.

It gives me pleasure to recognize Mr. Phillip Runkel for his efforts on behalf of the youth of Grand Rapids.

OUR CHANGING WEATHER IS WORSE THAN WE REALIZE

Mr. HASKELL. Mr. President, Sunday's Parade magazine contained an article on the world's changing weather patterns excerpted from a recently published study "The Weather Conspiracy: The Coming of the New Ice Age," by a group called the Impact Team. The central message is that the world's climate ap-

pears to be changing for the worse and that we are entering a period of disruptive weather with colder winters, shorter growing seasons and sporadic, severe drought. Some experts feel that we will no longer be able to count on the stable seasons of the past, and that the world is returning to the radical weather shifts and cooler climate that characterized the 800 years before the modern 50-year period of unusually temperate climate. The "abnormal" weather of the past year in the United States alone, is an ominous sign of extreme departures from the "normal" or expected patterns we have enjoyed for the past decades. I realize that information of this nature has been coming to light in frequent articles and reports of late, but I think it is extremely important that the public and the Nation's policymakers take note.

The implications of such a weather shift for the world's food supply alone are enormous and troubling. In the words of the authors—

The ramifications of such a change would be many, affecting the foreign policy and your fuel bill, what food is grown and what you eat. Taken at its bleakest, the coming weather may signify massive migration and equally massive starvation. Taken at its most optimistic, it will cause all of us to change parts of our life-styles.

One need not be an alarmist to find this information of serious concern and worthy or considerable thought.

Today, our farmers are beset by record wheat and grain surpluses which have forced farm prices down and caused a serious recession in many parts of the Nation's Grain Belt. Viewed in the context of this weather picture, however, we should be counting our blessings. We may never again have this golden opportunity to accumulate adequate food reserves against the probable years of scarcity. Many forward-looking Members of this body have pointed this out for some time, and I know that the Secretary of Agriculture has a deep appreciation of these facts. Let us hope that we all have the wisdom and the responsibility as public officials to take the necessary measures, however costly they may seem at the time, to arm ourselves against likely future scarcities.

Mr. President, as the Senate prepares to consider major legislation establishing the Nation's agricultural and nutrition policies for the next 5 years, I commend this sobering article to my colleagues and to interested readers. I ask unanimous consent that the article "Our Changing Weather is Worse Than We Realize," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OUR CHANGING WEATHER IS WORSE THAN WE REALIZE

For the past 50 years we have enjoyed some of the best weather mankind has ever known. But this exceptionally clement period has lulled us into a false sense of security. Now, according to many climatologists and some recently declassified Central Intelligence Agency reports, our climate and the consistency of our seasons can no longer be taken for granted.

In the early 1970's top CIA thinkers concluded that changing weather was "perhaps the greatest single challenge that America will face in coming years." As a result, they ordered several studies of the world's climate, the likely changes to come, and their probable effect on America and the rest of the world. The studies conclude that the world is entering a difficult period during which major climatic change is apt to occur.

The ramifications of such a change would be many, affecting the foreign policy and your fuel bill, what food is grown and what you eat. Taken at its bleakest, the coming weather may signify massive migration and equally massive starvation. Taken at its most optimistic, it will cause all of us to change parts of our life-styles.

For two-thirds of the United States the winter of 1977 was the coldest on record. Upper New York State was buried under 26 feet of snow. Buffalo lay inert as a 15-foot fall brought life to a complete standstill. A freak frost in Florida reduced the citrus crop by 14 percent from the previous year. Snow fell briefly in Miami.

RECORD LOW TEMPERATURES

Chicago, Pittsburgh, Jacksonville, and Nashville had many days of the lowest temperatures on record. Cincinnati averaged 20° below normal; Indianapolis shivered for weeks and recorded an all-time low of 18° below zero.

Abnormal weather, people said.

Pardee Reservoir near Jackson, Cal., was down more than 100 feet below normal water level as parts of the state sweltered under a severe drought.

"The problem is worse than anyone realizes," said Daryl Arnold of the Western Growers Association as reports came in that many square miles of California farmland were already too dry to grow anything.

At the same time, the Midwest, America's breadbasket, has too little moisture, which could turn it into a totally unproductive dust bowl. Thirteen Western states, with only one-fifth their normal mountain snow cover, can look forward to a bleak period of water rationing and power blackouts if summer, their dry season, follows its usual course.

Thirteen other states, from Washington and Oregon across to Kansas and Nebraska, were also hit. Wheat and oat stocks were depleted. In parts of Minnesota, the Dakotas, Wisconsin and Kansas the earth froze to a depth of four feet, because not enough snow fell to give the usual insulation to the ground.

Old Man Winter was perplexing other countries as well. In the USSR, snow fell farther south than in any winter on record. Neighboring Hungary and Czechoslovakia were flooded out with a freak warm spell. Britain had severe blizzards in random parts of the country. Several parts of southern Australia were declared disaster areas as the worst brush fires ever torched timber and crops. In Brazil, the Saõ Francisco River, an important commercial artery, became too shallow along most of its 1800 miles for cargo boats to pass through.

And in the not-so-distant past, there have been other startling weather-related events. In 1972 Russia's total wheat crop failed. Since 1970, 3 million have died as a result of drought in the six countries of the African Sahel. The once-teeming schools of anchovy off the coast of Peru have mysteriously disappeared. In India 150 million people would have starved had help not come in time when 1974's monsoon failed to show.

What's going on?

RETURN TO NORMAL

The answer is simple. America and the rest of the Northern Hemisphere are returning to normal weather. After 50 years of unprecedentedly temperate climate, the world is returning to the more radical shifts and the cooler climate that characterized the previous 800 years.

As intelligence analyses, the CIA studies have profound and disturbing implications: "The politics of food will become the central issue of every government in the near future." This estimate is based on overwhelming evidence gained in the past two decades that the world is heading into an unstable weather future—what climatologists call a "cooling trend."

WE'VE BEEN LUCKY

Prof. Reid A. Bryson of the University of Wisconsin, one of the world's most renowned and respected climatologists, makes the point that for 50 of the past 60 years, the world's climate has been *abnormal*, not normal. He convincingly demonstrates that the world has enjoyed the best agricultural climate since the 11th century.

During this period, and notably during the 1960's, a worldwide "green revolution" occurred. Through the use of highly selective, specially created strains of rice, wheat, and other grain crops, famine in underdeveloped countries was pretty well staved off. At the same time, the U.S. produced bumper crops. Monsoons arrived on schedule in India, West Africa, and China. By 1955, Alpine glaciers had retreated a half mile from their 1865 limits. The globe was warm, its people fairly well fed.

Experts disagree as to when this period began to end. Some say it was as early as the 1940's, others say as late as the mid-60's. But they are in general agreement that our weather is now changing—and for the worse.

The ice cover in the Northern Hemisphere increased by 12 percent in 1971—an increase equal to the combined area of England, Italy, and France. This added ice has remained.

The great ice mass of Antarctica grew by 10 percent in one year, 1966–67. And the average ice and snow cover is high—and expanding.

WINTERS LENGTHENING

Satellite photography has captured another, equally disturbing picture: In just six years winters in the Northern Hemisphere grew longer by almost three weeks, averaging 84 days in 1967 and 104 days in 1973.

And as the evidence accumulated, the world's climatologists turned their thoughts to the unthinkable: the real possibility that the world is about to face a new Ice Age.

Professor Bryson feels that the evidence suggests the change will be a return to the climate that was dominant from the 17th century to about 1850. During most of that time northern Europe lived in the twilight of permanent winter. Malnutrition caused great plagues in Europe, Russia, India, and Africa, while the Iberian Peninsula, Italy, and Greece thrived.

In northern Europe, even the summers were cool and dry, and harvests were poor. The winters were snowy and bitter cold.

Climatologists agree that the entire globe is in for unstable weather over the next several decades. Droughts and floods, hurricanes and tornados, killing frosts and throttling snows will occur far more often and randomly than ever before.

The CIA believes that perhaps our gravest short-term concern should be, as it has been recently, marked variations in prevailing weather patterns—one of the side effects of a cooling trend. They conclude:

"The U.S. Middle West has had moderate to severe droughts every 20-25 years—e.g., 1930's, mid-1950's—as far back as the weather records go. If this pattern holds, the main U.S. granary (now also the mainstay of the world grain trade) could expect drought and consequent crop shortfalls within the next several years."

In America's Midwest there could be a return to the disastrous dust bowl of the 1930's. Professor Bryson has publicly described the possibility of "an era of drought, famine and political unrest in the Western world."

The CIA believes that if the cooling trend

is great enough to reduce food production in areas such as Canada, the USSR, and north China and to increase the frequency of drought in countries that depend on regular monsoons, U.S. surpluses will still cover the needs of most of the world, except in particularly bad years.

But clearly the few rich countries of the world will have to make do with less food. With the exception of the U.S., they will run a good balance-of-payments deficit that will put a big dent in their economies and cause some degree of social disruption.

MANY WILL STARVE

For the poor countries of the world, the implications are more ominous. Many will starve. This future will place an almost unbearable moral and political burden on the U.S. and its people. We must face up to the following "unthinkable" questions:

1. How much food will we keep for ourselves?

2. How much are we willing to reduce our standard of living to feed others?

3. Are we going to give away our food or sell it?

4. Who gets how much, and why?

Climate does not respect national boundaries; production of food does. America is accurately termed the Breadbasket of the World. In mankind's coming quest for food, we hold all the cards. The CIA report states that the "U.S.'s near-monopoly position as food exporter would have an enormous, though not easily definable, impact on international relations. It could give the U.S. a measure of power it has never had before—possibly an economic and political dominance greater than that of the immediate post-World War II years

"In bad years, when the U.S. could not meet the demand for food of most would-be importers, Washington would acquire virtual life and death power over the fate of multitudes of the needy. Without indulging in blackmail in any sense, the U.S. would gain extraordinary political and economic influence. For not only the poor [countries] but also the major powers would be least partially dependent on food imports from the U.S."

PHYSICAL THREATS TO U.S.

And, the report adds, where climate changes caused grave shortages of food in spite of U.S. exports, the potential risks to the U.S. would rise. The militarily powerful but hungry nations would make increasingly desperate attempts to get more grain in any ways they could. This is no laughing matter. China currently has an estimated 3,250,000 men under arms; Russia has 3,800,000 in its armed forces.

Invasion is not the only physical threat we face. Massive migration, backed by force, could become a reality. There have been such migrations before; America welcomed a million Irishmen when climate caused the potato famine. Would we welcome a million now? Experts estimate that the failure of one Indian monsoon would cause 100 million to go hungry. Who would take them in?

The CIA believes we must assume that the worsensing of our weather will reach the point where even the best efforts of the U.S. would not be enough to met the minimum needs of starving countries. But we haven't yet acted on such an assumption.

As we enter the final quarter of the 20th century, the United States has less than 6 percent of the world's population. With common sense, we will recognize that the short-term power our food weapon can bring can also lead to a long-term disaster.

PATRICK HYNES AND HIS FAMILY

Mr. PROXMIRE. Mr. President, the Senate is a better, more efficient and more pleasant place because of Pat Hynes, the Assistant Secretary of the Majority. Pat started as a Senate page and through the years has become as helpful as any staff member in the 20 years I have been in this body.

In the complicated and confusing flow of legislation through the Senate, amid the myriad of parliamentary maneuvers, starts, stops, interruptions, and reverses, Pat has always been available to explain patiently, expertly, and with remarkable precision just what is going on.

On Wednesday, the Washington Post carried an unusual story by Michael Kernan about Pat, his marvelous mother, and his remarkable father, Emerson Hynes. who had been Senator Gene McCarthy's administrative assistant until Emerson Hynes died in 1971, and Pat's seven sisters and brothers.

This is a story of tragedy and happiness, of unusual achievement and disappointment. The last two paragraphs tell it:

The Hynes family tends to swallow people up like a friendly firestorm. The in-laws—all of them achievers, film maker, physicist, sociologist, teacher, architect—seem to enjoy this. One husband said that if he weren't already an honorary Hynes complete with hyphenated name, he'd marry Arlene (Pat's mother) in a minute.

Every time the Hyneses meet, it's a party. They aren't a family, they're a gestalt.

Mr. President, I ask unanimous consent to have the article printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD. as follows:

[From the Washington Post, May 11, 1977]

GROWING UP IN A LARGE FAMILY: THAT SPECIAL CLOSENESS

(By Michael Kernan)

Their people came from Kilfenora, County Clare, in Ireland. Their farm in Minnesota had the same name. Emerson Hynes and his wife, Arlene, considered themselves academics, but there was more to it than that: Hours before he went off to teach sociology and ethics at St. John's University in Collegeville, he was up to milk the cows, and long after he got back he was puttering around the house he had built himself.

He was one of 10 children; so was she. And they had . . . 10 children.

"Every night, we all got 30 seconds of loving each," said their daughter Mary Hynes-Berry. "They used to joke that if it was any longer, they'd be at it all night. But any time any one of us was depressed or needed some special time, she would take us on her lap. There were six of us under 6 at the time."

If Arlene got off her day's schedule by as much as 20 minutes, it could blow the whole day. She learned not to try to make it up but to flow with it.

Progressive Catholics, the Hyneses were active in the Catholic Worker movement and the Agrarian Society. Arlene became chairwoman of the National Council of Catholic Women, wrote magazine articles, papers. Something was always going on at the farm: They tried solar energy, tried to build with rammed earth. But no bank loans.

"It's a cliche, but they were hippies before their time," said their son Thomas More Hynes.

1959. Eugene McCarthy was elected Senator, called on his old college friend (and best man at his wedding) to come to Washington as his legislative assistant, to turn his back on a 20-year academic career.

"Dad called us all to the table and asked our opinions. Only Patrick didn't want to go. The rest of us were all for it."

Patrick was to become a Senate page and spend more time on the Hill than anyone else. He is now assistant Secretary for the Majority in the Senate.

"Actually," Arlene said, "moving here was the low point for me. We'd been in a safe community where we could let the children go. Children need to be free. We came to Arlington and they couldn't climb trees or roam around. We didn't know our neighbors. I didn't bake a cake for the new people when they moved in—I didn't even know who they were. It was all so impersonal."

The move proved a watershed for the Hynes children. The older ones compared everything to the farm in Minnesota; the younger ones saw those days as a kind of Eden, remote and mythic.

One Sunday in 1968 Emerson Hynes woke up to find he couldn't speak very well. He slurred the reading from the Breviary. The children giggled. The doctor told him he'd had a stroke. He retired after McCarthy lost the presidential nomination. Then he had another stroke. And his seventh child, Michael, drowned at 18 in the Pacific.

"It broke his heart," said Hilary. "He aged 20 years."

A month after Michael died, his mother went to work in the library at St. Elizabeth's Hospital, making use of her old degree in library science. Emerson urged her on, "as though he knew something." A few months later, in July 1971, he died at 56.

Changes:

"My father always handled the discipline problems," T. More said, "and when Arlene had to do it she was lousy. We all agreed on that. My father would hold you by the forelock and say, 'What did you do wrong?' It was hard. Because you knew it. You knew you were wrong, but sometimes it would take you 15, 20 minutes to admit it. You couldn't get out of it. But it was better than being shut in your room where you could sulk and blame everything on somebody else."

The daily work charts got sloppy. The Christmas rituals, the one-at-a-time gift opening ("the kids we knew couldn't believe it was after noon and we hadn't opened our presents yet") grew less formal. Emerson had been the family's great organizer.

Arlene discovered bibliotherapy.

"It began with some drug therapy I was asked to do at the hospital, and I got interested in therapy through reading, something like poetry therapy. There was no place to train for it, so I taught myself. I started running classes in the evenings with maybe seven people, training librarians in the techniques."

This year she has four trainees who come to her after a day's work. About 100 patients a week do the therapy, reading stories or poems, discussing their feelings, perhaps writing responses of their own. Robert Frost, Denise Levertov, Langston Hughes.

"It has to be stuff they can relate to, stuff that appeals to their own basic human experiences. What happens is that the patients learn to open up to each other, and also they get self-affirmation from the material, they respond to it in their own ways."

She hopes to get an MA in bibliotherapy. When she started work in 1971, the room she worked in consisted mainly of books piled on the floor. It was the former morgue. It had a skylight, like most morgues and artists' studios.

"I've just turned 60," said Arlene Hynes. "I'm delighted." Her identical twin in Houston has six children. Children, you might say, run in the family.

The first six Hynes kids came in six years. Denis was born in 1942. He is a lawyer for the Federal Trade Commission. Put himself

through law school. Two children, Patrick, also in Washington, also has two. Mary, married to a British nuclear physicist, lives in Chicago, has a Ph.D. in English. Chaucer. She has four boys. Hilary went through four years of art school on a full scholarship, tried to live on his art, wound up (very skinny) as a painting conservationist and restorer. Brigid Hynes-Cherin, a lawyer for the Department of Transportation, put herself through law school at night. Peter is a carpenter building houses in Austin, Tex. One son.

Then a 3-year gap to T. More, who has a picture framing business; Timothy, a writer-artist in a California commune; Christopher, age 20, at home, studying music theory and art at Northern Virginia Community College. The youngest, including Michael, are referred to the The Four Little Boys.

"I could live to be 94," said T. More, "but I'll still be one of The Four Little Boys."

He and Tim used to fight a lot (the family called them TNT), and generally the younger ones were rowdy at school.

"I had a terrible attitude to education," said Hilary. "I got nothing from school. Tried to work as an apprentice. Finally landed at the Corcoran. I think the big contribution of my generation was restoring crafts as a valued alternative way of life."

Arlene herself noted the division among her children, the older ones "more old-fashioned," reflecting the values of their parents, achieving academically, and the younger ones breaking away though not by any means dropping out.

"I don't see them so much as achievers," she said, "but as good people living the kind of life I'm happy to see them live. Nobody's rich, nobody's written a famous book. But that's not what matters.

Few of the children have remained as strictly Catholic as their parents ("I don't go to mass regularly, but I never considered myself anything but Catholic"). They were raised on family ritual. Each child had a special individual prayer. The parents even wrote a booklet on Lent in the home.

"We all have a profound sense of transcendence," said Mary. "The rituals are supporting and meaningful to us. I think our closeness was a healing, rich experience. I couldn't be at my father's funeral because I'd just had a baby, and that made his death much harder to cope with than my brother's. The older kids got this strong sense of the importance of faith and a sense of Catholicism based on love and mutual respect and the absolutely priority of human dignity."

They used to line up in two groups and read the Psalms responsively. They had candles in Advent, lived in the liturgical year from week to week. Church rituals became their own family ceremonies.

"All that became more difficult when we went to the suburbs," said Hilary. "The glue wasn't there. Still, when my father died it didn't just stop, the values were passed on. That was the thing, our parents gave us each a tremendous sense of self."

They used to have a '57 Pontiac station wagon named The Whale, and once all 12 of them drove to Houston. It took three days.

They used to have a paper route that they handed down from one kid to another. It was in the family six years.

Some broke away early. Brigid left home at 18 to be a nurse, quit that, went to night school, took city planning, went into transportation, rose to GS-12 with DOT, went to law school nights after her full-time job. Hilary rebelled against his father, giving them both an unpleasant year or two, but they got together again. "Our father never drew the lines. He never burned the bridges."

The Hynes family tends to swallow people up like a friendly firestorm. The in-laws—all of them achievers, film maker, physicist, sociologist, teacher, architect—seem to enjoy this. One husband said that if he weren't already an honorary Hynes complete with hyphenated names, he'd marry Arlene in a minute.

Every time the Hyneses meet, it's a party. They aren't a family, they're a gestalt.

(This concludes additional statements submitted today.)

CONCLUSION OF MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, is there further morning business?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

AMENDMENT OF THE STANDING RULES OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, what is the business before the Senate now?

The PRESIDING OFFICER. The clerk will state the pending business.

The legislative clerk read as follows:

Motion to proceed to consideration of Senate Resolution 5 to amend the Standing Rules of the Senate.

Mr. ROBERT C. BYRD. Is that a motion to proceed to the consideration of Senate Resolution 5, as modified?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all committees may be authorized to meet during the session of the Senate tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR COMMITTEES TO FILE REPORTS UNTIL 7 P.M. TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all committees may be authorized to file committee reports until 7 p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceded to call the roll.

Mr. RANDOLPH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RE-REFERRAL—S. 469

Mr. RANDOLPH. Mr. President, I ask unanimous consent that, upon being reported from the Committee on Human Resources, S. 469, the National Academy of Peace and Conflict Resolution Commission Act of 1977, be re-referred to the Committee on Foreign Relations for a period of not to exceed 30 calendar days; and further, that, if, at the end of the period of 30 calendar days for which S. 469 is so referred, the Committee on Foreign Relations has not reported S. 469, the committee be considered as having been discharged and the bill placed on the Senate Calendar.

This, of course, is unanimous consent on referral of the bill S. 469, the National Academy of Peace and Conflict Resolution Commission Act of 1977, to the Committee on Foreign Relations.

Mr. STEVENS. Mr. President, may I inquire, has that matter been cleared with the respective chairmen and ranking minority members of the committees involved? I assume it would be.

Mr. RANDOLPH. I say to the Senator from Alaska that has been done. It has been done with Senator JAVITS, the ranking member of the Committee on Human Resources, from which the bill comes; and also, I understand from him, he has handled that in the Committee on Foreign Relations.

Mr. STEVENS. I do not object.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I have no reservation to the request of my distinguished senior colleague. It is my understanding his request has been cleared with the chairman of the Foreign Relations Committee (Mr. SPARKMAN) and with the chairman of the Human Resources Committee (Mr. WILLIAMS).

The PRESIDING OFFICER (Mr. BUMPERS). Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, there is a likelihood that if Senate Resolution 5, as modified, is disposed of on tomorrow—as, hopefully, it will be—the bill, S. 1474, military construction, will be called up and acted on tomorrow.

Mr. President, there will be rollcall votes tomorrow. There will be no rollcall votes tomorrow before the hour of 12

o'clock noon so that committees will not be disturbed in their operation.

RECESS TO 9:45 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until the hour of 9:45 a.m. tomorrow.

The motion was agreed to; and at 6:39 p.m. the Senate recessed until tomorrow, Friday, May 13, 1977, at 9:45 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 12, 1977;

DEPARTMENT OF COMMERCE

Manuel D. Plotkin, of Illinois, to be Director of the Census.

FEDERAL ENERGY ADMINISTRATION

Leslie Jay Goldman, of Illinois, to be an Assistant Administrator of the Federal Energy Administration.

DEPARTMENT OF JUSTICE

David V. Vrooman, of South Dakota, to be U.S. attorney for the district of South Dakota for the term of 4 years.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

PRICE CONTROLS ON HOSPITAL SERVICES

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1977

Mr. LAGOMARSINO. Mr. Speaker, President Carter's recent proposal to impose price controls on certain hospital services has caused some concern in my district and I suspect throughout the Nation among hospital administrators. My constituent, Mr. Julius Gius, in an excellent editorial, points out problems with such a policy. I would like to share Mr. Gius' comments with my colleagues:

[From the Ventura County (Calif.) Star-Free Press, May 2, 1977]

EDITOR'S NOTEBOOK

(By Julius Gius)

For about a dozen years I have been a trustee of Community Memorial Hospital of Buenaventura, and it has been a civic service that has brought satisfaction to me and to others who give hours and talent to this cause.

So I have been dismayed in recent weeks to observe that President Carter and his advisers have singled out the nation's hospitals as the No. 1 villain in the fight against inflation. The President, through his secretary of Health, Education and Welfare, Joseph Califano, has proposed that legal ceilings be imposed on increases in hospital revenues; in other words, price controls on hospitals.

Mr. Califano argues his case in a HEW position paper that came to my desk, saying in part:

"For the past 40 years, hospital costs have spiraled upward far faster than the overall cost of living. Since 1950, the cost of a day's stay in a hospital has increased more than 1,000 per cent—compared with a 136 per cent increase in the Consumer Price Index. Today, it costs an average of about $160 to spend a day in a hospital, compared with just $44 in 1965 . . ."

What he says is correct, as far as it goes. What he fails to say is that there is no real comparison between 1950 and today—or even 1965 and today—so far as medical capabilities and hospital facilities are concerned.

A quarter-century ago open heart surgery and total hip replacements were unknown—yet these procedures are now done at Community Memorial and St. John's Hospitals, and the investment and continuing costs are high. Kidney dialysis had not been perfected in 1950, nor the laser method for cataract removal, nor cardiac artery catheterization.

And not until the 1970s did highly sophisticated computer-driven brain and body "scanners" evolve and their installation at Community Memorial permits medical staff members to take photographs of tissue and organs for more precise diagnosis of health problems.

As a trustee of our community-owned, nonprofit hospital, I have been on the periphery of the planning and financing necessary to acquire and install some of the delicate equipment to upgrade Ventura's medical capabilities. And my reward has been hearing from physicians of lives saved or prolonged because the hospital provided the tools to give full play to their skills.

Just the other day, for example, Dr. William James told about the boy who had fallen backwards off his skateboard and thudded his skull against concrete. He was unconscious, bleeding from the ears when his alarmed parents brought him to the hospital. A prompt brain "scan" told the physicians what they needed to know to save his life.

The Carter-Califano proposal would fix a $100,000-a-year limit on hospitals' outlay for new equipment. That's unrealistic. At Community Memorial, for example, the trustees in their March-April meeting approved these appropriations simply to maintain medical efficiency:

$57,395 for a mobile image intensifier for the radiology department; $3,540 for one intensive care bassinette for the maternity department; $27,275 for a telemetry monitoring system; $2,609 for an additional surgical light and track in an operating room. Without a continuing program of equipment acquisition (and the prices cited here are not exceptions), a hospital can swiftly suffer deterioration in the quality of its health care.

It should be noted, too, that while daily hospital care costs have been going up, medical efficiencies have reduced the length of patient stays. In Community Memorial the average patient is there 5.24 days at average cost of $937—and these figures, pleased to note, are lower than the statewide average reported by the California Health Facilities Commission of 7 days average patient stay at $1,316 cost.

There's no denying that it's costly to get hospital care these days, very costly in many cases. But far more ingredients go into these costs than are recognized so far by the Carter administration, and I will cite only two of many: skyrocketing malpractice insurance rates and the vast volume of paperwork required by state, federal and professional agencies to process Medicare, Medi-Cal and insurance claims. If the Carter people were to get out of Washington and take a look at the real world of hospitals and their administration, they would surely develop a different prespective. Hospitals, as I know them, do not deserve the villainous image that the President's team has cast upon them.

OUR NATION SALUTES THE CLERGY AND PARISHIONERS OF OUR LADY OF THE ASSUMPTION, ST. MARY'S CHURCH, POMPTON LAKES, N.J., DURING ITS 70TH ANNIVERSARY CELEBRATION

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1977

Mr. ROE. Mr. Speaker, this year the people of my congressional district, State of New Jersey are celebrating the 70th anniversary of the founding of Our Lady of the Assumption, St. Mary's Church, Pompton Lakes, N.J. I am honored and privileged to call this historic event to your attention and request that you join with me in extending our heartiest congratulations and best wishes to the pastor and team ministry, Rev. John Carnevale, OFM, Rev. Robert Hudak, OFM, Rev. Theodore Staniewicz, OFM, and to the members of the congregation on this most important jubilee anniversary celebration.

The faith and devotion of our people in a full communion of understanding, ever caring and respecting the individual religious beliefs of his fellowman, has been the lifeline of our democracy. Spiritual refreshment has inspired our people with hope and urged the individual on to great achievements and purpose in pursuing the fulfillment of his dreams and ambitions.

Mr. Speaker, the quality of the leadership of members of the most reverend clergy and the congregation of St. Mary's Church is most eloquently intertwined in the history of the church. His Excellency Lawrence B. Casey, the bishop of the diocese of Paterson, referred to the history of St. Mary's Church which appeared in their parish journal as "a tribute to the deep faith of the priests, sisters and faithful through 70 years when Father Francis Koch was the first pastor. . . ." I would like to insert at this point in our historical journal of Congress some excerpts from this chronology of events which I will preface with a list of the pastorate over these past 70 years, as follows:

PASTORS

Reverend Francis Koch, O.F.M., 1906–1920.

Reverend Marcellus Kolmer, O.F.M., 1920–1925.

Reverend Kieran McGrath, O.F.M., 1925–1931.
Reverend Philip McCool, O.F.M., 1931–1935.
Reverend Stephen Hartdegen, O.F.M., 1935.
Reverend Bertin O'Neill, O.F.M., 1935–1936.
Reverend Roland Burke, O.F.M., 1936–1937.
Reverend Aidan Burns, O.F.M., 1937–1949
Reverend Donatus Walsh, O.F.M., 1949–1955.
Reverend Arnold Walters, O.F.M., 1955–1961.
Reverend Thomas Giblin, O.F.M., 1961–1967.
Reverend Andrew Collins, O.F.M., 1967–1971.
Reverend Emmett Mulhern, O.F.M., 1971–1973.
Reverend Boniface Hanley, O.F.M., 1973–1976.
Team Ministry—1976:
Reverend John Carnevale, O.F.M., Reverend Robert Hudak, O.F.M., Reverend Theodore Staniewicz, O.F.M.

HISTORY OF OUR LADY OF THE ASSUMPTION, ST. MARY'S CHURCH, POMPTON LAKES, N.J.

As we stand outside St. Mary's on a Sunday morning to view the parish plant and watch the large crowds of people entering and leaving the church, it is hard to imagine that this was ever considered a missionary territory. The truth, however, is that only for the past seventy years have the people been able to claim their own parish church, only for the past thirty years have they enjoyed the services of a resident priest and only for the past twenty-six years have they known the blessing of a parish school. In a certain sense, St. Mary's Parish is comparatively new, but the Catholic faith in and around Pompton is very old.

. . . St. Mary's Parish was formally established by Father Francis Koch. . . . He was truly one of the greatest church builders that our country has known. . . . On Sunday, January 28, 1906, he inaugurated the first regular Sunday Mass over the blacksmith shop of Mathias Hennion on Ringwood Avenue. This building is still standing. The following month the parish was incorporated under the title of Our Lady of the Assumption, and the certificate of incorporation was signed by the Right Reverend John J. O'Connor, Bishop of Newark; Right Reverend Monsignor John A. Sheppard, Vicar General of the diocese; Father Francis Koch, Pastor; and Mathias Hennion and Timothy Lyons as lay trustees. Father Francis knew that the small group of parishioners could never build a church on their own. In proof of this, the total of the collections for the whole month of February was only nineteen dollars. To make sure that Pompton would have a church, he put his talents to use and begged money from some well disposed friends. In May of that same year, he purchased the Pompton Lakes Club House and some of the surrounding property. The building was remodeled to form the first parish church. Originally the lower floor was a chapel and the upper story was used as a hall of meetings and instructions. After a very short time the chapel was moved upstairs and separate entrances were made for the chapel and the meeting rooms.

On May 20, 1906, the first Mass was celebrated in the new Church of Our Lady of the Assumption. The Paterson Sunday Chronicle of that year states that from seventy to eighty people attended services regularly at the new church. Other sources, probably more reliable, put the number at forty. On August 19, 1906, the Vicar General of the diocese. Monsignor Sheppard, blessed the church. The Mass on this occasion was said by Father Clement Raab, the Superior of St. Anthony's Monastery in Butler, and the sermon was preached by Monsignor Isaac Whelan, rector of St. Patrick's Cathedral in Newark. This Mass was said on the porch, in order to accommodate the large crowds that had come from the surrounding neighborhood. It was estimated that about five hundred Catholics and non-Catholics witnessed this dedication.

On Easter Sunday of 1907 the first High Mass was sung in the little church by Father Francis. On May 1, 1907, the carriage shed was completed for those who knew the luxury of a horse and buggy and could drive to Mass on Sunday morning. Even in those days, there was a parking problem, for by the beginning of 1908, this shed had to be enlarged.

In the summer of 1925, Father Marcellus was succeeded by Father Kieran McGrath. During the six years that Father Kieran was in charge of the Pompton mission, it became more and more obvious that a larger church would eventually be needed. In preparation for that day, Father Kieran set aside much of the money for the building of the new church. When the changes were announced in the summer of 1931, Father Kieran was transferred to Croghan, New York. He later returned to New Jersey and took charge of the Mountain View parish, where he built the present Holy Cross Church. Father Kieran died on April 27, 1947, after spending many years at St. Anthony's Monastery in Butler as superior and teacher of the seminarians.

Father Kiernan was followed in St. Mary's by Father Philip McCool. Father Philip's priestly career was destined to be a short but very fruitful one, particularly for the people of St. Mary's Parish. After finishing his seminary studies, he was assigned to Butler, and one year later was appointed to take charge of St. Mary's. Father Philip's health was always poor, but, nevertheless, he gave himself wholeheartedly to the work of the parish, and in a very short time he endeared himself to both the parishioners and the community.

During his time, the parish grew to such an extent that the former church was no longer adequate. His one consuming desire was to build a church that would be large enough to accommodate the people. The old church had a seating capacity of only one hundred and seventy-two. In September of 1934, he petitioned the Bishop of Newark for his permission. Permission was granted and ground work was broken on April 14, 1935. Father Philip barely saw the beginning of his work. Two weeks later he entered St. Joseph's Hospital in Paterson, and on May 18, 1935, he was called to his eternal reward.

During the next two years, four different priests supervised the care of St. Mary's Parish. Father Stephen Hartdegan, while teaching the students for the priesthood at Butler, had assisted Father Philip during his illness. When Father Philip died, Father Stephen took over the care of the parish until Father Bertin O'Neill was appointed in July of 1935. The church was completed on October 1, 1935, and the first Solemn Mass was sung on October 20th in memory of Father Philip. Father Bertin was succeeded in January of 1936 by Father Roland Burke. The church was officially dedicated on December 6, 1936, by the Most Reverend Thomas H. McLoughlin, at that time Auxiliary Bishop of Newark, and soon to become the first Bishop of Paterson. The Solemn Mass on this occasion was celebrated by Father Bernard Vogt, the Superior of St. Anthony's Monastery.

On the occasion of the first funeral held in the church on August 16, 1908, the necessity of a larger staircase became apparent. Permission was obtained to correct this and to make other necessary improvements. The renovations included additions on the front and rear of the building, the erection of a steeple and the installation of a bell. The bell was donated by Mrs. Hershfield and Mrs. McDavitt in memory of their brother, Alfred Lauterbach, a young Jewish man, who was killed in an accident. The same bell is in our present church tower and still continues to ring out the call of God to the faithful. As part of the 50th Jubilee year improvements, this bell has been electrified. A stained glass window and many of the interior decorations of the old church were gifts from Henry Grah Hershfield, the prominent Jewish Mayor of the town.

Gradually the parish grew. In 1916, which was the year that Father Francis celebrated his Golden Jubilee in the priesthood. Father Marcellus Kolmar was assigned to assist him. From this time on, two Masses were said every Sunday. Father Marcellus was stationed in New York City and made the trip to Pompton each weekend to help care for the parish. Although Father Francis had spent fifty active years as a priest, he did not look upon the acquisition of an assistant as an excuse to retire. Rather it gave him greater opportunity to carry on the work closest to his heart, the work of collecting money and using that money to found new churches and help others already established. He was destined to be active to the very moment of his death four years later.

We can be especially proud of the founder of our parish and grateful that Pompton was one of the country hamlets to attract his attention.

Upon the death of Father Francis, Father Marcellus assumed the full responsibility of the parish and remained in charge of St. Mary's until 1925. In 1918, the duPont plant was enlarged and the parish grew to greater proportions. Father Marcellus envisioned the day when a new church would have to be built and more property would be needed. For a long time he asked the people on Sunday mornings to pray for a very special intention. At last he told them that their prayer has been answered, and he revealed to them that he had been able to acquire the remaining property between the old church and the library. It is the site on which the present church stands. During his time here Father Marcellus founded the Lincoln Park Parish. He died on July 24, 1955, after devoting more than fifty-three years to the priesthood.

* * * * *

In July of 1937, Father Aidan Burns was assigned to St. Mary's Church. He remained in charge until August 1, 1949. One of his first actions was to replace the foot pedaled harmonium with an electric Hammond Organ. The old organ had been acquired by Father Francis when he started the church in the old club house. Father Aidan also arranged with Father Kieran for some of the children to attend St. Anthony's School in Butler, and provided bus transportation for them. St. Mary's children attended St. Anthony's from September of 1942 until September of 1951 when our own parish school was opened.

On December 7, 1944, an agreement was entered into between Bishop McLoughlin and the Franciscan Provincial, the Very Reverend Bertrand Campbell, that St. Mary's take on the nature of a residential parish beginning January 1, 1945, with Father Aidan Burns as the first resident pastor. Up until this time the priest in charge of St. Mary's resided at St. Anthony's in Butler and administered the affairs of the parish under the supervision of the superior of that monastery. It now became necessary to procure a rectory. The house at 34 Pompton Avenue was available, and the parish acquired title to it in March of 1945. At the time the building was being used as a rooming house of war workers at the duPont plant, and it was six months before the house was vacated. Because of the

need for renovations, it was not until the summer of 1946 that the house was occupied. In July of 1946, Father Edward J. Sullivan was assigned as Assistant to Father Aidan, and Brother Pascal Edwards was appointed to do the cooking and other chores around the newly established Friary. In 1948, Brother Pascal was transferred to Croghan and was replaced by Brother Kevin O'Brien.

In the summer of 1949, Father Aidan was transferred to the pastorate of St. Anthony's in Butler, and Father Edward was appointed to the mission band. They were succeeded by Father Donatus Walsh as pastor and Father George P. Reilly as assistant. In October of the same year, Brother Benedict Brown replaced Brother Kevin in taking care of the Friary. Brother Benedict was here one year, when the provincial superiors decided to station all of the Brothers in the larger monastery houses where there was a greater need for them.

Under the pastoral guidance of Father Donatus great progress was made in St. Mary's Parish. Up to this time the idea of a parish school had only been a dream. He set out immediately to make that dream a reality. With the encouragement of the parishioners and the approval of the diocesan and provincial superiors, plans were drawn up for a school and convent. These were to be among the most practical, substantial and beautiful school structures in the diocese. The school was to contain eight classrooms, a kindergarten, gymnasium, offices and utility rooms. Because of the extent of the building, it was desirable to procure added property. Before the work got under way, Father Donatus was successful in purchasing the Ball house on Pompton Avenue. In May of 1950, the contracts were signed, the old church, which had been used for a short time as a C.Y.O. Center, was torn down and work on the new school and convent begun. During the course of the building, Father Donatus purchased two adjoining pieces of property on Lenox Avenue to insure sufficient parking space and adequate playground area. All of this property was macadamized and enclosed. A school bus was purchased to facilitate the transportation of the children and later another bus was also acquired.

During his term as pastor, Father Donatus also made many other improvements in the church. Among these were the enlargement of the sanctuary, the addition of exits at the front of the building and the refurnishing of the baptistry and sacristies. The parish had grown to such an extent that the number of Sunday Masses were doubled, from four in 1949 to eight in 1954. Six of these Masses are celebrated in church and two in the church hall. The priests who assist in taking care of these extra Masses come from St. Anthony's Monastery in Butler and St. Francis' Monastery in New York City.

In July of 1955, Father Donatus was transferred to Greenwood Lake and appointed to the pastorate of the Ringwood-Erskine Lake Parish. He was succeeded by the present pastor, Father Arnold Walters, formerly pastor of St. Bonaventure's Parish in Paterson, New Jersey. Father Arnold immediately entered into the spirit of the parish and began to make preparations for the Jubilee Year. Because of the large enrollment of the school, and the growing needs of the parish, his first concern was to enlarge the church. With the permission of the Bishop he was able to do this in a way that added to the original beauty of the building. The enlargement was accomplished by adding two wings or chapels, one on either side of the sanctuary and both facing the main altar. At the same time the sacristies were remodeled and the sanctuary entirely renovated and refurnished.

On Sunday, June 3rd of 1956, St. Mary's Parish received a very special Jubilee Blessing when Father Taddeus Searles of the Missionary Servants of the Most Holy Trinity celebrated his First Solemn Mass in our church. This was the first vocation to the priesthood from St. Mary's Parish. Father Taddeus has been assigned to the Missions in Puerto Rico. On August 16, 1955, Sister Marie George, the former Marigene Kennedy, made her religious profession in the Franciscan Sisters of Allegany, New York.

Mr. Speaker, we do indeed extend our congressional salute to the pastors, associate priests, sisters, and parishioners of St. Mary's Church in national tribute to the elegance of their faith and fellowman which has truly enriched our community, State, and Nation.

A MORE EFFICIENT 40-HOUR WORKWEEK

HON. WILLIAM L. ARMSTRONG

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1977

Mr. ARMSTRONG. Mr. Speaker, many industries in the United States have converted to a 4-day workweek.

For some firms, the advantages are numerous—especially in terms of both employee acceptance and often in energy saving.

For example, adoption of a 4-day workweek by the Norgren Co., in Littleton, Colo., resulted in reducing employee annual turnover from more than 40 percent to less than 16 percent. Absenteeism fell from 7 to 4 percent.

Prior to 1970, less than 100 firms operated on a 4-day workweek. By 1973, 3,000 firms had shifted to a 4-day week, and by the end of 1976, over 10,000 firms in the United States had shifted to a 4-day week.

Unfortunately, often the Government is the principal stumbling block to such efficiencies being realized. In one instance which has come to my attention, a food processing company with offices in both Colorado and Texas could save at least 10 percent in annual energy consumption alone. But the company cannot shift to a 10-hour, 4-day week because it supplies the U.S. Government. And the Walsh-Healey Act would require time and a half for any worker who works more than 8 hours a day. So a shift to a 4-day week—which could save 10 percent in energy—would end up costing the employer almost 15 percent more in wages.

While an administrative waiver is theoretically possible, this company has spent 17 months attempting to get an exemption, but finally abandoned the attempt because the administrative costs were threatening to outweigh the savings in energy costs.

For these reasons, today I am introducing an amendment to the Walsh-Healey Act which would permit either a 4-day, 10-hour workweek, or a 5-day, 8-hour workweek.

In some respects, I am introducing this legislation reluctantly, but after working with this company and others for well over a year in search of an administrative solution, I am forced to conclude that only remedial legislation will solve the problem.

While the legislation I am introducing will solve this specific problem, this instance of excessive and sometimes foolish regulation is part of an overall pattern of repressive regulation which is costing the Nation's consumers billions each year and unnecessarily restricting the operations of employers and employees. I am hopeful that other Members will join my efforts to alleviate these restrictions wherever they are found to be unduly burdensome.

DR. BROSNAN, MAN OF THE YEAR

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1977

Mr. RUSSO. Mr. Speaker, the Men of Tolentine, a distinguished group of some 140 men, are preparing for the annual man-of-the-year award banquet, an auspicious occasion and one that is happily anticipated by all involved.

The purposes of the Men of Tolentine are: The promotion of vocations to the Augustinian Order and the contribution of financial help in the formation of future priests and brothers for the Augustinian Order. Since 1958, the Men of Tolentine has raised and contributed nearly $135,000 to the Augustinian major seminary system.

The annual achievement banquet this year will honor as man of the year Dr. Joseph Brosnan, a compassionate and skillful physician. Dr. Brosnan is assistant professor of surgery at the Stritch School of Medicine, a member of the senior attending staff at Little Company of Mary Hospital, a consultant for thoracic surgery at Holy Cross and South Suburban Hospital and the emeritus staff, active, at Mercy Hospital.

This dedicated man gives unselfishly of himself and brings to his work a constancy of talent that is an example to others.

Dr. Brosnan, born in Chicago, received his B.S.M., M.S., and M.D. from Loyola University. He interned at Mercy Hospital and did his residency in thoracic surgery at Municipal TB Sanitorium. He was a captain with the 27th Evacuation Hospital, University of Illinois, World War II, and served in northern Africa, Italy, southern France, and Germany.

With such a background, it is not surprising to find Dr. Brosnan such an active member of the community and in the medical field. He is a former consultant at St. Francis, Blue Island; St. George; St. Bernard; Englewood and Palos Community Hospitals. He is a past president of Little Company of Mary Hospital staff and of the South Chicago branch of the Chicago Medical Society and is a former delegate-at-large with the Chicago Medical Society.

A Diplomat of the American Board of Surgery, he holds memberships in such organizations as the American College of Surgeons, Society of Thoracic Surgeons—a founding member—the Midwest Surgical Association, and the American Thoracic Society.

I know my colleagues join with me in congratulating Dr. Brosnan on this recognition and commend him for his many accomplishments. The Men of Tolentine will have a splendid and successful evening, I know.

SUPPORT FOR HATCH ACT REFORM

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1977

Mr. CLAY. Mr. Speaker, H.R. 10, the Federal Employees' Political Activities Act of 1977, would enable Federal employees to enjoy the benefits of full participation in our political process. The bill enjoys the support of the President.

Patrick J. Nilan, national legislative director of the American Postal Workers Union, wrote the following letter to the Washington Star on April 27, 1977. Mr. Nilan is one of the more respected legislative representatives in Washington. His letter is cogent and informative. I believe that my colleagues would want to benefit by his views which follow:

DOWNSTAIRS WITH THE HATCH ACT

Nearly every fear-ridden cliche of the past 38 years distinguished your editorial of March 28 opposing revision of the Hatch Act. You remain steadfastly unwilling, however, to come to grips with the real issue, namely, the abridgement of First Amendment rights for nearly 3 million American citizens.

The fact that the Hatch Act has managed to survive three court challenges—a point you stress—certainly doesn't foreclose further argument, or mean that the misguided majorities have been correct. It was Justice Black who stressed that the purpose of government is to encourage participation in the political process, not throttle it.

Justice Douglas, in his dissent, contended that federal employes have the same rights as other citizens. When controversy develops concerning individual liberty and community protection, he said, abridgement of constitutional rights should have to be justified by a clear and present danger.

Lesser lawyers may outvote greater legal minds for awhile, but it is equally discouraging to find an important segment of the free press—the self-proclaimed guardian of our liberties—opting for expediency in an area of rights vital to freedom, and in the process, conjuring up such panicky twaddle as your argument that mailmen, through their daily contact with millions of Americans, might proselytize for partisan purposes. Really now! This is the reformed voice of *The Washington Star?*

You could have better served your readers by reminding them that the Hatch Act was less a response to WPA abuses of the 1930s than it is a monument to the vengeance of those who hated Franklin D. Roosevelt, and indeed that it was enacted without hearings and little debate.

Nearly 40 years later, *The Star* is still trying to victimize its audience by perpetuating the "Upstairs Downstairs" syndrome which holds that only our masters should have the privilege of participating in politics. What bosh!

The modifying legislation now before Congress contains more safeguards against abuse than the existing law itself—more than enough to preserve the political purity of the federal work force from the schemings of their bosses and scalawag politicians. Or vice-versa. In fact, of course, the Hatch Act for too long has been a handy bolt hole in which the fearful can take refuge while defaulting on their obligations of citizenship.

A representative poll among our own members last year—it reached 28,000 men and women in 66 cities throughout the country, no mean sample!—recorded 95 out of every 100 postal workers favoring Hatch Act repeal or revision because they believe in more, rather than less, participatory democracy. Our union's convention delegates, totaling nearly 3,000 freely chosen in democratic elections by their own local members, have now twice unanimously endorsed repeal or revision as their paramount legislative goal. Postal workers at last want their political freedom.

Take another look, Mr. *Washington Star,* and put aside your timidities. Political action should not be reserved only for the kind of elite that gave us Nixon, Agnew, Watergate and Lockheed.

PATRICK J. NILAN,
National Legislative Director, American Postal Workers Union.
WASHINGTON, D.C.

CARVED IN THE DOOR

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1977

Mr. DERWINSKI. Mr. Speaker, last week, during the consideration of the Arms Control and Disarmament Agency bill, I offered an amendment which provides for certain reports to Congress on verification of weapons.

This amendment received the editorial support of the Wall Street Journal of May 9. I insert the editorial in the RECORD for those Members who voted with me in prevailing the point, and for the special attention of those Members who opposed the provision, but now have further evidence of its wisdom:

CARVED IN THE DOOR

Any agreement which is not verifiable is worse than no agreement at all.

The House of Representatives, accepting the advice we offered when the Senate was considering the nomination of Paul Warnke as disarmament chief, voted last week to carve the above quote in Mr. Warnke's door.

Mr. Warnke uttered the immortal words during his confirmation hearings, responding to Senators' worries about the American ability to detect Soviet cheating on arms control agreements. About his first act as head of the Arms Control and Disarmament Agency, however, was to disband its verification bureau, scattering the members through other bureaus. He said this was to improve verification capability, an explanation believed by absolutely no one except Rep. Thomas J. Downey of New York.

At least, by a vote of 259–148 the House accepted amendments to the arms control act that would require Mr. Warnke to report directly to the Congress on verification matters. On each element of any arms control proposal offered by either the U.S. or the Soviet Union, he is to report his judgment "as to the degree" Soviet compliance can be verified by unilateral means such as satellite photography.

He is further required to report on any degradation of the ability to monitor compliance with existing agreement. And he is to report how many government personnel are assigned full time to verification matters, and the amount of research funds spent on them.

Finally, the House voted that in reporting on the problems of verifying elements of proposals, "it should be assumed that all measures of concealment not expressly prohibited could be employed and that "standard practices" could be altered so as to impede verification."

So the House has improved on our suggestion. It would not stop carving merely with the confirmation-hearing quote. It would continue:

P.S. And remember, the Russians may cheat.

OUR NATION SALUTES GREGORY BARON, OF GARFIELD, N.J., 1977 "BOY OF THE YEAR" OF THE BOYS' CLUB OF AMERICA

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1977

Mr. ROE. Mr. Speaker, on Saturday, May 14, the Garfield Boys Club of my congressional district will honor Gregory Baron, of Garfield, N.J., a distinguished young man who at the age of 17 years is receiving national acclaim as the "Boy of the Year" of the Boys' Club of America. I know that you and our colleagues here in the Congress will want to join with me in extending our warmest greetings and felicitations to Gregory Baron whose standards of excellence in the tradition of the American way has truly enriched our community, State, and Nation.

Mr. Speaker, Gregory Baron has been selected among 1 million members of the Boys' Club of America as the 31st annual National Boy of the Year, a highly coveted award which was presented to him by President Carter in recent ceremonies at the White House. The inscription on the plaque cited him for his "superlative service to home, church, school, community and boys club."

The people of my congressional district and State of New Jersey are proud of Gregory Baron and we seek to express our appreciation to him through the annals of Congress where his exemplary accomplishment may be forever lastingly etched in our historical journal of Congress.

Gregory, who is the son of Helen and the late Steven Baron, Sr., is a senior at the Garfield High School where he maintains a perfect 4.0 average in his academic pursuits. He is president of the student government and captain of the basketball team. During the next school year, if his plans materialize, he will attend Princeton University as a predentistry student.

Mr. Speaker, when we reflect upon the character-building and development of our young people that is achieved through the Boys' Club of America, we can indeed feel secure about the future of our Nation. By their participation, sportsmanship and fair play, the members of the Boys' Clubs throughout our Nation personify the excellence of the youth of America.

When we reflect upon the fact that Gregory Baron was chosen from 10 regional finalists who had been selected from among 250 applicants of the full

membership of this most prestigious youth organization, we can indeed appreciate the magnificence of Gregory's citation as "The Boy of the Year."

Mr. Speaker, it is a pleasure and a privilege to share the pride of his mother, Helen, his brothers and his many, many friends in the many years of preparation, training, hard work and personal commitment that Gregory has devoted to accomplish this most outstanding achievement. He is a credit to his family and our community and I am sure that in exercising the leadership qualities he has demonstrated in the tradition of the Boy Scouts of America he will help to work toward freedom and justice for all people in our Nation and throughout the world.

We do indeed salute Gregory Baron of Garfield, N.J., for his sincerity of purpose and quality of leadership that has enabled him to achieve this most esteemed honor of the Boys' Club of America, "Boy of the Year."

SPECIALTY STEEL AND IMPORTS

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1977

Mr. MURTHA. Mr. Speaker, we have heard over the last few years where inflation and prices have been chasing each other in a circle with Government activity speeding the chase. Nowhere is that truer than in the specialty steel industry.

Last week, according to the New York Times:

> The Administration, in what appeared to be a tactical ploy, let it be known that it was considering increasing or abolishing the quota that limits imports of specialty steels, such as stainless. It did that in direct response to an 8% price increase by Allegheny Ludlum Industries, Inc. The proposed quota action was disclosed as a warning against more such price increases.

The problem is that those price increases result directly from some of the worst corporate reports during the first quarter of 1977 in the history of the steel industry. Moreover, one cause of that problem in steel is the 15 percent of the market controlled by imports.

Mr. R. P. Simmons, chairman of the Specialty Steel Industry of the United States, reports production in steel companies outside the United States is low, but cautions that is not good news:

> The extremely low levels of production in all steel companies throughout the world raise a serious concern that removal or modification of quotas at this time would result in a "wave of imports" as inventories which have been accumulated by these foreign specialty steel companies are exported to the United States. In some cases, the inventories that have been built over the past two years were as a direct result of government subsidization.

Moreover, Mr. Simmons reports that during the first 2 months of 1977 imports were actually down somewhat, so based on annual quotas and "the fact that the special trade representative has allocated unused quotas to other countries, it is anticipated that imports will increase in the remaining 4 months of the first quota year."

This at the very time the steel industry is trying to rebound. Mr. Speaker, no one wants to halt international trade, but it seems clear to me an international agreement on steel import quotas is essential to protect the American steel industry. I strongly urge the administration to adopt this approach, rather than talking about abolishing or increasing present quotas.

PHILIPPINE GOVERNMENT REPORTED TO HAVE TORTURED COMMUNITY LEADERS

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1977

Mr. FRASER. Mr. Speaker, I would like to report to the House that a widely respected community leader of Manila, Mrs. Trinidad Herrera, allegedly has been tortured brutally by Philippine Government officials. Mr. Herrera and Mr. David Balondo—both of whom were recently arrested are elected leaders of a large squatter organization—ZOTO—Zone One Tondo Organization—situated in Manila's domestic port area. The organization has worked hard through peaceful means to obtain title to the land which the Philippine Congress in 1956 declared was theirs. For the past 3 years, the Marcos martial law government has been negotiating with the World Bank on a plan to develop the port area. The organization also has been negotiating with both parties to prevent mass removal and relocation of its people who number 75,000.

Mrs. Trinidad Herrera is in her late thirties. She reached the 3d year college level at Far Eastern University.

Mr. David Balondo, in his mid or late fifties, is a family man who supports his wife and three children through fishing. Information has it that as a young man Mr. Balondo studied at Silliman University.

From its beginning, both leaders have given of their time and resources in creating a mass-based people's organization, ZOTO, which works on community concerns including disaster relief, housing, an emergency food program, loans, job training and placement, and so forth. Both Mrs. Herrera and Mr. Balondo also gave leadership to the formation of Ugnayan, an urban squatters coalition in greater Manila.

Incidentally, both Mrs. Herrera and Mr. Balondo were barred by the Philippine Government from participating as World Council of Churches Representatives to the U.N. Habitat Forum held in Vancouver, British Columbia in May to June, 1976.

The Subcommittee on International Organizations of the House Committee on International Relations has held a number of hearings on the human rights situation. I have been seriously concerned about our continuing close relationship with the Government of the Philippines as long as President Marcos continues repressive measures. This latest incident raises once again the question whether our military aid program to the Philippines should continue unabated.

PERCEPTIONS OF INTERDEPENDENCE: A SOUTHERN VIEW

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 12, 1977

Mr. SIMON. Mr. Speaker, the other evening Representative MILLICENT FENWICK, Representative STEPHEN SOLARZ, and I had the privilege of joining with a group gathered at the Woodrow Wilson International Center for Scholars to hear the Honorable Shridath Ramphal, Secretary-General of the British Commonwealth, speak about the interrelationships between the United States and the developing nations.

All of us who were present were most impressed by his grasp of the issues and his frankness.

I wish all of my colleagues in the House and Senate could have heard him. Since that was not possible, I am taking the liberty of inserting his formal remarks into the RECORD at this point, and I encourage my colleagues and their staffs to read the remarks of the Secretary General:

PERCEPTIONS OF INTERDEPENDENCE: A SOUTHERN VIEW

(Address by the Commonwealth Secretary-General, Mr. Shridath S. Ramphal)

I thank you, Mr. Moderator, for your words of welcome and, through you, the Center for its invitation to take part in this evening's dialogue. I am doubly glad to be here since the Center commemorates the ideals and concerns of a great and pioneering internationalist like Woodrow Wilson and serves, I am sure, to infuse national policies with a wider vision. And secondly, because I am associated on the panel this evening with Roger Hanson. There must have been many like myself who felt grateful to him for his open letter to President Carter on "Major U.S. Options on North/South Relations"—not least for the clarity of the analysis and the frankness of the approach which distinguished that contribution. I suspect that in some respects a dialogue between us need not be an argument.

In the paper which I provided, and which I hope you may have had a chance to glance at, I have attempted to present the global economic scene through the eyes of the developing world and to point a way through it compatible with Northern interests. It is, if you like, a Southern view; and that really is my first point—that whether the North shares that view or not it is one of the important realities of the present that the world looks like this from Southern perspectives. That view needs to be understood as a reality.

I do not intend to traverse the ground covered by the paper, but I would like to try to pull together a few of its threads in explaining to you what I believe the South requires of the North in the global dialogue.

THE BASIC PROBLEM

First of all, to agree that the basic problem is the disparity in the human condition be-

tween one-third or less of the world's advantaged and two-thirds or more of the world's disadvantaged. To talk of North and South is no doubt less pejorative than to talk of rich and poor; but the neutrality of the label does not alter the nature of the contents. It is a dialogue between the rich and the poor, and it is a dialogue about poverty and inequality. The RIO Report (produced by Professor Tinbergen and a group of North/South scholars for the Club of Rome) encapsulates the problem specially well, and I adopt that description.

"The inequities in the international system are of tremendous significance. They have given rise to essentially two worlds and the disparities between them are growing. One is the world of the rich, the other the world of the poor, united by its heritage of common suffering. A poverty curtain divides the worlds materially and philosophically. One world is literate, "the other largely illiterate; one industrial and urban, the other predominantly agrarian and rural; one consumption-oriented, the other striving for survival . . .

We have maldistribution of the world's resources on a scale where the industrialized countries are consuming about twenty times more of the resources per capita than the poor countries. We have a situation where, in the Third World, millions of people toil under a broiling sun from morning till dusk for miserable rewards and premature death without ever discovering the reason why."

This is the essence of the problem. I certainly hope that there can be agreement between North and South that this is the central issue. The trouble is that the dialogue when conducted in the language of abstruse economics tends to lose contact with the problem itself. I worried more than once at UNCTAD IV in Nairobi over the remoteness of much of the discussion from the basic human condition of the cocoa farmer in Ghana or the jute worker in Bangladesh. If North and South agree that that human condition really is the problem, perhaps we can also agree on ways of keeping it always in view.

NOT A PROBLEM FOR THE POOR ALONE

The problem of poverty is, of course, a problem for the poor. The main effort of development is an effort that has to be made by each developing country, in the sense that development has to come from within. The essential character of self-reliant development to which most developing countries are committed is that it is based not on what the world can do for them but on what they can do for themselves; for example, by national effort in meeting basic human needs of food, of habitat, of health and of education; and, of course, of enlarging the possibilities of a successful effort by strengthening co-operation between themselves.

But the problem itself—and the implications of its lingering unresolved—is not one for the poor countries alone. Quite apart from the question of what rich countries might do to help resolve it, the problem of international poverty must be of direct concern to the rich. I believe there are three quite separate but inter-related factors which make the global economic disparities and disequilibrium the concern of the rich, or, if you like, of the North, and which constitute an imperative for Northern commitment to finding solutions.

THE MORAL IMPERATIVE

The first I would describe as moral imperative. If my description of the problem is right, I hope there is little need to argue the morality of change; certainly not here and now when a concern about the human condition (which is what human rights are all about) is so much a part of the prevailing political ethic. That moral compulsion is of a piece with the early resolve that this nation could not be half slave and half free; it is the international counterpart of President Kennedy's much later warning that if a free society could not save the many who were poor it could not save the few who were rich. It finds expression in the understanding (which necessity imposes on the South) that human rights have at least as much to do with economic and social rights as with civil and political rights: that freedom from starvation is as critical to the human condition as freedom from oppression; that literacy is as important as dissent; that human rights therefore have at least as much to do with the dialogue of development as with the dialogue of detente.

Southern concern with human rights begins with an appreciation of the massive violation of the human condition which the existing economic order ordains for millions in the South. They feel that Northern concern must manifest itself in priority action to help devise a new order. Poverty debases humanity and diminishes rich and poor alike. This, I submit, is the first reason why it is not a problem for the poor alone. A moral imperative commits all men to its removal.

THE SURVIVAL IMPERATIVE

The second I would describe as the imperative of survival. In some respects this is implict in the moral issue. This nation could not be half-slave and half-free not only because of the immorality of slavery but because the United States could not have survived as a nation in that way. When, a century and a half later, President Kennedy spoke of a free society being unable to save the few who are rich if it could not save the many who are poor, he was not moralising merely, he was alluding to the reality that gross disparities in the human condition put at risk the very survival of the advantaged minority. He was being mindful of the box of matches carried by every embittered member of a deprived group—the tinder that could so easily start the national conflagration. Although privilege tends to induce complacency and self-assurance, let it not be forgotten that that box of matches has its counterpart at the international level. It would be tragic self-blindness to ignore its menace for the future.

The third factor, which in part derives from the second, I would describe as the contractual imperative: the need, arising from our more enlightened perceptions of interdependence, to strike what Harlan Cleveland has called a "planetary bargain" We are developing better insights of the world as a single community; deeper understanding of the limits (if not indeed the increasing irrelevance) of the concept of sovereignty and the many dangers of the adversary system it has helped to establish as the basis of international relations. The obvious areas of interdependence—in food, in energy and mineral resources, in population, in the international commons and the environment, generally and (to be realistic) in nuclear power—have made it abundantly clear to North and South alike that a compact for survival on this planet has to be struck among all its peoples. But the rules of survival cannot be imposed by the few—they have to be agreed by the many. In that contract, the human condition in the South cannot escape negotiation. Its betterment will be a condition precedent to any planetary bargain. It was this which as great an internationalist and man of compassion as Julius Nyerere had in mind when he asked in the timely documentary "Five Minutes to Midnight"

"Why should the poor avoid catastrophe and leave the rich rich?"

Together, I suggest, these three factors make it imperative that the problem of international poverty be seen in the North as a problem for the North as well. It is an insight which the South expects of you, and which I suggest you owe to yourself.

TINKERING WILL NOT DO

The next proposition on which the South seeks Northern accord is that tinkering with prevailing economic arrangements—themselves a relic of the passing age of political dependency—will not suffice to secure the objective of a more equal world. Ever since 1945 the world has been tinkering with the old system. In the result, two Development Decades have yielded bitter disappointment: four UNCTADs have institutionalized frustration; 30 years of post-war internationalism has seen the political equality of states assured by the Charter almost entirely nullified by an entrenched economic inequality between the world's peoples. After a monumental effort by the developing countries themselves in an environment provided by nearly four decades of the working (or nonworking) of the Bretton Woods and GATT regimes, we now know what the result by 1985 is likely to be: an increase of $50 per capita in the annual incomes of the poorest group (over 1965 incomes) compared with an increase of $3,900 per capita for those of the richest—who were already in 1965 3,000 per cent better off. By 1985, the poorest would have grown still poorer—they would by then be 4,500 per cent worse off. The gap, if it could still be called a gap, would have widened and deepened for all the tinkering. The effort to close it was largely cosmetic, and mainly aid-oriented.

A brief look at aid: global projections were for an aid target of 0.7 per cent of GNP in ODA. It could still be reached by an aid commitment of no more than 2 per cent of the incremental wealth—2 per cent of growth, 2 per cent of the further enrichment of the developed world—between 1975 and 1985. But ODA relative to GNP is falling: from 0.44 per cent in 1965 to 0.36 per cent in 1975 and probably to 0.30 per cent by 1985. And the record of the richest is the least worthy. While Canada improved its aid effort from 0.28 per cent in 1965 to 0.57 per cent in 1975, the US reduced its effort from 0.40 per cent to 0.27 per cent; while Australia increased its effort from 0.56 per cent to 0.61 per cent: Japan's declined from 0.29 per cent to 0.24 per cent; while the Nertherlands and Sweden reached and passed the UN target moving from 0.23 per cent and 0.44 per cent respectively to 0.82 per cent and 0.75 per cent: Germany's performance never came higher than 0.40 per cent. And this decline in aid took place during a decade in which, as Robert McNamara points out: "the people of the developed countries have enjoyed per capita incomes in real terms that rose in absolute terms more than in any other comparable period in history." The South can hardly be anything but cynical over more of the same mixture.

In trade the record was no better—produce more, sell more, earn more: that was the simple formula. With major effort, developing countries produced and sold more: but their net earnings, their terms of trade, steadily declined. The amount of cotton, or sisal, or sugar, or bauxite they had to produce and export in order to buy, say, a tractor, or antibiotics, or an irrigation pump kept increasing. Despite all their efforts, they grew relatively poorer. They were developing on a basis of diminishing returns. And there were other problems when they tried to diversify their economic base: efforts to industrialise, to process their raw materials and produce simple manufactured goods led them to high tariff walls, differential freight rates and administrative obstructions to trade—all frustrating their entry into the markets of the rich countries.

Aid a mirage, trade a cul de sac! For all the effort at improving within the system: the poor got poorer and the rich richer.

THE SYSTEM ITSELF IS AT FAULT

The fourth proposition, therefore, for which the South seeks agreement—and it really is the central proposition—is that the international economic system itself is at fault and that it needs reshaping if it is to yield more equitable returns. The poor (who are its victims) know that the old system has not served them well. They will not easily be persuaded that minor adjustments or marginal reforms can correct those deficiencies which derive from its basic premises: premises that assigned to developing countries a supportive and peripheral role in world economic activity, which conceived the South as the suppliers of raw materials (cheap materials) for the industrial machines of the North, and which kept in Northern hands the commanding heights of the world economy. And not only its premises but its operation were hostile to the emergence of more equal opportunities. And this is not a Southern view only. The Prime Minister of the Netherlands a few years ago viewed it no differently:

"The international economic system (he said) is not as free as is often said and . . . our choice is not one between a free system based on free enterprise and a completely planned economy. Our real choice is between the present system which is largely guided and manipulated for the benefit of the rich countries and a system directed towards solving the problems of division of income and property, of scarcity, of natural resources, and of the despoiled environment."

So perhaps we need not argue about the distortions of the old order. It is concomitant to that view that the needed change must be structural. Such a conclusion is not alien to your own historical experience: 200 years ago at Philadelphia one of the great arguments was whether tinkering with the Articles of Confederation could fulfill the demands of the new nation. As Hamilton later urged in the 'Federalist' Essays:

"A full display of the principal defects of the Constitution (would show) that the evils we experience do not proceed from minute or partial imperfections, but from fundamental errors in the structure of the building, which cannot be amended otherwise than by an alteration in the first principles or main pillars of the fabric."

The case for fundamental economic restructuring at the international level proceeds on essentially similar lines. It demands a similarly bold response as that which the Founding Fathers gave at Philadelphia. I suggest to you this is not a time for "little plans."

NEW MECHANISMS TO EFFECT STRUCTURAL CHANGE

The fifth proposition is ancillary to the fourth, namely that acceptance of the need for a substantially different structure of international economic relations—for basic change in the system—should condition Northern approaches to specific measures.

Commodities, for example, must be high on the Southern agenda since as many as 73 out of the 94 developing countries who are producers of the primary commodities on the UNCTAD IPC list rely for 50 per cent or more of their export earnings on commodities.

On commodities, the South must demand an entirely new deal; they must correct the long-term secular decline in real prices which have fallen in relative terms by more than 40 per cent over the last twenty years, and replace it with a rising trend that takes account, among other things, of the ever rising cost of manufactures; they must seek to induce greater price stability avoiding the uncertainties and hardships inherent in a system of cyclical troughs and peaks; they must try to secure for commodity producers worldwide the kind of protection from outrageous economic fortune that the North has provided its own farmers through a wide range of equalizing mechanisms which do not hesitate to interfere with market forces in the interests of social and economic justice. And they must judge Northern responses by the degree to which they help to fulfill these aspirations.

It is the same thing with manufactures. The Leontief Study has confirmed what the developing countries have long known, namely that in the absence of sustained expansion in manufacturing and processing, economic development will not advance at a rate which will enable them within an acceptable period of time to satisfy the basic needs of their population and reduce the income disparities of the world. With 40 percent of their labour force unemployed—to which 1,000 million more will be added by the end of the century—a Northern commitment to support development is meaningless without tangible support for their industrialisation.

In the end, this means access to markets; moro real than the GSP and MTNs have yet produced. And it means, too, an adjustment of Northern industrial activity to accommodate a Southern manufacturing role—adjustment of the kind that has gone on continuously within the North as part of the process of technological development. And that process will itself become easier when the North stops believing, or at least asserting, that less costly manufactures from the South sustain sweated labour. If a concern for living standards in the South is the real issue (as it should be) let it be known that wages are low because incomes are low generally and that wages in the export sector throughout the developing world tend to be higher than the average for the country as a whole. Restrictions against Southern manufactures will further impoverish the poor countries. Such restrictions do not avoid exploitation; they represent one of its most pernicious forms.

WHAT'S IN IT FOR THE NORTH!

If the dialogue between the North and South is responsive to the imperatives I have identified there is no avoiding the conclusion that the North is being asked to give rather moro than it gets directly and immediately. Reciprocity cannot be a touchstone of success. Aristotle, a long time ago, taught us why, in dealings between unequals, equity demands nonreciprocity. Only by unequal inputs can we redress inequality. But this is not to say that in the overall result and, indeed, in specific reforms there is nothing in it for the North.

I have tried to explain at some length in the paper why over the long term the improvement of living standards in the developing countries is not only consistent with but necessary for high standards of living and continuing improvement in the quality of life in the developed world. Indeed, I suggest that a continuation of present policies that effectively condemn the South to persistent poverty will put at risk the very standards in the North which you seek to safeguard and improve. My proposition is that there is a quickening symbiotic relationship between development in the poor countries and continued growth in the rich. Traditional economics has tended to emphasise the one-way flow from the developed to the developing. I suggest that the reverse flow is equally important for sustaining growth and employment levels in the developed world, and that is becoming more so.

The present trends and the vast future potential of US exports to the developing countries fully bear this out. In 1975, 37 per cent of US exports went to the developing countries—more than to the EEC countries, Japan, the USSR, Eastern Europe and all other centrally planned economies combined. Even if exports to OPEC countries are discounted, the developing countries emerged as the single most important group export market for the US with 27 per cent of all US exports—and, incidentally, the single most important trading partner of the US taking both imports and exports into account. What is more these levels represent a growth trend with US exports to developing countries: expanding as exports to the developed countries declined.

The composition of this increasing share of exports going to the developing countries is even more significant for job creation in the United States. Out of every dollar increase of exports of manufactured goods between 1972 and 1975, more than 45 cents came from the developing countries. Out of every dollar increase of exports of motor vehicles, 38 cents came from the developing countries. Out of every dollar increase of export earnings from engineering products, almost 49 cents came from the developing countries.

All this on the basis of the developing countries earning less than 20 per cent of the world's income. In a real sense future growth, future jobs in the US, can depend on enlarging the purchasing power of this market—now representing 75 per cent of the world's population, excluding the Socialist States. If its members can be persuaded to take a broader and longer view, American labour would see a major stake for itself in a new economic order: and it would then be easier to achieve.

THE NEW CONTRACT: NO LOSERS

The new contract which the South seeks with the North—the poor with the rich—is not aid-oriented, it does not rest on the concept of charity or even the valid one of humanitarianism. It rests firmly and securely on the premise that the dependent relationships of the past have served the world badly; that isolationism is not an option open to even the most powerful of countries; that a world order dominated by concepts of sovereignty and founded on an adversary system is irrelevant and inimical to contemporary human needs and must be dismantled; that interdependence is the only valid basis for a human strategy of survival; and that in this 'planetary bargain', its short term problems notwithstanding, there are no losers.
